Grand total.....1,266,710,000,000

## THE STATE BANK.

The State Bank of Soviet Russia reported accounts from Jan. 1 to May 1, in "money of the 1922 model," which drops four ciphers in computation, both sides of the ledger showing totals for these months:

|            | Rubles,<br>1922 Model. | Rubles,<br>1922 Model.   |
|------------|------------------------|--------------------------|
| Jan. 1.... | 385,227,700            | Apr. 1.... 1,409,261,900 |
| Feb. 1.... | 345,883,700            | May 1.... 1,910,337,950  |
| Mar. 1.... | 762,915,300            |                          |

The bank's accounts contained interest-bearing accounts, non-interest-bearing accounts and accounts discountable as follows:

| IN CASH.       | IN RUBLES, 1922 MODEL. |                       | Discountable. |
|----------------|------------------------|-----------------------|---------------|
|                | Interest-Bearing.      | Non-Interest-Bearing. |               |
| Jan.....       | 134,894,800            | 74,807,700            | 321,800       |
| Feb.....       | 261,550,100            | 40,294,700            | 504,800       |
| Mar.....       | 360,699,300            | 22,114,200            | 775,000       |
| Apr.....       | 542,644,800            | 16,146,600            | 159,000       |
| IN FIXED FORM. |                        |                       |               |
| Jan.....       | 220,325,100            | 4,277,600             | 402,300       |
| Feb.....       | 295,300,200            | 25,122,400            | 833,800       |
| Mar.....       | 360,512,000            | 20,298,300            | 167,400       |
| Apr.....       | 565,341,100            | 12,234,300            | 152,400       |

The working credits of the State Bank as of May 1, 1922, in millions of rubles, model of 1922 were:

|                               | De-mand.      | Time.        | Industrial.  | Dis-count.   | Mer-chandise. |
|-------------------------------|---------------|--------------|--------------|--------------|---------------|
| Enterprises of the State..... | 837.6         | 603.9        | 266.2        | 35.2         | 802.4         |
| Co-operative enterprises..... | 440.2         | 188.4        | 54.4         | 93.5         | 50.9          |
| Private enterprises.....      | 27.9          | 21.0         | .10          | 4.4          | 16.1          |
| <b>Totals.....</b>            | <b>1305.7</b> | <b>813.3</b> | <b>310.7</b> | <b>133.1</b> | <b>869.4</b>  |

## CURRENT COSTS OF LIVING.

The Soviet report to The Hague showing the rise of the cost of living in Russia is here reproduced. It was based on 100 as the 1913 value standard, as set forth in the report:

| DATE.     | Average for the Principal Places. | Ave. Russia, Except Moscow and Petrograd. | Average for All Russia. |
|-----------|-----------------------------------|-------------------------------------------|-------------------------|
| 1921.     |                                   |                                           |                         |
| Sept..... | 6,308,426                         | 6,051,780                                 | 6,285,305               |
| Oct.....  | 6,668,948                         | 6,310,099                                 | 5,412,091               |

| Dec.....  | 9,771,205                         | 9,998,023                                 | 10,277,122              |
| 1922.     |                                   |                                           |                         |
| Jan.....  | 18,275,835                        | 18,275,340                                | 14,804,306              |
| Feb.....  | 46,698,217                        | 44,770,192                                | 49,414,312              |
| Mar.....  | 87,783,002                        | 83,473,948                                | 89,451,133              |
| Apr.....  | 119,377,387                       | 185,253,297                               | 194,651,133             |
| May.....  | 10,263,714,167                    | 267,319,959                               | 267,394,138             |

## THE ECONOMIC STATUS QUO.

Apart from the foregoing official statement by the representatives of the Russian Socialist Federal Soviet Republic at The Hague Conference in July, 1922, not much information may be obtained as to economic conditions at the present, other than unofficial figures and estimates by authorities outside of Russia. One comparison of products was made in thousands of poods weight—a thousand poods being equal to about 16 short tons.

Coal fell from 1,728,000 poods in 1913 to 466,499 in 1920; oil from 564,300 to 233,900; ores from 638,000 to 10,400; cast iron from 257,400 to 6,330; electrical machines from 678,000 to 36,700; brick from 2,000,000 to 43,000; sulphuric acid from 7,688,128 to 691,387; cotton yarn from 16,000 to 825; hides from 16,000 to 825; sugar from 82,806 to 5,542; and so on through a long list.

Other unofficial estimates were that the number of livestock had decreased approximately 35 to 40 per cent. up to 1921 from 1913 figures, and tilled acreage about 40 to 50 per cent.

The United States Department of Commerce, late in 1922, issued a review of Russian economic activities for 1921, on the basis of comparison between 1913 and 1921, and, while noting gradual increase of industrial and commercial movement during the year, estimated that "at pre-war prices the foreign trade for 1921 amounted to 288,700,000 gold rubles (51.46 American cents), of which 248,500,000 represented imports, and 20,200,000 exports. The combined exports and imports were 9.6 per cent. of the former normal trade. By weight, the total trade amounted to 68,200,000 poods (1,000 poods equal to about 16 short tons), of which 55,300,000 poods (892,000 long tons), represented imports, and 12,900,000 (208,000 long tons) exports, being only 2.8 per cent. of the trade for 1913, reckoned by weight. Imports from the United States increased somewhat during the last quarter of the year. In December, they amounted to 610,000 poods (9,839 long tons), of which 300,000 poods (4,839 long tons), consisted of goods for famine relief. From the United States, Russia obtained coal, foodstuffs, shoes and drugs."

The department also stated that exports of manufactures were only three-tenths of 1 per cent. of the total, or 2.5 per cent. of the total value in rubles; and that the chief export markets for Russia were Great Britain, Latvia and Germany.

It was accepted generally throughout the economic world that the industrial life in Russia was disorganized more seriously than in most countries.

In 1913 exports totalled \$782,243,460, and imports \$707,060,400. Later events completely overturned that healthy balance between income and outgo. This disparity is seen in the figures of United States exports to Russia of \$26,000,000 in 1913, and of more than \$315,000,000 in 1917.

Present imports and exports into and from the United States are negligible. Trade with the United States as reported by the Department of Commerce was:

## Russia in Europe.

|                 |              |
|-----------------|--------------|
| Imports 1920-21 | \$17,111,758 |
| Imports 1921-22 | 13,830,070   |
| Exports 1920-21 | 1,055,146    |
| Exports 1921-22 | 22,153       |

## The Ukraine.

|                 |             |
|-----------------|-------------|
| Imports 1921-22 | \$5,915,811 |
| Exports 1921-22 | 47,000      |

## Armenia and Kurdistan.

|                 |           |
|-----------------|-----------|
| Imports 1921-22 | \$526,081 |
| Exports 1921-22 | 3,163     |

## Russia in Asia.

|                 |           |
|-----------------|-----------|
| Imports 1920-21 | \$979,245 |
| Imports 1921-22 | 863,622   |
| Exports 1920-21 | 3,564,438 |
| Exports 1921-22 | 327,019   |

## THE UKRAINE.

(Ukrainian Socialist Soviet Republic.)

AREA, 174,510 square miles.  
POPULATION, 1922, estimated, 26,001,802.  
CAPITAL, Kharkov, population, 1913, 258,360; chief cities, Odessa, population, 1912, 631,040; Kiev, population, 1913, 610,190; Ekaterinoslav, population, 1914, 180,000; Zhitomir, population, 1914, 80,000.

The Ukraine, the richest and most densely populated part of Russia, consists of the nine provinces in the southwestern part of European Russia bordering on the Black Sea. It formerly included Bessarabia, a strip taken from Roumania by Russia after its victory over Turkey in 1878, but restored to that country by the Allies in the Treaty of Peace. The Dniester River forms its boundary with Roumania on the southwest, and on the west it is bounded by Poland. The black soil is the richest in Russia; it is the great wheat growing district and Odessa, its great port on the Black Sea, has large elevators

and in pre-war days was a most important grain shipping port.

There are large deposits of coal and iron ore.

The people belong to the Little Russian branch of the Slavs. Their independence, encouraged by Germany, was declared Nov. 21, 1917, but it was despoiled by Germany and later overrun by the Bolsheviks. Soviet Russia admitted its independence even so late as March 19, 1921, in the Treaty of Riga with Poland, but the Ukraine's efforts at complete independence have been frustrated by the R. S. F. S. R., to which its economic adherence is vital. The two Soviet Governments of Russia and the Ukraine on Dec. 28, 1920, signed a military and economic alliance which established joint People's Commissariats for Industry, Foreign Trade, Transport, Finance, Labor, War, and Posts and Telegraphs.

## ARMENIA.

(Socialistic Soviet Republic of Armenia.)

AREA, 15,240 square miles.

POPULATION, 1922, estimated, 1,214,391.

CAPITAL, Erivan, population, 90,000.

Armenia, first winning recognition of independence from Turkey and Germany, joined with the Georgians and the Tartars, to form a federal republic in 1918. It was overthrown in five weeks, Georgia and Armenia declaring their independence and Armenian independence was recognized by the Allies in 1920. On April 2, 1921, Armenia became a Soviet republic, and has therefore such relations with the R. S. F. S. R. as classes it in a measure as Russian territory.

It lies at the southeastern frontier of Trans-Caucasia, and was a part of Imperial Russia, being now classed as one of the several autonomous republics which have sprung up in that region.

## GEORGIA.

(The Fraternal Soviet Republic of Georgia.)

AREA, 25,760 square miles.

POPULATION, 1922, estimated, 2,372,403.

CAPITAL, Tiflis, population, 1915, 446,766.

Georgia, situate in Trans-Caucasia, between the Black and Caspian Seas, is bounded on the north by the Caucasus, on the east by Azerbaijan, and on the south by Armenia.

Georgia joined the federal republic which was set up by Georgia, Armenia and Tartary in 1918, in March of the following year, Georgia becoming independent. Tumult followed, until in 1921, Russian Soviet armies occupied the land. The country is now governed by a revolutionary committee fashioned after Soviet Russia, which claims the dominant power in that area.

The people are Christians. Ninety per cent. of the population engage in agriculture, with tillage most crude. Corn, wine, fruits, silk, honey, cattle and minerals are the chief interests. The production of manganese ore around Tbilisi is important.

There are railways, and 1919 exports were 257,550,000 rubles, and imports, 866,897,167 rubles. Batum, population, 1915, 25,020, is its important port on the Black Sea.

## AZERBAIJAN.

(Azerbaijan Socialist Soviet Republic.)

AREA, 33,970 square miles.

POPULATION, 1922, estimated, 2,096,973.

CAPITAL, Baku, population, 250,000.

Baku, the capital, is the centre of the extensive oil industry and perhaps the most important of the several autonomous states in Trans-Caucasia for that reason.

Azerbaijan joined with Georgia and Armenia in 1917 to form a federal republic, but Azerbaijan declared its complete independence on May 28, 1918, a Soviet government being formed, which was recognized by Great Britain in January, 1920. In April, the Bolsheviks overthrew that government and declared alignment with Soviet Russia. In September, 1920, a political and economic treaty was signed between Azerbaijan and the R. S. F. S. R.

The people are Mohammedans. Besides oil, other interests are cotton, fisheries, cereals and cattle.

## FAR EASTERN REPUBLIC.

(Far Eastern Democratic Republic.)

AREA, estimated, 652,740 square miles.

POPULATION, 1922, estimated, 1,811,725.

CAPITAL, Chita.

The "Far Eastern Democratic Republic," to give it its full title, is the southern part of Siberia from Lake Balkal east to the Sea of Okhotsk and the Japan Sea. It includes Transbaikalia, Amur, and the Maritime Province (capital and seaport Vladivostok). The upper half of the Island of Sakhalin, now held by the Japanese as security for claim for the Nikolaevsk affair, normally belongs with it. In the south are Mongolia and Manchuria,

That part of Siberia which lies to the north is a waste. Of its 1,800,000 inhabitants spread out over a territory as large as Texas, New Mexico, Arizona and California, 80% are peasants, 15% are in the Government service and 5% are in private industry.

The people have suffered terribly in the three years of civil war that has devastated the land and beggared the people. The forests are enormous and the country rich in gold and coal, but wholly undeveloped. The Trans-Siberian Railroad is its artery of life.

"The Government" is a commission of seven elected by the National Assembly of about 400, which itself is elected by direct vote with proportional representation on a basis of universal suffrage of all men and women above 18 years of age. Liberty of speech, the press, assembly and religion are guaranteed. Education is free and compulsory. Bodily and capital punishment are abolished. There is a system of people's commissars and a secret political police as under the Moscow government.

#### Russian Dependencies.

##### BOKHARA.

(Bokharan People's Soviet Republic.)

AREA, 83,000 square miles.

POPULATION, 1922, estimated, 1,250,000.

CAPITAL, Bokhara, population about 75,000.

Bokhara is a vassal state in Central Asia, bounded on the north by the Russian provinces of Syr-Daria and Samarkand; on the east by the province of Ferghana, on the south by Afghanistan, and on the southwest by the Russian provinces of Trans-Caspia and Khiva. A treaty, political and economic, was signed with the R. S. F. S. R., by virtue of which it remains as recognized Russian territory, one feature being that none may be admitted into Bokhara without a Russian passport. The new government is Soviet. No duty may be levied on Russian goods imported.

The religion is Mohammedan, and the products are corn, fruit, silk, tobacco, cotton, hemp, sheep, goats, horses, camels, gold, silver, alum and sulphur.

There is navigation for steamers on the Oxus River, and railway lines operate to close to the capital.

##### KHIVA.

(Khorasmanian People's Soviet Republic.)

AREA, 24,000 square miles.

POPULATION, 1922, estimated, 646,000.

CAPITAL, Khiva, population about 5,000.

Khiva is a vassal state of Russia, bounded on the north by the Aral Sea; on the east by the Oxus River; on the south and west by the Russian Trans-Caspian province.

It has a Soviet government, and has signed a treaty, political and economic, with the Russian Soviets, which lists Khiva as virtual Russian territory. The people are Mohammedans, and their products are chiefly cotton and silk.

#### SALVADOR REPUBLIC OF.

AREA, 7,226 square miles.

POPULATION, estimated, Jan. 1, 1922, 1,500,000.

CAPITAL, San Salvador, population 80,756. Other

cities: Santa Ana, 60,679; San Miguel, 30,406;

Nueva San Salvador, 23,291; San Vicente, 26,881.

President, Sr. Don Jorge Melendez, 1919-23.

Premier, Dr. Arturo Gomez Arias (Foreign, Public Instruction, Justice, and Charities).

Minister to the United States, Sr. Salvador Sol M.

Consul General, at New York, Trinidad Romero.

Consuls, at New Orleans, Leonillo Montalvo; at

St. Louis, Rafael Garcia Escobar; at San Francisco, Flo Romero Bosque, Jr.

United States Minister, Montgomery Schuyler.

United States Vice-Consul, at San Salvador, Lynn W. Franklin.

Salvador lies along the Pacific Ocean with Honduras as its northeast boundary, and Guatemala on the northwest. Its coast line is 160 miles long and its average breadth 60 miles. It is about the size of the State of New Jersey. Along the sea is a narrow low alluvial plain and the interior is a plateau about 2,000 feet above sea level, containing a number of volcanic cones. Earthquakes are frequent; that of June 8, 1917, destroyed much of the capital and three other towns; even greater damage was done the capital on April 28, 1919. It has luxuriant forests and abundant mineral deposits which are undeveloped. The leading products are coffee, of which 60,000,000 pounds was produced in 1921, and sugar, 40,000,000 pounds. Cacao, indigo,

cotton, tobacco, balsam, hemp, hides, rubber, and bananas are also exported. Mestizos and Indians form two-thirds of the population.

Under the Constitution of 1824, modified last in 1886, a president for four years and a single chamber of 70 deputies for a year are elected by universal suffrage. The President appoints a ministry of four members. The dominant religion is Roman Catholic. Education is free and compulsory. The army numbers 7,500, with reserves of 25,000. There are 213 miles of narrow gauge railroads. In 1920, 520 steamers, tonnage 657,396, entered its ports. Salvador is a member of the League of Nations.

(For part in federation of Central America see Honduras.)

#### SAN MARINO, REPUBLIC OF.

AREA, 38 square miles.

POPULATION, census of June, 1920, 12,027.

San Marino, situated in the Apennines near Rimini, in the heart of Italy, claims to be the oldest state in Europe and to have been founded in the fourth century. Its treaty of friendship with the Kingdom of Italy, concluded June 28, 1907, was revised in 1921. It has an extradition treaty with the United States and other countries. Agriculture and stock raising are practically the only industries. It is governed by a Great Council of 60 members elected by popular vote, two of whom are chosen to exercise executive power for a term of six months. It maintains a military force of 39 officers and 950 men. Revenue for 1920-21 was 2,000,000 lire and expenditures 2,150,000 lire.

#### SANTO DOMINGO.

(See Dominican Republic.)

#### SERBS, CROATS AND SLOVENES, KINGDOM OF THE.

##### JUGO-SLAVIA.

AREA, approximately 86,878 square miles.

POPULATION, 1922, estimated, 11,600,000.

CAPITAL, Belgrade, population, 1919, 120,000

King of the Serbs, Croats and Slovenes, Alexander

I., born Dec. 17, 1888, Prince Regent from June

24, 1914 to Aug. 16, 1921, when his father, King

Peter I., died; married June 8, 1922 at Belgrade,

Princess Elizabeth of Roumania.

Prime Minister, N. Pashitch (Radical).

Minister to the United States, Dr. Anton Tresic-Pavlic.

Consuls General in the United States, New York,

Pavle Karovitch; Chicago, Branko Lazarevitch;

Consul, San Francisco, Bozidar Puritch.

United States Minister at Belgrade, H. Percival

Dodge.

United States Consuls, Belgrade, Kenneth S. Patton;

at Zagreb, Joseph E. McGurk.

Recognition of the Kingdom of Montenegro is maintained in New York City by Luigi Criscuolo as

Delegate Plenipotentiary "with particular duties referring to Montenegrins in the United States who have not become, and have no desire to become, citizens of the Kingdom of the Serbs, Croats and Slovenes." The State Department at Washington has revoked the exequatur of the former Montenegrin Consul General.

Serbia, which had since the Battle of Kossovo in 1389 been a vassal principality of Turkey, was established as an independent kingdom by the treaty of Berlin, July 13, 1878. By the Balkan wars of 1913 her boundaries were enlarged by the annexation of Old Serbia. The government of Austria-Hungary laid the assassination of the Archduke Franz Ferdinand (June 28, 1914) to a Serbian plot and by invasion following her ultimatum brought on the World War of 1914-18. Serbia was overrun and suffered enormously, but in October, 1918, her army again occupied Nish and on Nov. 3, 1918 reoccupied the capital, Belgrade. At the dissolution of the Austrian-Hungarian Empire, the National Assembly of the former Hungarian provinces of Croatia and Slovenia proclaimed their independence and a National Council was established to which representatives of other Slav states of the

old empire including Bosnia and Herzegovina were admitted and union with Serbia as the Kingdom of the Serbs, Croats and Slovenes (Jugo-Slavia) became effective on Dec. 29, 1918, when a ministry was formed.

On Nov. 29, 1918, the National Parliament of Montenegro, which had been recognized as an independent state by the Treaty of Berlin in 1870, deposed King Nicholas who was born in exile and decided to unite with Serbia. This union became a fact on the death of King Nicholas, March 1, 1921, and Montenegro officially disappeared from the map of Europe on July 13, 1922, when the Council of Ambassadors sitting in Paris to ratify the boundaries of Jugo-Slavia and Albania recognized the fact that its union was an accomplished fact. The dispute over the allotment of Fiume to Jugo-Slavia under the Treaty of Versailles rendered acute by the d'Annunzio raid of September, 1919, was composed by an agreement with Italy in 1921, in the Treaty of Rapallo, when the buffer state of Fiume-Istria-Dalmatia was set up in which Fiume has a special status, being administered by a committee of five members, two Italians, two Jugo-Slavs and one citizen of Fiume.

Jugo-Slavia is bounded by this buffer state and the Adriatic Sea on the east, by Austria and Hungary on the north, by Bulgaria and Greece on the east, and by Albania and Greece on the south. Its area and population by provinces is approximately as follows:

According to nationality there are approximately 9,730,000 Slavs, 500,000 Germans, 490,000 Hungarians, 480,000 Albanians, 180,000 Rumanians, and 10,000 Italians. According to religion there are approximately 5,460,000 Greek Orthodox (the state religion), 4,475,000 Roman Catholics, 345,000 Mohammedans and 750,000 of other religions. Under a concordat with the Vatican a Roman Catholic Archbishop of Belgrade is to be established.

The Constitution, adopted June 28, 1921, provides for a single Legislative Chamber of 419 members elected for four years, one Deputy to every 40,000 inhabitants. The present Chamber was made up as follows: 96 Radicals, 49 Democrats, 54 Communists, 49 Croatian Agrarians, 30 Serb Agrarians, 27 Mohammedans, 25 Catholic People's Party, and 43 scattering.

Elementary education is nominally compulsory and is free. There are three universities, Belgrade with 7,668 students in 1921; Zagreb, 3,249; and Ljubliana, 769.

The army has been reorganized on a nominal peace strength of 150,000 but (in 1921) about 250,000 are with the colors. Compulsory service is in force.

The principal exports are grain, cattle, timber and prunes; imports, agricultural and animal products, machinery and chemicals. Serbia is an agricultural country of small peasant holdings. Over one-third of its area is covered with forests. There are valuable coal and iron mines and some lead and copper. The State owns 5,175 of the 5,684 miles of railroads. The river navigation of the Danube and the Save is important. Access to seaports, Fiume and Salonica, is guaranteed by treaty.

The unit of currency is the dinar or crown; par of exchange, 20.3 cents, exchange, Nov. 1, 1922, .42 cents.

Imports, 1920, dinars.....3,487,996,150  
Exports, 1920.....1,320,905,955  
Budget, 1922—Receipts, dinars.....6,267,577,805  
Expenditures, theoretically equal.

The total debt was 3,564,240,897 dinars.

Trade with the United States, including that of Fiume was;  
Imports, 1920-21.....31,326,528  
" 1921-22.....1,831,187  
Exports, 1920-21.....72,956  
" 1921-22.....155,920

### SIAM, KINGDOM OF.

AREA, 198,000 square miles, of which about 45,000 is in the Malay Peninsula.

POPULATION, census of 1911-12, last available, 8,266,408. Official estimate, 1920, 9,022,000.

CAPITAL, Bangkok, population, 541,000.

King, Rama VI. (Chao Fa Maha Vajiravudh); born Jan. 1, 1881; succeeded on Oct. 23, 1910, on the death of his father, King Chulalongkorn I.

Minster to the United States, Phya Prabha Karavongse.

Consuls in the United States, at New York, F. Warren Sumner; at Chicago, Milward Adams; at San Francisco, Henry C. W. Dinkenspiel.

United States Minister, William H. Roenbrock.

United States Consul, at Bangkok, Maurice P. Dunlap.

Siam is situate in Southeastern Asia, with Bur-

ma (British India) on the northwest and west and French Indo-China on the northeast and east, and the Gulf of Siam, which makes on the Pacific Ocean on the south and east. It also occupies the neck of the Malay Peninsula as far as the Federated Malay States (British). It is of rolling topography, with large areas susceptible to irrigation, of which about 300,000 acres were brought under water in 1922.

There are many large forests, teakwood being an important article of export. Labor is higher than in almost any other Oriental country. The chief product is rice, the national food, and heavily exported, with 6,150,000 acres of it under cultivation in 1920, and an average of 1,700,000 tons exported annually. There are 80 rice mills in the Bangkok district. Livestock in 1920 was 6,294 elephants, 132,675 horses and ponies, 2,620,682 bullocks, and 2,508,164 buffaloes, all of which are used as beasts of burden. Annual exports of teak average about 70,000 tons, worth about \$6,000,000.

Mineral resources are extensive and varied, including tungsten, wolfram, coal, iron, manganese, antimony, and quicksilver. Tin also is abundant, exports having been 6,183 tons in 1921, and normally in previous years up to 8,800 tons.

In 1920 there were 1,376 miles of state railways. In 1921, 571 vessels entered the port of Bangkok, of 492,812 tonnage, mostly of British registry, with some flying the flags of France, Norway, Japan and other countries.

Executive power vests in the King, who is advised by a Cabinet. Formerly there was a Council of State, which has been succeeded by the Legislative Council of Ministers and others, not less than twelve, appointed by the King. Present membership is forty. It supervises the legislation of the Kingdom, being charged with the task of perfecting the statutes. Laws must be signed by the King.

Buddhism is the prevailing religion. In 1919 there were 13,616 temples, with 87,538 priests. Schools are controlled by the Minister of Education, excepting those for military, naval and legal training, and some of which are under royal patronage. In 1919 there were 402 Government schools, with 1,026 teachers and 35,945 pupils, 2,416 non-Government primary schools with 2,819 teachers and 113,793 pupils. About 11 per cent. of the people were illiterate in the last census.

Every able-bodied man serves in the army. The navy has 5,000 active and 20,000 reserve men. In 1920 there were over 15,000 Boy Scouts. Siam is a member of the League of Nations.

The tical is the unit of the currency, its gold par being 37.69 cents. Imports in 1921 were 230,635,000 ticals; exports, 105,546,400 ticals. Principal revenues are from opium, land capitulation, excise, railways, mines, forests, and customs: total 99,311,000 ticals in 1920. The national debt was 99,509,000 ticals in 1920.

Trade with the United States was:

Imports, 1920-21.....\$2,442,756  
" 1921-22.....820,148  
Exports, 1920-21.....290,076  
" 1921-22.....138,607

### THE SOUDAN.

(Anglo-Egyptian.)

AREA, 1,014,600 square miles.

POPULATION, estimated, 1921, 4,000,000.

CAPITAL, Khartoum, including Khartoum North, on the Blue Nile, population, 1921, 39,056. Below on the White Nile, Omdurman, the old Dervish capital, population, 50,429.

Governor General of Soudan, Major Gen. Sir Lee O. E. Stack, appointed 1919.

The Soudan is bounded by Egypt on the north, the line being the 22° north latitude; the Red Sea and Eritrea (Italian) and Abyssinia on the east; Uganda (British), and the Belgian Congo on the south, and French Equatorial Africa on the west. Its greatest length north and south is 1,650 miles, and its greatest breadth east and west is about 1,200 miles. The northern zone consists of the Libyan desert, on the west, and the mountainous Arabian desert, extending to the Red Sea on the east, separated by the narrow valley of the Nile; the central zone has large areas of fertility, including the rainlands of Kassala and Tokar, the Gerira plain and the pastures and gum forests of Kordofan; and the southern equatorial belt where the soil is richest and watered by tropical rains.

The White Nile flows north through the middle of the country, the Blue Nile rising in the mountains of Abyssinia, flows northwest to its junction at Khartoum with the White Nile to make the Nile that flows on in a huge S curve to enter Egypt at Halls.

Two large dams for impounding the waters, one the Makwar dam in the Blue Nile, for irrigation

of the Gerira country between the rivers, and the other at Gebel Aulla in the White Nile, 24 miles south of Khartoum, to hold up double the quantity of water stored by the Aswan dam for the benefit of Egypt, are under way after being suspended by the war. The Governor-General has authorized (1922) a loan of £7,000,000 to facilitate the completion of these works; it must be approved by the British Government.

The population, which was estimated at 9,000,000 in 1884, decreased to 2,000,000 under Dervish misrule through war, famine and disease. The inhabitants are partly Arabs, partly Negroes and partly Nubians of mixed Arab and Negro blood; the Arabs and Nubians are all Mohammedans. The Mahdist rebellion in 1884, culminating in the fall of Khartoum and the death of Gen. Gordon Jan. 26, 1885, forced the Egyptian Government to withdraw from the Soudan, retaining only Wadi Halfa on the Nile and Suakin on the Red Sea as frontier ports. The Dervishes were overthrown by Lord Kitchener with the Anglo-Egyptian army at Omdurman, Sept. 2, 1898. On the reconquest of the Soudan an agreement was signed Jan. 19, 1899, between Egypt and Great Britain which fixed the boundary, provided for the administration of the territory by a Governor-General appointed by Egypt with the consent of Great Britain (aided since 1910 by a council) who should make laws by proclamation, and providing that the British and Egyptian flags should fly together. Free trade with Egypt was provided for also and the import and export of slaves was forbidden together with the import of arms, ammunition and spirits. The civil and criminal codes are based on those of Egypt and India.

The country has prospered under the Anglo-Egyptian rule though suffering agriculturally during seasons of low water in the Nile, and by depression consequent on the past years of the war when the exports of grain and cattle almost entirely ceased. Cotton can be grown successfully with increased irrigation and transportation facilities. Rich forests are of great extent and the Soudan is the chief source of the world's supply of gum arabic, the exports being 12,109 tons valued at £556,925, in 1920. Of ivory, 45 tons, valued at £E78,819 were exported in 1920.

The Soudan railroad reached Khartoum in 1899. A line from Atbara across the Arabian desert to Port Soudan and Suakin on the Red Sea was opened in 1906. A bridge has been built over the Blue Nile at Khartoum and another over the White Nile near Hillet Abbas. The total length of railroads is about 1500 miles.

A fleet of Government passenger and freight steamers is maintained on the Nile and its tributaries with a scheduled service covering over 2,500 miles.

The future control of the Soudan has not been settled. Egypt claims it as an integral part and is making possession of it a basic part of its projected new Constitution. However, Lord Allenby, when in the Soudan (1922), informed the native leaders that Great Britain does not intend to abandon the Soudan.

The revenue of the Soudan for 1920 was £E4,425,340 and the expenditures £E3,564,843. The budget estimate for 1921 balanced at £E4,026,000.

### SPAIN, KINGDOM OF.

AREA, including the Balearic and the Canary Islands, 194,783 square miles; Spanish Colonies in Africa, including Spanish Morocco, 128,149: total 320,932.

POPULATION, estimated, in 1920, 20,783,844 in Spain proper; Canary Islands, 506,414; Colonies, estimated, 844,339; total, 21,134,597.

CAPITAL, Madrid; population, 1918, estimated, 608,793; other cities, Barcelona, 582,240; Valencia, 236,477; Seville, 150,631; Malaga, 136,364; Murcia, 123,936; Zaragoza, 117,742; Cartagena, 102,542; and 28 of more than 30,000.

King, Alfonso XIII.; born May 17, 1886, after the death of his father, King Alfonso XII.; succeeding on birth; married, May 31, 1906, Princess Victoria Eugenie, daughter of Prince Henry of Battenberg and Princess Beatrice, youngest daughter of Queen Victoria of Great Britain; *Heir*, his eldest son, Prince Alfonso, born May 10, 1907. There are three other sons and two daughters.

President of the Council, Sanchez Guerra.

Minister of Foreign Affairs, Fernandez Fria.

Ambassador to the United States, Senor Don Juan Riano y Gayongos.

Consul General in the United States, at New York, Alexandro Barea y Rodrigo; Consuls, at Philadelphia, Emilio de Motta y Ortiz; at New Orleans, Jose Maria Sempere y Olivares; at Galveston, Andreas Iglesias y Velayos; at San Francisco, Jose Jimeno Aznar; at St. Louis, vacant.

United States Ambassador to Spain, Cyrus E. Woods.

United States Consuls, at Barcelona, Ralph J. Totten; at Madrid, Keith Merrill; at Bilbao, Henry M. Wolcott; at Cadiz, Lucien N. Sullivan; at Seville, Robert Harnden; at Malaga, Gaston Smith; at Valencia, Henry C. A. Damm; at Tenerife, Canary Islands, Frank Anderson Henry; at Corunna, Fred C. Slater; at Huelva, Horace Remillard; at Santander, Leonard G. Dawson; at Vigo, Henry T. Wilcox.

Spain is bounded on the west by Portugal and the Atlantic Ocean, on the north by the Atlantic and by France, on the east and south by the Mediterranean Sea, the British fortified station Gibraltar being at the southernmost tip, guarding the entrance to the Mediterranean from the Atlantic.

The Balearic Islands in the Mediterranean (capital Palma, area 1,935 square miles, population, 331,195) and the Canary Islands (area 3,342 square miles, population 506,414) in the Atlantic (capital Santa Cruz, area 2,807 square miles, population 520,516) are provinces of Spain; Ceuta, a fortified post in Africa, opposite Gibraltar, (area 5 square miles, population 23,907) is part of the Province of Cadiz.

Spain occupies the entire Iberian peninsula with the exception of Portugal. The lofty Pyrenees separate it from France. The interior is a high inclosed plateau traversed east and west by mountain ranges and deficient in rainfall. However, 83.45 per cent. of the soil is regarded as productive or potentially so, crops and fruit being gathered from more than one-third of the productive area, and a quarter of it is given over to grazing. Crops in 1921 from about 20,000,000 acres were 8,600,000 tons, including practically all of the farm products of the temperate and south temperate zones. Grapes in 1920 amounted to 9,576,528,864 pounds, yielding 706,756,116 gallons of wines, much of which was exported. Other products are olives, which yielded 1,662,384 tons, from which 316,963 tons of oil were made, flax, hemp, oranges and nuts. Silk culture is carried on in Valencia, Murcia and other localities. There are 73 sugar factories, 1920 production being about 237,000 short tons.

Domestic animals in 1921, estimated, were 722,183 horses, 1,294,912 mules, 1,137,980 asses, 3,718,189 cows, 20,521,677 sheep, 4,298,056 goats, 5,151,988 swine, 4,268 camels (in the Canary Islands), and 25,102,973 poultry.

Spain has large mineral wealth. Iron abounds, with coal, lead, copper, asphalt, tin, wolfram, manganese, quicksilver, silver, sulphate of soda, salt, sulphur, and phosphorus. Platinum has lately been discovered. Mining industries employed in 1920 104,918 men, 2,152 women, and 17,970 boys and girls under 18 years of age. The 1920 mineral output was valued at 500,984,695 pesetas. Coal represented 328,000,000 pesetas, copper, 14,000,000, and lead, 59,808,000.

Cotton and woolen goods for domestic use are manufactured to a considerable amount, the normal employment of cotton spindles being 2,614,000, and woolen spindles 662,000.

Paper making and glass works are important.

Fisheries in 1918 employed 24,907 boats and 104,999 men, the catch being valued at 228,332,342 pesetas, the most important products being sardines, tuna fish and cod.

Railway mileage in 1919 was 9,436, privately owned, but subsidized by the Government, Highway mileage in 1917 was 45,972.

The merchant marine in 1922 was composed of 621 steamships of 912,817 net tons, and 581 sailing vessels of 101,285 net tons. Bilbao and Barcelona are the principal ports. In 1922 vessels entering numbered 14,609 of 12,395,628 tons, of which 9,619 of 5,426,611 were of Spanish registry.

Spain was once overrun by the Moors, who swept across the Mediterranean and went even into France. They were expelled from Europe in 1609, having entered Europe in 711, and for those centuries dominated that part of the European Continent, leaving many marks in customs and habits impressed to this day on the Spanish people. However, the language remains in general Castilian, with variations in each separate region. Spain's colonial period was brilliant and extended to the Americas and the Philippines. She lost Mexico and her Central and South American colonies by revolution a hundred years ago, and in 1898 Cuba secured her independence, and she lost the Philippines, Guam and Porto Rico to the United States as a result of the Spanish-American War. Now her colonial possessions are confined to Morocco in North Africa, Spanish Guinea and a few islands along the Guinean coast. In the north there are 400,000 Basques, of a distinctly different race and language; and there are 50,000 gypsies.

The Government is that of a constitutional mon-

archy, the Constitution dating from 1876. It provides for a sovereign and the Cortes composed of two Houses, the Senate and the Congress, equal in authority, 360 Senators and 417 Deputies in the Congress. Election requirements are complicated. The last twenty years has seen a very marked tendency toward democracy, numerous disturbances having occurred, with Socialists as the moving force. Spain has moved towards modernization and has made good economic progress.

The Roman Catholic is the national religion, all the people adhering excepting about 30,000 Protestants, Jews and others. The Constitution requires state support of the church.

There is a heavy percentage of illiteracy, the 1910 census showing that only 38.59 per cent. could read and write. Although there has been a compulsory education law since 1857, it has not been rigidly enforced. There are 2,604,000 pupils in the public schools, with about 50,000 in secondary institutions. Spain has 11 universities, which attain high culture.

Military service is compulsory, the peace establishment being set at about 300,000, with reserves in addition.

The navy has nine vessels of from 2,134 to 15,700 tons, and 61 auxiliaries. A building programme for six years from 1915 called for 59 additional vessels, but the work was delayed.

Spain was neutral in the Great War, and is a member of the League of Nations.

The unit of the currency is the peseta, its gold par being 19.3 cents; rate of exchange on Nov. 1, 1922, was 15.27.

Imports in 1921 were 1,261,390,000 pesetas; exports, 812,440,000.

Budget, 1921-22, receipts, pesetas, 1,976,663,000; expenditures, pesetas, 2,550,794,000. The public debt on Jan. 1, 1920, was 11,962,084,525 pesetas, of which 910,761,400 was external.

#### SPANISH COLONIES IN AFRICA.

AREA, 128,149 square miles; divided, Río de Oro and Adrar, 109,200; Int. 965; Spanish Guinea, 9,470; Fernando Po and others near Guinea, 814; and Spanish Morocco, 7,700.

POPULATION, 844,339; Morocco, 600,000; others near Guinea, 244,339.

The colonies of Spain are now relatively unimportant, in sharp contrast with those which she held in the sixteenth, seventeenth and eighteenth centuries. The Guinean lands are undeveloped, and small values are taken therefrom. All figures are mere estimates.

Morocco, over a part of which Spain exercises a protectorate and where she has lately had military operations, is less developed than the French Algerian and other African possessions.

Exports to Spain from Fernando Po, in 1917, were 6,261,379 pesetas; imports from Spain, 3,137,750.

#### SWEDEN, KINGDOM OF.

AREA, 173,036 square miles.

POPULATION, census of 1920, 5,903,752.

CAPITAL, Stockholm, population, 1921, 419,429; other cities, Göteborg, 202,366; Malmö, 113,558; Norrköping, 58,101; and 29 with more than 10,000 population.

King, Gustaf V.; born June 16, 1858; succeeded on the death of his father, Oscar II., on Dec. 8, 1907; married, Sept. 20, 1881, Princess Victoria, daughter of Friedrich, Grand Duke of Baden. Heir, Crown Prince Gustaf Adolf, born Nov. 11, 1882, married, June 15, 1905, Princess Margaret (died May 1, 1920), daughter of the Duke of Connaught and grand-daughter of Queen Victoria; has five sons and one daughter.

Premier, Hjalmar Branting (Foreign).

Minister to the United States, Capt. Axel Wallenberg. Consul General in the United States, at New York, Olaf Herman Lamm; Consuls, at Boston, Carl Wilhelm Emanuel Andre Johanson; at Chicago, Carl Otto David von Dardel; at San Francisco, Carl Edward Wallerstedt.

United States Minister to Sweden, Ira Nelson Morris. United States Consul General, at Stockholm, Dominic I. Murphy; Consul, at Malmö, Gerhard H. Krogh; at Göteborg, Walter H. Shoies.

Sweden occupies the eastern and largest part of the Scandinavian peninsula in northwest Europe. The Kjölen mountain range separates it from Norway in the west, and the Gulf of Bothnia and the Tornea River from Finland on the east. The Baltic Sea separates it from the Baltic States and Germany on the southeast and south and the Cattegat from Denmark on the southwest.

Although of broken, mountainous topography, it contains much productive land, well watered, on which the Swedes have attained high efficiency in agriculture. In 1910, 45.8 per cent. of the people were engaged in agriculture, the remainder being industrial and commercial. Sweden's total area divides 9.4 per cent. arable, 2.3 per cent. meadows, 59.4 per cent. forests which are largely susceptible of cultivation after removal of the trees and which yield large annual timber cuts.

The crops in 1921 were valued at 1,384,000,000 kroner, and live-stock in 1919 was horses, 715,681; cattle, 2,550,828; sheep, 1,563,654; swine, 716,783. In 1921, cereal crops of 2,700,000 tons were taken from about 3,000,000 acres, and 1,804,974 tons of potatoes from 350,000 acres.

In 1920 were produced 4,519,112 tons of iron ore, of which 3,736,329 were exported, and 2,901 tons of silver and lead ore, 1,136 of copper ore, 47,674 of zinc ore, 14,926 of manganese ore, and 107,326 of sulphur pyrites, and 439,584 of coal. Iron ore mining is most extensive north from the Arctic Circle. The iron and steel industries—Swedish steel being of especial value for tool making—is mostly in the central part. Much machinery is manufactured, with considerable porcelain production. In 1919, the value of the industrial output was about 2,900,000,000 kroner, with 291,777 men, 54,744 women, 34,611 boys and 11,779 girls under 18 years of age employed in factories.

On Jan. 1, 1922, Sweden's merchant marine—ships over 100 tons—was 1,310 vessels of 1,090,000 tonnage. Göteborg was the most important port in 1920, with 394,771 of ship tonnage; Stockholm next with 278,216. In 1919 there entered Swedish ports 23,300 vessels of 8,521,385 tonnage. In 1919 149,657 ships and boats passed through the canals of Sweden.

In 1920 Swedish railways were of 9,420 miles, of which 3,459 were state-owned.

The Government is a constitutional monarchy, executive power being vested in the King, advised by a Council of State, headed by the Minister of State or Premier. The Legislature has two Chambers, the first of 156 members and the second of 23 members. Suffrage is universal for all over 25 years of age of both sexes.

A plebiscite was taken in Sweden, Sunday, Aug. 27, 1922, on a consultative referendum on prohibition. The official result of the vote was 930,655 against prohibition, 901,053 for, a majority of 29,602 out of 1,831,708 votes cast. Fifty-three per cent. of the Stockholm vote was cast by women. Of this 53 per cent. 44 was against and 9 in favor of prohibition. At Gothenburg, the second city in Sweden, 23,355 women voted against prohibition and 11,904 in favor. In Malmö, the third city, 15,141 women voted against and 4,511 for.

The present system of restricted liquor traffic, devised by Dr. Ivan Bratt, was put into effect in 1914, replacing the Gothenburg system, which abolished the saloon and established certain hours when liquor could be sold.

Briefly, the Bratt system is this: All wine and spirits in Sweden containing over 3.6 per cent. alcohol are sold through the Wine and Spirits Central, the only organization in Sweden having the right to manufacture and to sell liquor wholesale. This organization sells to 120 local companies in as many local districts throughout Sweden, and these in turn supply individuals as well as hotels and restaurants. Individual buying is controlled by the "motbok," a booklet with detachable slips on which its owner must sign his name every time he buys strong liquor. The "motbok" entitles its owner to four litres of spirits a month, although in some parts of Sweden, such as the northern provinces, where the prohibition forces are strong, the quantity is two litres. Applying for a "motbok" is like applying for a passport. Usually only one member of a family may have one of these books, exception being made in the case of sons who have reached the age of 25.

In public places, such as hotels and cafes, the amount of spirits to be sold is based on the amount of food consumed, with a certain maximum quantity permitted.

The Wine and Spirits Central has bought out all the private wine merchants in Sweden, and the

shareholders of it and of the local companies which it serves are entitled to only 5 per cent. on their money. The balance of the profits go to the Government. Three main ideas run through the Bratt system: Reduction of the general ration of distilled and spirituous liquors through a central control; denial of liquor to alcoholics and persons who are known to abuse drink, and elimination of all private interest in the liquor traffic. Under this law Sweden now derives a revenue of 110,000,000 crowns from the liquor traffic.

In 1913, before the present restrictive measures went into effect, the total Swedish consumption of distilled and spirituous liquors was 38.7 millions of litres. In 1921 the total consumption was 28.4 millions of litres, a reduction of 27 per cent. But even these figures are far too modest, for in 1913 distilled liquors were sold by scores of private dealers, the figures for which are lacking. Arrests for drunkenness in Sweden have gone down 46 per cent. In 1913 there were 58,909 arrests for drunkenness in the kingdom. In 1921 there were 30,081. The Katarina Hospital in Stockholm, which is the central receiving hospital for cases of the kind, reports a reduction of 61 per cent. in chronic alcoholism. In 1913 it had 584 cases; in 1921, 228.

The population is very homogeneous, being entirely of the Scandinavian branch of the Aryan family, except about 30,000 Finns and 10,000 Lapps. Emigration has sent about 2,200,000 Swedes abroad, of whom 1,500,000 are in America and 370,000 in Finland. Most of the people are Lutheran Protestant, which is the state religion, but complete freedom of worship exists. Education is compulsory from 7 to 14 years of age, and besides the many higher institutions of learning (including two universities) which attain great culture, schooling is so general that army recruits in 1910 were only 0.16 per cent. illiterate.

Compulsory military service is required, with volunteering permitted, 655,000 men being on the army rolls, with 400,000 reserves. The navy has 13 vessels of from 3,600 to 7,180 tons, with 10 destroyers, 4 torpedo gunboats, 7 torpedo boats and 14 submarines. For the 1922-24 programme Sweden is to expend 15,000,000 kroner on submarines.

The unit of the currency is the krona, its gold par being 26.3 cents. Rate of exchange, Nov. 1, 1922, was 26.75.

Imports in 1921 were 1,266,237,485 kroner; exports, 1,097,273,992.

Budget, 1922—Receipts, kroner.....795,990,900

Expenditures, kroner.....795,990,900

Extraordinary expenditures, kroner...143,933,887

The public debt on Jan. 1, 1922, was 1,423,464,853

kroner, contracted mostly for productive purposes,

therefore representing, not net liability but invest-

ment, the interest on state investments covered by

this debt being more than the interest thereon.

Trade with the United States was:

Imports, 1920-21.....\$76,615,673

1921-22.....30,082,053

Exports, 1920-21.....27,905,342

1921-22.....23,203,575

**SWITZERLAND, CONFEDERATION OF.**

AREA, 15,976 square miles.

POPULATION, census of 1920, 3,880,320.

CAPITAL, Berne, population, 104,626; other cities,

Zurich, population, 207,161; Basel, 135,976;

Geneva, 135,059; St. Gall, 70,437; Lausanne, 68,-

583 and 19 above 10,000 population.

President, for 1922, Dr. Robert Haab, born 1865;

Vice-President, Charles Scheurer.

Minister to the United States, Marc Peter.

Consuls in the United States, at New York, Louis

H. Junod; at Philadelphia, Charles Vulleumier;

at New Orleans, Paul U. Thalman; at Chicago,

Ernest Buhler; at San Francisco, John Freuler;

at Denver, Paul Weiss; at St. Paul, Alfred Karlan;

at Galveston, Rene J. Mueller.

United States Minister to Switzerland, Joseph C.

Grew.

United States Consul General, at Zurich, George H.

Murphy; Consuls, at Berne, Thornwell Haynes;

at Geneva, Lewis W. Haskell; at Basle, Phillip

Holland; at St. Gall, Gebhard Willrich.

Switzerland is bounded on the west by France, the north by Germany, the east by Austria and Italy and the south by Italy. It is mostly mountainous, having many high peaks of the Swiss Alps, with many fertile and productive valleys between, in which dairying flourishes, and much foodstuff is procured. The German language is spoken by a majority of the people in 19 of the 25 cantons, French in five, and Italian in one. In 1920, there were 412,306 foreigners in the country, and in 1910

German was spoken by 2,594,298 persons, French by 793,264, Italian by 302,578; Romansch by 40,122; and 23,031 other languages. There are estimated to be about 300,000 peasant proprietors.

Of the total area, 28.4 per cent. is unproductive. Of the productive area, 35.3 per cent. is devoted to meadows, 29 per cent. to forests; 18.7 per cent. to fruits, and 16.4 per cent. to crops and gardens. In 1921 there were 97,282 tons of wheat produced from 111,275 acres, 39,599 tons of rye from 50,000 acres, 44,063 tons of oats from 53,075 acres, with large quantities of potatoes. Dairy products are the chief agricultural interest, vast quantities of condensed milk and of various forms of chocolate being produced. Wine and tobacco also are produced. In the last census, 1920, there were 129,269 horses, 3,581 milks, 891 donkeys, 2,112,115 cattle, 242,553 sheep, 546,112 swine, and 333,852 goats.

The Swiss Confederation has enacted that the forest area, 3,290 square miles, or 2,105,214 acres, shall never be reduced, the law applying to national, cantonal and private forests, re-planting being provided for. In 1920, there were planted 16,466,785 trees, chiefly coniferous.

There were, in 1920, 208 establishments for fish culture.

Switzerland has important clock and watch works, 1,859 embroidery works, and employed in manufacturing in 1918, 381,170 persons, with 526,098 horse power for motive power.

Railway mileage in 1920 was 3,881 State owned, and 34 miles of foreign lines, the cost of construction up to 1918 having been 2,476,247,157 francs.

The Government is a confederation of the 25 cantons, which are joined under a Federal Constitution (that of May 29, 1874, being now in force), with large powers of local control retained by each canton. The national authority vests in a parliament of two chambers, a "Ständerat" or State Council, and a "Nationalrat" or National Council, the first of 44 members, the second of 189 members. There is universal suffrage, and in many cantons the people meet in popular assemblies to vote directly under absolute democratic methods. Switzerland has maintained its unity since the men of the three cantons of Uri, Schwyz and Lower Unterwald formed a defensive league in 1291, and became formally independent of the Holy Roman Empire in 1648.

There is complete freedom of worship. In 1920, there were 2,218,589 Protestants, 1,586,826 Roman Catholics, and 20,955 Jews. Protestants are in a majority in 12 of the cantons, and Catholics in 10.

Instruction is obligatory, about 600,000 pupils being taught in the lower schools, with many technical schools and seven universities with about 7,000 students.

The national defense depends on the National Militia, with compulsory service. Fortifications defend the St. Gothard Pass on the south and the Rhone River valley. The army always has been efficient and for many generations has been constantly in effective condition.

Switzerland was neutral in the great war and is a member of the League of Nations, of which Geneva is the seat.

The unit of the currency is the franc, its gold par being 19.3 cents. Rate of exchange on Nov. 1, 1922, was 18.05.

Imports in 1921 were 2,298,288 francs; exports, 2,140,135.

Swiss export trade fell off 2,000,000,000 francs from 1920 to 1921, owing in large part to the high international exchange value of the Swiss franc making it difficult for countries with depreciated currencies to buy Swiss goods.

Budget—Receipts, 1922.....francs 422,170,000

Expenditures.....francs 528,570,000

The public debt in 1921, exclusive of the rail-

way debt, was 1,605,859,100 francs, with about

250,000,000 francs of floating debt.

Trade with the United States was:

Imports, 1920-21.....\$25,632,565

1921-22.....5,016,246

Exports, 1920-21.....46,797,810

1921-22.....41,556,266

## SYRIA.

(French Mandate.)

AREA, estimated, 60,000 square miles.

POPULATION, estimated, 3,000,000.

ADMINISTRATIVE CAPITAL, Beirut, population 160,000. Chief cities, Damascus, population, estimated, 300,000; Aleppo, 250,000; Hama, 70,000; Hama, 60,000; Adana, 45,000; Marash, 50,000; Alexandretta, chief port, 10,000.

French High Commissioner, Gen. Henri Gouraud.

United States Consuls, at Aleppo, Jesse B. Jackson;

at Beirut, Paul Knabenshue; at Damascus, Charles

E. Allen.

Syria is a former province of Turkey lying south

of Anatolia with Mesopotamia on the east, the

Arabian desert and Palestine on the south and the Mediterranean on the west. It is about the size of the State of Georgia. It was made an independent state by the Treaty of Sevres, Aug. 10, 1920, and the mandate given to France by the Supreme Council of the Allied Powers. Palestine, which formed a vilayet of the old province, was given separate independence and placed under a British mandate (see Palestine). The boundary line on the north has been readjusted by a treaty between France and the Nationalist Government of Turkey, and the Palestine boundary by Franco-British agreement, Dec. 23, 1920.

The French development of Syria provides for a federative state of four provinces, Aleppo (the district around Latakia), Alassout, Damascus and Great Lebanon. The latter was proclaimed a state Sept. 1, 1920, with Beirut as its capital and given a flag, the French tricolor with a cedar on the white ground. The greater part of the population is of the orthodox Mohammedan faith.

The eastern part of the country is dry, being cut off from the sea moisture-laden winds by mountains. Irrigation is essential to cultivation. Tobacco, wheat, fruit, wine and silk are the chief products. Mineral wealth is unimportant. Great Lebanon, which extends along the Mediterranean for 120 miles, with an average width of 30 miles, produces olives, wheat, grapes, oranges and mulberry trees, and also supports much livestock.

Important railroad lines are Beirut to Damascus, with connections at Riyak to Homs, Hama and Aleppo and from Tripoli, a promising seaport, to Aleppo, where connection is made with the Bagdad railroad. Damascus, with "the Street called Straight," famous in the time of the Apostles, is one of the oldest cities in the world, and 35 miles northwest of it are the magnificent ruins of Heliopolis. Beirut is the seat of the Syrian Protestant College founded by the Rev. Dr. Daniel Bliss in 1864, which shares with Robert College in Constantinople American educational honors in the Levant.

Trade of Syria and Palestine with the United States in 1921-22 was:  
Imports.....\$3,167,822  
Exports.....752,049

## TURKEY.

(The Ottoman Empire.)

AREA, approximately 247,650 square miles, but boundaries are indeterminate.

POPULATION, approximately, 13,302,300.

CAPITALS, Constantinople, population approximately 1,000,000; Nationalist capital in Anatolia, Angora.

Commander-in-Chief, Mustapha Kemal Pasha.

Grand National Assembly at Angora asserts its complete control of the Ottoman Empire and has sent Rafet Pasha to take charge of Constantinople. The Assembly on Nov. 2, 1922, declared that it is invested with sovereign rights, that the Sultanate is abolished, that the present Sultan is deposed as Caliph (spiritual head of Islam); and that a suitable member of the house of Osman will be appointed to that place. The Sultan on Nov. 17 boarded the British battleship *Malaya* and was taken to Malta. On the 18th the National Assembly elected to the Caliphate the heir to the Sultanate, Abdul Medid Effendi, (born May 25, 1868), the cousin of Sultan Mohammed VI. (See Chronology for developments.)

Diplomatic and Consular Interests of Turkey in the United States are cared for by Spain (which see). United States High Commissioner, at Constantinople, Rear Admiral Mark L. Bristol, U. S. N.

Up to the beginning of the World War, Turkey, or the Ottoman Empire, included European Turkey, Anatolia, Arabia, Syria, Palestine, Mesopotamia, Armenia and Kurdistan, also groups of islands in the Aegean Sea.

So late as 1918, the areas of the Turkish Empire totalled about 710,224 square miles, with about 21,273,900 of population. Cyprus and Egypt had passed to British domination—Cyprus annexed, and Egypt under a protectorate. There remained, therefore, in the Turkish Empire, 10,882 square miles of area with 1,891,000 of population in and around Constantinople and Adrianople on the north of the Straits; in Asia Minor, including Ismid (opposite Constantinople), Brussa, Bigha, Smyrna, Kastamuni, Angora, Konia, Adana, Sivas and Trebizond, 199,272 square miles, with 10,186,900 of population; Armenia and Kurdistan, 71,900 square miles, with 2,000,000 of population; Mesopotamia, 143,250 square miles, with 2,000,000 of population; Syria, 114,630 square miles, with 3,675,000 of population; and the Hejaz and Yemen in

Arabia, 170,800 square miles, with 1,050,000 of population; a total of 710,224 square miles, with 21,273,900 of population.

In Asia, Armenia has in part adopted a Soviet government and is at least in harmonious agreement with Soviet Russia. Syria has passed under the mandate of France, Mesopotamia has been created the dependent kingdom of the Iraq (which see), under the mandate of Great Britain; and Arabia (which see) has asserted its independence as the Kingdom of the Hejaz, the Imamate of Yemen and other divisions.

There remained to the Turkish Empire under the treaty then Constantinople and its hinterland, about 800 square miles, with about 1,000,000 population, and Anatolia with about 236,852 square miles, and about 11,632,300 population. If to these figures is added Thrace, transferred from Greece to Turkey by agreement of the powers following the successful campaign of Mustapha Kemal Pasha, the Nationalist leader (of which later), with its 10,000 square miles and 670,000 population, the total will be approximately 247,652 square miles and 13,302,300 population. This total included Smyrna, population 350,000, the most important city and port in Anatolia, and its hinterland, which, while retaining Turkish sovereignty, had been turned over by the treaty to Greece for administration with military control, and with the promise that a plebiscite might be held in 1935 to decide under which rule it should continue. Turkey now, therefore, is not quite as large as Texas, but has three times its population.

## CONTROL OF THE STRAITS.

European Turkey before the war, included Constantinople and Thrace on the northwest side of the waters which connect the Mediterranean Sea with the Black Sea—so that Turkey controlled the Straits of the Dardanelles—historic vantage point, politically, economically and diplomatically, of events touching the Near East, with deep significance also regarding Far Eastern interests.

The Ottoman Empire was at that time under German domination, with German officers training the Turkish army, and Berlin more or less influencing the policy of the Sultan at Constantinople. Turkey was a unit of the Central Powers' military and geographical resources in the World War, and, defeated, was dismembered by the conquerors.

The Balkan wars of 1913 had reduced the European area dominated by Turkey, leaving her only that part of Thrace from Adrianople east to the Black Sea, and south to Enos on the Aegean; but it left her completely the mistress of the Straits of the Dardanelles.

The Treaty of Sevres (Paris), following the World War, further diminished Turkish territory, giving all Thrace to Greece except a triangle 30 miles by 40, containing a neutral zone, along the immediate border of the Dardanelles, the Sea of Marmora and the Bosphorus on both the European and the Asiatic sides, to secure equal passage rights to all nations. All fortifications were to be demolished. The Straits were to remain open in peace and in war for all craft and to be neutral in time of war. They were not to be subject to blockade or other hostile acts.

A Commission of the Straits was named, to have complete control of the navigation of the Straits, on which sit representatives of Great Britain, France, Italy, Japan, Turkey, Greece, and, if and when joining the League of Nations, of Russia and Bulgaria. The United States was offered a seat. After final peace settlements had been effected, Constantinople was to return to Turkish administration.

The Allied occupation of Constantinople became complete on March 16, 1920, with the Allied High Commission controlling affairs the power of the Sultan and his Ministers is nullified and almost entirely nominal.

The real power in the Turkish Empire (Nov. 1, 1922) rests in the National Assembly and responsible Ministry set up by the Nationalists at Angora in Anatolia, which was the most genuinely Turkish section of the old Ottoman Empire. This rests on universal suffrage without religious or race distinction, recognizes the right of minorities to freedom and protection, and has a programme of social reform laid out. This Assembly has offered the dictatorship to Mustapha Kemal Pasha, the soldier and able diplomatist who brought it about. He had served well in Gallipoli under Gen. Liman von Sanders and found the nucleus of the Nationalist movement in his own troops after the war. The movement was spurred on by the Treaty of Sevres which dismembered the Turkish Empire but has not been ratified.

## RISE OF KEMAL PASHA.

Nominally regarded by the Sultan as in rebellion, Kemal established a government at Angora, entered into alliance with Soviet Russia regarding the

division of the Caucasus and control of the Black Sea, arranged the Syrian boundaries with France, the mandatory power, saw that Pan-Islamism was preached, organized his army, drove the Greeks back from the Bagdad railroad in 1921 and in September, 1922, hurled a well organized, well disciplined force upon them and drove them back to the Aegean Sea, capturing Smyrna, which was devastated by fire. Following that victory he pushed on to the Dardanelles, refusing to recognize the neutral zone set up. The French and Italian Governments withdrew their troops, but the British reinforced and strengthened their garrison at Chanak, on the Asiatic side, backing it up with warships. As the two forces faced each other, the situation yielded to diplomatic treatment. Kemal's demand that Greece give up Thrace to Turkey, as well as yielding its claims to Smyrna and the Aidin district, was assented to by military representatives of Great Britain, France, Italy, Turkey and Greece, at a conference in Mudania in October. An agreement was reached for a later peace conference to attempt permanently to settle all questions, the Allies meanwhile to continue as arranged in control of the waterways and land neutral areas, under existing general terms.

On Sept. 26 Secretary Hughes indorsed the Allies peace note and declared that the United States was in accord regarding the effective freedom of the Straits and the protection of racial and religious minorities. Soviet Russia, which had not been invited to the conference, in a note to the powers on the same date, protested against the exclusion from the conference of countries directly interested in the freedom of the Dardanelles and declared Russia would refuse to recognize any decision unless she were a party to the agreement.

The conference of the Allied Powers with Turkey was called to meet in Lausanne in November; the peace conference proper to be participated in by France, Great Britain, Italy, Japan, Jugo-Slavia, Roumania, Turkey and Greece; and at the second conference dealing with the Straits representatives of Russia, the Ukraine, Georgia and Bulgaria were to have seats. The fourteen main points brought forward by the Turks were:

1. The Dardanelles and the Bosphorus.
2. Constantinople.
3. The abolition of the capitulations.
4. Exchange of minority populations between Greece and Turkey.
5. Kurdish territories of Iraq.
6. The complete independence of Arab States.
7. The Bagdad Railroad.
8. An autonomy for Macedonia, with a free port for Serbia and autonomy or annexation of Western Thrace, with Dedeaghat a Bulgarian free port.
9. The question of Demotika and Dedeaghat as part of Eastern Thrace.
10. The islands off the coast of Anatolia, including the Dodecanese.
11. Control of the public debt.
12. Reparations.
13. The Caliphate.
14. The return of the three Turkish dreadnoughts which were acquired by England before Turkey entered the war.

(Developments in the Near East situation will be found in the Chronology of the Year elsewhere in this Almanac.)

Mohammedans form the vast majority of the people of Anatolia, and about half the population of Constantinople. Mohammedism is the state religion. The Sultan, as Caliph, is the supreme head. The laws of the empire rest on the Koran. The chief ecclesiastical dignitary is the Sheikh ul Islam whose functions are chiefly judicial and legal, and who is a member of the Cabinet. Turkey denounced the capitulations providing for ex-territorial privileges for foreigners on certain powers in 1914 before entering the war. This, however, was not assented to by any of the powers, and the treaty rights were reasserted for all nations in the Treaty of Sevres, but with provision for readjustment.

Agriculture is the chief industry of the Turks, products being tobacco, which goes to almost all world marts, cereals, cotton, figs, nuts, fruits of almost all varieties, opium, and gums. Asiatic Turkey was estimated to have about 16,567,000 acres under cultivation, of which about 13,689,000 was in cereals, 473,000 in fruit and vegetables, 779,000 in cotton and flax, and 1,213,000 in vineyards. The approximate production of cotton in 1912 was 200,000 bales, or about 100,000,000 pounds.

Turkey has large mineral resources, not yet developed, chrome, zinc, manganese, antimony, copper, borax, emery, asphalt, meerschaum, some coal and lignite, salt, some gold and silver, and petroleum on lands bordering the Marmora Sea.

Turkish fisheries are regarded as important, but manufactures are small and methods crude.

Imports were reported as about \$195,000,000 in

1912, and exports about \$105,000,000. In 1921 imports were reported as about \$365,000,000 and exports about \$95,000,000.

The external debt of Turkey on Aug. 31, 1921, was placed at 171,527,034 pounds Turkish (the pound Turkish at par of exchange \$4.35).

Trade with the United States as reported by the United States Department of Commerce was:

#### TURKEY IN EUROPE.

|                  |              |

#### URUGUAY, REPUBLIC OF.

AREA, 72,153 square miles.

POPULATION, 1921, 1,494,953.

CAPITAL, Montevideo; population, 1920, 361,950.

There are three cities between 20,000 and 30,000.

President, Dr. Baltasar Brum, 1919-23, inaugurated March 1, 1919.

President of the Administrative Council, Jose Batlle y Ordóñez.

Premier, Dr. Gabriel Terra (Interior).

Minister to the United States, Dr. Jacobo Varela,

Consul General, at New York, Jose Riehling; Consuls,

at Chicago, Rodolfo Carlos Lebrer; at Boston,

William H. Mossman; at Baltimore, A. F. Pablo

du Pont; at Philadelphia, Rodman Wanamaker;

at San Francisco, O. W. Goldaracena; at Savannah,

Ramon Esteve; at New Orleans, Henry L. Lange;

at Portland, Me., James E. Marret; at St. Louis,

F. Ernest Cramer.

United States Minister, Hoffman Philip.

United States Consul, at Montevideo, David J. D.

Myers.

Uruguay, the smallest republic in South America, is bounded on the north and east by Brazil, on the south by the South Atlantic Ocean and the River Plate, and on the west by Argentina, the boundary line being the River Uruguay, which is navigable from the Plate to Salto, 200 miles north. In area it is slightly larger than the combined States of New York, Vermont, Massachusetts and Connecticut. Lying between latitudes 30° and 35° south and consisting of rolling grassy plains, it enjoys an extraordinary healthy climate with a uniform temperature. It is agricultural and pastoral. Large herds of cattle and sheep are raised. The chief exports are wool and hides. In 1920 there were entered in its ports 5,731 steamers, tonnage 8,355,932, and 3,952 sailing vessels, tonnage 519,386.

Uruguay declared her independence of Spain Aug. 25, 1825. The present Constitution, as amended, came into force March 1, 1919. It provides for universal franchise for males over 18 and for proportional representation. The President is elected for four years by direct vote. He shares executive power with the National Administrative Council, which consists of nine members, six of the majority party and three of the largest minority—three retiring every two years—all elected by direct popular vote. The President appoints the Ministers of Foreign Affairs, War and the Interior and has supreme control of these departments. The Council appoints the Ministers of Finance, Public Works, Industry and Education and has control. Congress has two Houses—the Senate of 19 members, chosen for six years by an electoral college, one-third retiring every two years; and a House of Representatives of 90 members, chosen for three years by direct vote. There are 19 departments which have ample home rule.

Church and State are separated and there is complete religious toleration. The majority of the people are Roman Catholic. Primary education is compulsory and free. The educational system is highly progressive. The university at Montevideo had 4,165 students in 1920. Schools and hospitals are plentiful, and the prison at Montevideo is a model penal institution. The death penalty was abolished in 1907.

Uruguay has (June 30, 1921) 1,625 miles of railroads, mostly British owned, of which 1,060 miles are under state guarantee. The Bank of the Republic has a paid-up capital of \$20,335,955. Its

President and directors are appointed by the Government. It has the exclusive right to issue notes. The Government in 1912 created a National Insurance Bank and gave it a monopoly of issuing insurance. The standing army, in which service is voluntary, numbers 18,500, with a reserve of 157,439 in the National Guard service, which is compulsory.

Uruguay has made great advances in social welfare legislation and administration during the last 12 years. The republic is a member of the League of Nations.

## VENEZUELA, REPUBLIC OF.

AREA, approximately, 363,728 square miles.

POPULATION, census of 1920, 2,411,952.

CAPITAL, Caracas; population, 1920, 92,212.

Chief cities, Maracaibo, population, 46,706; Valencia, 29,466; Barquisimeto, 23,943; chief port, La Guaira.

President, Gen. Juan Vicente Gomez, 1922-29.

Premier, Dr. F. Baptista Galindo (Interior).

Minister to the United States, Dr. Pedro Manuel Arcaza.

Consuls General, at New York, Pedro Rafael Rincón; at New Orleans, Alfredo Olavarria. Consuls, at Boston, Ernesto Hurtado; at St. Louis, Alivio Parra Marquez.

United States Minister, Willis C. Cook.

United States Consuls, at Caracas, Thomas W. Voetter; at Maracaibo, John O. Sanders; at Puerto Cabello, Wm. P. Garrety; at La Guaira, vacant.

Venezuela is the northernmost state of South America and is bounded on the north by the Caribbean Sea, on the east by British Guiana, on the south by Brazil and Colombia and on the west by Colombia. It stretches from 12° 26' north to within two degrees of the Equator. The climate is tropical, hot and unhealthy in the coastal and river regions. In area it is as large as the States of Texas, Louisiana and Arkansas combined. The spurs of the Eastern Andes and the foothills are covered with dense forest, and the high plateaus provide excellent grazing. The River Orinoco (over 1,500 miles in length) flows through many stretches of level prairies (llanos) and is navigable for 700 miles for large steamers and for 200 miles further for smaller vessels. A natural river or canal, the Casiquiare, unites its upper reaches with the Rio Negro, a tributary of the Amazon. The island of Margarita (area of 400 square miles), noted for its pearl fishing, with Tortuga and some 70 other islands, belongs to Venezuela, but Trinidad, at the mouth of the Orinoco, is British and Curaçao and others off the coast are Dutch.

Agriculture and cattle raising are the chief industries and the chief exports are coffee, cacao, balata, hides, gold, rubber and asphalt. Imports are chiefly textiles, machinery and hardware. The country is rich in metals, but is mostly undeveloped, and petroleum is found in the Lake Maracaibo district.

The production of petroleum for the year 1921 was 215,000 metric tons; for 1920, 19,000; for 1919, 45,000. The law concerning hydrocarbons, promulgated June 30, 1920, states clearly the rights and privileges of foreigners in the development of oil lands. Both British and American oil interests have secured possessions in the Maracaibo district.

There are (1921) 644 miles of railroad, Caracas (altitude 4,017 feet), the capital, being connected with its seaport, La Guaira, by a railroad 22 miles long which is famous for its magnificent views. The roads of the country have been greatly improved of late years.

In 1920, 1,120 vessels of 1,124,261 tonnage entered Venezuelan ports.

Venezuela was the first of the Spanish colonies in South America to formally declare her independence (July 5, 1811) following the disturbing conditions in Spain caused by Napoleon. After severe fighting, the Republic of Colombia of which the present states of Colombia, Venezuela and Ecuador formed the three departments, was established Dec. 17, 1819, under the presidency of the liberator, Gen. Simon Bolivar. In May, 1830, a convention re-created the Republic of Venezuela and adopted a constitution. Separation from Colombia was amicable, but the boundary separating the two republics has never been determined. Both agreed in 1881 to submit the question to the arbitration of the King of Spain. His award, made in 1891, did not satisfy and on one occasion the two countries were on the verge of war. The dispute was submitted to the arbitration of Switzerland in 1915 and Swiss engineers will lay out the line. The territory in dispute is an almost uninhabited tract of the head waters of the Orinoco.

For 60 years the Brazil boundary line was in dispute, but that was settled in 1905. In the dispute with Great Britain over the boundary of British Guiana, Venezuela, on the refusal of her request for arbitration, broke off diplomatic relations and appealed to the United States for aid. This President Cleveland gave in 1895, taking a strong, even belligerent, attitude, based on the Monroe Doctrine. Following diplomatic negotiations, a treaty awarded the major portion of the territory to Great Britain and gave Venezuela title to valuable territory at the mouth of the Orinoco.

Venezuela has had many revolutions and many revisions of its Constitution since the first was adopted in 1819. That now in force was adopted June 13, 1914. It provides for a President elected by Congress for seven years, a Senate of 40 members elected for three years, and a House of Deputies of about 77 members elected for three years. There are twenty autonomous states, a federal district and two territories. The Roman Catholic is the state religion, but religious liberty is guaranteed. Primary education is free and nominally compulsory. Higher education has been much improved under recent administrations. By a law promulgated in June, 1910, military service was made compulsory. A standing army of 8,000 is maintained, with 87,000 in the reserve. Venezuela is a member of the League of Nations.

NOTE TO GERMANY AND PRUSSIA.—The German Empire was restored on Jan. 1, 1871, and King William I. of Prussia was proclaimed German Emperor, at Versailles, Jan. 18, 1871. On his death he was succeeded by King Frederick of Prussia, and the latter in turn by William II.

William II. (Kaiser Wilhelm) abdicated as King of Prussia and German Emperor, as of Nov. 9, 1918, all the rest of the sovereigns of the German states quit too, one by one, and the German Empire became a Republic, under the Presidency of Frederick Ebert. The Constitution was adopted July 31, 1919.

# THE MONROE DOCTRINE.

The Monroe Doctrine dates from a declaration of December 2, 1823, by James Monroe, President of the United States, in his seventh annual message to Congress. Brazil had declared its independence of Portugal the year before. Troubles in the latter country had caused a modification of the Constitution. In Spain a revolution had occurred, and the dominion of Peru was lost. The Holy Alliance, formed in 1815 by Russia, Austria and Prussia, was threatening, so it was alleged, to help Spain recover its control in South America. Russia and the United States were in controversy over their Pacific Coast boundaries. Mr. Monroe in his message took up the Russian matter first, saying:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been judged proper for asserting, as a principle in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European powers."

The President then spoke of Spain and Portugal in this wise:

"Of events in that quarter of the globe with which we have so much intercourse and from which we derive our origin we have always been anxious and interested spectators. The citizens of the United States cherish sentiments the most friendly in favor of the liberty and happiness of their fellowmen on that side of the Atlantic. In the wars of the European powers, in matters relating to themselves, we have never taken any part, nor does it comport with our policy so to do. It is only when our rights are invaded or seriously menaced that we resent injuries or make preparation for our defence. With the movements in this hemisphere we are of necessity more immediately connected, and by causes which must be obvious to all enlightened and impartial observers. The political system of the allied powers is essentially different in this respect from that of America. This difference proceeds from that which exists in their respective Governments. And to the defence of our own, which has been achieved by the loss of so much blood and treasure, and matured by the wisdom of their most enlightened citizens, and under which we have enjoyed unexampled felicity, this whole nation is devoted. We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety."

"With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the Governments who have declared their independence and maintained it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them, or controlling, in any other manner, their destiny, by any European power, in any other light than as the manifestation of an unfriendly disposition toward the United States."

## CLEVELAND'S DECLARATION IN 1895.

When President Grover Cleveland, in 1895, urged Great Britain to arbitrate her dispute over the boundary between Venezuela and British Guiana, he said (December 17) in a message to Congress:

"The doctrine "(Monroe) "upon which we stand is strong and sound because its enforcement is important to our peace and safety as a nation, and is essential to the integrity of our free institutions and the tranquil maintenance of our distinctive form of government. It was intended to apply to every stage of our national life, and cannot become obsolete while our Republic endures. If the balance of power is justly a cause for jealous anxiety among the Governments of the Old World and a subject for our absolute non-interference, none the less is an observance of the Monroe Doctrine of vital concern to our people and their Government. \* \* \* If a European power, by an extension of its boundaries, takes possession of the territory of one of our neighboring republics against its will and in derogation of its rights, it is difficult to see why to that extent such European power does not thereby attempt to extend its system of government to that

portion of this continent which is thus taken. This is the precise action which President Monroe declared to be 'dangerous to our peace and safety,' and it can make no difference whether the European system is extended by an advance of frontier or otherwise. \* \* \* The Monroe Doctrine finds its recognition in those principles of international law which are based upon the theory, that every nation shall have its rights protected and its just claims enforced."

## PRESIDENT WILSON'S WORDS IN 1915.

President Wilson said of the Monroe Doctrine (December 7, 1915) in an address to a joint session of Congress: "There was a time in the early days of our own great nation and of the republics fighting their way to independence in Central and South America when the Government of the United States looked upon itself as in some sort the guardian of the republics to the south of her as against any encroachments or efforts at political control from the other side of the water; felt it its duty to play the part even without invitation from them; and I think that we can claim that the task was undertaken with a true and disinterested enthusiasm for the freedom of the Americas and the unmolested self-government of her independent peoples. But it was always difficult to maintain such a rôle without offence to the pride of the peoples whose freedom of action we sought to protect and without provoking serious misconceptions of our motives, and every thoughtful man of affairs must welcome the altered circumstances of the new day in whose light we now stand, when there is no claim of guardianship or thought of wards but, instead, a full and honorable association as of partners between ourselves and our neighbors, in the interest of all America, north and south."

"Our concern for the independence and prosperity of the states of Central and South America is not altered. We retain unabated the spirit that has inspired us throughout the whole life of our Government and which was so frankly put into words by President Monroe. We still mean always to make a common cause of national independence and of political liberty in America. But that purpose is now better understood so far as it concerns ourselves. It is known not to be a selfish purpose. It is known to have in it no thought of taking advantage of any Government in this hemisphere or playing its political fortunes for our own benefit. All the Governments of America stand, so far as we are concerned, upon a footing of genuine equality and unquestioned independence."

## PRESIDENT HARDING'S WORDS IN 1921.

President Harding, April 19, 1921, at the unveiling of the Bolivar Statue, New York City, said:

"Having sacrificed in arms to establish the human inheritance belonging to free men, the American republics may well touch elbows to prove their unselfishness and show to mankind that righteous achievement does not mean anybody's destruction, individually or nationally, but that real victory lies in that human progress wherein every contender, individual or national, may share as it is sought to merit it."

"The doctrine proclaimed under Monroe, which ever since has been jealously guarded as a fundamental of our own Republic, maintained that these continents should not again be regarded as fields for the colonial enterprises of Old-World powers. There have been times when the meaning of Monroeism was misunderstood by some, perverted by others, and made the subject of distorting propaganda by those who saw in it an obstacle to the realization of their own ambitions. Some have sought to make our adhesion to this doctrine a justification for prejudice against the United States. They have falsely charged that we sought to hold the nations of the Old World at arm's length, in order that we might monopolize the privilege of exploitation for ourselves. Others have protested that the doctrine would never be enforced if to enforce it should involve us in actual hostilities."

"The history of the generations since that doctrine was proclaimed has proved that we never intended it selfishly; that we had no dream of exploitation. On the other side, the history of the last decade certainly must have convinced all the world that we stand willing to fight, if necessary, to protect these continents, these sturdy young democracies, from oppression and tyranny."

**Declaration of Independence.**

(UNANIMOUSLY ADOPTED IN CONGRESS, JULY 4, 1776, AT PHILADELPHIA)

WHEN, in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers of invasion from without, and convulsions within.

He has endeavoured to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and

sent hither swarms of Officers to harass our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies, without the Consent of our Legislature.

He has affected to render the Military independent of and superior to the Civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation: For quartering large bodies of armed troops among us: For protecting them by a mock Trial from punishment for any Murders which they should commit on the Inhabitants of these States: For cutting off our Trade with all parts of the world: For imposing Taxes on us without our Consent: For depriving us in many cases of the benefits of Trial by Jury: For transporting us beyond Seas to be tried for pretended offences: For abolishing the free System of English Laws in a neighbouring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies: For taking away our Charters, abolishing our most valuable Laws and altering fundamentally the Forms of our Governments: For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated Government here by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large Armies of foreign Mercenaries to complete the works of death, desolation and tyranny, already begun with circumstances of Cruelty & perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavoured to bring on the Inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions. In every stage of these Oppressions We have Petitioned for Redress in the most humble terms. Our repeated Petitions have been answered by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people. Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

WE THEREFORE, the REPRESENTATIVES of the UNITED STATES OF AMERICA, in GENERAL CONGRESS, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by authority of the good People of these Colonies, solemnly PUBLISH and DECLARE, That these United Colonies are, and of Right ought to be FREE and INDEPENDENT STATES; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain is and ought to be totally dissolved; and that as FREE AND INDEPENDENT STATES, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which INDEPENDENT STATES may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our Lives, our Fortunes, and our sacred Honor.

## BRIEF BIOGRAPHIES OF UNITED STATES PRESIDENTS.

(For explanation of reference marks see third page following. Some authorities say Taylor was born Sept. 24, and Fillmore, Feb. 7. The controversy as to which side of the North Carolina-South Carolina line Jackson was born on still goes on, in and out of Congress.)

| FULL NAME.                     | PATERNAL ANCESTRY.                            | PARENTAGE—FATHER.         | FATHER'S VOCATION.    | PARENTAGE—MOTHER.     |
|--------------------------------|-----------------------------------------------|---------------------------|-----------------------|-----------------------|
| 1. George Washington.          | English.                                      | Augustine Washington.     | Planter.              | Mary Ball.            |

## NOTES TO THE TABLES OF THE PRESIDENTS ON FOREGOING PAGES.

\*Monroe abandoned the profession of law when a young man, and was afterward, and until his election, always holding public office. Jackson called himself a South Carolinian, and his biographer, Kendall, recorded his birthplace in Lancaster Co., S. C.; Jas. Parton has published evidence in a contention that Jackson was born in Union Co., N. C., less than a quarter mile from the South Carolina line. For of departure from college.

§Widows. Their maiden names are in parentheses. †She was the divorced wife of Captain Robards. (a) The Democratic Party of to-day claims lineage descent from the first Republican Party, and President Jefferson as its founder. (b) Political parties were disorganized at the time of the election of John Quincy Adams. He claimed to be a Republican, but his doctrines were decidedly Federalistic. The opposition to his Administration took the name of Democrats, and elected Jackson President.

(c) Randall, the biographer of Jefferson, declares that he was a believer in Christianity, although not a sectarian. (d) While President Johnson was not a church member, he was a Christian believer. His wife was a Methodist.

Washington's first inauguration was in New York, and his second in Philadelphia. Adams was inaugurated in Philadelphia, and Jefferson and the Presidents following elected by the people, in the city of Washington. Arthur took the Presidential oath of office first in New York City. John Adams and Jefferson died on the same day, the Fourth of July, 1826, and Monroe died on the Fourth of July five years later. John Quincy Adams was a Representative and Andrew Johnson a Senator in Congress after the expiration of their Presidential terms, and both died while holding these offices. Tyler was a Representative in the Confederate Congress from Virginia, and died in office.

Lincoln, Garfield and McKinley were assassinated while in office. Lincoln at Ford's Theatre, Washington, D. C., April 14, 1865, from a pistol shot fired by John Wilkes Booth, who was killed near Fredericksburg, Va., April 26, 1865, by Sergeant Boston Corbett. Garfield was shot in the Pennsylvania Railroad Depot, Washington, D. C., July 2, 1881, and died at Elberon, Long Branch, N. J., September 19, 1881. The assassin was Charles Julius Guiteau, who was hanged at Washington, D. C., June 30, 1882. McKinley was shot twice September 6, 1901, while in the Temple of Music of the Pan-American Exposition, Buffalo, N. Y., and died from his wounds at the home of John G. Milburn, Buffalo, September 14, 1901. The assassin was Louis Czolgosz, who was electrocuted at Auburn State Prison, New York, October 29, 1901.

Jackson was shot at in the Capitol at Washington, D. C., January 29, 1835, by a house painter named Richard Lawrence, escaping because the pistol of the assassin missed fire. Ex-President Roosevelt was shot and wounded by John Schrank, an insane man, at Milwaukee, Wis., October 14, 1912.

Cleveland, after taking the oath as President, kissed the open Bible, his lips touching Psalm cxli., verses 5-10, inclusive. Garfield's first act after taking the oath was to kiss his mother.

The sixth President was the son of the second President, and the twenty-third President was the grandson of the ninth President. William Henry Harrison was the eighth and Benjamin Harrison the tenth in descent from Pocahontas and John Rolfe. Lincoln was the first President wearing a full beard. Grant the first wearing a mustache. Buchanan and Cleveland were bachelors when they entered the White House as Presidents, but Cleveland surrendered during his first term. Washington, Monroe, Pierce and Hayes were born on Friday, J. Q. Adams, Pierce and Garfield were inaugurated on Friday. Tyler, Polk and Pierce died on Friday. Lincoln was assassinated on Friday.

There were remarkable coincidences in the lives of Abraham Lincoln and Jefferson Davis. Both were born in Kentucky; Lincoln in 1809, Davis in 1808. Both removed from their native State in childhood, Lincoln to the Northwest, Davis to the Southwest. Lincoln was a Captain of Volunteers and Davis a Second Lieutenant of Regulars in the Black Hawk war of 1832. They began their political careers the same year, 1844, Lincoln being a Presidential Elector for Clay, and Davis for Polk. They were elected to Congress about the same time, 1845 and 1846. They were called to preside over their respective governments the same year and within a few days; Davis, February 8, 1861; Lincoln, March 4, 1861.

Washington, Monroe, and Jackson were soldiers in the Revolutionary war; Jackson, W. H. Harrison, Tyler, Taylor, and Buchanan in the war of 1812-15; Lincoln in the Black Hawk war; Taylor, Pierce, and Grant in the Mexican war; Grant, Hayes, Garfield, Arthur, B. Harrison, and McKinley in the Civil War, and Roosevelt was in the war with Spain. Adams and Jefferson were signers of the Declaration of Independence, and Washington and Madison of the Constitution.

Grant was christened Hiram Ulysses and Cleveland Stephen Grover. W. H. Harrison was the oldest man elected to the Presidency, and Roosevelt the youngest, Grant being the next youngest by six months. Cleveland was the only President married in the White House, and his second daughter the only President's child born therein. Monroe's daughter (Mrs. Gouverneur), Tyler's daughter (Mrs. Waller), Grant's daughter (Mrs. Sartoris), Roosevelt's daughter (Mrs. Longworth) and Wilson's daughters, Jessie (Mrs. Sayre) and Eleanor (Mrs. McAdoo), were the only children of Presidents married therein. Wives of Tyler, Benjamin Harrison, and Wilson died in the White House. John Tyler was father of the largest family, eight sons and six daughters. Eight Presidents: Washington, Jefferson, Madison, Monroe, W. H. Harrison, Tyler, Taylor, and Wilson, were Virginians by birth. Six Presidents: Grant, Hayes, Garfield, B. Harrison, McKinley, and Taft, were Ohioans by birth.

## VICE-PRESIDENTS OF THE UNITED STATES.

| NAME.                        | Birthplace.                  | Yr.  | Residence. | Qu all fled | Politics. | Place of Death.          | Yr.  | Age at D'th |

|---------|-------------------|-----|------|
| Wilson  | William B. Wilson | Pa. | 1913 |
| Harding | James J. Davis    | "   | 1921 |

## TREASURERS OF THE UNITED STATES.

The germ of the Treasury Department was planted when, on July 29, 1775, the Continental Congress appointed two Treasurers. The appointments were Michael Hillegas and George Clymer. The latter soon resigned to accept his seat as delegate to the Congress. Mr. Hillegas discharged the duties of Treasurer until September 11, 1789. The Treasury Department was organized under the act of September 2, 1789. Strictly speaking, it was reorganized,

for the department under various names had been in existence since 1775. The Constitution went into effect March 4, 1789. Washington was inaugurated as the first President of the United States April 30, 1789. It will thus be seen that Mr. Hillegas was Treasurer for nearly five months after the inauguration of Washington, and for nine days after the Treasury Department was organized under the Constitution.

Note.—The selection of the Superintendent of the Military Academy was confined to the Corps of Engineers from the establishment of the Institution, March 16, 1902, till the passage of the law of July 13, 1866, which opened it to the entire Army. By the act of June 12, 1868, the local rank of Colonel was conferred upon the Superintendent.

Major Williams resigned June 20, 1803, on a point of command, and pending its settlement until April 19, 1805, when he again returned to service as Chief Engineer, no permanent Superintendent of

the Military Academy was appointed, the command devolving upon the senior officer of the Corps of Engineers present for duty.

But Major P. G. T. Beauregard, Corps of Engineers, by order of John B. Floyd, Secretary of War, relieved Col. Delafield, Jan. 23, 1851, from the superintendency of the Military Academy, but was himself displaced five days later, Jan. 28, 1861, by direction of the succeeding Secretary of War, Joseph Holt, the command again devolving upon Col. Delafield.

| "             | Baron Charles de Lederer.          | 1868 | "             | Dr. K. Theodor Dumba, amb.        | 1912 |
| "             | Baron von Schwartz Senborn.        | 1874 | "             | Count Adam von Tarnow Tar-        |      |
| "             | Count Ladislaus Hoyos.             | 1875 | "             | nowski, amb.                      | 1916 |
| "             | Chev. E. S. von Tavera, ch. d'aff. | 1877 | Republic.     | E. L. G. Prochnik, ch. d'aff.     | 1922 |

Dumba was recalled in 1915.

On the separation of Austria and Hungary and the return of peace, the United States sent and received separate envoys in the cases of the Republic of Austria and the Kingdom of Hungary, Albert H. Washburn being the first United States Minister to Austria, and Theodore Brentano the first to Hungary, which latter country has sent as its first Minister to the United States, Count Laszlo Szechenyi.

## IS THIS A RECORD PASSAGE?

The following log of a voyage of the steamship Santa Catalina, from New York to San Francisco, in 1914, by way of the Strait of Magellan, is compiled from the records of the owners of the ship, W. R. Grace & Co., of New York. The log of a trip in the same year over the same route by the steamship Santa Cruz, owned by the same firm, is also here presented. These two records are to be compared with others which will be found on page 723.

Steamship Santa Catalina—Sailed from New York April 13th, 1914, at 7 A. M., arriving at San Pedro, May 27th, 9.40 P. M., with a total steaming time of 44 days, 14 hrs. and 40 min., and covering a total mileage of 12,649 miles, thus giving an average of 11.8 nautical miles per hour. She left San Pedro May 29th, at 12.25 P. M., arriving in San Fran-

cisco May 30th, at 7.35 P. M., steaming time being 1 day, 7 hrs. and 10 min. The total time from New York to San Francisco, via San Pedro, being 45 days, 21 hrs. and 50 min., covering a total distance of 12,929 miles or an average of 11.8 miles per hour.

Steamship Santa Cruz—Sailed from New York January 28th, 1914, 4.55 P. M., arrived at San Pedro March 16th, 8.50 P. M. Total sailing time 47 days, 3 hrs. and 55 min. The log books indicate a distance of 12,819 miles, thus giving this vessel an average of 11.3 nautical miles per hour. She sailed from San Pedro March 17th, 5 P. M. and arrived in San Francisco March 19th at 12.50 A. M., this being the steaming time of 1 day, 19 h. s. and 50 min. Thus the entire voyage from New York to San Francisco, via San Pedro, was 48 days, 23 hrs. and 45 min., covering a total distance of 13,042 miles or an average of 11.1 miles per hour.

## FORM OF ADDRESS FOR PERSONS OF RANK.

An Emperor is to be addressed, in a letter, as "Sire," or "Your Imperial Majesty."

A King or Queen is to be addressed, in a letter, as "Sire" (or "Madam"), or "Your Majesty." The envelope is to be addressed, "The King's (or Queen's) Most Excellent Majesty."

Princes and Princesses, and other persons of royal blood, are addressed as "His (or Her) Royal Highness." Here, as in the cases above, a letter may begin "May it please," following with the words "Your Majesty" or "Your Royal Highness." "May it please" goes well at the start of any letter.

A Duke or Marquis is "My Lord Duke" (or "Marquis"), a Duke is "His (or Your) Grace." A Marquis is also "My Lord," or "Your Lordship."

An Earl or a Baron is "My Lord," or "Your Lordship," as "the Right Honorable."

A Viscount is "the Right Honorable."

A Baronet or a Knight is "Sir."

Wives of any peer may be addressed as "Madam," with the further alternative of "Your Ladyship," or "Your Grace," if she is of high rank. Women of peers may be addressed also as "the Right Honorable," or "the Honorable," according to the rank.

The wife of an Earl is a Countess.

A Cardinal is "Your" (or "His") Eminence." An Archbishop is "My Lord," or "His Grace." A Bishop is "My Lord." An Archdeacon is "Venerable Sir."

An Ambassador is "Your Excellency." A Minister Plenipotentiary is "Sir."

## WHEAT, LAND AND POPULATION.

(By the United States Department of Agriculture.)

That wheat consumption was overtaking wheat production, both per capita, after 1875-1894, is indicated by the last column of the accompanying table down to the World War period, during a portion of which period wheat production was specially stimulated. It may be suspected that the high percentage of the wheat crop going into consumption in 1866-1875 is due to underestimation of the production at a time when it was impossible for estimation to keep up with the expanding production on new land.

The crust of the problem of the production of wheat in relation to population is found in the per capita production per acre. Although it is known

that wheat yield per acre has been increasing in the United States for many years, it is not so well known that population has been gaining at a faster rate and that this fact has had to be counterbalanced, more or less, by taking more acreage into the national wheat field. This remedy cannot be continued indefinitely. Diminished immigration and a diminishing birth rate, with some help from increasing yield per acre, are apparently the only factors of the problem that may prevent a partial dependence on the country on imported wheat at some future time.

The total wheat production on which the per capita production of the accompanying table is based is partly the result of adjusting the department's estimates of wheat acreage for each year.

## PRODUCTION AND CONSUMPTION OF WHEAT IN THE UNITED STATES.

| PERIOD BEGINNING WITH JULY. | PRODUCTION. |                             | CONSUMPTION. |                     | PERIOD BEGINNING WITH JULY. | PRODUCTION. |                             | CONSUMPTION. |                     |

NOTE—Carry-over not taken into the reckoning, but the error is not perceptible in the groups of years.

## GIANT STAR BETELGEUSE NOT AS BIG AS IT LOOKS?

The bigness of Betelgeuse does not lie in its body but in the immense extent of the luminous atmosphere which surrounds it, according to the theory advanced by M. Verronet, the astronomer of the Strasburg Observatory, July 25, 1922, at the Congress for the Advancement of Science at Montpellier, France.

M. Verronet stated that no star as big as Betelgeuse could exist in a solid mass. According to the measurements of Professor Michelson at Mt. Wilson Observatory, it is 300 times greater in diameter than the sun, with a circumference greater than the whole orbit of the earth, whereas Sirius, the most brilliant normal star in the sky, is only twice as big as the sun.

M. Verronet cited measurements of other giant stars, such as Antares, which has forty times the diameter of the sun, in support of his theory. The established laws, he said, did not admit an explanation of the physical equilibrium of these giant

stars, and he quoted determined laws of correlation, mass and temperature to show that in no case could one of these giant stars exceed in actual mass two or three times the size of the sun.

What gave them their gigantic appearance, he said, was that their mass was surrounded by an immense luminous envelope forming a photosphere. Something analogous to this envelope, but much less brilliant, was to be found in the sun's corona. If an effulgent photosphere stretched beyond the sun's atmosphere at the level of the corona, something like a giant star of the Betelgeuse kind would be produced. But to produce this effect the sun's superficial heat would have to be raised to 300,000 degrees. An outside stable envelope with diameter equal to 300 times that of the sun would then be formed.

Ultimately, says M. Verronet, these giant stars become normal as their envelopes contract with the decline of heat, turning successively yellow and blue.

## Washington Arms Conference; Treaties.

IN pursuance of a resolution of Congress (passed by the Senate, May 26, 1921, and by the House, June 29) calling for an International Conference on Armament Limitation. President Harding, after informally sounding the big powers and finding them agreeable, sent forth, on Aug. 11, 1921, the formal call for the Conference, on the part of the United States to the British Empire, Belgium, China, France, Italy, Japan, Netherlands, and Portugal. The opening was set for Nov. 11, 1921 (Armistice Day), at Washington, but, owing to the burial of America's unknown soldier on that day at Arlington, Va., National Cemetery, just outside the Capital, the formal sessions did not begin until Nov. 12. For further details including the speeches, etc., see the 1922 WORLD ALMANAC.

The agenda of official U. S. programme for the Conference, was as follows:

## AGENDA.

1. Limitation of naval armament; basis of limitation; extent of limitation; fulfilment of conditions.
2. Rules for control of new agencies of warfare.
3. Limitation of land armament.
- Pacific and Far-Eastern questions:
  - a. Questions relating to China; principles to be applied.
  - b. Application to subjects.
    - A. Territorial integrity.
    - B. Administrative integrity.
  - c. Open door; equality of administrative and industrial opportunity.
  - d. Concessions, monopolies and other economic privileges.
  - e. Development of railways.
  - f. Preferential railroad rates.
  - g. Status of existing commitments.
- Questions relating to Siberia; similar to questions relating to China.
3. Mandated islands.

Japan at first raised some objection to the consideration of her interests in the Far East, but later agreed to the agenda.

## DELEGATES PLENIPOTENTIARY TO THE CONFERENCE.

## United States.

Secretary of State Charles E. Hughes, *Chairman of the Conference*; U. S. Senator Henry Cabot Lodge of Mass., ex-Secretary of State Elihu Root, of N. Y.; U. S. Senator Oscar W. Underwood, of Ala.

## Belgium.

Ambassador to the U. S. Baron de Cartier.

## British Empire.

Great Britain—Premier David Lloyd George (unable to attend), Lord President of the Council, Right Hon. A. J. Balfour; Right Hon. Lord Lee of Fareham; Ambassador to the U. S., Sir Auckland Geddes.

Canada—Right Hon. Sir Robert Borden.

Australia—Minister for Defense, Hon. G. F. Pearce.

New Zealand—Judge Sir John Salmond.

India—Right Hon. Srinivasa Sastri.

## China.

Minister to the U. S., Mr. Sao-Ke Alfred Sze; Minister to Great Britain, Mr. V. K. Wellington Koo; Chief Justice Chung-Hui Wang; Mr. Chao-Chu Wu.

## France.

Premier Aristide Briand; ex-Premier Rene Viviani; Minister of Colonies, M. Albert Sarraut; Ambassador to the U. S., M. Jules Jusserand.

## Italy.

Senator Carlo Schanzer; Ambassador to the U. S., Vittorio Rolandi-Rice; Senator Luigi Albertini; Representative Filippo Meda.

## Japan.

Minister of the Navy, Baron Tomosaburo Kato; Ambassador to the U. S., Baron Kijuro Shidehara; Pres. of the House of Peers, Prince Iyesato Tokugawa; Vice Minister for Foreign Affairs, Mr. Masanao Hanihara.

## Netherlands.

Foreign Minister Jonkheer H. A. van Karnebeek; Jonkheer F. Beelaerts van Blokland; Dr. E. Moresoe. Alternate delegates—Minister to the U. S., Dr. J. C. A. Everwijn; Jonkheer W. H. de Beaufort.

## Portugal.

Minister to the U. S., Viscount d'Alte; Capt. E. de Vasconcellos.

Secretariat General of the Conference—John W. Garrett.

The Advisory Committee of the U. S. delegates was composed of: *Chairman*, George Sutherland; Charles S. Barrett, Mrs. Charles Sumner Bird, Mrs. Katherine Phillips Edson, Mrs. Eleanor Franklin Egan, Under Sec. of State Henry P. Fletcher, Samuel Compers, Sec. of Commerce Herbert C. Hoover,

John L. Lewis, Gov. John M. Parker of La., Gen. John J. Pershing, Congressman Stephen G. Porter, Rear Admiral W. L. Rodgers, Asst. Sec. of the Navy Theodore Roosevelt, Willard Saulsbury, Harold M. Sewall, Walter George Smith, Carmi A. Thompson, William Ayres Thompson, Asst. Sec. of War J. Mayhew Walwright, and Mrs. Thomas C. Winter.

The Conference ended on Feb. 6, 1922, and on Feb. 10, President Harding submitted to the Senate these treaties negotiated at the Conference:

The covenant of limitation to naval armament between the United States, the British Empire, France, Italy, and Japan.

The treaty between the same powers in relation to the use of submarines and noxious gases in warfare.

The treaty between the United States, the British Empire, France, and Japan relating to their insular possessions and their insular dominions in the Pacific.

A declaration accompanying the four-power treaty recognizing American rights in mandated territory.

An agreement supplementary to the four-power treaty defining the application of the term "insular possessions and insular dominions" as relating to Japan.

A treaty between the nine powers in the conference relating to principles and policies to be followed in matters concerning China.

A treaty between the nine powers relating to Chinese customs tariff.

France declined to consider land armament reduction, and that part of the Agenda fell through.

## NO ALLIANCE IN THE TREATIES,

SAYS HARDING.

In submitting the treaties to the Senate President Harding said: "I can bring you every assurance that nothing in any of these treaties commits the United States, or any other power, to any kind of an alliance, entanglement, or involvement. It does not require us to any power to surrender a worthwhile tradition. It has been said, if this be true, these are mere meaningless treaties, and therefore valueless. Let us accept no such doctrine of despair as that. If nations may not establish by mutual understanding the rules and principles which are to govern their relationship; if a sovereign and solemn plight of faith by leading nations of the earth is valueless; if nations may not trust one another, then, indeed, there is little on which to hang our faith in advancing civilization or the furtherance of peace. Either we must live and aspire and achieve under a free and common understanding among peoples, with mutual trust, respect, and forbearance, and exercising full sovereignty, or else brutal, armed force will dominate, and the sorrows and burdens of war in this decade will be turned to the chaos and hopelessness of the next."

As to the Pacific treaty he said: "We crave peace there as we do on the continent, and we should be remiss in performing a national duty if we did not covenant the relations which tend to guarantee it. For more than a half century we have had a part in influencing the affairs of the Pacific, and our present proposed commitments are not materially different in character, nor materially greater in extent, though fraught with vastly less danger, than our undertakings in the past."

"We have convinced the on-looking and interested powers that we covet the possessions of no other power in the Far East, and we know for ourselves that we crave no further or greater governmental or territorial responsibilities there. Contemplating what is admittedly ours, and mindful of a long-time and reciprocal friendship with China, we do wish the opportunity to continue the development of our trade peacefully, and on equality with other nations, to strengthen our ties of friendship, and to make sure the righteous and just relationships of peace. Holding the possessions we do, entertaining these views, and confessing these ambitions, why should we not make reciprocal engagements to respect the territory of others and contract their respect of ours, and thus quiet apprehension and put an end to suspicion?"

"There has been concern. There has been apprehension of territorial greed, a most fruitful cause of war. The conference has dissipated both, and your ratification of the covenants made will stabilize a peace for the breaking of which there is not a shadow of reason or real excuse. We shall not have less than before. No one of us shall have less than before. There is no narrowed liberty, no hampered independence, no shattered sovereignty, no added obligation. We will have new assurances, new freedom from anxiety, and new manifestations of the sincerity of our own intentions; a new demonstration of that honesty which proclaims a righteous and powerful republic. I am ready to assume the sincerity and the dependability of the assurances of our neighbors of the Old World that they will respect our rights, just as I know we mean to respect theirs."

## TREATY ON LIMITATION OF NAVAL ARMAMENT.

FOLLOWING is the text of the Limitation of Naval Armament Treaty, between the United States, the British Empire, France, Italy, and Japan, ratified by the United States Senate (74 to 1—France of Maryland), on March 29, 1922; ratified on the part of Japan by the Prince Regent, on Aug. 5, 1922; ratified by Britain, by the King's assent, on Aug. 19, 1922. Previously, on August 9, ratifications were agreed to by Canada, India, and the Union of South Africa.

Up to Dec. 1, 1922, neither France nor Italy had ratified the treaties providing for the reduction of naval armament. Unofficial announcement, however, had been made by both Premier Poincaré, of France, and Premier Mussolini, of Italy, that the treaty would surely be ratified. Premier Wang Chung Hui announced in Peking on November 6 that the nine Washington Conference treaties affecting China had been sent to the Chinese Parliament and were certain to be ratified shortly.

## CHAPTER I.

*General provisions relating to the limitation of naval armament.*

ARTICLE I.—The contracting powers agree to limit their respective naval armament as provided in the present treaty.

ARTICLE II.—The contracting powers may retain, respectively, the capital ships which are specified in Chapter II, part 1. On the coming into force of the present treaty, but subject to the following provisions of this article, all other capital ships, built or building, of the United States, the British Empire and Japan shall be disposed of as prescribed in Chapter II, part 2.

In addition to the capital ships specified in Chapter II, part 1, the United States may complete and retain two ships of the West Virginia class now under construction. On the completion of these two ships the North Dakota and Delaware shall be disposed of as prescribed in Chapter II, part 2.

The British Empire may, in accordance with the replacement table in Chapter II, part 3, construct two new capital ships not exceeding 35,000 tons (35,560 metric tons) standard displacement each. On the completion of the said two ships, the Thunderer, King George V., Ajax, and Centurion shall be disposed of as prescribed in Chapter II, part 2.

ARTICLE III.—Subject to the provisions of Article II, the contracting powers shall abandon their respective capital ship building programmes, and no new capital ships shall be constructed or acquired by any of the contracting powers except replacement tonnage which may be constructed or acquired as specified in Chapter II, part 3.

Ships which are replaced in accordance with Chapter II, part 3, shall be disposed of as prescribed in part 2 of that chapter.

ARTICLE IV.—The total capital ship replacement tonnage of each of the contracting powers shall not exceed in standard displacement, for the United States, 525,000 tons (533,400 metric tons); for the British Empire, 525,000 tons (533,400 metric tons); for France, 175,000 tons (177,800 metric tons); for Italy, 175,000 tons (177,800 metric tons); for Japan, 315,000 tons (320,040 metric tons).

ARTICLE V.—No capital ship exceeding 35,000 tons (35,560 metric tons) standard displacement shall be acquired by, or constructed by, for, or within the jurisdiction of, any of the contracting powers.

ARTICLE VI.—No capital ship of any of the contracting powers shall carry a gun with a caliber in excess of 16 inches (407 millimeters).

ARTICLE VII.—The total tonnage for aircraft carriers of each of the contracting powers shall not exceed in standard displacement, for the United States 135,000 tons (137,160 metric tons); for the British Empire 135,000 tons (137,160 metric tons); for France 60,000 tons (60,960 metric tons); for Italy 60,000 tons (60,960 metric tons); for Japan 81,000 tons (82,296 metric tons).

ARTICLE VIII.—The replacement of aircraft carriers shall be effected only as prescribed in Chapter II, part 3, provided, however, that all aircraft carrier tonnage in existence or building on Nov. 12, 1921, shall be considered experimental, and may be replaced, within the total tonnage limit prescribed in Article VII, without regard to its age.

ARTICLE IX.—No aircraft carrier exceeding 27,000 tons (27,432 metric tons) standard displacement shall be acquired by, or constructed by, for, or within the jurisdiction of, any of the contracting powers.

However, any of the contracting powers may, provided that its total tonnage allowance of aircraft carriers is not thereby exceeded, build not more than two aircraft carriers, each of a tonnage of not more than 33,000 tons (33,528 metric tons) standard displacement, and in order to effect economy any of the contracting powers may use for this purpose any two of their ships, whether constructed or in course of construction, which would otherwise be scrapped under the provisions of Article I. The armament of any aircraft carriers exceeding 27,000 tons (27,432 metric tons) standard displacement shall be in accordance with the requirements of Article X., except that the total number of guns to be carried in case any of such guns be of a caliber exceeding 6 inches (152 millimeters), except anti-aircraft guns and guns not exceeding 5 inches (127 millimeters), shall not exceed eight.

ARTICLE X.—No aircraft carrier of any of the contracting powers shall carry a gun with a caliber in excess of 8 inches (203 millimeters). Without prejudice to the provisions of Article IX., if the armament carried includes guns exceeding 6 inches (152 millimeters) in caliber the total number of guns carried, except anti-aircraft guns and guns not exceeding 5 inches (127 millimeters), shall not exceed 10. If alternatively the armament contains no guns exceeding 6 inches (152 millimeters) in caliber, the number of guns is not limited. In either case the number of anti-aircraft guns and of guns not exceeding 5 inches (127 millimeters) is not limited.

ARTICLE XI.—No vessel of war exceeding 10,000 tons (10,160 metric tons) standard displacement, other than a capital ship or aircraft carrier, shall be acquired by, or constructed by, for, or within the jurisdiction of, any of the contracting powers. Vessels not specifically built as fighting ships nor taken in time of peace under government control for fighting purposes, which are employed on fleet duties or as troop transports or in some other way for the purpose of assisting in the prosecution of hostilities otherwise than as fighting ships, shall not be within the limitations of this article.

ARTICLE XII.—No vessel of war of any of the contracting powers hereafter laid down, other than a capital ship, shall carry a gun with a caliber in excess of 8 inches (203 millimeters).

ARTICLE XIII.—Except as provided in Article IX., no ship designated in the present treaty to be scrapped may be reconverted into a vessel of war.

ARTICLE XIV.—No preparations shall be made in merchant ships in time of peace for the installation of warlike armaments for the purpose of converting such ships into vessels of war, other than the necessary stiffening of decks for the mounting of guns not exceeding 6 inch (152 millimeters) caliber.

ARTICLE XV.—No vessel of war constructed within the jurisdiction of any of the contracting powers for a non-contracting power shall exceed the limitations as to displacement and armament prescribed by the present treaty for vessels of a similar type which may be constructed by or for any of the contracting powers. Provided, however, that the displacement for aircraft carriers constructed for a non-contracting power shall in no case exceed 27,000 tons (27,432 metric tons) standard displacement.

ARTICLE XVI.—If the construction of any vessel of war for a non-contracting power is undertaken within the jurisdiction of any of the contracting powers, such power shall promptly inform the other contracting powers of the date of the signing of the contract and the date on which the keel of the ship is laid; and shall also communicate to them the particulars relating to the ship prescribed in Chapter II, part 3, section 1 (b), (4) and (5).

ARTICLE XVII.—In the event of a contracting power being engaged in war, such power shall not use as a vessel of war any vessel of war which may be under construction within its jurisdiction for any other power, or which may have been constructed within its jurisdiction for another power and not delivered.

ARTICLE XVIII.—Each of the contracting powers undertakes not to dispose by gift, sale or any mode of transfer of any vessel of war in such a manner that such vessel may become a vessel of war in the navy of any foreign power.

ARTICLE XIX.—The United States, the British Empire, and Japan agree that the status quo at the time of the signing of the present treaty, with regard to fortifications and naval bases, shall be maintained in their respective territories and possessions specified hereunder:

(1) The insular possessions which the United States now holds or may hereafter acquire in the Pacific Ocean, except (a) those adjacent to the coast of the United States, Alaska, and the Panama Canal Zone, not including the Aleutian Islands, and (b) the Hawaiian Islands.

(2) Hongkong and the insular possessions which the British Empire now holds or may hereafter acquire in the Pacific Ocean, east of the meridian of 110° east longitude, except (a) those adjacent to the coast of Canada, (b) the Commonwealth of Australia and its territories, and (c) New Zealand.

(3) The following insular territories and possessions of Japan in the Pacific Ocean, to wit, the Kurile Islands, the Bonin Islands, Amami-Oshima, the

Loochoo Islands, Formosa, and the Pescadores, and any insular territories or possessions in the Pacific Ocean which Japan may hereafter acquire.

The maintenance of the status quo under the foregoing provisions implies that no new fortifications or naval bases shall be established in the territories and possessions specified; that no measures shall be taken to increase the existing naval facilities for the repair and maintenance of naval forces, and that no increase shall be made in the coast defenses of the territories and possessions above specified. This restriction, however, does not preclude such repair and replacement of worn-out weapons and equipment as is customary in naval and military establishments in time of peace.

ARTICLE XX.—The rules for determining tonnage displacer prescribed in Chapter II., part 4, shall apply to the ships of each of the contracting powers.

#### CHAPTER II.

##### *Rules relating to the execution of the treaty— Definition of terms.*

PART 1—Capital Ships Which May be Retained by the Contracting Powers.—In accordance with Article II. ships may be retained by each of the contracting powers as specified in this part.

*Ships which may be retained by the United States.*

| NAME.             | Tonnage. | NAME.              | Tonnage. |

PART 2—Rules for Scrapping Vessels of War.—The following rules shall be observed for the scrapping of vessels of war which are to be disposed of in accordance with Articles II. and III.:

I. A vessel to be scrapped must be placed in such condition that it can not be put to combatant use.

II. This result must be finally effected in any one of the following ways:

(a) Permanent sinking of the vessel.  
(b) Breaking the vessel up. This shall always involve the destruction or removal of all machinery, boilers, and armor, and all deck, side, and bottom plating.

(c) Converting the vessel to target use exclusively. In such case all the provisions of Paragraph III. of this part, except subparagraph (6), in so far as may be necessary to enable the ship to be used as a mobile target, and except subparagraph (7), must be previously complied with. Not more than one capital ship may be retained for this purpose at one time by any of the contracting powers.

(d) Of the capital ships which would otherwise be scrapped under the present treaty in or after the year 1931, France and Italy may each retain two seagoing vessels for training purposes exclusively, that is as gunnery or torpedo schools. The two vessels retained by France shall be of the Jean Bart class, and of those retained by Italy one shall be the Dante Alighieri, the other of the Giulio Cesare class. On retaining these ships for the purpose above stated, France and Italy, respectively, undertake to remove and destroy their conning towers, and not to use the said ships as vessels of war.

III. (a) Subject to the special exceptions contained in Article IX., when a vessel is due for scrapping, the first stage of scrapping, which consists in rendering a ship incapable of further warlike service, shall be immediately undertaken.

(b) Vessels shall be considered incapable of further warlike service when there shall have been removed and landed, or else destroyed in the ship—

(1) All guns and essential portions of guns, fire-control tops, and revolving parts of all barbettes and turrets;

(2) All machinery for working hydraulic or electric mountings;

(3) All fire-control instruments and range finders;

(4) All ammunition, explosives, and mines;

(5) All torpedoes, warheads, and torpedo tubes;

(6) All wireless telegraphy installations;

(7) The conning tower and all side armor, or alternately all main propelling machinery; and

(8) All landing and flying-off platforms, and all other aviation accessories.

IV. The periods in which scrapping of vessels is to be effected are as follows:

(a) In the case of vessels to be scrapped under the first paragraph of Article II., the work of rendering the vessels incapable of further warlike service, in accordance with paragraph 3 of this part, shall be completed within six months from the coming into force of the present treaty, and the scrapping shall be finally effected within 18 months from such coming into force.

(b) In the case of vessels to be scrapped under the second and third paragraphs of Article II., or under Article III., the work of rendering the vessel incapable of further warlike service in accordance with paragraph 3 of this part shall be commenced not later than the date of completion of its successor, and shall be finished within six months from the date of such completion. The vessel shall be finally scrapped, in accordance with paragraph 2 of this part, within 18 months from the date of completion of its successor. If, however, the completion of the new vessel be delayed, then the work of rendering the old vessel incapable of further warlike service in accordance with paragraph 3 of this part shall be commenced within four years from the laying of the keel of the new vessel, and shall be finished within six months from the date on which such work was commenced, and the old vessel shall be finally scrapped in accordance with paragraph 2 of this part within 18 months from the date when the work of rendering it incapable of further warlike service was commenced.

PART 3—Replacement.—The replacement of capital ships and aircraft carriers shall take place according to the rules in section 1 and the tables in section 2 of this part.

SECTION I.—Rules for Replacement.—(a) Capital ships and aircraft carriers 20 years after the date of their completion may, except as otherwise provided in Article VIII. and in the table in section II. of this part, be replaced by new construction, but within the limits prescribed in Article IV. and Article VII. The keels of such new construction may, except as otherwise provided in Article VIII. and in the tables in section II. of this part, be laid down not earlier than 17 years from the date of completion of the tonnage to be replaced, provided, however, that no

capital ship tonnage, with the exception of the ships referred to in the third paragraph of Article II., and the replacement tonnage specifically mentioned in section II. of this part, shall be laid down until 10 years from Nov. 12, 1921.

(b) Each of the contracting powers shall communicate promptly to each of the other contracting powers the following information:

(1) The names of the capital ships and aircraft carriers to be replaced by new construction.

(2) The date of governmental authorization of replacement tonnage.

(3) The date of laying the keels of replacement tonnage.

(4) The standard displacement in tons and metric tons of each new ship to be laid down, and the principal dimensions, namely, length at waterline, extreme beam at or below waterline, mean draft at standard displacement.

(5) The date of completion of each new ship and its standard displacement in tons and metric tons, and the principal dimensions, namely, length at waterline, extreme beam at or below waterline, mean draft at standard displacement, at time of completion.

(c) In case of loss or accidental destruction of

capital ships or aircraft carriers, they may immediately be replaced by new construction subject to the tonnage limits prescribed in Articles IV. and VII. and in conformity with the other provisions of the present treaty, the regular replacement programme being deemed to be advanced to that extent.

(d) No retained capital ships or aircraft carriers shall be reconstructed except for the purpose of providing means of defense against air and submarine attack, and subject to the following rules: The contracting powers may, for that purpose, equip existing tonnage with bulge or blister or anti-air attack deck protection, providing the increase of displacement thus effected does not exceed 3,000 tons (3,048 metric tons) displacement for each ship. No alterations in side armor, in caliber, number or general type of mounting of main armament shall be permitted except—

(1) In the case of France and Italy, which countries within the limits allowed for bulge may increase their armor protection and the caliber of the guns now carried on their existing capital ships so as not to exceed 16 inches (406 millimeters) and

(2) The British Empire shall be permitted to complete, in the case of the Renown, alterations to armor already commenced but temporarily suspended.

## SECTION II.—Replacement and Scrapping of Capital Ships.

### UNITED STATES.

| YR.  | Ships Laid Down | Ships Completed | Ships Scrapped (Age in Parentheses).                                                                                                                                                                                                                                                                                                                                                                                                                           | SHIPS RETAINED. |               | YR.  | Ships Laid Down | Ships Completed | Ships Scrapped (Age in Parentheses).                                             | SHIPS RETAINED. |               |

\* Within tonnage limitations; number not fixed.  
 Note—Italy expressly reserves the right of employing the capital ship tonnage allotment as she may consider advisable, subject solely to the limitations that the displacement of individual ships should not surpass 35,000 tons, and the total capital ship tonnage should keep within the limits imposed by the present treaty.

## Standard Displacement.

The standard displacement of a ship is the displacement of the ship complete, fully manned, equipped, and equipped ready for sea, including all armament and ammunition, equipment, outfit, provisions and fresh water for crew, miscellaneous stores and implements of every description that are intended to be carried in war, but without fuel or reserve feed water on board.

The word "ton" in the present treaty, except in the expression "metric tons," shall be understood to mean the ton of 2,240 pounds (1,016 kilos).

Vessels now completed shall retain their present ratings of displacement tonnage in accordance with their national system of measurement. However, a power expressing displacement in metric tons shall be considered for the application of the present treaty as owning only the equivalent displacement in tons of 2,240 pounds.

A vessel completed hereafter shall be rated at its displacement tonnage when in the standard condition defined herein.

\* Japan may retain the Shikishima and Asahi for noncombatant purposes, after complying with the provisions of Part 2, III. (b).

NOTE—A, B, C, D, etc., represent individual capital ships of 35,000 tons standard displacement, laid down and completed in the years specified.

## CHAPTER III.

## Miscellaneous Provisions.

ARTICLE XXI.—If during the term of the present treaty the requirements of the national security of any contracting power in respect of naval defense are, in the opinion of that power, materially affected by any change of circumstances, the contracting powers will, at the request of such power, meet in conference with a view to the reconsideration of the provisions of the treaty and its amendment by mutual agreement.

In view of possible technical and scientific developments the United States, after consultation with the other contracting powers, shall arrange for a conference of all the contracting powers which shall convene as soon as possible after the expiration of eight years from the coming into force of the present treaty to consider what changes, if any, in the treaty may be necessary to meet such developments.

ARTICLE XXII.—Whenever any contracting power shall become engaged in a war which in its opinion affects the naval defense of its national security, such power may after notice to the other contracting powers suspend for the period of hostilities its obligations under the present treaty other than those under Articles XIII and XVII, provided that such power shall notify the other contracting powers that the emergency is of such a character as to require such suspension.

The remaining contracting powers shall in such case consult together with a view to agreement as to what temporary notifications, if any, should be made in the treaty as between themselves. Should such consultation not produce agreement, duly made in accordance with the constitutional methods of the respective powers, any one of said contracting powers may, by giving notice to the other contracting powers, suspend for the period of hostilities its obligations under the present treaty, other than those under Articles XIII and XVII.

On the cessation of hostilities the contracting powers will meet in conference to consider what modifications, if any, should be made in the provisions of the present treaty.

ARTICLE XXIII.—The present treaty shall remain in force until Dec. 31, 1936, and in case none of the contracting powers shall have given notice two years before that date of its intention to terminate the treaty it shall continue in force until

the expiration of two years from the date on which notice of termination shall be given by one of the contracting powers, whereupon the treaty shall terminate as regards all the contracting powers. Such notice shall be communicated in writing to the Government of the United States, which shall immediately transmit a certified copy of the notification to the other powers and inform them of the date on which it was received. The notice shall be deemed to have been given and shall take effect on that date. In the event of notice of termination being given by the Government of the United States, such notice shall be given to the diplomatic representatives at Washington of the other contracting powers, and the notice shall be deemed to have been given and shall take effect on the date of the communication made to the said diplomatic representatives.

Within one year of the date on which a notice of termination by any power has taken effect, all the contracting powers shall meet in conference.

#### CAPITAL SHIP STRENGTH AS DETERMINED BY THE ARMAMENT CONFERENCE.

(Displacement-Efficiency in Last Column Estimated on 20-Year Life Assigned by Conference.)

#### TREATY LIMITING SUBMARINES AND NOXIOUS CASES.

(Signed by the Arms Conference delegates from the U. S., British Empire, France, Italy, and Japan, on Feb. 6, 1922.) Ratified by the U. S. Senate, March 29, 1922.

ARTICLE I.—The signatory powers declare that among the rules adopted by civilized nations for the protection of the lives of neutrals and noncombatants at sea in time of war, the following are to be deemed an established part of international law:

(1) A merchant vessel must be ordered to submit to visit and search to determine its character before it can be seized.

A merchant vessel must not be attacked unless it refuse to submit to visit and search after warning, or to proceed as directed after seizure.

A merchant vessel must not be destroyed unless the crew and passengers have been first placed in safety.

(2) Belligerent submarines are not under any circumstances exempt from the universal rules above

stated; and if a submarine can not capture a merchant vessel in conformity with these rules the existing law of nations requires it to desist from attack and from seizure and to permit the merchant vessel to proceed unmolested.

**ARTICLE II.**—The signatory powers invite all other civilized powers to express their assent to the foregoing statement of established law so that there may be a clear public understanding throughout the world of the standards of conduct by which the public opinion of the world is to pass judgment upon future belligerents.

**ARTICLE III.**—The signatory powers, desiring to insure the enforcement of the humane rules of existing law declared by them with respect to attacks upon and the seizure and destruction of merchant ships, further declare that any person in the service of any power who shall violate any of those rules, whether or not such person is under orders of a governmental superior, shall be deemed to have violated the laws of war and shall be liable to trial and punishment as if for an act of piracy and may be brought to trial before the civil or military authorities of any power within the jurisdiction of which he may be found.

**ARTICLE IV.**—The signatory powers recognize the practical impossibility of using submarines as commerce destroyers without violating, as they were violated in the recent war of 1914-1918, the requirements universally accepted by civilized nations for the protection of the lives of neutrals and non-combatants, and to the end that the prohibition of the use of submarines as commerce destroyers shall be universally accepted as a part of the law of nations they now accept that prohibition as henceforth binding as between themselves and they invite all other nations to adhere thereto.

**ARTICLE V.**—The use in war of asphyxiating,

poisonous, or other gases, and all analogous liquids, materials, or devices, having been justly condemned by the general opinion of the civilized world and a prohibition of such use having been declared in treaties to which a majority of the civilized powers are parties.

The signatory powers, to the end that this prohibition shall be universally accepted as a part of international law binding alike the conscience and practice of nations, declare their assent to such prohibition, agree to be bound thereby as between themselves and invite all other civilized nations to adhere thereto.

**ARTICLE VI.**—The present treaty shall be ratified as soon as possible in accordance with the constitutional methods of the signatory powers and shall take effect on the deposit of all the ratifications, which shall take place at Washington.

The Government of the United States will transmit to all the signatory powers a certified copy of the procès-verbal of the deposit of ratifications.

The present treaty, of which the French and English texts are both authentic, shall remain deposited in the archives of the Government of the United States, and duly certified copies thereof will be transmitted by that Government to each of the signatory powers.

**ARTICLE VII.**—The Government of the United States will further transmit to each of the non-signatory powers a duly certified copy of the present treaty and invite its adherence thereto.

Any non-signatory power may adhere to the present treaty by communicating an instrument of adherence to the Government of the United States, which will thereupon transmit to each of the signatory and adhering powers a certified copy of each instrument of adherence.

#### FOUR-POWER PACIFIC TREATY.

The United States Senate, on March 24-27, 1922, ratified, by a vote of 67 to 27, the Four-Power Pacific Treaty between the United States, the British Empire, France, Italy, and Japan. The Senate also adopted reservations to the treaty. Following are the full text of the treaty and the reservations, the former being in practically the identical language of the agreement signed Dec. 13, 1921, at Washington, by the Four-Power delegates to the Conference on Limitation of Armament.

##### *Four-Power Treaty.*

The United States of America, the British Empire, France and Japan, with a view to the preservation of the general peace and the maintenance of their rights in relation to their insular possessions and insular dominions in the regions of the Pacific Ocean, have determined to conclude a treaty to this effect and have appointed as their plenipotentiaries:

The President of the United States; His Majesty the King of the United Kingdom of Great Britain and Ireland, etc., and for the Dominion of Canada, for the Commonwealth of Australia, for the Dominion of New Zealand, for India; The President of the French Republic; His Majesty the Emperor of Japan;

Who having communicated their full powers, found in good and due form, have agreed as follows:

**ARTICLE I.**—The high contracting parties agree as between themselves to respect their rights in relation to their insular possessions and insular dominions in the region of the Pacific Ocean.

If there should develop between any of the high contracting parties a controversy arising out of any Pacific question and involving their said rights which is not satisfactorily settled by diplomacy and is likely to affect the harmonious accord now happily subsisting between them, they shall invite the other high contracting parties to a joint conference to which the whole subject will be referred for consideration and adjustment.

**ARTICLE II.**—If the said rights are threatened by the aggressive action of any other power the high contracting parties shall communicate with one another fully and frankly in order to arrive at an understanding as to the most efficient measures to be taken, jointly or separately, to meet the exigencies of the particular situation.

#### CHINESE POLICIES AND CUSTOMS TARIFF TREATIES.

The United States Senate, on March 30, 1922, ratified (66 to 0) a Treaty Concerning Chinese Principles and Policies, and also ratified (58 to 1—King of Utah) the Chinese Customs Tariff Treaty.

The first named treaty, between the United States, Belgium, the British Empire, China, France, Italy, Japan, the Netherlands, and Portugal, agreed on by the delegates, at Washington, on Feb. 6, 1922, is as follows:

##### TREATY ON CHINESE POLICIES.

**ARTICLE I.**—The contracting powers, other than China, agree:

(1) To respect the sovereignty, the independence, and the territorial and administrative integrity of China;

(2) To provide the fullest and most unembarrassed opportunity to China to develop and maintain for herself an effective and stable Government;

(3) To use their influence for the purpose of effectually establishing and maintaining the principle of equal opportunity for the commerce and

industry of all nations throughout the territory of China,

(4) To refrain from taking advantage of conditions in China in order to seek special rights or privileges which would abridge the rights of subjects or citizens of friendly States, and from countenancing action inimical to the security of such States.

**ARTICLE II.**—The contracting powers agree not to enter into any treaty, agreement, arrangement or understanding, either with one another, or, individually or collectively, with any power or powers,

**ARTICLE III.**—This treaty shall remain in force for ten years from the time it shall take effect, and after the expiration of said period it shall continue to be in force subject to the right of any of the high contracting parties to terminate it upon twelve months' notice.

**ARTICLE IV.**—This treaty shall be ratified as soon as possible in accordance with the constitutional methods of the high contracting parties and shall take effect on the deposit of ratifications, which shall take place at Washington, and thereupon the agreement between Great Britain and Japan, which was concluded at London on July 13, 1911, shall terminate.

(For the full text of the Anglo-Japanese treaty, see the 1922 ALMANAC.)

*Reservations to Four-Power Pacific Treaty.*

(Included in the Senate's ratification, March 24-27, 1922.)

**No. 1.**—(Signed Feb. 6, 1922, by the four-power delegates to the Arms Conference.)

The term "insular possessions and insular dominions" used in the aforesaid treaty shall, in its application to Japan, include only Karafuto (or the Southern portion of the island of Sakhalin), Formosa and the Pescadores, and the islands under the mandate of Japan. The present agreement shall have the same force and effect as the said treaty to which it is supplementary.

**No. 2.**—(Originated and passed by the U. S. Senate, March 27, 1922.)

The United States understands that under the statement in the preamble or under the terms of this treaty there is no commitment to armed force, no alliance, no obligation to join in any defense.

which would infringe or impair the principles stated in Article I.

ARTICLE III.—With a view to applying more effectually the principles of the open door or equality of opportunity in China for the trade and industry of all nations, the contracting powers, other than China, agree that they will not seek, nor support their respective nationals in seeking—

(a) Any arrangement which might purport to establish in favor of their interests any general superiority of rights with respect to commercial or economic development in any designated region of China.

(b) Any such monopoly or preference as would deprive the nationals of any other power of the right of undertaking any legitimate trade or industry in China, or of participating with the Chinese Government, or with any local authority, in any category of public enterprise, or which by reason of its scope, duration, or geographical extent is calculated to frustrate the practical application of the principle of equal opportunity.

It is understood that the foregoing stipulations of this article are not to be so construed as to prohibit the acquisition of such properties or rights as may be necessary to the conduct of a particular commercial, industrial, or financial undertaking or to the encouragement of invention and research.

China undertakes to be guided by the principles stated in the foregoing stipulations of this article in dealing with applications for economic rights and privileges from Governments and nationals of all foreign countries, whether parties to the present treaty or not.

ARTICLE IV.—The contracting powers agree not to support any agreements by their respective nationals with each other designed to create spheres of influence or to provide for the enjoyment of mutually exclusive opportunities in designated parts of Chinese territory.

ARTICLE V.—China agrees that, throughout the whole of the railways in China she will not exercise or permit unfair discrimination of any kind. In particular there shall be no discrimination whatever, direct or indirect, in respect of charges or of facilities on the ground of the nationality of passengers or the countries from which or to which they are proceeding, or the origin or ownership of goods or the country from which or to which they are consigned,

or the nationality or ownership of the ship or other means of conveying such passengers or goods before or after their transport on the Chinese railways.

The contracting powers, other than China, assume a corresponding obligation in respect of any of the aforesaid railways over which they or their nationals are in a position to exercise any control in virtue of any concession, special agreement or otherwise.

ARTICLE VI.—The contracting powers, other than China, agree fully to respect China's rights as a neutral in time of war to which China is not a party; and China declares that when she is a neutral she will observe the obligations of neutrality.

ARTICLE VII.—The contracting powers agree that whenever a situation arises which in the opinion of any one of them involves the application of the stipulations of the present treaty, and renders desirable discussion of such application, there shall be full and frank communication between the contracting powers concerned.

ARTICLE VIII.—Powers not signatory to the present treaty, which have governments recognized by the signatory powers and which have treaty relations with China, shall be invited to adhere to the present treaty. To this end the Government of the United States will make the necessary communications to non-signatory powers and will inform the contracting powers of the replies received. Adherence by any power shall become effective on receipt of notice thereof by the Government of the United States.

ARTICLE IX.—The present treaty shall be ratified by the contracting powers in accordance with their respective constitutional methods, and shall take effect on the date of the deposit of all the ratifications, which shall take place at Washington as soon as possible. The Government of the United States will transmit to the other contracting powers a certified copy of the procès-verbal of the deposit of ratifications.

The present treaty, of which the French and English texts are both authentic, shall remain deposited in the archives of the Government of the United States, and duly certified copies thereof shall be transmitted by that Government to the other contracting powers.

In faith whereof the above-named plenipotentiaries have signed the present treaty.

#### CHINESE CUSTOMS TARIFF TREATY.

The text of the Chinese Customs Tariff Treaty is as follows:

ARTICLE I.—The representatives of the contracting powers having adopted on the 4th day of February, 1922, in the city of Washington, a resolution, which is appended as an annex to this article, with respect to the revision of Chinese customs duties, for the purpose of making such duties equivalent to an effective 5 per cent. ad valorem, in accordance with existing treaties concluded by China with other nations, the contracting powers hereby confirm the said resolution and undertake to accept the tariff rates fixed as a result of such revision. The said tariff rates shall become effective as soon as possible, but not earlier than two months after publication thereof.

#### Annex.

With a view to providing additional revenue to meet the needs of the Chinese Government, the powers represented at this conference, namely, the United States of America, Belgium, the British Empire, China, France, Italy, Japan, the Netherlands, and Portugal, agree:

That the customs schedule of duties on imports into China adopted by the Tariff Revision Commission at Shanghai on Dec. 19, 1918, shall forthwith be revised so that the rates of duty shall be equivalent to 5 per cent. effective, as provided for in the several commercial treaties to which China is a party.

A revision commission shall meet at Shanghai, at the earliest practicable date, to effect this revision forthwith and on the general lines of the last revision.

This commission shall be composed of representatives of the powers above named and of representatives of any additional powers having Governments at present recognized by the powers represented at this conference, and who have treaties with China providing for a tariff on imports and exports not to exceed 5 per cent. ad valorem and who desire to participate therein.

The revision shall proceed as rapidly as possible with a view to its completion within four months from the date of the adoption of this resolution by the Conference on the Limitation of Armament and Pacific and Far Eastern Questions.

The revised tariff shall become effective as soon as possible, but not earlier than two months after its publication by the revision commission.

The Government of the United States, as convener of the present conference, is requested forthwith to communicate the terms of this resolution to the Governments of powers not represented at this con-

ference but who participated in the revision of 1918, aforesaid.

ARTICLE II.—Immediate steps shall be taken, through a special conference, to prepare the way for the speedy abolition of likin and for the fulfillment of the other conditions laid down in Article VIII. of the treaty of Sept. 5, 1902, between Great Britain and China; in Articles IV. and V. of the treaty of Oct. 8, 1903, between the United States and China; and in Article I. of the supplementary treaty of Oct. 8, 1903, between Japan and China, with a view to levying the surtaxes provided for in those articles.

The special conference shall be composed of representatives of the signatory powers, and of such other powers as may desire to participate and may adhere to the present treaty, in accordance with the provisions of Article VII. in sufficient time to allow their representatives to take part. It shall meet in China within three months after the coming into force of the present treaty, on a day and at a place to be designated by the Chinese Government.

ARTICLE III.—The special conference provided for in Article II. shall consider the interim provisions to be applied prior to the abolition of likin and the fulfillment of the other conditions laid down in the articles of the treaties mentioned in Article II.; and it shall authorize the levying of a surtax on dutiable imports as from such date, for such purposes, and subject to such conditions as it may determine.

The surtax shall be at a uniform rate of 2½ per cent. ad valorem, provided, that in case of certain articles of luxury which, in the opinion of the special conference, can bear a greater increase without unduly impeding trade, the total surtax may be increased but may not exceed 5 per cent. ad valorem.

ARTICLE IV.—Following the immediate revision of the customs schedule of duties on imports into China, mentioned in Article I., there shall be a further revision thereof to take effect at the expiration of four years following the completion of the aforesaid immediate revision, in order to insure that the customs duties shall correspond to the ad valorem rates fixed by the special conference provided for in Article II.

Following this further revision there shall be for the same purpose, periodical revision of the customs schedule of duties on imports into China every seven years, in lieu of the decennial revision authorized by existing treaties with China.

In order to prevent delay, any revision made in

pursuance of this article shall be effected in accordance with rules to be prescribed by the special conference provided for in Article II.

ARTICLE V.—In all matters relating to customs duties there shall be effective equality of treatment and of opportunity for all the contracting powers.

ARTICLE VI.—The principle of uniformity in the rates of customs duties levied at all the land and maritime frontiers of China is hereby recognized. The special conference provided for in Article II shall make arrangements to give practical effect to this principle; and it is authorized to make equitable adjustments in those cases in which a customs privilege to be abolished was granted in return for some local economic advantage.

In the mean time, any increase in the rates of customs duties resulting from tariff revision, or any surtax hereafter imposed in pursuance of the present treaty, shall be levied at a uniform rate ad valorem at all land and maritime frontiers of China.

ARTICLE VII.—The charge for transit passes shall be at the rate of 2½ per cent. ad valorem until the arrangements provided for by Article II. come into force.

ARTICLE VIII.—Powers not signatory to the present treaty whose Governments are at present recognized by the signatory powers, and whose present treaties with China provide for a tariff on imports and exports not to exceed 5 per cent. ad valorem, shall be invited to adhere to the present treaty.

The Government of the United States undertakes to make the necessary communications for this purpose and to inform the Governments of the contracting powers of the replies received. Adherence by any power shall become effective on receipt of notice thereof by the Government of the United States.

ARTICLE IX.—The provisions of the present treaty shall override all stipulations of treaties between China and the respective contracting powers which are inconsistent therewith, other than stipulations according most favored nation treatment.

ARTICLE X.—The present treaty shall be ratified by the contracting powers in accordance with their respective constitutional methods and shall take effect on the date of the deposit of all the ratifications, which shall take place at Washington as soon as possible. The Government of the United States will transmit to the other contracting powers a certified copy of the procès-verbal of the deposit of ratifications.

The present treaty, of which the French and English texts are both authentic, shall remain deposited in the archives of the Government of the United States, and duly certified copies thereof shall be transmitted by that Government to the other contracting powers.

The above treaties relating to China were agreed to by the delegates from the nations concerned, at the Conference on Limitation of Armaments, at Washington, on Feb. 6, 1922.

### THE RESULTS OF THE ARMS CONFERENCE.

The delay in securing the assent of France and Italy to the naval disarmament treaty has occasioned postponement by the three other nations of their project of reducing their navies. The United States, Great Britain and Japan have, however, provided in their naval budgets for the scrapping of the capital ships and the reduction of forces as called for by the treaty. An official of the Japanese Foreign Office in a statement in Tokyo on November 18 said that before the framing of Japan's naval budget, which shows a decrease of yen 117,000,000 (about \$58,500,000), as compared with that of the current year, the Foreign Office had received assurances from the American Government that the United States naval budget would be drawn up in the spirit of the Washington Conference. Japan gave similar assurances.

It will cost the United States a minimum of \$70,000,000 to scrap its navy, and probably much more, it was indicated by Secretary of the Navy Denby when he on May 2 made public the report of the board appointed to formulate instructions to carry out the rules of the conference.

The completed capital ships to be scrapped by the United States as recommended by the board consist of the following: The Virginia, New Jersey, Rhode Island, Georgia, Nebraska, Connecticut, Louisiana, Vermont, Minnesota, Kansas, New Hampshire, Michigan, South Carolina and the Delaware or the North Dakota.

The Kentucky, Ohio, and the former Iowa, now CB-4, are not listed under the terms of the treaty, but are understood to be among the completed capital ships to be scrapped. The Maine and the Missouri already have been disposed of by sale.

The board recommended that the two most advanced battle cruisers, the Lexington and the Saratoga, be selected for conversion into airplane carriers. The board recommended that the battleship Washington, building by contract and launched, be sold for scrapping.

In Great Britain the Admiralty on August 31 announced that the battle cruisers, Lion and Princess Royal, and the battleships, Orion, Monarch, Conqueror and Erin, all famous in the British Navy, had been ordered scrapped; and on September 27 it further announced that all the thirteen ships which are to be disposed of under the treaty are in home waters and have been taken out of commission and dismantled. Great Britain has also placed a score or more of cruisers and other auxiliary vessels out of commission, as well as many destroyers and submarines.

Of an officers' strength of about 9,400, a total of 1,835 will be retired from active service.

The loss of the French battleship France brought down its naval strength more nearly to the strength of Italy, as it reduced the country's first naval line by one-seventh of its fighting strength. It would cost about 200,000,000 francs to replace the battleship at this time. It was announced on October 12 that France was preparing a naval program to be spread over a period of twenty years and to be arranged in accordance with the terms of the naval treaty.

The Naval Intelligence Bureau in Washington on June 27 announced, according to a despatch in the New York Times, that Japan has, building and pro-

jected, more ships than any other power in those particular types upon which no restrictions were imposed by the conference. The despatch says:

"These types are light cruisers, destroyer leaders, destroyers, submarines and fleet submarines. Japan has, building and projected, 140 units with an aggregate tonnage of more than 160,794 among such types, as against 8 units of 11,275 tons being built by Great Britain, 52 units of 116,581 tons being built by the United States, 33 units of 68,400 tons by France, and 24 units of 42,550 tons by Italy.

"Japan is building 52 submarines, whose exact tonnage is unknown. Their aggregate tonnage will be around 50,000, so that Japan's present building program of light cruisers, destroyers and submarines is nearer 210,000 tons than 164,796.

"American naval officers feel that Japan will profit by the failure to adopt a submarine and destroyer ratio, unless the United States Government shall exercise care and maintain its submarine and destroyer, as well as light cruiser strength, in the proportion of 5-3 as between this country and Japan.

"The United States is well off at present in the matter of destroyers on account of the large number built during the war, but the Japanese building program respecting light cruisers and submarines in a few years will place the Japanese Navy in a better relative position.

### UNRESTRICTED SHIPS NOW BUILDING.

"Official naval intelligence data covering the whole situation up to June 26, 1922, show that in ships building and projected among types on which no restrictions were placed by the naval treaty the position of the powers is as follows:

#### GREAT BRITAIN.

First-line cruisers, none.  
Destroyer leaders, 1 of 1,750 tons.  
First-line destroyers, 3 of 3,725 tons.  
First-line submarines, 4 of 5,800 tons.  
Fleet submarines, none.

#### UNITED STATES.

First-line light cruisers, 10 of 75,000 tons.  
First-line cruisers, 10 of 75,000 tons.  
Destroyer leaders, none.  
First-line destroyers, 3 of 3,645 tons.  
First-line submarines, 26 of 31,561 tons.  
Fleet submarines, 3 of 6,375 tons.

#### JAPAN.

First-line light cruisers, 15 of 81,900 tons.  
Destroyer leaders, none.  
First-line destroyers, 50 of 58,500 tons.  
First-line submarines, 23 of 30,394 tons and 52 of tonnage unknown to American Naval Intelligence officers.  
Fleet submarines, none.

#### FRANCE.

First-line light cruisers, 3 of 24,000 tons.  
Destroyer leaders, 6 of 14,400 tons.  
First-line destroyers, 12 of 16,800 tons.  
First-line submarines, 12 of 13,200 tons.  
Fleet submarines, none.

#### ITALY.

First-line light cruisers, 2 of 16,000 tons.  
Destroyer leaders, 6 of 12,270 tons.  
First-line destroyers, 12 of 11,680 tons.  
First-line submarines, 4 of 2,600 tons.  
Fleet submarines, none.

"Study of these figures in comparison with other figures showing the ships retained on June 1, 1922, by each of the five powers, and excluding those to be scrapped under the naval treaty, has convinced naval officers studying the matter that Japan is gaining an advantage over the United States with respect to light cruisers and submarines.

"The United States is building ten light cruisers, and on June 12 was retaining twelve light cruisers which are not to be scrapped. Japan is building fifteen light cruisers, in addition to the eighteen which she is retaining as of June 1. On this showing, Japan will have 33 to 22 for the United States—a ratio of three to two in favor of Japan. If light cruisers were built on the basis of the 5-3 ratio, the United States would be entitled to 55 light cruisers for the 33 which Japan will have when her building and projected light cruisers are commissioned.

#### OUTLOOK FOR SUBMARINE STRENGTH.

"Japan has, building and projected, for immediate laying down a total of 75 submarines, as against 36 building and about to be laid down for the United States. In commission and built, Japan already has 23 first-line and 10 second-line submarines, which will give Japan a total of 108 submarines. The United States, on the other hand, on June 1, possessed 57 first-line and 28 second-line submarines and 3 fleet submarines. When the 36 classified as building are completed and added to the present strength of 88, the American submarine strength will be 124 submarines. On the basis of a 5-3 ratio, the United States would be entitled to 180 submarines when Japan has her 108 in commission.

"On the basis of present submarine strength of the American and Japanese Navies, the United States will have to build a great many more submarines than it has so far proposed. The existing strength ratio is 8 to 3, and on that basis the United States would be entitled to 288 submarines when the best the American Navy can now see is 124. In other words, the United States would have to build 164 additional submarines."

#### SHANTUNG TRANSFERRED TO CHINA.

The matter of Shantung being left by the Washington Conference on Disarmament to direct negotiations between Japan and China was arranged in Washington on Feb. 4, 1921, when Japan and China signed the Kiaochow Treaty, transferring the Kiaochow leased territory and the Shantung Railway to China.

On Oct. 10, 1922, the Japanese members of the Shantung Commission who were arranging the details of the restoration announced in Tsingtau Shantung that the leasehold would be restored, on Dec. 2, when the Japanese troops would withdraw and civil and military authority be handed over to China, and the Chinese flag hoisted for the

first time since Germany acquired the territory in 1898.

The amounts which China must pay for Japanese investments in the district have been virtually decided upon. Katsud Debuchi, member of the Shantung commission and formerly Counselor of the Japanese delegation at Washington, said Japan will exact only what Japan paid to Germany for private German investments and what Japan actually invested since 1914. It is expected that Japan will accept Chinese treasury notes, as China is without cash.

China will receive free all public properties which Japan acquired from the German Government.

The commission decided China must pay 20,000,000 yen for Japanese investments in public improvements, 8,000,000 yen for improvements made in the salt industry of Kiaochow and 55,000,000 yen for the Shantung Railroad, a grand total of \$3,000,000 yen.

The coal mines which are valued at 10,000,000 yen are to be operated jointly by the Japanese and Chinese by a corporation to be organized.

The United States on Oct. 30, 1922, delivered through Minister J. G. Schurman to the Chinese Government, a note advising them that in concert with Great Britain, France, Italy and Japan, the United States was surrendering to China control of the Chinese Eastern Railway in accordance with the terms of the resolutions adopted at the Conference for the Limitation of Armament held in Washington. The taking over of the railroad was incident to the despatch of Allied and American troops to Siberia in the summer and autumn of 1918. An agreement concluded in February, 1919, between Japan and the United States, and later concurred in by the other nations, resulted in the operation of the Chinese Eastern and Chinese Siberian Railways in the zone of operation of the Allied military forces being placed under the supervision of a special Allied committee, this agreement to end with the withdrawal of the foreign military forces from Siberia.

#### ARMAMENT CONFERENCE COST \$252,000.

The Armament Limitation Conference cost the American Government \$252,002, minus an estimated unexpended balance of \$350.92, according to a statement of expenses transmitted by President Harding to the Senate on May 25.

Salaries of \$68,689 were the largest item of expense, while the expenses for buildings were \$44,219; for reporting proceedings, \$29,358; printing, \$20,844; translations, \$29,726.

For rent of War Department automobiles used by delegates and attaches, the report showed \$18,752 was spent and \$3,227 for other transportation.

The item for "entertainment" was \$9,356, while supplies cost about \$12,000, and telephone and other wire facilities \$4,453.

#### ELIHU ROOT ON THE VALUE OF THE CONFERENCE.

Elihu Root, former Secretary of State, one of the United States delegates, in his Presidential address before the sixteenth annual meeting of the American Society of International Law, in Washington, April 27, 1922, summed up the work of the conference in part as follows:

"The conference was called to deal with the limitation of armament. The special occasion for it was the apparent race of competition in the building of battle ships and battle cruisers on the part of Japan and the United States, a race in which Great Britain was about to enter under the imperative necessity of maintaining her ocean-borne food supply and protecting her far Eastern colonies and dominions. . . . At the outset of the conference the United States made a very drastic proposal not only to stop competition, but to destroy about 40 per cent. of the existing strength of capital ships of the principal naval powers, in such a way as to leave the relative proportions of naval strength unchanged, and that proposal was ultimately accepted and embodied in the principal treaty resulting from the conference.

"Such proposals, however, do not carry themselves. Competition in armament results from national states of mind, distrust, apprehension of attack, a widespread belief that war is imminent, so that the peoples of the respective countries think in terms of war, prepare for war, and reach a condition of thought and feeling in which it is natural for war to come. That state of mind must be disposed of if competition is to be really stopped. The nations concerned must cease to think in terms of war and must come to think in terms of peace. The object of having a conference is to effect such a change by friendly negotiation, explanation, doing away with misunderstanding, creating conviction of friendly intention and good faith, with the aid on appropriate occasions of friendly advice of third parties. The success of such a process in the Washington Conference was registered in what is called the Four-

Power Treaty between Great Britain, France, Japan, and the United States.

"I doubt if any formal treaty ever accomplished so much by doing so little. It provided that we should all respect rights, which we were bound to do already, and that if controversy arose about the Pacific islands (it was quite immaterial what islands) the parties should get together and talk it over, which was the very thing they were then doing in Washington. The consent of the Senate was not necessary to such an agreement. It merely arranged for following an ordinary form of diplomatic intercourse.

The President had done the same thing at Algieras and at The Hague and at the Conference of London without asking the consent of the Senate, and the Senate had ratified the conclusions reached at those conferences. It was important, however, that the Senate should give its approval in this case because the instrument was a formal certificate to all the people of Japan and all the people of the United States and all the civilized powers that the parties to the treaty had abandoned their mutual distrust and had ceased to think about war with each other and had resumed relations of genuine friendship.

That certificate and the truth that it represents incidentally made possible the abandonment of the Anglo-Japanese Alliance and made possible the treaty for the limitation of naval armament and dispelled one war cloud upon the horizon of a troubled world.

#### PROBLEM OF CHINA.

"The Four-Power Treaty was not enough, however, standing by itself, to make the new condition stable without some treatment of the causes of irritation which had arisen and which might be apprehended upon the continent of Asia. For the discussion of this subject four other powers having interests in the Far East—Belgium, China, the Netherlands and Portugal—also took part.

"Under the conventional arrangements with

China there had developed a vast extent of beneficial trade and industry upon which multitudes of people in and out of China were dependent. It was evident that to attempt then to wipe out all the arrangements which I have described and put China immediately upon the footing of a full member of the society of nations, unhampered in her trade, her administration, and her maintenance of order, except by the rules of international law, would be futile and disastrous, for there was no government in China competent to maintain trade, to administer justice to foreigners, or to protect foreign life and property. It was evident too that China must work out her own salvation, that no exercise of foreign power could accomplish the result. Four hundred and thirty million people are too great a mass to be reformed from the outside. If China is to possess her own territory, with independence and control of her own destinies, she must learn to govern herself and to assert and maintain her own rights as a nation.

"Accordingly, the members of the conference addressed themselves to the task of helping China so far as it was possible in her struggle to achieve self-government.

"Any one examining the treaties and resolutions will find that they uniformly sought a double object, first, to relieve the limitations and inconveniences flowing from the old conventional relations as far as was then practicable under the existing governmental conditions in China, and, second, to afford to all sections and parties of the Chinese people a helpful incentive to unite in the establishment of an effective and stable government by making specific provisions under which such a government, competent to perform its national duties, will be the means of bringing China into the full possession of the rights and liberties assured by international law to the members of the family of nations, just as Japan has been brought into that family.

"Personally I am a believer in the coming of that event. It will be a long, difficult process, for it requires the new education of more than four hundred million people, but I look to the future of that industrious, kindly, peaceful people, with their inveterate respect for individual and family rights, not as a yellow peril but as a great reinforcement to the power of ordered liberty upon the domination of which the future of our civilization depends.

#### APPEAL TO PUBLIC OPINION.

"The conference treaty relating to submarines, which is in the way of being described as the Declaration of Washington, was also an incident to the naval armament negotiation.

"It will be perceived that up to this point the treaty does not undertake to make or provide for

#### SECRETARY HUGHES ON THE

Charles E. Hughes, Secretary of State, and head of the United States delegation in a letter to Senator Underwood, also a delegate, on March 11, 1922, wrote in part:

"The treaty itself is very short and simple, and is perfectly clear. It requires no commentary. Its engagements are easily understood and no ingenuity in argument or hostile criticism can add to them or make them other or greater than its unequivocal language sets forth. There are no secret notes or understandings.

"In view of this, the question of authorship is unimportant. It was signed by four powers, whose delegates respectively adopted it, all having made various suggestions.

"I may say however, with respect to the general course of negotiations that after assent had been given by Great Britain and Japan that France should be a party to the agreement, I prepared a draft of the treaty based upon the various suggestions which had been exchanged between the delegates.

making new universal or general international law. It does four things: It furnishes the high authority of the five great naval powers of the world as to what the existing law is, at the same time inviting all other powers to add to that authority by their assent.

"It binds all of these five great powers themselves to obey this law.

"It establishes jurisdiction for the trial and punishment of all future violations of this law.

"It classifies violations of this law with piracy. . . . Perhaps this provision, agreed upon by so great authority in the world, may be the beginning of a system under which in general those rules of international law which express the moral sense of mankind may receive a new sanction through responsibility to law and liability to punishment of the agents through whom the rules may be violated.

"The treaty is not merely a declaration of existing law. It is not merely an agreement between governments resulting from diplomatic negotiations. It is all these, but above all it is an appeal to the public opinion of mankind to establish and maintain a fundamental rule of morals applied to international conduct in the form of a rule of international law.

"The real sanction of international law comes from the punishing power of public opinion, a power which has been growing with great rapidity in recent years and bids fair to grow still more rapidly with the increased public participation in the conduct of foreign affairs and the constantly increasing interdependence of nations. The ordinary mode of its exercise is in control of the operations of government. The most absolutely simple exercise of it is illustrated by the effectiveness of the Chinese boycott, which avails itself of no governmental action whatever. This tremendous and increasing power is not very effective as yet in support of mere governmental agreements as such, and it is not very effective in matters which are complicated and confused, watch rest upon conflicting evidence and agreement; but where a rule of international law is simple, easily understood, and applies the moral sense of decent people the world over to human conduct, public opinion is competent to enforce that rule with tremendous effect.

"This treaty takes one further step and that is to simplify still further the whole subject by proposing a new rule of absolute prohibition against the use of submarines as commerce destroyers, and all five of the great powers uniting in the treaty voluntarily subject themselves to the operation of that rule, and at the same time ask other powers to join them in that new rule by adhering to the treaty. This, of course, is the first step in making a new rule of international law. . . . Similar considerations apply to the provision of the treaty under consideration prohibiting the use of poisonous gases."

#### AUTHORSHIP OF THE TREATY.

"After the approval of the American delegates who were here, the draft was submitted to the representatives of other powers and became the subject of discussion between the heads of the delegations concerned, and with a few changes, which were approved by the American delegates and which did not affect the spirit or substance of the proposed treaty, an agreement was reached.

"The treaty as thus drawn and notified was deemed to embrace the main islands of Japan. Later, in view of the sentiment both in this country and Japan, it was deemed to be preferable to exclude these main islands, and a supplementary treaty was prepared to this effect which designated the islands of Japan which it was to include.

"There is not the slightest mystery about the treaty or basis for suspicion regarding it. It is a straightforward document which attains one of the most important objects the American Government has had in view and is of the highest importance to the maintenance of friendly relations in the Far East upon a sound basis."

The Colorado was launched at Camden, N. J., March 22, 1921.

All of the battleships have submerged torpedo tubes, mostly two each. They have a crew of 60 to 65 officers, and 800 to 1,600 enlisted men.

Battleships are divided into three classes—pre-dreadnoughts, dreadnoughts, and super-dreadnoughts—according to their displacement and guns. The first named class usually are not over 16,000 tons; the second, 18,000 tons or so; the third, 25,000 tons or more. The dreadnoughts have a main battery of all big guns (11 inches or more). The super-dreadnoughts have more than 10 big guns

in the main battery, or a very large displacement, and a speed of 21 to 25 knots an hour.

Of the battleships in the above list the following are officially classed as second line ("obsolete"): Connecticut, Kansas, Michigan, Minnesota, Ohio, South Carolina.

Other second-line battleships on the navy list in July, 1921, but not in commission, were the Georgia (14,948), Louisiana (16,000), Nebraska (14,948), New Hampshire (16,000), New Jersey (14,948), Rhode Island (14,948), Vermont (16,000), and Virginia (14,948). All but the Illinois and Kentucky carry four 12-in. guns, the two named having four 13-in. guns. Their contract speed ranged from 16.9 knots to 19.26 knots an hour.

## APPROPRIATIONS FOR THE "NEW" U. S. NAVY SINCE 1883.

## NAVAL EDUCATION SYSTEM OF THE UNITED STATES.

The Bureau of Navigation of the Department is charged with the training and education of the line officers of the navy, and each staff bureau with the training of the staff officers. Midshipmen, when appointed, are given four years instruction on general and technical subjects at the Naval Academy. Upon graduation these midshipmen are commissioned as line officers and are ordered to sea duty. None is sent to any special schools until he has had at least one year at sea. Officers who have shown special qualifications and interest in the subjects mentioned below are selected for special instruction. In recent years 40 per cent. to 80 per cent. of each Naval Academy class have received special instruction in some one of these subjects. The following courses are maintained by the Bureau of Navigation:

*War College*—Newport, R. I., one year; for officers of command or flag rank. This course includes theoretical instruction in the art of naval warfare, and war games played on game boards.

*Post-Graduate Work*—Naval Academy, Annapolis, Md., and various educational institutions; two years. The first year of this course is at the Naval Academy

and consists of the preparation and technical ground-work. This work merges into the specialization course continued at the institution, offering the best available facilities in the given work, viz.: ordnance, marine, gas, electrical and radio engineering. Columbia University, Massachusetts Institute of Technology, George Washington and Harvard are among the institutions at which special instruction is given. As a part of this course practical work during the summer is given to student officers at such places as navy yards, naval gun factory, Bureau of Mines, Bureau of Standards and large industrial plants.

*Naval Construction*—Naval Academy and Massachusetts Institute of Technology; two to three years. First year at post-graduate work at Naval Academy and the remainder at Massachusetts Institute of Technology, studying design and construction of ships. These officers are transferred from the line to the construction corps.

*Submarine*—New London, Conn.; three months. This course is practical training in handling submarines and firing torpedoes from them.

*Torpedoes*—Naval Torpedo Station, Newport, R. I.; five months. Theoretical and practical instruc-

tion in the assembly, firing, care and maintenance of various types of torpedoes.

**Aviation**—Pensacola, Fla.; nine months. Training in both heavier than air and lighter than air craft.

**Law**—Judge-Advocate-General's office and George Washington University; three years. Certain officers while on duty in the Judge-Advocate's office take the law course at George Washington University, giving special attention to military law and procedure.

**Optical Instruments and Gyroscopic Instruments**—Naval gun factory, Ford instrument works and other industrial plants. From time to time officers are sent to places where such instruments are manufactured, to learn the details and principles of manufacturing, while others are given shorter courses in the care, operation and maintenance of these instruments.

#### EDUCATION AND TRAINING OF ENLISTED MEN IN THE NAVY.

There are shore training stations at Newport, R. I.; Hampton roads, Va.; Great Lakes, Ill., and San Francisco. At the Hampton Roads and San Francisco training stations there are special schools for enlisted men who desire to enter the Naval Academy. Trade schools are maintained at the stations and at several of the navy yards and naval air stations. The course of training for apprentice seamen and firemen, third class, at training stations, is eight weeks. Upon the completion of the course of training at training stations, apprentice seamen will be rated seamen, second class, or firemen, third class. Every endeavor is made to qualify those who are unable to swim 50 yards. This is particularly desirable in the case of line petty officers, and no man shall be made a coxswain or a member of a power boat who has not so qualified.

Men need not be continuous service men to be eligible for entrance to a trade school, but, except in the case of recruits who will enter immediately after enlistment, no men will be detailed who will not have at least two years to serve on their current enlistment after they have completed their course. A recruit must have enlisted for at least three years

to be eligible for entrance to any trade school having a course of six months or more. Men who complete a course of instruction in any service trade school are not qualified for furlough without pay or discharge by purchase or by special order during the remainder of the enlistment in which the course was completed. A man who applies for instruction in any service trade school shall be so informed and required to sign a statement that he has no intention of requesting furlough without pay or discharge by purchase or special order during his current enlistment, and that no reason exists or can be anticipated to necessitate such discharge. Men who have completed one course of instruction in any trade school whose course is six months or longer will not be considered eligible for entrance to another trade school, except that men entering the apprentice courses in the aviation mechanics' school may be advanced through the higher trade schools of his specialty if his aptitude and progress warrant. Men qualifying for a rating prior to the completion of a course are to be rated and transferred to receiving ships for general detail.

The training given men at regular training stations is supplemented and continued through navy education study courses, supplied through the Bureau of Navigation for men on active duty in naval vessels and at naval shore stations. These courses are designed primarily for increasing the technical knowledge and efficiency of enlisted personnel in regular naval trades. They cover a wide range of technical courses closely related to naval duties, as well as the fundamental subjects needed by men whose general education is not adequate for a proper study of the technical courses related to these duties. The naval education study courses are largely developed within the navy. They combine the self-instruction type of material used in other educational extension work with the instruction of regular ship officers and the practical knowledge gained through regular duties. Diplomas are granted for completed courses and a permanent record of all completed educational work is entered in the service record which carries the complete official statement of each man's qualifications and service.

#### UNITED STATES NAVAL ACADEMY AT ANNAPOLIS.

The students of the Naval Academy are styled midshipmen. Five midshipmen are allowed for each Senator, Representative and Delegate in Congress, five for the Resident Commissioner from Porto Rico, five for the District of Columbia, and fifteen appointed each year from the United States at large. The appointments from the District of Columbia and fifteen each year at large are made by the President. It is the custom of Presidents to give the appointments of midshipmen at large to the sons of officers of the army and navy, for the reason that officers, owing to the nature of their duties, are usually not in a position to establish permanent residences.

The selection of candidates, by competitive examination or otherwise, for nomination for vacancies in the quota of Senators, Representatives and Delegates in Congress is entirely in the hands of each Senator, Representative and Delegate in Congress having a vacancy; and all applications for appointment or inquiries relative to competitive examinations should be addressed accordingly. Two examinations for admission are held each year, the first on the third Wednesday in February, the second on the third Wednesday in April.

The law authorizes the appointment of one hundred enlisted men each year to be selected as a result of a competitive examination of enlisted men of the Regular Navy and Marine Corps, and members of the Naval Reserve Force on active duty, who must not be more than twenty years of age on April 1 of the year they enter, and who will have been in the service at least one year by August 15 of that year. The mental and physical requirements, as well as the amount of money to be deposited upon admission, are the same for these candidates as for other candidates for midshipmen.

The competitive examination of these enlisted men is held on the third Wednesday in April of each year. Candidates may also be accepted on certificate. For details write Bureau of Navigation, Navy Department, Washington, D. C.

All candidates, except 4 Filipinos, are required to be citizens of the U. S. and must not be less than 16 or more than 20 years of age on April 1 of the calendar year in which they enter the Naval Academy.

The course for midshipmen is four years. Examinations on the ground covered are held at the end of each academic term. During the summer, midshipmen of the first, second and third classes go to sea for about three months. Midshipmen after graduation are commissioned as Ensigns in the navy, and occasionally to fill vacancies in the

Marine Corps and in certain of the staff corps of the navy. The act of June 29, 1906, prescribes that the Secretary of the Navy shall notify in writing each Senator, Representative and Delegate in Congress of any vacancy that will exist at the Naval Academy and which he shall be entitled to fill by nomination of a candidate and one or more alternates therefor. The nomination of a candidate and alternate or alternates to fill said vacancy shall be made upon the recommendation of the Senator, Representative or Delegate, if said recommendation is made by the fourth day of March of the year following that in which said notice in writing is given, but if it is not made by that time the Secretary of the Navy shall fill the vacancy by appointment of an actual resident of the State, Congressional district or Territory, as the case may be, in which the vacancy will exist, who shall have been for at least two years immediately preceding the date of his appointment an actual and bona fide resident of the State, Congressional district or Territory.

The height of candidates for admission shall not be less than five feet two inches, between the ages of sixteen and eighteen years and not less than five feet four inches, between the ages of eighteen and twenty years; and the minimum weight at sixteen years shall be one hundred and eleven pounds, with an increase of not less than three pounds for each additional year, or fraction of a year, over one-half. Any marked deviation in the date will add materially to the consideration for rejection. Candidates must be unmarried, and any midshipman who shall marry, or who shall be found to be married before his final graduation, shall be dismissed from the service. Each candidate who has passed the required examinations must, before being admitted as a midshipman, deposit the sum of \$350 to cover the cost of his initial outfit—clothing, uniforms, text books and equipment.

Each candidate before admission will be required to sign articles by which he binds himself to serve in the United States Navy during the pleasure of the President of the United States (including his time of probation at the Naval Academy) unless sooner discharged. The pay of a midshipman is \$780 a year.

#### ORIGIN OF THE UNITED STATES NAVAL ACADEMY.

The United States Naval Academy was founded at Annapolis, Md., in 1845, by George Bancroft, who then was Secretary of the Navy. Owing to the Civil War it was removed to Newport, R. I., in May, 1861, but was re-established at Annapolis in September, 1865.

## THE ARMY OF THE UNITED STATES.

The army of the United States consists of the Regular Army, the National Guard while in the service of the United States, and the Organized Reserves, including the Officers' Reserve Corps and the Enlisted Reserve Corps.

The Regular Army consists of the Infantry, the Cavalry, the Field Artillery, the Coast Artillery Corps, the Air Service, the Corps of Engineers, the Signal Corps, which are designated the combatant arms or the line of the army; the General Staff Corps, the Adjutant General's Department, the Inspector General's Department, the Judge Advocate General's Department, the Quartermaster Corps, the Finance Department, the Medical Department, the Ordnance Department, the Chemical Warfare Service, the officers of the Bureau of Insular Affairs, the officers and enlisted men under the jurisdiction of the Militia Bureau, the chaplains, the professors and cadets of the United States Military Academy, the present military storekeeper, detached officers, detached enlisted men, unassigned recruits, the Indian Scouts, the officers and enlisted men of the retired list, and such other officers and enlisted men as are now or may hereafter be provided for. Except in time of war or similar emergency when the public safety demands it, the number of enlisted men of

the Regular Army shall not exceed 280,000, including the Philippine Scouts; however, the Army Appropriation Act, approved June 30, 1922, for the fiscal year of 1923 provides for 125,000 enlisted men and 7,148 Philippine Scouts.

The National Guard consists of the regularly enlisted militia between the ages of 18 and 45 years and of commissioned officers between the ages of 21 and 64 years, of the several States, Territories and the District of Columbia. The organization thereof in general is the same as that prescribed for the Regular Army. The National Guard may be called as such into the service of the United States, and when so called is subject to the laws and regulations governing the Regular Army as far as applicable. When Congress has authorized the use of troops in excess of those of the Regular Army, the members of the National Guard may be drafted into the military service to serve therein for the period of the war or emergency, unless sooner discharged.

The Organized Reserves constitute a war force in order to meet any major emergency requiring the use of troops in excess of those of the Regular Army and the National Guard. They are liable to military service only in the event of a serious national emergency especially proclaimed by Congress.

## MILITARY DEPARTMENTS AND CORPS AREAS, U. S. ARMY.

| Department or Corps Areas, | Headquarters,                   | Jurisdiction,                                        |
|----------------------------|---------------------------------|------------------------------------------------------|
| First Corps Area.          | Boston.                         | Me., N. H., Vt., Mass., R. I., Conn.                 |

| Hawaiian Dept.             | Honolulu.                       | Hawaiian Islands and dependencies.                   |
| Philippine Dept.           | Manila.                         | Philippine Islands and U. S. troops in China.        |
| Pan. Canal Dept.           | Quarry Heights, Balboa Heights. | Canal Zone.                                          |

## COAST ARTILLERY DISTRICTS.

|           |                                 |                                                                                                |
|-----------|---------------------------------|------------------------------------------------------------------------------------------------|
| First.    | Boston.                         | Coast defenses of Boston, L. I. Sound, Narragansett Bay, New Bedford, Portland and Portsmouth. |
| Second.   | N. Y. (Gov. Isl.)               | Coast defenses of the Delaware, Eastern N. Y., Sandy Hook, and Southern N. Y.                  |
| Third.    | Baltimore, Md.                  | Coast defenses of Baltimore, Chesapeake Bay, and the Potomac.                                  |
| Fourth.   | Ft. McPherson, Ga.              | Coast defenses of the Cape Fear, Charleston, Key West, Mobile, Pensacola and Savannah.         |
| Ninth.    | Presidio of San Francisco, Cal. | Coast defenses of the Columbia, Los Angeles, Puget Sound, San Diego, and San Francisco.        |
| Panama.   | Ft. Amador, Canal Zone.         | Coast defenses of Balboa and Cristobal.                                                        |
| Hawaiian. | Honolulu.                       | Coast defenses of Honolulu and Pearl Harbor.                                                   |

Effective Sept. 1, 1920, the six military departments within the continental limits of the United States were discontinued and the continental area divided into nine corps areas. The military departments and corps areas include the coast artillery districts, coast defenses, forts and camps within their limits. In October, 1920, there was attached to the First Corps Area such part of the State of New York as lies east of west longitude 72° 30'. Sept. 1, 1920, the island of Porto Rico, with the

islands and keys adjacent, was attached to the Second Corps Area, and the Territory of Alaska to the Ninth Corps Area. Sept. 1, 1920, there was attached to the Ninth Corps Area that part of the State of Arizona west of the 114th meridian and south of the 33d parallel. Aug. 1, 1922, Jefferson Barracks, Mo., was attached to the Sixth Corps Area. The territorial limits of the coast artillery districts within the continental limits of the United States are those of the corps areas bearing the same numerical designations.

## TACTICAL DIVISIONS.

The active tactical divisions, with their headquarters, are as follows: *First*, Ft. Hamilton, N. Y.; *Second*, Camp Travis, Tex.; *Hawaiian Division*, Schofield Barracks, H. T.; *Panama Division*, Fort

Amador, C. Z.; *Philippine Division*, Fort Wm. McKinley, P. I.; *First Cavalry Division*, Fort Bliss, Tex.

## GENERAL ARMY HOSPITALS.

The General Hospitals of the army are located at Hot Springs, Ark. (also navy); Denver, Colo.; Presidio, San Francisco; Manila, Philippines; Honolulu,

Hawaii; Takoma Park at Washington, D. C. and El Paso, Tex.

## UNITED STATES MILITARY ACADEMY AT WEST POINT.

EACH Senator, Congressional district and Territory, including Porto Rico, Alaska and Hawaii, is entitled to have two cadets at the academy; the District of Columbia, four cadets. There are also eighty-two appointments at large, two of whom are appointed upon the recommendation of the Vice-President, specially conferred by the President of the United States. The law (act of May 4, 1916) authorizes the President to appoint cadets to the United States Military Academy from among enlisted men in the Regular Army and National

Guard, the total number not to exceed one hundred and eighty at any one time.

Appointments are usually made one year in advance of date of admission, by the Secretary of War, upon the nomination of the Senator or Representative. These nominations may either be made after competitive examination or given direct, at the option of the Representative. The Representative may nominate two legally qualified second candidates to be designated first and second alternates. The alternates will receive from the War Department a letter of appointment, and will be

examined with the regular appointee, and the better qualified will be admitted to the academy in the event of the failure of the principal to pass the prescribed preliminary examinations. Appointees to the Military Academy must be between seventeen and twenty-two years of age; enlisted men of the Regular Army and of the National Guard must be between the ages of nineteen and twenty-two years, and have served as enlisted men not less than one year. *Provided*, that whenever any member of the graduating class shall fail to complete the course with his class by reason of sickness, or deficiency in his studies, or other cause, such failure shall not operate to delay the admission of his successor.

Appointees must be free from any infirmity which may render them unfit for military service, and able to pass, unless a satisfactory certificate is submitted, a careful examination in English grammar, English composition, English literature, algebra through quadratic equations, plane geometry, United States history, and the outlines of general history. The Secretary of War is authorized to permit not exceeding four Filipinos to be designated, one for each class, to receive instruction at the Philippine Islands, to receive instruction at the United States Military Academy at West Point: *Provided*, that the Filipinos undergoing instruction shall receive the same pay, allowances and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations; *And provided further*, that said Filipinos undergoing instruction, on graduation, shall be eligible only to commissions in the Philippine Scouts; serve for eight years, unless sooner discharged.

The course of instruction, which is quite thorough, requires four years; *Provided*, that any person heretofore nominated in accordance with regulations, for

appointment to fill a vacancy which would have resulted from the graduation of a cadet during the present year, may be so appointed notwithstanding the retention of such cadet at the academy; *Provided further*, that any cadet now at the academy may at his option, exercised prior to June 11, 1920, continue at the academy one additional year and postpone thereby his prospective graduation, and cadets not electing so to prolong their course shall be graduated in the years assigned to their respective classes prior to the passage of this act.

The course is largely mathematical and professional. The principal subjects taught are mathematics, English, French, drawing, drill regulations of all arms of the service, natural and experimental philosophy, chemistry, chemical physics, mineralogy, geology, electricity, history, international, constitutional and military law, Spanish, civil and military engineering, art and science of war, economic and government, and ordnance and gunnery.

From about the middle of June to the end of August cadets live in camp, engaged only in military duties and receiving practical military instruction. Cadets are allowed but one leave of absence during the four years' course, and this is granted at the expiration of the first two years. The pay of a cadet is \$1,174.20 per year and with proper economy is sufficient for his support.

Upon graduating, cadets are commissioned as Second Lieutenants in the United States Army. The whole number of cadets graduated from 1802 to 1922, inclusive, has been 6,959. It is virtually absolutely necessary for a person seeking an appointment to apply to his Senator or Member of Congress. The Superintendent is Brig-Gen. Fred W. Sladen, U. S. A., and the military and academic staff consists of fifteen persons. Number of cadets June 1, 1922, was 1,154.

## AWARDS MADE TO OFFICERS AND MEN BY THE WAR DEPARTMENT.

Congressional Medals of Honor are awarded by the President in the name of the Congress to such person who "while an officer or enlisted man of the army shall in action involving actual contact with an enemy distinguish himself conspicuously by gallantry and intrepidity at the risk of his life above and beyond the call of duty." Five were bestowed on the Unknown Soldier of the British, the French, the Italian, the Belgian and the American Armies, and were laid upon their graves.

Eighty-two Congressional Medals of Honor were awarded to American soldiers. Their names follow, an asterisk indicating posthumous award:

First Division—Sergt. Wilbur E. Colyer\*; Sergt. Michael B. Ellis; Private Sterling Morelock.

Second Division—Private Frank J. Bart; Lieut. Louis Cukela; Sergt. Charles F. Hoffman; Private John Joseph Kelly; Sergt. Matej Kocak; Corp. John H. Pruitt\*; Sergt. Ladovous Van Iersal.

Third Division—Private John L. Barkley; Lieut. George Price Hays.

Fifth Division—Capt. Edward C. Allworth; Lieut. Samuel Woodfil.

Twenty-sixth Division—Private George Dilboys; Private Michael J. Perkins\*.

Twenty-seventh Division—Sergt. Alan Louis

Eggers; Private Frank Gaffney; Sergt. John Cridland Latham; Corpl. Thomas E. O'Shea\*; Lieut. William Bradford Turner\*; Sergt. Reidar Waaler. *Twenty-eighth Division*—Sergt. James I. Mestrovitch\*.

*Twenty-ninth Division*—Private Henry G. Costin\*; Sergt. Earl D. Gregory; Lieut. Patrick Regan.

*Thirtieth Division*—Sergt. Joseph B. Adkinson; Private Robert L. Blackwell\*; Lieut. James C. Dozier; Sergt. Garey Evans Foster; Sergt. Thomas Lee Hall\*; Corpl. James D. Heriot\*; Sergt. Richmond H. Hilton; Sergt. James E. Karnes; Sergt. Milo Lemert\*; Sergt. Edward R. Talley; Corpl. John C. Villepligue; Private Calvin John Ward.

*Thirty-third Division*—Corpl. Jake Alex; Sergt. Johannes S. Anderson; Sergt. Sydney G. Gumpertz; Corpl. Ralyn Hill; Private Berger Loman; Capt. George H. Mallon; Corpl. Thomas A. Pope; Sergt. Willie Sandlin; Private Clayton K. Stack.

*Thirty-fifth Division*—Capt. Alexander R. Skinker\*; Private Nels Wold\*.

*Thirty-sixth Division*—Sergt. Samuel M. Tampler; Corpl. Harold L. Turner.

*Thirty-seventh Division*—Lieut. Albert E. Baesel\*; *Forty-second Division*—Corpl. Sidney E. Manning; Private Thomas C. Neibauer; Sergt. Richard W. O'Neill.

*Seventy-seventh Division*—Capt. Nelson M. Holderman; Sergt. Benjamin Kaufman; Capt. George G. McMurry; Capt. L. Wardlaw Miles; Private Archie A. Peck; Lieut. Col. Fred E. Smith\*; Lieut. Col. Charles W. Whittlesey.

*Seventy-eighth Division*—Sergt. William Sawelson\*. *Eighty-second Division*—Lieut. Col. Emory J. Pike; Corpl. Alvin C. York.

*Eighty-ninth Division*—Private Charles D. Barger; Private David B. Barkeley\*; Capt. Marcellus H. Chiles\*; Sergt. Arthur J. Forrest; Private Jesse N. Funk; Lieut. Harold A. Furlong; Sergt. M. Waldo Hattler; Sergt. Harold I. Johnston; Lieut. J. Hunter Wickersham\*.

*Ninety-first Division*—Sergt. Philip C. Katz; Major Oscar F. Miller\*; Sergt. Lloyd M. Selbert; Sergt. Chester H. West.

*Ninety-third Division*—Lieut. George S. Robb. *Tank Corps*—Lieut. Donald M. Call; Corpl. Harold W. Roberts\*.

*Air Service*—Lieut. Frank Luke, Jr.\*. Prior to the World War 1,722 Congressional Medals of Honor had been awarded to American soldiers; this number does not include 911 awards made and later cancelled (as per circular of War Department, 1904).

The War Department also awarded 5,907 Distinguished Service Crosses.

## DISTINGUISHED SERVICE MEDAL.

### 161 AMERICAN GIRLS GAVE THEIR LIVES IN THE WAR.

The Women's Overseas Service League on Armistice Day, Nov. 11, 1922, published a list of the 161 "gold star" American girls who gave their lives in the World War. Most of them rest in French soil though some are buried in Siberia, China, Manila and Armenia and some in England. Plans are being forwarded for a permanent memorial for them. Miss Irene Givenwilson, Curator of the Red Cross Museum, Washington, has the matter in charge. Of those on the list Marion Crondell, Y. M. C. A. canteener was killed by a German shell at Chalons-sur-Marne, March 26, 1917; Winona C. Martin was killed in a Paris hospital by a bomb from a German air raider; and Ruth Landon was killed when the German shell from Big Bertha struck and demolished the roof of the Church of St. Gervais in Paris at Good Friday service, 1918.

C.; *Assistant to the Director*—Assistant Surgeon General J. D. Long, United States Public Health Service, Washington, D. C.; *Vice Director*—Assistant Surgeon General J. H. White, United States Public Health Service, Washington, D. C.; *Secretary*—Dr. Julio Blanchi, Minister of

Guatemala, Washington, D. C.; *Executive Clerk*—W. P. Montgomery, Pan-American Building, Washington, D. C.; *Board of Directors*—Dr. J. Llamblas, Director General Public Health, Buenos Ayres, Argentina; Dr. Carlos Chagas, Director General Public Health, Rio de Janeiro, Brazil; Dr. Juan Guiteras, Director General Public Health, Habana, Cuba; Dr. Luis Razetti, Secretary Academy of Medicine, Caracas, Venezuela.

## IMPEACHMENTS IN UNITED STATES HISTORY.

THE Constitution of the United States, Article II., Section IV., provides that civil officers of the United States may be removed from office on impeachment and conviction of treason, bribery or other high crimes and misdemeanors; that the House of Representatives has the sole power of impeachment, and the Senate the sole power to try impeachments; that the Vice President shall preside at impeachments except when the President is tried, when the Chief Justice of the Supreme Court shall preside; and that two-thirds of the members present must vote for conviction before a person impeached shall be deemed guilty. Only eight persons have been impeached and tried before the Senate, and only two of them have been convicted. The record is as follows:

William Blount, Senator from Tennessee, impeached July 7, 1797, for conspiring to wage war with Spain in favor of Great Britain, to excite the Cherokee Indians against Spain, and to create disaffection among the Indians toward the United States; trial Dec. 17, 1798, to Jan. 14, 1799; vote, 11 guilty, 14 not guilty; verdict, acquittal.

John Pickens, Judge of the District Court of the United States for the District of New Hampshire; impeached 1803 for drunkenness and disregard of the terms of the statutes; trial March 3 to March 12, 1803; vote, 19 guilty, 7 not guilty; verdict, guilty; punishment, removal from office.

Samuel Chase, Associate Justice of the Supreme Court of the United States; impeached 1804 for misconduct at trials of persons charged with breach of the Sedition Law; trial Nov. 30, 1804, to March 1, 1805; vote, 9 guilty, 30 not guilty, and 15 guilty, 19 not guilty, on different counts; verdict, acquittal.

James Peck, Judge of the District Court of the United States for the District of Missouri; impeached for tyrannous treatment of counsel, 1830; trial May 11 to May 30, 1830, and from Dec. 13,

1830, to Jan. 31, 1831; vote, 22 guilty, 21 not guilty; verdict, acquittal.

West H. Humphreys, Judge of the District Court of the United States for the District of Tennessee, impeached 1862 for supporting the secession movement and unlawfully acting as Judge of the Confederate District Court; trial May 22 to June 26, 1862; vote, 32 guilty, 4 not guilty; verdict, guilty; punishment, removal from office.

Andrew Johnson, President of the United States, impeached for usurpation of the law, corrupt use of the veto power, interference at elections and high crimes and misdemeanors; trial, March 30 to May 26, 1868; vote, guilty, 35, not guilty, 19; verdict, acquittal.

William W. Belknap, Secretary of War of the United States, impeached for accepting bribes; trial April 5 to Aug. 1, 1876; vote, guilty, 5, not guilty, 25; verdict, acquittal.

Charles Swayne, Judge of the District Court of the United States for the District of Florida; impeached 1905 for misconduct in office; trial Feb. 6 to Feb. 27, 1905; vote, 55 guilty, 37 not guilty; verdict, acquittal.

Robert W. Archbald, Associate Judge of United States Commerce Court, was impeached July 11, 1912, on thirteen articles charging him with corrupt collusion with coal mine owners and railroad officials while in office. The Senate began his trial Dec. 3, 1912, and ended Jan. 13, 1913. Verdict, guilty; removal from office.

On June 12, 1914, District Judge Alston G. Dayton was impeached. Proceedings dropped March 3, 1915.

In the House, near the close of the 66th Congress, a member asked for the impeachment of Federal District Judge Kenesaw Mountain Landis for having accepted, at a salary, the post of Commissioner of Baseball. The demand was not acted upon by the House.

## STORY OF THE RAILROAD DOLLAR.

(From a Nov., 1922, bulletin of the National City Bank of N. Y.)

For the last six years the percentage of the annual income of the railroad companies directly disbursed to their own employes has been as follows:

|              |                       |           |
|--------------|-----------------------|-----------|
| In 1916..... | \$1,365,776,046 or 38 | per cent. |
| In 1917..... | 1,617,718,932 or 40.3 | per cent. |
| In 1918..... | 2,430,846,416 or 49.8 | per cent. |
| In 1919..... | 2,644,109,442 or 51.4 | per cent. |
| In 1920..... | 3,424,075,109 or 55.4 | per cent. |
| In 1921..... | 2,585,329,497 or 46.9 | per cent. |

For the year 1921 the average dollar of railroad incomes for all the railroads of the country was disbursed as follows:

|                                                                                            | Cents. |
|--------------------------------------------------------------------------------------------|--------|
| For labor (salaries and wages).....                                                        | 46.9   |
| For materials, supplies and miscellaneous.....                                             | 20.6   |
| For fuel.....                                                                              | 9.5    |

**International Association of Agricultural Missions**, Dr. Warren H. Wilson, New York City, Presi-

dent; Vice Presidents, Prof. Sam Higginbotham, India; Prof. B. C. Case, Burma; Prof. B. H. Brundic, Brazil; Prof. H. A. Longworth, Africa; Prof. F. L. Crouse, Chile; Dean J. H. Reiser, East China; Prof. G. W. Groff, South China; Prof. L. H. Parker, Amherst, Mass., for the United States; American Country Life Association, Dr. K. L. Butterfield, Amherst, Mass., President; A. R. Mann, Ithaca, N. Y., Mrs. Chas. F. Shuttler, Farmington, Mo., Vice Presidents; E. C. Lindeman, Greenboro, N. C., Executive Secretary; C. F. Jenkins, Philadelphia, Pa., Treasurer; Field Secretary, N. T. Frame, Morgantown, W. Va.

**World Alliance for International Friendship through Churches**, Dr. H. A. Atkinson, 70 Fifth Ave., New York City, director; Rural Life Bureau of National Catholic Welfare Council, the Rev. E. V. O'Hara, Eugene, Ore., director; Société des Ingénieurs Agricoles de Louvain, M. le Vicomte Vilain XIII, President, Louvain, Belgium; Commission Nationale pour l'Embellissement de la Vie Rural, M. Max Pastur, Jodoigne, President.

**Association des Ingénieurs Agricoles de Gembloix**, H. Kufferath, Gembloix, Belgium, President; Federazione pro Montibus, Dr. Guido A. R. Borghesani, Rome, Italy, director; Hungarian Agrarian League, Address, Ulivet, Hungary; Bureau of Applied Botany of Russian Scientific Agricultural Committee, Prof. N. I. Vavilov, Morskaja, 44 Petrograd, Russia, Chairman; director of New York office, D. N. Borodin, 110 W. 40th St., N. Y. City; Union of Siberian Creamery and Other Co-operative Associations, Joseph K. Okulich, 113 Lincoln St., Boston, Mass.

**La Société des Agriculteurs de France**, M. le Marquis de Vogue, Paris, President; American Committee for Devastated France, President, Miss Anne Morgan, Chairman Executive Committee, 16 E. 39th St., N. Y. City; M. Andre Tardieu, Paris, Honorary President; Myron T. Herrick, President; Village Clubs Association of England and Wales, Sir Henry Raw, K. C. B., 80 Pall Mall, London, S. W. 1, Chairman.

**Junta Agro-Pecuaria Internacional (Livestock Breeders)**, Robert Scoville, New York City, Chairman; Woman's National Farm and Garden Association, 1828 Stevens Bldg, Chicago, Mrs. Francis King, Alma, Mich., President.

## THE INTERNATIONAL JOINT COMMISSION.

(Washington, D. C.)

**United States—Chairman**—Obadiah Gardner; Clarence D. Clark, Marcus A. Smith; **Secretary**—William H. Smith.

**Canada—Chairman**—Charles A. Magrath; Henry A. Powell, K. C., Sir William Hearst, K. C. M. G.; **Secretary**—Lawrence J. Burpee.

## INTERNATIONAL BOUNDARY COMMISSION.

(U. S. Coast and Geodetic Survey, Washington.)

For defining and marking boundary between United States and Canada, except on Great Lakes and St. Lawrence River; for marking and surveying boundary between Alaska and Canada.

**U. S. Section—Commissioner**—E. Lester Jones; **Engineer to the Commission**—J. H. Van Wagoner; **Chief Clerk and Disbursing Officer**—Robert B. Martin.

**Canadian Section—Commissioner**—J. J. McArthur.

## ROSENWALD RURAL SCHOOLS.

Julius Rosenwald of Chicago, during the last eight years, has given \$1,107,000 toward the construction of 1,633 rural schoolhouses for Negroes in 14 Southern States. This aid has been furnished on condition that the Negroes themselves, through their own contributions, from white friends or from public funds, raise an amount equal to or larger than that furnished by the Julius Rosenwald Fund.

On this co-operative plan, up to Nov. 20, 1922, 1,633 schoolhouses, utilizing the services of 3,807 teachers and providing for 171,000 pupils, were built at a total cost of approximately \$5,700,000. Of this amount the Negroes gave about \$1,510,000, the whites \$345,000, the public funds \$2,738,000, and Mr. Rosenwald \$1,107,000. Classified by

types the buildings include 443 one-teacher schools, 618 two-teacher schools, 262 three-teacher schools, 153 four-teacher schools, 51 five-teacher schools, 47 six-teacher schools, 22 schools above six teachers, and 37 teachers' homes.

By States the number of school buildings erected and the amounts contributed from the Julius Rosenwald Fund follow:

Alabama, 260, \$121,400; Arkansas, 77, \$55,100; Florida, 7, \$7,900; Georgia, 77, \$52,750; Kentucky, 66, \$42,300; Louisiana, 167, \$113,000; Maryland, 27, \$19,500; Mississippi, 193, \$165,400; North Carolina, 267, \$179,165; Oklahoma, 25, \$21,030; South Carolina, 104, \$92,000; Tennessee, 136, \$91,000; Texas, 96, \$72,133; Virginia, 131, \$73,900; total, 1,633, \$1,107,478.

Y. M. C. A. AND Y. W. C. A.

Orange, N. J.; Los Angeles; Nashville and Chicago for a second building. Owing to excessive cost and adverse conditions no city had qualified up to Nov. 15, 1922, but the Chicago Y. M. C. A. reported that Atlantic City, which had bought a site for \$50,000, intended inaugurating a campaign for building funds in the spring of 1923; also that Detroit, Jersey City and Dayton might soon qualify.

Mr. Rosenwald gave \$25,000 toward the cost of a Y. W. C. A. building erected in New York and he promised \$25,000 to a Y. W. C. A. building now under construction in Philadelphia. There is no general offer to aid Y. W. C. A.'s, New York and Philadelphia presenting exceptional situations.

**ROSENWALD AID TO NEGRO**  
Julius Rosenwald in 1910 offered through the Chicago Y. M. C. A. to give \$25,000 toward the cost of a Negro Y. M. C. A. building for men and boys in any city of the United States which by popular subscription would raise \$75,000 additional, thus assuring a building to cost complete a minimum of \$100,000. Under this offer buildings were erected at a cost of \$2,150,000 in thirteen cities, having a total Negro population of 1,000,000.

In 1920 Mr. Rosenwald made a second offer to contribute \$25,000 to any city raising not less than \$125,000, being influenced by interest awakened at Akron, O.; Dayton, O.; Detroit; Jersey City; Augusta, Ga.; Montclair, N. J.; Atlantic City;

## THE GULF STREAM.

Discussions about the effects of the Gulf Stream upon climate and mariners' reports of its excessive heat recall that the first detailed study of what he called "the grandest and most mighty terrestrial phenomenon," was made by the late Rear Admiral John Elliott Pillsbury, U. S. N., a former President of the National Geographic Society, and summarized by him in a communication to the National Geographic Magazine.

"In all oceans there are movements of the water (other than that caused by the tides) which may be said to be due primarily to the prevalent wind," Admiral Pillsbury wrote.

"In the two great oceans, the Atlantic and the Pacific, there is to be found both north and south of the Equator, and also in the Indian Ocean, a similar circulation, that is, a general westerly movement in the tropics, a flow toward the poles along the eastern shores of the continents, an easterly set in the temperate zones, and a current toward the Equator along the western shores. It thus becomes a grand circular movement, some parts being quite slow, and other parts very swift; sometimes there may be a temporary interruption in the slower portions, or perhaps even a reversal, but taken as a whole the movement is continuous.

"In the North Atlantic Ocean the currents are probably more pronounced than in either the Pacific or the Indian Oceans.

"The equatorial current is usually described as being a broad band of water moving across the Atlantic in the tropics. The portion of this current situated south of the Equator is divided into two parts upon meeting the eastern salient of South America, Cape St. Roque. One branch turns south toward the Antarctic, while the other is forced to the westward along the shores of Northern Brazil and the Guianas, and is called the Guiana coast current. The equatorial current north of the Equator has an almost uninterrupted progress until it reaches the Windward Islands, but a portion of it also impinges against the Guiana coast and thus augments the volume of that current.

## HOW GULF STREAM IS FORMED.

"At the Windward Islands both are united, and a portion of the flow enters the Caribbean through the various passages, crosses it to the Yucatan and Honduras coasts, and thence into the Gulf of Mexico, from which it issues through the Straits of Florida as the Gulf Stream. Passing onward toward Europe it is augmented in volume by a part of the north equatorial current that sweeps along outside the West Indian Islands and the Bahamas, and while this current is slow in movement in comparison to the Gulf Stream itself, it doubtless carries a much greater number of heat units to help warm up Northern Europe.

"The Gulf Stream, or rather the combined flow mentioned above, divides as it meets the resistance of the Eastern Continent, one branch flowing south along the African coast, while the other proceeds northward into the Arctic toward Spitzbergen and Franz Josef Land.

"It is difficult for the mind to grasp the immensity of this great ocean river. The straits of

Florida at its narrowest point is about 40 miles wide and observations here numbered between three and four thousand, surface and subsurface. A calculation of the average volume of water passing in one hour gives the enormous sum of 90 billion tons. If this one single hour's flow of water could be evaporated, the remaining salts would require many times more than all the ships in the world to carry it.

## MAGNITUDE OF OCEAN RIVER.

"When one is on board a vessel, floating upon its waters, one is not as much impressed at the power and grandeur of this wonder of nature as he is when he stands before a towering mountain, an immense iceberg, or a fall of water such as Niagara, but when one remembers that the mighty torrent, speeding on hour by hour and day by day in a volume equal to all the largest rivers in the world combined, carrying its beneficent heat to temper the climate of continents, one begins to realize that of all the forces of the physical world none can equal this one river of the ocean.

"It is interesting to note in the history of the Gulf Stream how great its influence has been on the fortunes of the New World. Before the discovery of America, strange woods and fruits were frequently found on the shores of Europe and off-lying islands. Some of these were seen and examined by Columbus, and to his thoughtful mind they were convincing evidence of the fact that strange lands were somewhere to the westward. These woods were carried by the Gulf Stream and by the prevailing winds from the American continent, so that in part, the stream is responsible for the discovery of the New World.

## INFLUENCE IN COLONIZING AMERICA.

"The influence of the Gulf Stream in the colonization of America was very great. The division of the English colonies into New England and Virginia was probably in part due to the routes by which they were reached. Vessels bound from England to New England crossed the North Atlantic outside the limit of the Gulf Stream, or in a feeble adverse current. They had the advantage, too, of crossing the Newfoundland Banks and of being able to surely replenish their provisions by fishing.

"This voyage, however, much as the advantages might be either by the shorter distance or the gaining of food, was not thought to be practicable with a vessel bound to the Southern Colonies. They sailed south to the trade-wind region, through the Caribbean and around Cuba, thence following the Gulf Stream to their port.

"The Dutch adopted this passage to the Hudson, so that really Nantucket Island became the dividing line between the two voyages; a difference of 100 or 200 miles in destination caused a difference in the length of the passage of about 3,000 miles.

"The name of 'Gulf Stream' was first suggested by Benjamin Franklin because it issues from the Gulf of Mexico. While it is only a part of the grand scheme of ocean circulation, and the Gulf of Mexico is in reality only a stopping place, as it were, for its waters, this name is generally applied to the current now as it was given by Franklin—that is, the current coming from the Gulf of Mexico and spreading abroad over the North Atlantic."

## DISTANCES BETWEEN CITIES OF THE UNITED STATES BY LAND.

| CITY.                  | New York. | New Orleans. | San Francisco. | Seattle. | CITY.                    | New York. | New Orleans. | San Francisco. | Seattle. |

## SOME FAMOUS OLD PEOPLE OF 1922.

- At what age is one to be classed as "old"? Five centuries ago a man was called old at fifty. In the nineteenth century few under sixty would admit that they were old. With so many hale and hearty men well on in years to-day, it seems well to keep the limit set by the Psalmist of three-score years and ten in offering this list, by no means exhaustive, of famous old people of 1922. The age at the last birthday is given and the list is made up as of October 1, 1922:
- 100—John A. Stewart, banker, New York; Cornelius Cole, former U. S. Senator, California.
  - 99—The Earl of Halsbury, former Lord Chancellor of Great Britain.
  - 96—Major Gen. Sir Archibald E. H. Anson, served in Crimean War, British administrator.
  - 93—John R. Voorhis, President of the Board of Elections, New York.
  - 91—Frederic Harrison, English publicist, author.
  - 90—George Shiras, Jr., U. S. Supreme Court Justice (retired); F. F. Mackay, New York, actor.
  - 89—Prof. William F. Warren, former President of Boston University.
  - 88—Chauncey M. Depew, former U. S. Senator, New York; James Brown Herreshoff, yacht builder, inventor; Charles William Eliot, President Emeritus of Harvard University; S. Baring-Gould, English author.
  - 87—Rev. Dr. Lyman Abbott, editor; Sir Archibald Geikie, O. M., geologist; Mrs. William H. Felton, of Georgia, first woman to be appointed United States Senator.
  - 86—Joseph G. Cannon, Congressman from Illinois; Cardinal Vincenzo Vannutelli; Lyman J. Gage, former Secretary of the Treasury; Mme. Juliette Adam, French author.
  - 85—Rt. Rev. Daniel S. Tuttle, P. E. Bishop; Viscount Knollys, private secretary to King Edward VII.
  - 84—John Wanamaker, merchant and former Postmaster General; Sir George Otto Trevelyan, biographer of Macaulay and English publicist; Emile Loubet, President of the French Republic, 1899-1906; Henry A. du Pont, former U. S. Senator; Edward P. Weston, long distance walker.
  - 83—John D. Rockefeller, founder of the Standard Oil Co.; William P. Clyde, steamship owner; Lieut. Gen. Nelson A. Miles, U. S. Army (retired).
  - 82—Simeon E. Baldwin, jurist, former Governor of Connecticut; Cardinal Logue; George F. Baker, banker, New York; Thomas Hardy, O. M., English novelist and poet; Sir John Scott Keltie, editor the Statesman's Year Book; George Gray, statesman, former U. S. Judge; Henry Holt, New York publisher; Admiral of the Fleet Sir Edward H. Seymour, O. M.; Palmer Cox, creator of the Brownies; Viscount Mersey, English jurist; Henry Clews, banker, New York.
  - 81—Oliver Wendell Holmes, U. S. Supreme Court Justice; Georges Clemenceau, former Premier of France; the Earl of Dunraven, yachtsman; Viscount Chaplin, British statesman; Field Marshal Lord Grenfell; Sir Edward George Clarke, British lawyer; the Rev. Dr. R. S. MacArthur, Baptist clergyman.
  - 80—Rev. Dr. Charles H. Parkhurst, Congregational minister; Giovanni Giolitti, former Premier of Italy; Charles S. Fairchild, former Secretary of the Treasury; Camille Flammarion, French astronomer; Dr. David Webster, N. Y. surgeon; Richard Vincent, Jr., famous dahlia grower.
  - 79—Joseph McKenna, U. S. Supreme Court Justice; Paul Cambon, French diplomatist; Knute Nelson, U. S. Senator, Minnesota; Carroll S. Fage, U. S. Senator, Vermont; W. P. Dillingham, U. S. Senator, Vermont; Lord Trevelyan, former Lord Chief Justice of England; Rev. Dr. Russell H. Conwell, President Temple University, Philadelphia, lecturer; Rear Admiral Charles E. Clarke, U. S. N. (retired), commander U. S. S. Oregon in Spanish War; Rear Admiral Yates Stirling, U. S. N. (retired); Robert T. Lincoln, former Ambassador to Great Britain; Rev. Dr. J. B. Remensnyder, Lutheran clergyman.
  - 78—Queen Mother Alexandra of Great Britain, George W. Cable, novelist; George Haven Putnam, New York publisher; Major Gen. A. W. Greely, U. S. A. Signal Service (retired), Arctic explorer; Anatole France, French author; Frank E. Warren, U. S. Senator, Wyoming; N. Fashitch, Premier of Yugo-Slavia; Robert Bridges, poet laureate of England; T. P. O'Connor, M. P., Irish journalist.
  - 77—Elihu Root, former Secretary of State; Sarah Bernhardt, French actress; Rear Admiral Charles D. Sigsbee, U. S. N. (retired), commander of U. S. S. Maine, destroyed in Havana Harbor, 1898; Rear Admiral William H. Brownson, U. S. N. (retired); Rev. Dr. J. F. Goucher, educator; the Duke of Richmond and Gordon; the Marquis of Lansdowne, British statesman; Field Marshal Lord Methuen; J. Ranken Towse, dramatic critic; Sir Henry Lucy, English journalist.
  - 76—Judge Elbert H. Gary, head of the U. S. Steel Corporation; Judson Harmon, Governor of Ohio, 1909-13, former U. S. Attorney-General; the Duke of Somerset; Le Baron B. Colt, U. S. Senator, Rhode Island; the Earl of Harewood, father-in-law of Princess Mary of Great Britain; Charles P. Scott, editor of the Manchester (England) Guardian; Ira Jensen, educator, chemist; Clara Morris, actress; Joseph I. C. Clarke, New York, journalist, playwright.
  - 75—Thomas A. Edison, inventor; the Earl of Rosebery, former Premier of Great Britain; Prof. Henry A. Beers, author, critic; Arthur Shelbourne Hardy, author, diplomatist; the Marquis of Aberdeen, English statesman; the Duke of Beaufort; the Earl of Iveagh, brewer, philanthropist; E. ## INTERNATIONAL TRADE COURT OF ARBITRATION.

A. C. Bedford, of New York, Chairman of the American Section of the International Chamber of Commerce, in which 28 countries are associated with the United States, announced on Nov. 6, 1922, that the chamber has perfected plans for the establishment of a court of arbitration for the settlement and adjustment of international commercial disputes. The court is the result of two years of careful study and is to be independent of all agencies established by Governments.

Owen D. Young, Chairman of the board of the General Electric Company, has been selected as Chairman of the American group on the court. His associates will be:

Newton D. Baker, President of Chamber of Commerce of Cleveland and formerly Secretary of War.

Irving T. Bush, President of Bush Terminal Company, New York.

R. Goodwin Rhett, President of People's National Bank, Charleston, S. C.

Henry M. Robinson, President of First National Bank, Los Angeles.

M. J. Sanders, Manager of International Mercantile Marine, New Orleans.

Frederick S. Snyder, President of Chamber of Commerce of Boston.

Thomas E. Wilson, President of Wilson & Co., Chicago.

Edgar Carolan of International General Electric Company, Paris, France.

Administration of the court will be directed from the headquarters of the International Chamber, 32 Rue Jean Goujon, Paris.

M. Philip von Hemert, President of the Dutch Chamber of Commerce in Paris and Chairman of the special committee that drafted the rules of procedure for the court, will serve as President of its Executive Committee.

Mr. Carolan of the American group will serve as one of the Vice Presidents of its Executive Committee.

## THESE COUNTRIES INTERESTED.

Similar groups of representative business men have been named by the following 28 countries represented in the International Chamber of Commerce: Argentina, Austria, Belgium, Bulgaria, Costa Rica, Czechoslovakia, Denmark, Estonia, France, Great Britain, Greece, Guatemala, Haiti, Indo-China, Italy, Japan, Luxemburg, Netherlands, Norway, Poland, Portugal, Spain, Soudan, Sweden, Switzerland, Union of South Africa, and Jugoslavia.

The purpose of the court is economical adjustment of commercial disputes without the necessity of long delays and expenses involved in great distress, limitation of means of communication, differences in language and the usual legal agencies.

The proposed procedure has three phases—conciliation, arbitration where legal sanction for the enforcement of awards exists, and arbitration where there is no enforcing law.

Conciliation will be invoked where, for instance, there is disagreement over a contract which looks as if it could be handled without the more formal procedure of arbitration. It is expected that such cases can be handled satisfactorily by the administrative commission, consisting of one resident commissioner from each country represented.

Two forms of arbitration are provided, as already indicated, to cover, on the one hand, the case where the laws of both countries involved provide for the enforcement of arbitral awards, and on the other hand, the case where there is no such provision. In the latter case enforcement will have to depend on moral suasion, and such influence as, for instance, the United States Chamber of Commerce might have in this country.

Some of the provisions in the code now formulated for use in the case of countries where there is no legal sanction for the execution of arbitration awards follow:

## AN INTERNATIONAL COURT.

"The Council of the International Chamber of Commerce shall name a committee on arbitration, for the purpose of facilitating arbitration of disputes arising between business men of different countries. This committee shall be known as the 'Court of Arbitration of the International Chamber of Commerce.'

"Any party who desires to have recourse to arbitration under the new plan shall address a request to his national committee or, if no national committee exists, through an organization member of the international chamber, giving a statement of the transaction in question and the claims to be arbitrated. If the question is found suitable for arbitration the court shall forward a copy of the request to the other party and invite him to furnish a statement of his case.

"The court will appoint one arbitrator to try each case submitted to it, unless the parties desire the appointment of two arbitrators and one umpire or of three arbitrators.

"The Court of Arbitration will request the various national committees to furnish the names of technically qualified arbitrators for appointment to hear the cases submitted to it. The arbitration shall take place in the country and town as may be determined by the court.

"Normally the arbitrators shall render their award within sixty days. The arbitrators will have the right, where the law permits, to take evidence in countries other than that in which the arbitration takes place.

"The award of the arbitrators, in addition to the decision on the merits, shall determine which of the two parties is responsible for the costs, or in what proportion such costs shall be divided between them. The arbitrators shall be entitled to reimbursement of expenses, but shall serve gratuitously except, within the discretion of the court, in such countries and industries where fees are customarily allowed for arbitrators.

## IN HONOR BOUND.

"Whenever the parties have agreed to arbitration by the International Chamber of Commerce, the jurisdiction of the Court of Arbitration is obligatory upon the contracting parties, and upon the refusal or failure of one of the parties to present his case before the arbitrators an award by default may be made.

"The parties are in honor bound to carry out the award of the arbitrators."

In the event of the failure of the party against whom the award has been rendered, it is provided that the successful party may notify the national committee or the organization member of the International Chamber of Commerce, whereupon the court shall report the default to the Chamber of Commerce of the country concerned, with the request that the proper disciplinary measures be applied.

Settlement of a dispute by conciliation may be effected by business men bringing the controversy to the attention of the International Chamber through the national committees. Such requests for the good offices of the chamber will be referred to the administrative commission, which is composed of the representatives of the member countries resident in Paris to co-operate with international headquarters.

After examining all documents submitted by both parties to the controversy and collecting all possible information, the administrative committee, through its Chairman, will communicate with the parties, through the national committees, proposing a basis of mutual agreement.

## EXPECTATION OF LIFE IN THE UNITED STATES, 1910-1920.

(Original registration States.)

| YEAR.           | At Age 0. | At Age 32. | At Age 62. | YEAR.           | At Age 0. | At Age 32. | At Age 62. |
|-----------------|-----------|------------|------------|-----------------|-----------|------------|------------|
| White males:    |           |            |            | Negro males:    |           |            |            |
| 1920.....       | 53.98     | 34.93      | 13.38      | 1920.....       | 40.14     | 28.50      | 11.42      |
| 1910.....       | 50.23     | 33.33      | 12.85      | 1910.....       | 34.05     | 26.16      | 10.88      |
| Difference..... | 3.75      | 1.60       | .53        | Difference..... | 6.09      | 2.34       | .54        |
| White females:  |           |            |            | Negro females:  |           |            |            |
| 1920.....       | 56.33     | 36.12      | 14.01      | 1920.....       | 42.16     | 28.82      | 12.12      |
| 1910.....       | 53.52     | 35.40      | 13.70      | 1910.....       | 37.67     | 28.33      | 11.96      |
| Difference..... | 2.71      | .72        | .31        | Difference..... | 4.49      | .49        | .16        |

The above table shows that the average span of life has lengthened 3.75 years for white males since 1910, with gains also, for white females and for Negroes of both sexes.

## WHO IS THE RICHEST MAN?

(From the Wall Street Journal, Sept. 20, 1922.)

Henry Ford has in the Ford Motor Co. the largest income and, if capitalized, the largest fortune in the world.

Profits, before taxes for 1922, will exceed \$125,000,000. After taxes they will be \$110,000,000, about \$100 a car. With these earnings the Ford Motor Co. could be capitalized at \$2,000,000,000 and pay 5 per cent. on that capital.

Ford condemns bankers, but with \$180,000,000 cash he himself is the largest individual banker in this country, if not in the world. Michigan sugar beet growers and automobile manufacturers have little need for such a stupendous sum and only a few millions are banked in Detroit. Wall Street—the financial centre of the country—absorbs the other millions, and Ford accumulated profits expand and multiply with Wall Street assistance.

In his newspaper interviews Ford says that Wall Street and the gold standard have outlived their usefulness, but his millions flow through to Wall Street at 4 per cent. to bring his company a possible \$7,200,000 gold standard money annually in interest. This is more than \$6 profit for every car he produces.

Even a Republican Congress unites to add to the Ford wealth. The company paid more than \$50,000,000 in Federal taxes in 1921. Because of the abolition of the excess profits levy, it will pay only \$16,000,000 in 1922. The Fords are \$34,000,000 richer, though if they were to draw the riches out they would pay more than 50 per cent. additional in personal income taxes.

So Ford continues to pile up in his business the millions which find their way into Wall Street. His replacement parts business is so profitable that he could chop off his manufacturing profit of probably \$80 a car and make more than \$15,000,000 annually, or \$14 on each car produced from the sale of parts necessary to keep the millions of Fords now on the roads in running condition.

He could distribute this \$14 as a bonus to his workmen and still make the \$6 a car profit from interest.

But he is not selling at cost. He is holding on to profits from interest, parts and cars: \$58,000,000 in the record ten months ended last February, despite the heavy taxes; \$110,000,000 in all probability after taxes in 1922.

## CHIEF POLITICAL ASSASSINATIONS SINCE 1865.

Abraham Lincoln, President of the United States, April 14, 1865; died April 15, 1865.

Michael, Prince of Serbia, June 10, 1868.

Prim, Marshal of Spain, December 28, 1870.

Richard, Earl of Mayo, Governor-General of India, February 8, 1872.

Abdul Aziz, Sultan of Turkey, June 4, 1876.

Alexander II. of Russia, March 13, 1881.

James A. Garfield, President of the United States, July 2, 1881; died September 19, 1881; Guiteau, hanged, June 30, 1882.

Carter H. Harrison, Sr., Mayor of Chicago, October 28, 1893.

Marie Francois Sadi-Carnot, President of France, July 24, 1894.

Stanislaus Stambouloff, Premier of Bulgaria, July 25, 1895.

Nasr-ed-Din, Shah of Persia, May 1, 1896.

Canovas Del Castillo, Prime Minister of Spain, August 8, 1897.

Juan Idiarte Borda, President of Uruguay, August 25, 1897.

José Maria Reyna Barrios, President of Guatemala, February 18, 1898.

Empress Elizabeth of Austria, September 10, 1898.

General Ulisses Heureaux, President of the Dominican Republic, July 26, 1899.

William Goebel, Governor of Kentucky, January 30, 1900.

Humbert, King of Italy, July 29, 1900.

William McKinley, President of the United States, September 6, 1901; died September 14, 1901.

Leon Czolgosz executed, October 29, 1901.

Alexander, King of Serbia, and his wife, Queen Draga, June 11, 1903.

Bobrikoff, Gov.-General of Finland, June 16, 1904.

Von Plehve, Russian Minister of the Interior, July 28, 1904.

Solsalon Soininen, Procurator-General of Finland, February 6, 1905.

Delyannis, Grecian Premier, June 13, 1905.

Major-Gen. Count Shuvailoff, Russia, July 11, 1905.

Ex-Governor Frank Steunenberg, Idaho, December 30, 1905.

Sergius, Grand Duke of Russia, February 17, 1905.

Gen. Count Alexis Ignatieff, Russia, August 26, 1906.

Gen. Pavlov, St. Petersburg, January 9, 1907.

Premier Mirza Ali Hizam, Persia, August 31, 1907.

Carlos, King of Portugal, February 1, 1908.

Louis Philippe, Crown Prince of Portugal, February 1, 1908.

Prince Ito, of Japan, October 26, 1909.

Premier Pasha Ghali, Egypt, February 21, 1910.

Peter Areadovitch Stolypin, Premier of Russia, September 14, 1911.

Ramon Caceres, President of the Dominican Republic, November 19, 1911.

José Canalejas, Prime Minister of Spain, November 12, 1912.

Nazim Pasha, Turkish Minister of War, January 23, 1913.

Manuel E. Arujo, Premier of Salvador, February 4, 1913.

Francisco I. Madero, President of Mexico, February 23, 1913.

José Pino Suarez, Vice-President of Mexico, February 23, 1913.

George, King of Greece, March 18, 1913.

Archduke Francis Ferdinand of Austria-Hungary and his wife, Countess Sophie Chotek, Duchess of Hohenberg, June 28, 1914.

Jean J. Jaures, French Socialist leader, July 31, 1914.

Guillaume Sam, President of Hayti, July 28, 1915.

General Chen Chi-Nel, of Chinese revolutionary party, May 19, 1916.

General Count von Mirbach, German Ambassador to Russia, at Moscow, July 5, 1918.

Czar of Russia and family, July, 1918.

German Field Marshal von Elchhorn, in the Ukraine, July 31, 1918.

Count Karl Sturgkh, Austrian Premier, at Vienna, October 21, 1918.

Count Stephen Tisza, ex-Pres. Hung. Privy Council, at Budapest, November, 1918.

Sidonio Paes, President of Portugal, December 14, 1918.

Habibullah Khan, Ameer of Afghanistan, at Laghman, February 20, 1919.

"Red Czar," Yankel Sverdlov, at Moscow, early in 1919.

Kurt Eisner, Bavarian Premier, at Munich, February 21, 1919.

War Minister Neuring, at Dresden, Saxony, April 12, 1919.

Hugo Haase, Pres. Ger. Soc. Party, at Berlin, October 8, 1919.

Gen. Venustiano Carranza, President of Mexico, at Tlaxcaltenango, May 20, 1920.

Essad Pasha, Albanian leader, at Paris, June 13, 1920.

Droubi Pasha, Syrian Premier, near Haifa, August 20, 1920.

Inspector O'Sullivan, of British Army, at Dublin Castle, December 17, 1920.

Dr. Z. Jones, Governor of San Juan Province, Argentina; Buenos Aires, November 20, 1921.

Senor Dato, Premier of Spain; at Madrid, March 8, 1921.

Talaat Pasha, Ex Grand Vizier of Turkey; at Berlin, March 15, 1921.

M. Dras Kovics, Jugo-Slav Minister of Interior, at Delnice, Croatia, July 21, 1921.

Mathias Erzberger, Ex-German Vice Chancellor, by two youths, near Offenburg, Baden, August 26, 1921.

Portuguese Premier, Antonio Granjo, Ex-Pres. Machado dos Santos, and two other high officials, Lisbon, October 19, 1921.

Ta Kashi Hara, Japanese Premier, at Tokio, by Korean youth, November 4, 1921.

Bulgarian Minister of War, M. Demitroff, at Kostandil, October 22, 1921.

Heikki Ritavirta, Finnish Minister of the Interior, at Helsingfors, by a merchant, Feb. 14, 1922.

Jemal Azmyk Bey, Ex-Gov. of Trebizond, and B. E. Chakir, of the Turkish Committee of Union and Progress, by an Armenian, at Berlin, April 7, 1922.

Field Marshal Sir Henry H. Wilson, Military Adviser of the Ulster Government, by two Irishmen, at London, June 22, 1922.

Dr. Walter Rathenau, German Foreign Minister, by two German youths, (who, when at bay in a Saxony Castle, killed selves), at Berlin, June 24, 1922.

Djemel Pasha, Ex-Turkish (Unionist), Minister of Marine, Afghan Army Chief of Staff, by two Armenians, at Tiflis, Repub. of Georgia, July 25, 1922.

Gen. Michael Collins, Irish Free State Premier, by rebels, near Bandon, County Cork, Aug. 22, 1922.

## Memorable Dates.

- 1917 Germany begins unrestricted submarine warfare, Feb. 1; United States broke off diplomatic relations with Germany, Feb. 3; United States declared a state of war existed with Germany, April 6; Russian Czar abdicates, March 15; first American troops landed in France, June 26; Russia proclaimed a Republic, Sept. 15; first shot by American troops in France, Oct. 27; first American casualties in France, Nov. 3; Bolsheviks under Lenin seize supreme power in Russia, Nov. 7; Battle of Cambria, Nov. 20-Dec. 4; United States declared a state of war existed with Austria, Dec. 7; Jerusalem captured, Dec. 9.
- King Constantine of Greece abdicated, June 12.
- Halifax disaster, Dec. 6; explosion of a munition ship in harbor in collision caused fire that laid in ruins one-third of the city; killed 1,226, with 400 others missing; destroyed 3,000 houses, with \$20,000,000 damage.
- 1918 Peace signed at Brest-Litovsk between the Bolsheviks on the one side, and Germany, Austria-Hungary, Bulgaria and Turkey on the other, March 3; peace signed between Germany and Finland, March 7; battle of the Somme, March 21 to April 6; Paris bombarded by long range guns at distance of 75 miles, March 23; British naval forces raid Zeebrugge and Ostend, April 22; German plot discovered in Ireland, Sinn Fein leaders arrested, May 17; battle of the Aisne, May 27-June 5; Czar Nicholas of Russia, the Empress, their four daughters and one son, Prince Dolgoroukoff, Dr. Bodkin, a lady-in-waiting and a nurse were shot by Bolshevik orders at Ekaterinburg, July 16; at Perm, also in July, the Bolsheviks assassinated the Czar's brother, Grand Duke Michael, and at Alapalevsky, north of Ekaterinburg, they killed the Grand Dukes Sergius Mikhailovitch, Igo Constantinovitch and Ivan Constantinovitch; German retreat across the Marne begins, July 19; battle of St. Mihiel, Sept. 12-16; United States troops take St. Mihiel, Sept. 13; battle of the Meuse-Argonne, Sept. 20 to Nov. 11; Franco-American attack in Argonne, Sept. 26; British attack breaks Hindenburg line, Sept. 27; Bulgaria signs armistice and surrenders, Sept. 29; Ferdinand of Bulgaria abdicates, Oct. 5; United States troops capture St. Etienne, Oct. 6.
- Allies capture Cambrai, Le Cateau and Roncroy, Oct. 9; Allies occupy Ostend, Bruges and Lille, Oct. 17; Germans in third peace note accept President Wilson's terms and recall submarines to their bases, Oct. 20; British and Italians cross the Piave, Oct. 27; armistice granted to Turkey, Oct. 30; Hungarian Republic proclaimed in Budapest, and Republic of German-Austria in Vienna, Nov. 1; Austria accepts truce terms, Nov. 4; United States troops capture Sedan, Nov. 7; revolution in Kiel and Hamburg, Nov. 7; Bavaria proclaimed a republic, Nov. 8; the Kaiser abdicates, Nov. 9; he flees to Holland, Nov. 10; armistice in World War signed, Nov. 11; German fleet surrenders to British, Nov. 21; United States troops enter Mainz, Dec. 6; American troops crossed the Rhine, Dec. 13.
- Malbone St. Tunnel rail (B. R. T.) wreck, 97 killed, 100 hurt, Nov. 2.
- 1919 Peace Conference opens informally at Paris, Jan. 12; formally inaugurated at Versailles, Jan. 18; treaty signed at Versailles, June 28, by the Treaty Plenipotentiaries of Germany and the Allied Powers; President Wilson gave the treaty to the Senate, July 10; ratified by the German National Assembly, July 10; by the British Parliament, July 25; and by King George, July 31; by the King of Italy, Oct. 7; by France, Oct. 13, and by Japan, Oct. 27; rejected by the United States Senate, Nov. 19.
- Three U. S. Navy seaplanes left Tracy, Newfoundland, May 16; one, the N-C 4, reached the Azores, May 17; Lisbon, May 27; Plymouth, England, May 31; Harry G. Hawker and MacKenzie Grieve fell in

- midcoast, on an attempted flight, May 13, from Newfoundland to Ireland, but were rescued. John Alcock and A. W. Brown made, June 14-15, a non-stop air flight from Newfoundland to Ireland. A British dirigible balloon, R-34, left Scotland, July 2, and descended at Mineola, L. I., July 6. It left for England July 10, and arrived there July 13. The U. S. transcontinental air flight, New York to San Francisco and return, Oct. 8-18, was won by Lieut. W. B. Maynard and Lieut. Alex. Pearson.
- 1919 Nation-wide bomb plot, at the home of Attorney General Palmer; the Red was killed by his own bomb, June 2.
- Airplane service between New York and Chicago begun July 1.
- Big port strike at N. Y., Boston, etc., begun July 16.
- Dirigible balloon exploded at Chicago; 10 killed.
- Thirty-one killed, 500 injured, in race riot, at Chicago, July 27.
- Boston police strike, begun Sept. 9.
- Steel workers strike all over U. S., beginning Sept. 22; railway strike in England, begun Sept. 27; soft coal miners in U. S. began strike Oct. 31.
- 1920 The United States Senate for the second time defeated the German treaty, March 19.
- The U. S. Transport Buford (Soviet Ark) took to Finland Emma Goldman, Alexander Berkman and 200 other Reds (Dec., 1919-Jan., 1920).
- 1920 The Eighteenth Amendment to the U. S. Constitution providing for Nation-wide prohibition, was proclaimed in effect Jan. 16.
- The Nineteenth Amendment giving suffrage to women, was proclaimed in effect Aug. 26.
- Wall St., N. Y., bomb explosion, killed over 30, injured over 100; did over \$2,000,000 property damage, Sept. 16.
- 1921 President Harding signed joint resolution (passed by House June 30, by Senate July 1) of Congress declaring peace with Germany and Austria, July 2. The Treaty was signed Aug. 25, at Berlin, by United States and German representatives; was ratified Sept. 17 by the German National Council; ratified by the United States Senate (66 to 20) on Oct. 18.
- Sinn Feiners burned Custom House, Dublin, May 25.
- Arkansas River floods and rain swept away 665 houses at Pueblo, Col., making 3,500 persons homeless; property loss over \$20,000,000; 1,500 dead or missing, June 3-4.
- Explosion of a new gas plant at Oppan, on the Rhine, Germany; killed hundreds and destroyed property worth millions, Sept. 21.
- Collapse and explosion of dirigible balloon, ZR-2, over Hull, England, over 40 were killed, Aug. 25.
- Limitation of Armaments Conference met at Washington in November; it adjourned Feb. 6, 1922.
- 1922 Roof of Knickerbocker (movie) Theatre collapsed at Washington, D. C.; 98 died from injuries; Jan. 28.
- Dirigible balloon, Roma, exploded descending at Hampton, Va.; 34 died of injuries; Feb. 21.

### HIGHEST LATITUDES REACHED IN POLAR EXPLORATIONS.

(Prepared by the National Geographic Society, Washington, D. C., Gilbert Grosvenor, President.)

The following is a record of the highest latitudes attained in Arctic and Antarctic exploration during the past three hundred years in the Eastern and Western Hemispheres, both by land and by sea: \* Represents new records.

#### ARCTIC EXPLORATION—WESTERN HEMISPHERE.

| COMMANDER.                                                                       | Date. | No. Lat.   | Locality.                                      |
|----------------------------------------------------------------------------------|-------|------------|------------------------------------------------|
| *John Davis.....                                                                 | 1588  | 72° 12'    | Sanderson's Hope, in West Greenland Waterways. |
| William Baffin.....                                                              | 1616  | 77° 45'    | Ellesmere Land.                                |
| William Morton, Elisha Kent Kane Expedition.....                                 | 1854  | 82° 27'    | Cape Constitution.                             |
| Sir Edward Augustus Inglefield.....                                              | 1858  | 78° 28'    | Smith Sound.                                   |
| Dr. Isaac I. Hayes.....                                                          | 1861  | 81° 35'    | Cape Lieber, Grinnell Land.                    |
| Capt. Charles Frederick Hall.....                                                | 1871  | 82° 2'     | Near Thank God Harbor.                         |
| *A. H. Markham, Nares Expedition.....                                            | 1875  | 83° 20'    | Northeast Grinnell Land.                       |
| *James B. Lockwood and Gen. David L. Brainard, Gen. A. W. Greely Expedition..... | 1882  | 83° 24' 5" | Greenland Coast.                               |
| *Robert E. Peary.....                                                            | 1892  | 83° 27'    | Greenland Coast.                               |
| Robert E. Peary.....                                                             | 1902  | 84° 17'    | Grinnell Land.                                 |
| *Robert E. Peary..... (Apr. 21)                                                  | 1906  | 87° 6'     | North of Greenland.                            |
| *Robert E. Peary..... (Apr. 6)                                                   | 1909  | 90°        | The North Pole.                                |

#### ARCTIC EXPLORATION—EASTERN HEMISPHERE.

| COMMANDER.                                      | Date.  | No. Lat. | Locality.                   |
|-------------------------------------------------|--------|----------|-----------------------------|
| *William Barents.....                           | 1596   | 79° 49'  | Spitzbergen & Gr'nland Sea. |
| *Henry Hudson.....                              | 1607   | 80° 23'  | Spitzbergen & Gr'nland Sea. |
| *Phipps.....                                    | 1773   | 80° 48'  | Spitzbergen & Gr'nland Sea. |
| *Scoresby the Elder.....                        | 1806   | 81° 30'  | Spitzbergen & E. Greenland. |
| *Sir William Edward Parry.....                  | 1827   | 82° 45'  | North of Spitzbergen.       |
| Baron Nordenskjöld and Otter.....               | 1868   | 81° 42'  | Spitzbergen.                |
| J. Payer.....                                   | 1873   | 81° 50'  | Franz Josef Land.           |
| *Fridtjof Nansen.....                           | 1893-5 | 86° 4'   | North of Franz Josef Land.  |
| Frederick George Jackson.....                   | 1894-7 | 83° 20'  | Franz Josef Land.           |
| Prince Luigi Amadeo.....                        | 1899   | 82° 4'   | Franz Josef Land.           |
| *Capt. Cagni, Duke of Abruzzi's Expedition..... | 1898   | 86° 34'  | North of Franz Josef Land.  |
| Ziegler Polar Expedition.....                   | 1904   | 82°      | Franz Josef Land.           |

#### ANTARCTIC EXPLORATION.

| COMMANDER.                             | Date. | Latitude.  | Longitude.  | Means.                         |
|----------------------------------------|-------|------------|-------------|--------------------------------|
| *Capt. James Cook.....                 | 1773  | 71° 10' S. | 106° 54' W. | Sailing vessel.                |
| *Admiral Charles Wilkes..... (Jan. 16) | 1840  | 158° E.    |             | Sailing vessel.                |
| *Capt. Ross.....                       | 1842  | 77° 32' S. |             | Sailing vessel.                |
| *Borchgrevink.....                     | 1899  | 78° 50' S. |             | Steamship.                     |
| *Capt. Robert F. Scott.....            | 1902  | 82° 17'    | 163° E.     | Steamship and sledge journeys. |
| *Sir Ernest Shackleton.....            | 1908  | 85° 20' S. | 162° E.     | Steamship and sledge journeys. |
| *Roald Amundsen..... (Dec. 14)         | 1911  | 90°        |             | Steamship and sledge journeys. |
| Capt. Robert F. Scott..... (Jan. 18)   | 1912  | 90°        |             | Steamship and sledge journeys. |

Captain Cagni, on his journey in 1899, reached 86° 34' N., 64° E.—at that time the most northerly point attained by man—within 206 miles of the North Pole. Sir Ernest Shackleton in 1908 personally led the party which pushed to latitude 85° 20' S., 162° E. longitude, surpassing his predecessors by 366 geographical miles and reaching within 97 miles of the South Pole.

†The time and place from which Admiral Wilkes first saw the Antarctic Continent.

NOTE BY THE EDITOR.—Dr. Fredrick A. Cook claims to have discovered the North Pole on April 21, 1908.

## TROOPS ENGAGED IN U. S. WARS.

Number of United States troops paroled on the field, 16,431; Confederate troops paroled on the field, 248,599. Number of United States troops who died while prisoners, 30,156; Confederate troops who died while prisoners, 30,152.

## A List of Marine Disasters.

(Figures indicate number of lives lost.)

- 1805—Oct. 23. British troop ship *Aeneas*, lost off Newfoundland; 340.
- 1810—Nov. 10. British troop ship *Harpooner*, foundered off Newfoundland; 200.
- 1831—April 9. Brig *Billow* wrecked on Ragged Island, Nova Scotia; 137.
- Aug. 19. Immigrant ship *Lady Sherbrooke*, Ireland to Quebec, wrecked off Cape Ray; 273.
- 1832—April 9. Steamship *Brandywine* burned on Mississippi River near Memphis; 110.
- 1833—May 11. Ship *Lady of the Lake*, England to Quebec, hit by iceberg; 215.
- 1836—Nov. 21. American ship *Bristol*, England to New York, wrecked on Far Rockaway Beach, N. Y.; 77.
- 1837—Jan. 2. American bark *Mexico*, England to New York, wrecked on Hempstead Beach, near Point Lookout, N. Y.; 92.
- Feb. 16. British ship *Jane* and *Margaret*, England to New York, lost near Isle of Man; 200.
- May 9. Steamer *Sherrod* burned on Mississippi River; 175.
- Oct. 9. Steamboat *Home*, New York to Charleston, wrecked off Ocracoke; 100.
- Oct. 29. Steamboat *Monmouth* sunk in collision on Mississippi River; 234.
- 1838—April 25. Steamboat *Moselle* blown up on Ohio River, near Cincinnati, Ohio; 100.
- June 14. Steamboat *Pulaski*, Savannah to Baltimore, blew up off North Carolina; 140.
- June 18. Steamboat *Washington* burned on Lake Erie; 50.
- Nov. 25. Steamboat *Gen. Brown*, blew up on Mississippi River, at Helena, Ark.; 60.
- 1840—Jan. 13. Steamboat *Lexington*, New York to Stonington, burned off Edens Neck, L. I.; 140.
- Aug. 9. Brig *Florence*, Rotterdam to New York, foundered off Newfoundland; 60.
- 1841—Feb. 19. Ship *Governor Fenner*, England to New York, sunk in collision off Holyhead, England; 122.
- April 19. American ship, *William Browne*, England to Philadelphia, sunk by iceberg; 70.
- 1841—March 11. Steamer *President* New York to Liverpool, with 136 persons on board; never heard from.
- Aug. 9. Steamer *Erie* burned on Lake Erie; 175.
- Aug. 28. Transports *Abercrombie*, *Robinson* and *Waterloo* wrecked off Cape of Good Hope; 189.
- 1847—April 28. Emigrant ship *Exmouth*, London-derry to Quebec; 200.
- Nov. 19. Steamers *Talisman* and *Tempest* in collision on Ohio River; 100.
- Nov. 21. Steamer *Phoenix* burned on Lake Michigan; 240.
- 1848—Aug. 24. American emigrant ship *Ocean Monarch*, from Liverpool, burned off Carnarvon-shire, North Wales; 200.
- 1850—March 30. Steamer *Royal Adelaide* wrecked off Margate; 400.
- June 17. Steamer *Griffith* burned on Lake Erie; 300.
- Nov. 12. Emigrant ship *Edmund*, Limerick to New York, wrecked off coast of Ireland; 100.
- 1852—Jan. 24. Steamer *Amazon* burned off Scilly Islands; 100.
- Feb. 26. Troopship *Birkenhead*, Queenstown to Cape of Good Hope, wrecked; 454.
- Aug. 20. Steamer *Atlantic* sunk by collision on Lake Erie; 250.
- 1853—Feb. 16. The *Independence* burned off coast Lower California; 140.
- Sept. 28. Emigrant ship *Annie Jane* wrecked off coast of Scotland; 348.
- Dec. 23-31. Steamer *San Francisco*, bound for California with 700 United States troops, foundered at sea; 240.
- 1854—Jan. 20. Emigrant ship *Taylor* wrecked off Lambay; 380.
- March. Steamer *City of Glasgow*, Liverpool to Philadelphia, with 450 passengers, never heard from.
- May 10. Troopship *Lady Nugent*, from Madras, foundered in a storm; 400.
- Sept. 27. Steamer *Arctic*, from Liverpool, sunk in collision in fog, 40 miles off Cape Race, N. F.; 350.
- Nov. 13-16. Eleven transports with supplies for the army in the Crimea wrecked in storm on Black Sea; 600.
- 1855—May 1. Emigrant ship *John* wrecked off Falmouth; 200.
- 1856—Jan. 30. Chilian warship *Cazador* wrecked; 314.
- Sept. 23. Steamer *Pacific*, Collins Line, 240 on board, never heard from.
- Nov. 2. Steamer *Lyonnais* sunk off Nantucket in collision; 260.
- 1857—Feb. 26. Steamer *Tempest*, Anchor Line; 150 on board; never heard from.
- June 26. Steamer *Montreal*, Quebec to Montreal, burned; 250.
- Aug. 20. Ship *Dunbar* wrecked near Sydney, Australia; 120.
- Sept. 12. Steamer *Central America*, Havana to New York, sunk; 400.
- 1858—June 13. Steamboat *Pennsylvania* exploded on Mississippi River, near Memphis; 160.
- Sept. 13. Steamer *Austria*, Hamburg to New York, burned in midocean; 471.
- 1859—April 27. American ship *Pomona*, Liverpool to New York, wrecked; 400.
- Oct. 25. Steamer *Royal Charter* wrecked on the Anglessea coast; 446.
- 1860—Feb. 19. American ship *Luna* wrecked off Barfleur; 100.
- Feb. 19. Steamer *Hungaria* wrecked near Cape Sable, N. S.; 205.
- Sept. 8. Steamer *Lady Elgin* sunk by collision on Lake Michigan; 287.
- 1863—Feb. 7. British steamer *Orpheus* wrecked off coast of New Zealand; 190.

- 1865—April 27. Steamboat *Sultana* with exchanged Union prisoners of war aboard, destroyed on Mississippi River, 7 miles above Memphis, by boiler explosion; 400.
- Aug. 24. Emigrant ship *Eagle Speed* foundered near Calcutta; 265.
- 1866—Jan. 11. Steamer *London* foundered in Bay of Biscay; 220.
- Jan. 30. Steamer *Missouri*, boilers exploded on Ohio River; 100.
- Jan. 30. Steamer *Miami*, boilers exploded on Mississippi River; 150.
- Oct. 3. Steamer *Evening Star*, New York to New Orleans, foundered; 250.
- 1867—Oct. 29. Royal mail steamers *Rhone* and *Wye* and about fifty vessels driven ashore and wrecked at St. Thomas, West Indies, by a hurricane; 1,000.
- 1868—April 9. Steamer *Sea Bird* burned on Lake Michigan; 100.
- 1869—Oct. 27. Steamer *Stonewall* burned below Cairo, Ill.; 200.
- 1870—Jan. 24. American *Onelda* sunk in collision off Yokohama; 115.
- Jan. 28. Inman Line steamer *City of Boston*, New York to Liverpool, with 177 on board; never heard from.
- Sept. 7. British warship *Captain* foundered off Finisterre; 472.
- Oct. 19. Steamer *Cambria* lost off Inishtrahul; 170.
- 1871—July 30. Staten Island ferryboat *Westfield's* boilers exploded in New York harbor; 100; 290 injured.
- 1873—Jan. 22. British steamer *Northfleet* sunk in collision off Dungeness; 300.
- April 1. White Star steamer *Atlantic* wrecked off Nova Scotia; 547.
- Nov. 23. French Line steamer *Ville du Havre*, New York to Havre, in collision with ship *Loch Earn* and sunk in sixteen minutes; 230.
- 1874—Dec. 6. Emigrant ship *Cospatrick* burned at sea; 470.
- 1875—May 7. Hamburg mail steamer *Schiller*, wrecked in fog on Scilly Islands; 200.
- June 4. American steamer *Pacific* sunk by collision off Cape Flattery; 236.
- Dec. 6. Steamer *Deutschland*, Bremen to New York, wrecked at mouth of the Thames; 157.
- 1877—July 15. British steamer *Eten* wrecked off Valparaiso; 100.
- Nov. 24. United States sloop-of-war *Huron* wrecked off North Carolina coast; 100.
- November. Steamer *Atacama* wrecked off Caldera, Chili; 104.
- 1878—Jan. 31. Steamer *Metropolis* wrecked off North Carolina; 100.
- March 24. British training ship *Eurydice* foundered near the Isle of Wight; 300.
- Sept. 3. British steamer *Princess Alice* sunk in collision in the Thames; 700.
- Dec. 18. French steamer *Byzantin* sunk in collision in the Dardanelles; 210.
- 1879—Dec. 2. Steamer *Borusia* sank off the coast of Spain; 174.
- 1880—Jan. 31. British training ship *Atlanta* left Bermuda with 290 men; never heard from.
- Nov. 24. French steamer *Onie Joseph* sank by collision of Spezzia; 250.
- 1881—May 24. Steamer *Victoria*, capsized in Thames River, Canada; 200.

- Aug. 30. Steamer Teuton wrecked off the Cape of Good Hope; 200.
- 1883—July 3. Steamer Daphne capsized in the Clyde; 124.
- 1884—Jan. 18. American steamer City of Columbus wrecked off Gay Head Light, Mass.; 99.
- April 3. Steamer Daniel Steinman wrecked off Sambre Head, N. S.; 131.
- April 13. Bark Pomena in collision with steamer State of Florida off coast of Ireland, both vessels sunk; 150.
- July 22. Spanish steamer Gizon and British steamer Lexham in collision off Cape Finisterre; both sunk; 150.
- 1886—March 14. Steamer Oregon, Cunard Line, Liverpool to New York, in collision with unknown schooner 18 miles east of Long Island; passengers and crew saved.
- 1887—Jan. 20. Steamer Kapunda in collision with bark Ada Melmore off coast of Brazil; 300.
- Nov. 15. British steamer Wah Young burned; 400.
- Nov. 19. Steamer W. A. Scholten sunk by collision in the English Channel; 134.
- 1888—Aug. 14. Steamship Geiser sunk by collision with the Thingvalle; 105.
- Sept. 12. Italian steamship and steamship La France collide near Canary Islands; 89.
- 1889—March 16. United States warships Trenton, Vandalia and Nipsic and German ships Adler and Eber wrecked on Samoan Islands; 147.
- 1890—Jan. 2. Steamer Persia wrecked on Island of Corsica; 130.
- Feb. 17. British steamer Duburg wrecked in China Sea; 400.
- March 1. British steamship Quetta wrecked off Cape York; 124.
- Sept. 19. Turkish frigate Ertogru foundered off coast of Japan; 540.
- Nov. 10. British cruiser Serpent, wrecked in storm off coast of Spain; 167.
- Dec. 27. British steamer Shanghai burned in China Sea; 100.
- 1891—March 17. Steamer Utopia, Anchor Line, sunk by collision off Gibraltar; 574.
- April 16. British ship St. Cathar's wrecked off Carolina Island; 90.
- April 22. Chilean warship Blauco Encalada blown up in Caldera Bay; 200.
- Dec. 18. Steamer Abyssinia, Guion Line; burned at sea.
- 1892—Jan. 13. Steamer Namchow wrecked in China Sea; 414.
- Oct. 28. Steamer Roumania, Anchor Line, wrecked off Portuguese coast; 113.
- 1893—Feb. 8. Steamer Trinacria, Anchor Line, wrecked off coast of Spain; 115.
- Feb. 11. White Star steamer Naronic, Liverpool to New York on her maiden voyage; never heard from.
- June 22. British battleship Victoria sunk by collision with her sister ship Camperdown off Tripoli; 350.
- 1894—Feb. 2. United States corvette Kearsarge wrecked on Roncador Reef.
- June 25. Steamship Norge, wrecked on Rockall Reef, North Atlantic; 600.
- Nov. 1. Steamer Walraro wrecked off coast of New Zealand; 134.
- 1895—Jan. 30. German steamer Elbe sunk in collision with British steamer Crathie in North Sea; 335.
- March 11. Spanish cruiser Reina Regenta foundered in the Atlantic at entrance to the Mediterranean; 400.
- May 28. French steamer Dom Pedro wrecked on coast of Galicia; 100.
- 1896—June 17. Steamer Drummond Castle wrecked off Brest, France; 250.
- 1898—Feb. 15. United States battleship Maine blown up in Havana harbor; 260.
- July 4. French Line steamer La Bourgogne, in collision with British sailing ship Cromartyshire; 560.
- Oct. 14. Steamer Mohegan, Atlantic Transport Line, wrecked off the Lizard; 170.
- 1901—Feb. 22. Pacific mail steamer Rio de Janeiro wrecked in San Francisco harbor; 128.
- April 1. Turkish transport Aslan wrecked in Red Sea; 180.
- 1902—July 21. Steamer Primus sunk in collision with steamer Hansa, on the Elbe; 112.
- 1903—June 7. French steamer Libau sunk in collision near Marseilles; 150.
- 1904—June 15. Steamship General Slocum took fire going through Hell Gate, East River; 1,000.
- June 28. Steamer Norge wrecked off Scottish coast; 846.
- 1905—Sept. 13. Japanese warship Mikasa sunk by explosion; 599.
- 1906—Jan. 21. Brazilian battleship Aquidaban sunk near Rio Janeiro by explosion of powder magazine; 212.
- Jan. 22. American steamer Valencia lost off Vancouver Island; 129.
- Aug. 4. Italian emigrant ship Sirio wrecked off Cape Palos; 350.
- Oct. 21. Russian steamer Variag on leaving Vladivostok accidentally struck by a torpedo and sunk; 140.
- 1907—January. British steamship, Bengwerin foundered in North Sea; 24.
- Feb. 12. Steamer Larchmont sunk in Long Island Sound; 131.
- Feb. 21. British steamer Berlin stranded off the Hook of Holland; 100.
- Feb. 24. Austrian steamer Imperatrix wrecked; 137.
- March 12. Explosion on French battleship Jena killed 117.
- July 20. American steamers Columbia and San Petro collided on the California coast; 100.
- Nov. 26. Turkish steamer Kaptan, foundered in North Sea; 110.
- 1909—Feb. 3. Steamship St. Cuthbert burned off Nova Scotia; 15.
- March 23. Japanese steamer Matsu Maru sunk in collision near Hakodate; 300.
- April 25. British cruiser Gladiator sunk in collision with American Liner St. Paul off Isle of Wight; 30.
- April 30. Japanese training cruiser Matsu Shima sunk by explosion off the Pescadores; 200.
- July 28. Steamer Ying King foundered off Hongkong; 300.
- Aug. 24. Steamship Folgenender wrecked; 70.
- Nov. 6. Steamer Taisi sunk in storm; 150.
- Nov. 27. Steamer San Pablo sunk off the Philippines; 100.
- 1909—Jan. 23. Collision between steamer Florida and White Star steamer Republic, latter sunk off Nantucket Lightship, during a fog; 6.
- Aug. 1. British steamer Waratah, from Sydney via Port Natal for London, left Port Natal July 26; never heard from; 300.

- April 8. Nile, excursion steamer, sunk in collision near Cairo, Egypt; 200.
- April 14-15. White Star steamship Titanic sunk after collision with iceberg in North Atlantic; 1,517.
- April 30. Steamer Texas blown up by mine at entrance to Gulf of Smyrna; 64.
- June 20. Steamer Hungarian burned on lower Danube; 23.
- Sept. 23. Russian steamer Obnevka sunk in Dvina River; 115.
- Sept. 28. Japanese steamer Kickermaru sunk off coast of Japan; 1,000.
- Oct. 7. Steamer Fagundes Varela burned off Brazilian coast; 18.
- Nov. 1. Steamer Cecilia sunk in Lake St. Louis, Quebec; 16.
- 1913—Jan. 2. Steamer El Dorado lost in storm on Atlantic coast; 39.
- Jan. 4. Steamer Julia Luckenbach sunk in collision with British freighter Indrakuala in Chesapeake Bay; 15.
- Jan. 7. Oil steamer Rosecrans wrecked on Oregon coast; 33.
- Jan. 9. Steamer James T. Staples sunk in Tombigbee River, Alabama; 18; 10 injured.
- Jan. 16. British steamer Veronese wrecked near Oporto, Portugal; 16.

- March 1. British steamer Calvadas lost in blizzard in Sea of Marmora; 200.
- March 5. German torpedo-boat destroyer S-178 sunk in collision with cruiser Yorck, near Heligoland; 66.
- March 7. British steamer Alum Chive destroyed by dynamite explosion, Baltimore; 50.
- May 24. Steamer Nevada sunk by mine in Gulf of Smyrna; 40.
- Aug. 18. Steamer State of California wrecked near Juneau, Alaska; 40.
- Oct. 9. Steamship Volturmo wrecked by fire and explosion in mid-ocean; 135.
- Nov. 9. Steamer collier Bridgeport wrecked in St. Lawrence River; 44.
- Dec. 5. Swedish steamer Malmverget foundered on Norway coast; 45.
- December. German steamer Aelia wrecked near Terra del Fuoco; 98.
- 1914—Jan. 5. Tank steamer Oklahoma sunk off Sandy Hook; 21.
- Jan. 30. Old Dominion steamship Monroe sunk in collision off coast of Virginia; 41.
- March 25. Steamer Mani blown up off Pearl Harbor, Hawaii; 30.
- March 31. Sealing steamer Southern Cross wrecked in Belle Isle Strait; 173.
- April 28. Steamer Benj. Noble, off Duluth; 20.
- May 3. Leyland Liner Columbian burned on Grand Banks; 15.
- May 15-21. Steamship Luckenbach wrecked off coast of South Carolina; 29.
- May 29. Canadian Pacific steamship Empress of Ireland sunk in collision with Danish collier Stord in St. Lawrence; 1,024.
- Sept. 18. Steam schooner Francis H. Leggett wrecked near mouth of Columbia River, Oregon; 80.
- Oct. 30. British hospital ship Robrilla wrecked on coast near Whitby, England; 54.
- 1915—Jan. 18. British steamer Penarth wrecked off English coast; 21.
- March 24. United States submarine F-4 sunk off Honolulu, H. I.; 26.
- April 3. Dutch steamer Prins Maurits lost off Cape Hatteras; 44.
- July 24. Steamer Eastland overturned in Chicago River; 812.
- Aug. 16. Dredge San Jacinto wrecked off Galveston, Tex.; 50.
- Aug. 16. Dredge Sam Houston wrecked off Galveston, Tex.; 56.
- Sept. 28. Steamship Isabel foundered in Long Island Sound; 14.
- Nov. 2. Steamer Santa Clara wrecked on Oregon coast; 15.
- Nov. 11. Steamer Charles A. Luck lost on Lake Superior; 18.
- 1916—Jan. 22. Steamship Pollentia foundered in mid-Atlantic.
- Feb. 3. Steamer Dalin Bari sunk in Pacific; 160.
- Feb. 26. French auxiliary cruiser Provence sunk in Mediterranean. Of nearly 4,000 on board but 870 were saved.
- May 9. Steamship Roanoke wrecked off coast of California; 41.
- June 5. River packet Eleanore capsized in Mississippi, north of Memphis, Tenn.; 30.
- Aug. 1. British steamer Ecuador sunk by explosion off coast of Chile; 20.
- Aug. 11. Greek steamer Eletheria burned in Aegean Sea; 40.
- Aug. 16. American steamer Admiral Clark wrecked in South Atlantic; 20.
- Aug. 29. United States cruiser Memphis wrecked at Santa Domingo; 33.
- Aug. 29. Chinese steamer Hsin Yu sunk off coast of China; 1,000.
- Aug. 29. Japanese steamer Wakatsu Maru wrecked on coast of Japan; 105.
- Oct. 20. Steamer James B. Colgate wrecked on Lake Erie; 21.
- Oct. 20. Steamer Merida lost on Lake Erie; 20.
- Nov. 3. London and N. W. Railway steamship Connemara and British steamship Retriever collided and sank in Irish Sea; 92.
- 1917—May 15. Ship Standard wrecked in Bering Sea; 25.
- July 1. French steamer Himalaya sunk by explosion in the Mediterranean; 28.
- July 9. The British warship Vanguard blown up at her dock in a British port; 800.
- July 27. Japanese freighter Koto Hira Maru wrecked on island near Alaska; loss, \$1,000,000.
- Nov. 10. Steamer Castalla wrecked on Lake Superior; 22.
- 1918—Feb. 24. Red Cross liner Florizel wrecked near Cape Race, N. F.; 92.
- Feb. 26. United States naval tug Cherokee lost in storm off Delaware Capes; 29.
- March 18. British steamer Batiscaun lost off Nova Scotia; 41.
- March 24. British steamer War Knight destroyed in collision off British coast; 37.
- April 25. Chinese steamship Kiang-Kwan sunk in collision off Hankow; 500.
- May 1. American steamship City of Athens sunk in collision off Delaware coast; 66.
- June 14. The U. S. S. Cyclops, 19,360 tons displacement, left the Barbados, West Indies, on March 4, 1918, and has not been heard of since. She had on board a crew of 15 officers and 221 men; also as passengers 6 officers and 51 enlisted men, as well as the American Consular General at Rio Janeiro, Brazil. Cost figures for Croton Lake and Croton Falls cover dam construction only.

## PRINCIPAL RIVERS OF THE U. S.

TOTAL number of navigable streams in United States, 295, tributary as follows, the total navigable length in miles being in parentheses—Atlantic, 148 (5,365); Gulf, not including the Mississippi, 53 (5,212); Mississippi and branches, 54 (13,912); Canada, 2 (315); Pacific, 88 (1,606). Total navigable length, 26,410 miles.

The Hudson was one of the earliest rivers of the country to be improved by the Government. Work began even before 1822 by the State of New York, at which time the Erie Canal was opened, and in 1823 the Erie and Champlain both emptied into the pool created by the State dam at Troy, finished about that year. Work by the United States began in 1834.

### HEIGHT OF YOSEMITE WATERFALLS ABOVE SEA LEVEL.

The height in feet above sea level of the waterfalls in Yosemite Valley is as follows—Upper Yosemite, 6,525; Lower Yosemite, 4,420; Nevada, 5,907; Vernal, 5,044; Illioullette, 5,816; Bridalveil, 4,787; Ribbon, 7,008; Widows Tears, 6,466.

## THE PANAMA CANAL.

(Opened for Navigation August 15, 1914. Gov., Col. Jay J. Morrow, U. S. Army, Balboa Heights.)

THE Panama Canal was built between latitudes 8 and 9° N. across the Isthmus of Panama at its narrowest part but one. The saddle through which it crosses the continental divide was originally about 335 feet above sea level. Gold Hill, the highest point immediately alongside the channel of the Canal, rises 540 feet above sea level. The Canal has a length of 43.8 nautical miles from deep water in the Atlantic to deep water in the Pacific. The Canal extends at sea level from its starting point in Limon Bay to Gatun, 5.77 miles. At Gatun the sea level section ends in a flight of three pairs of locks, forming the steps to Gatun Lake, with its normal elevation 85 feet above the sea.

Gatun Lake was formed by damming the Chagres Valley, and excess water, wasted through the spillway, finds its way to sea through the old course of the Lower Chagres. The Canal proceeds up the valley of the Chagres 20.55 miles to Gamboa, and in this section relatively little excavation was required. At Gamboa begins the real drive through the divide, the famous Culebra Cut. It is 6.97 nautical miles long, 300 feet wide at bottom, and extends to Pedro Miguel lock and dam, on the Pacific slope of the divide. Here one lock lowers the ship to Miraflores Lake, a small body about a mile long,

with its surface 55 feet above the sea. At the south end of this lake are Miraflores locks, which, in two steps, lower the ship to the Pacific. A sea level channel 7 miles long carried past Balboa and out into the Pacific.

The minimum depth of the channel is 41 feet, and in parts of Gatun Lake it is about 80 feet deep. The lock chambers have a clear width of 110 feet, and length of 1,000 feet, giving ample handling room for the largest ships yet built. Gatun dam, by which Gatun Lake was formed, is a big, gently sloping mound, built by pumping sand and clay into the space between two ridges of rock and earth. It is 1½ miles long and ¼ mile wide at its base. Its crest is 105 feet above sea level and the width of the dam at the top is 100 feet.

The Panama Railroad extends between Colon and Panama on the eastern side of the Canal.

The Canal Zone is the strip of land extending five miles on either side of the axis of the Canal, but not including the cities of Panama and Colon, which remain within the Republic of Panama. It has an area of 441½ square miles, including land and water. It was granted to the United States by the treaty made with Panama, February 26, 1904. The United States paid \$10,000,000 for the Zone, and makes an annual payment in addition of \$250,000.

## ORIGIN AND DESTINATION OF CARGO.

The tonnage of cargo passing through the Panama Canal during the fiscal year 1922 (10,884,910) was equivalent to 93.8 per cent. of the tonnage of the previous year (11,599,172).

The greatest shrinkage was in the trade with the west coast of South America. Exports from the Atlantic and Gulf ports of the United States to that region fell from 933,261 to 244,514 tons. European exports to South America declined only from 297,166 to 283,804 tons. Exports from South America through the Canal to the United States were 548,609 tons, as compared with 475,597 in 1921, and to Europe, 663,127, as compared with 922,499. Compelling imports and exports and Europe and the

United States, this South American trade was less by 1,388,469 tons, and to this may be added a difference of 398,097 tons in crude oil shipments from Mexico to South America, or a total of 1,786,566.

The trade with Australasia has also fallen off. Exports from the United States to Australasia declined from 620,428 to 288,090, and exports from Europe from 391,848 to 359,895. Imports from Australasia to the United States fell from 147,877 to 45,957, and to Europe from 579,745 to 381,533. The total loss of cargo in the Australasian trade amounted to 664,418.

Exports from the United States to the Far East increased from 1,213,906 to 1,728,172 tons. Imports from the Far East fell from 428,044 to 303,315.

Welland Ship Canal is under construction, and is not yet open for traffic.

The Queenstown-Chippawa Power Canal of the Ontario Hydroelectric Commission, total cost about \$80,000,000 (of which \$15,000,000 is yet to be spent), was opened Dec. 23, 1921, at Niagara Falls, Ont. Construction was begun in 1917. About 275,000 horse-power is generated, which is to be increased ultimately to 550,000. The canal is 12½ miles long.

Other than steam vessels using Suez Canal in 1921 numbered 3,257, of 155,820 net (metric) tons. The total receipts in 1921 were 149,251,000 francs. Southbound cargoes were chiefly metals and machinery, coal, railroad material, petroleum, salt, textiles and cement. Northbound cargoes were chiefly wheat, benzine and mazout, rich manganese, copra, sugar, oilseed, gunnies, wool, and jute. Of the 1921 net tonnage, 11,397,019 was British; 2,031,625, Dutch; 1,042,266, Japanese; 967,746, French; 934,146, Italian; 696,226, Scandinavian; 671,840, American; and 170,520, German.

## CATSKILL AND CROTON AQUEDUCTS.

Particulars of the Catskill and Croton Aqueducts, which supply the City of New York with water, are contained in the article on the water supply of that municipality, elsewhere in the ALMANAC.

## FAST OCEAN AND AIR PASSAGES.

*Sailing Ships*—Columbus, in 1492, sailed from Spain (Palos) to the Gulf of Mexico in thirty-seven days.

The American-built clipper, the *Lightning*, of the Black Ball (British) Australian Line, on March 1, 1854, sailed 436 nautical miles, on way from Boston to Liverpool, on her maiden voyage. A gale was blowing and the ship's log showed a speed as high as 18½ miles an hour. The same vessel, on March 19, 1857, sailed 430 nautical miles, on way from Liverpool to Melbourne, Australia. The clipper Donald McKay, Black Ball Line, on Feb. 27, 1855, sailed 421 nautical miles on maiden voyage from Boston to Liverpool.

The fastest day's record on a sailing ship on any sea—437 miles—was made by the *Sovereign* of the Seas, on a passage from New York to San Francisco. The *Flying Cloud* made 433½ miles in one day, New York to San Francisco.

The quickest passage of a clipper ship across the Atlantic was made, it is asserted in maritime circles, by the *Dreadnaught*, which cleared from New York on June 15, 1859, and arrived off Cape Clear, Ireland, on June 27—12 days. The clipper *Red Jacket*, built at Rockland, Me., sailed from Sandy Hook, N. Y., to Liverpool in 13 days 1 hour 25 minutes. The *Dreadnaught* once went from New York to Liverpool in 13 days 8 hours. She was built in 1853 at Newburyport, Mass. She was 217 feet long, 40 feet wide, 26 feet deep, 1,443 gross tons. She was lost, July 4, 1869, on Cape Penas, northeast of Terra del Fuego, South America, on the way from Liverpool to San Francisco.

The sailing ship *Northern Light* went from San Francisco to Boston, via Cape Horn, in 76 days and 8 hours. The *Andrew Jackson* sailed from New York to San Francisco in 80 days and 4 hours. The *Dreadnaught* went from Honolulu to New Bedford, Mass., 13,470 miles, in 82 days. The *Sovereign* of the Seas sailed from Honolulu to New York in 85 days. The *Natchez* sailed from Canton, China, to New York in 76 days. The *Trade Wind*, in 1853, sailed from San Francisco to New York in 75 days. The *Lightning*, in 1854, sailed from Australia to Liverpool in 64 days. The bark *Dawn* of New York sailed from Buenos Ayres to New York in 36 days. The *Nabob*, of Boston, went from New York to Rangoon (Burmah), India, in 75 days. The *Flying Dutchman* in 1852-3 made a round trip, New York to San Francisco and return (27,220 miles), in 201 days. On the way home she sailed from San Francisco to Cape Horn in 35 days.

The clipper ships often beat the time of the steamships between New York and Ireland.

*Steamships*—The first steamship to cross the Atlantic was the *Savannah*, 350 tons, built at New York City, which left Savannah, Ga., on May 24, 1819, and reached Liverpool in 26 days, during eighteen of which she used her side-paddles. The *Great Western*, on her maiden voyage, from Bristol,

England, to New York, covered the distance, in April, 1838, in 15 days. The *Sirius*, in April, 1838, went from England to New York in 18½ days. The *Britannia*, first Cunard liner, in July, 1840, came from Liverpool to New York in 14 days 8 hours. The *Great Western's* best record across the ocean was 10 days 10 hours 15 minutes. In May, 1851, the Pacific reduced the Atlantic record to 9 days 19 hours 25 minutes. The *Persia*, in 1856, did it in 9 days 1 hour 45 minutes; the *Scotia*, in 1866, in 8 days 2 hours 48 minutes; the *City of Brussels*, in 1869, in 7 days 22 hours 3 minutes; the *Baltic*, in 1873, in 7 days 20 hours 9 minutes; the *City of Berlin*, in 1875, in 7 days 15 hours 48 minutes; the *Arizona*, in 1880, in 7 days 7 hours 23 minutes; the *Alaska*, in 1882, in 6 days 18 hours 37 minutes; the *Etruria*, in 1885, in 6 days 1 hour 55 minutes; the *Majestic*, in 1891, in 5 days 18 hours 8 minutes; the *Lucania*, in 1894, in 5 days 7 hours 23 minutes; the *Lusitania*, in 1908, in 4 days 15 hours; the *Mauretania*, in 1910, in 4 days 10 hours 41 minutes. The foregoing records, since and including 1856, are between New York and Queenstown.

The best run from New York to Havre was made by the *France*, of the French Line, in 5 days 17 hours.

The quickest run from New York to San Francisco, via Straits of Magellan, was made by the *Santa Cruz*, an oil burner, in 1914, in 47 days 5 hours.

The day's-run record—676 knots—was made by the *Mauretania*, in January, 1911.

The U. S. destroyer *Cole* made 43.75 miles an hour on her trial sea trip. The motor boat *Miss America*, in 1920, on Lake George, N. Y., went at the rate of 77.85 miles an hour; the motor boat *Maple Leaf VII*, (August, 1921) made 80 miles an hour on the Solent, England.

## ACROSS THE ATLANTIC BY AIR.

The U. S. naval seaplane NC-4 (Read), in 1919 (May 16-27), flew from Trepassy, British North America, via the Azores, to Lisbon, Portugal, 2,150 miles, in 26 hours 45 minutes, actual flying time.

A British biplane (Alcock-Brown), in 1919 (June 14-16), flew from St. John's, N. F., to Clifden, Ireland, 1,960 miles, in 16 hours 12 minutes.

The British dirigible balloon R-34 (Scott), in 1919 (July), flew from East Fortune, Scotland, to Mineola, N. Y., 3,130 miles, in 108 hours 12 minutes, and returned from Mineola to Fulham, England, 3,200 miles, in 74 hours 56 minutes.

A hydroplane flew in 1922 from Portugal to Brazil.

## FASTEST TRIPS AROUND THE WORLD.

1889, by *Nellie Bly*, 72 days 6 hours 11 minutes; 1903, by *Henry Frederick*, 54 days 7 hours 20 minutes; 1911, by *Andre Jaeger-Schmidt*, 39 days 42 minutes 38 seconds; 1913, by *John H. Mears*, 35 days 21 hours, 36 minutes.

# **DISTANCES FROM NEW YORK, NEW ORLEANS, SAN FRANCISCO AND PORT TOWNSEND TO PRINCIPAL PORTS AND CITIES.**

(Water routes in nautical miles; land routes in statute miles. Seattle is 38 miles from Port Townsend.)

### DISTANCES BETWEEN EUROPEAN CITIES.

These are the mail-train route distances. The airline distances, used by aviators, are, on the average, from three-quarters to four-fifths the railroad distances.

[illegible]

## RAILROAD TRAIN SPEED.

THE modern locomotive can run 112 miles an hour on a heavy-rail, straight track, provided it is ballasted by a train behind it to keep it from jumping off. On account of curves and switches, the

big coal consumption at high speed, and the frictional wear on the equipment 60 miles an hour is not often exceeded.

## NOTABLE FAST RUNS OF PASSENGER TRAINS FOR LONG DISTANCES.

The fastest time on record for a distance of over 440 miles was made by the Lake Shore & Michigan Southern R.R. from Buffalo to Chicago, in June, 1905, noted above. The fastest long distance run less than 440 miles was on the New York Central R. R., September 11, 1895, from New York to Buffalo, 436½ miles, in 407 minutes actual time. Average speed, 64½ miles an hour, with two stops and 28 slow-ups, and on January 1, 1903, from Albany to Buffalo, 302 miles, in 295 minutes.

On August 15, 1898, on P. & R. and C. & E. R. of N. J., "Royal Blue Line," between Elizabeth, N. J. and Jenkintown, a distance of 69 miles, in 61 minutes, including 2 slow-ups, some of the miles being traversed in 38 seconds.

On October 7, 1913, a special train on the Baltimore & Ohio, occupied by a party of baseball writers en route to report the World's Series, ran from

Pittsburgh to Cumberland, Md., 147 miles, in 3 hours and 37 minutes, without stops, and from Cumberland to Baltimore, 190 miles, without stops, in 3 hours and 55 minutes, an average of 48.7 miles per hour. Both of these runs were made without taking water.

The Jarrett and Palmer special theatrical train, Jersey City to Oakland (San Francisco), 3,311 miles, June, 1876, 83 hours, 45 minutes; average speed, 39.53 miles per hour.

In May, 1906, the "Harriman Special" made the run from Oakland, Cal., to New York City in 71 hours, 27 minutes.

A special train of an engine and two cars, which was run in January, 1911, to carry J. P. Morgan from Washington to New York over the Pennsylvania Railroad, made the trip of 226.8 miles in 3 hours, 55 minutes and 30 seconds, or at the rate of 57.8 miles an hour.

## IMPORTANT TUNNELS OF THE WORLD.

- ALBERG—Under the Alps at the Arl Mountains, and extends from Langen to St. Anton,  $6\frac{3}{4}$  miles; opened 1884.
- Andes Mountains—See "Trans-Andine."
- Big Bend—Drains the Feather River in California, 2 miles; opened 1886.
- Blitter Root Mountains (Montana and Idaho)—10,100 feet long.
- Blackwell—Under River Thames, England,  $1\frac{1}{2}$  miles; opened 1897.
- Busk-Ivanhoe Tunnel on the Colorado Midland R. R., 9,600 feet long, single track, under the Continental Divide, in Lake and Pitkin Counties.
- Cascade Mountain—Through the Cascade Mountains in Washington, 3 miles.
- Catskill Aqueduct—92 miles to N. Y. City, and 35 miles of distributing tunnels deep down under the city itself; partly opened in 1915, completely in 1917.
- Connaught—Through Selkirk Mountains, under Rogers Pass, Canada; on Canadian Pacific Railway, double track, about five miles long; completed 1916.
- Continental Divide, for the Denver and Salt Lake R. R., 6.4 miles long (under survey).
- Croton Aqueduct— $33\frac{1}{2}$  miles to N. Y. City; opened 1888.
- Cumberland—Under Cumberland Mountains, Tennessee, 8,000 feet long.
- Detroit (Mich. Central Ry.)—Under Detroit River.
- Gunnison—Southwestern Colorado, 6 miles; opened 1909.
- Hoosac—Through Hoosac Mountains, Mass.,  $4\frac{1}{2}$  miles; opened 1873.
- Khorak Pass—India, Quetta to Kandahar, 2 miles.
- Lötschberg—Through the Alps, in Oberland, Switzerland,  $9\frac{1}{2}$  miles; opened June 20, 1913, costing nearly \$10,000,000.
- Mont Cenis—Italy to France, under the Col de Frejus, 8 miles; opened 1871.
- Mont d'Or—Between France and Switzerland, was bored through October 2, 1913. The tunnel pierces the Jura Mountains from Fresnoe to Val-lorbe, and is  $3\frac{3}{4}$  miles long.
- Mt. Roberts—From the shore of Gastineau Channel at Juneau, Alaska, into Silver Bow Basin,  $1\frac{1}{2}$  miles.
- Otira—In New Zealand, 5-1.3 miles.
- Rove—Northwest from l'Estaque, France, part of canal connecting Marseilles with Rhone River;  $4\frac{1}{2}$  miles, 72 feet wide, 47 feet high; opened 1916.
- Rothschönberg—Drains the Feiberg mines, Saxony,  $31\frac{1}{2}$  miles; opened 1877.
- St. Clair—Under St. Clair River from Sarnia, Ont., to Port Huron, Mich., 2 miles; opened 1891.
- St. Gothard—Through the Alps, connects Goschenen with Airolo, in Switzerland, 9-1.3 miles; opened 1881.
- Severn—From Monmouthshire to Gloucestershire England,  $4\frac{1}{2}$  miles; opened 1886.
- Simplan—Through the Alps,  $12\frac{1}{2}$  miles; opened 1905.
- Spiral—The tunnels on the Canadian Pacific Railway, between Hector and Fields, B. C. consists of two spiral tubes, the westerly, 3,255 feet long, under Cathedral Mountain; and the easterly, 2,921 feet long, under Mt. Ogden, with the Kicking Horse River between. This line was built to reduce grades through the Kicking Horse Pass, and cut the gradient on the line from 4.5% to 2.2%, and cost approximately \$1,500,000.
- Strawberry—Through the Wasatch Mountains.
- Sutro—Drains the Comstock Lode in Nevada,  $4\frac{1}{2}$  miles; opened 1879.
- Totley—England,  $3\frac{1}{2}$  miles.
- Trans-Andine Ry. Tunnel—5 miles long, 10,486 feet above sea level and affords direct communication between Valparaiso and Buenos Ayres; opened April 5, 1910.
- Wasserfluh—In the Alps, between Bunnadern and Lichtensteig, Switz., 2 miles, opened 1909.
- Woodhead—Liverpool to Birkenhead, Eng., under the River Mersey, 3 miles.

## Weights and Measures.

## U. S. WEIGHTS AND MEASURES.

**Apothecaries' Weight:** 20 grains=1 scruple; 3 scruples=1 dram; 8 drams=1 ounce; 12 ounces=1 pound.

**Avoirdupois Weight (short ton):** 27 11-32 grains=1 dram; 16 drams=1 ounce; 16 ounces=1 pound; 25 pounds=1 quarter; 4 quarters=1 cwt.; 20 cwt.=1 ton.

**Avoirdupois Weight (long ton):** 27 11-32 grains=1 dram; 16 drams=1 ounce; 16 ounces=1 pound; 112 pounds=1 cwt.; 20 cwt.=1 ton.

**Troy Weight:** 24 grains=1 pennyweight; 20 pennyweights=1 ounce; 12 ounces=1 pound.

**Circular Measure:** 60 seconds=1 minute; 60 minutes=1 degree; 30 degrees=1 sign; 12 signs=1 circle or circumference.

**Cubic Measure:** 1,728 cubic inches=1 cubic foot; 27 cubic feet=1 cubic yard.

**Dry Measure:** 2 pints=1 quart; 8 quarts=1 peck; 4 pecks=1 bushel.

**Liquid Measure:** 4 gills=1 pint; 2 pints=1

quart; 4 quarts=1 gallon; 31½ gallons=1 barrel; 2 barrels=1 hoghead.

**Long Measure:** 12 inches=1 foot; 3 feet=1 yard; 5½ yards=1 rod or pole; 40 rods=1 furlong; 8 furlongs=1 statute mile (1,760 yards or 5,280 feet); 3 miles=1 league.

**Mariners' Measure:** 6 feet=1 fathom; 120 fathoms=1 cable length; 7½ cable lengths=1 mile; 5,280 feet=1 statute mile; 6,085 feet=1 nautical mile.

**Paper Measure:** 24 sheets=1 quire; 20 quires=1 ream (480 sheets); 2 reams=1 bundle; 5 bundles=1 bale.

**Square Measure:** 144 square inches=1 square foot; 9 square feet=1 square yard; 30¼ square yards=1 square rod or perch; 40 square rods=1 rood; 4 roods=1 acre; 640 acres=1 square mile; 36 square miles (6 miles square)=1 township.

**Time Measure:** 60 seconds=1 minute; 60 minutes=1 hour; 24 hours=1 day; 7 days=1 week; 365 days=1 year; 366 days=1 leap year.

## BRITISH LIQUID MEASURE WITH U. S. EQUIVALENTS.

| NAMES.                    | Pounds of Water. | Cubic Inches. | Litres.   | United States' Equivalents. |
|---------------------------|------------------|---------------|-----------|-----------------------------|
| 4 gills = 1 pint.....     | 1.25             | 34.66         | 0.56793   | 1.20032 liquid pints.       |
| 2 pints = 1 quart.....    | 2.5              | 69.32         | 1.13586   | 1.20032 " quarts.           |
| 2 quarts = 1 gallon.....  | 5                | 138.64        | 2.27173   | 2.40064 " " "               |
| 2 pottles = 1 gallon..... | 10               | 277.27        | 4.54346   | 1.20032 " gallons.          |
| 2 gallons = 1 peck.....   | 20               | 554.55        | 9.08692   | 1.03152 dry pecks.          |
| 4 pecks = 1 bushel.....   | 80               | 2219.36       | 36.34766  | 1.03152 " bushels.          |
| 4 bushels = 1 coomb.....  | 320              | 8872.77       | 145.39062 | 4.12606 " " "               |
| 2 coombs = 1 quarter..... | 640              | 17745.54      | 290.7813  | 8.2521 " " "                |

A cubic foot of pure gold weighs 1,210 pounds; pure silver, 655 pounds; cast iron, 450 pounds; copper, 550 pounds; lead, 710 pounds; pure platinum, 1,220 pounds; tin, 456 pounds; aluminum, 163 pounds.

## Size of Barrels.

|                                      |            |                                  |             |
|--------------------------------------|------------|----------------------------------|-------------|
| Firkin or quarter barrel.....        | 9 gallons  | Tierce.....                      | 42 gallons  |
| Anker (10 gallons).....              | 10 gallons | Hoghead of ale (1½ barrels)..... | 54 gallons  |
| Kilderkin, rundlet, or ½ barrel..... | 18 gallons | Punchoon.....                    | 72 gallons  |
| Barrel.....                          | 36 gallons | Butt of ale.....                 | 108 gallons |

## Bottle Measure.

The customary glass bottle of wine or spirits should contain one-sixth of a gallon, or 26½ fluid ounces. In the drug trade two large bottles are used, the corbyn, of 40 fluid ounces (quart), and the Winchester quart, of 80 fluid ounces (½ gallon).

## VALUE AND WEIGHT OF GOLD.

(By the United States Assay Office, New York.)

The unit in weighing gold is the troy ounce. A "fine" ounce means an ounce of pure gold. The mint value of gold does not fluctuate but remains constant at \$20.67183482 per fine ounce. Troy measure is used in weighing gold. The grain is the same in both troy and avoirdupois measure but the ounce and the pound are not the same.

The troy ounce contains 480 grains and the troy pound 5,760 grains, there being 12 ounces to the pound. The troy pound is never used in weighing gold, even when the weights of large quantities are to be computed. The avoirdupois ounce contains 437½ grains and the avoirdupois pound contains 7,000 grains, there being 16 ounces to the pound.

## FOREIGN COINS VALUED IN UNITED STATES MONEY.

(Proclaimed by the Secretary of the Treasury as of July 1, 1922.)

Argentine Republic, G., Peso (\$0.9648). Currency: Paper, normally convertible at 44 per cent. of face value; now inconvertible.

Austria, G., Krone (\$0.2026).

Belgium, G. and S., Franc (\$0.1930). Member

Latin Union; gold is actual standard.

Bolivia, G., Boliviana (\$0.3893). 12½ bolivians equal 1 pound sterling.

Brazil, G., Milreis (\$0.5462). Currency: Government paper normally convertible at 16 pence (—\$0.3244) per milreis.

British Colonies in Australasia and Africa, G., Pound sterling (\$4.8665).

British Honduras, G., Dollar (\$1.0000).

Bulgaria, G., Lev (\$0.1930).

Canada, G., Dollar (\$1.0000).

Chili, G., Peso (\$0.3650). Currency: Inconvertible paper.

China, S., Tael, Haikwan (customs) (\$0.8463).

The tael is a unit of weight, not a coin. The customs unit is the Haikwan tael. The values of other taels are based on their relation to the value of the Haikwan tael.

The Yuan silver dollar of 100 cents is the monetary unit of the Chinese Republic; it is equivalent to 644 of the Haikwan tael. Dollar, Yuan (\$0.5390). Mexican silver pesos issued under Mexican decree of Nov. 13, 1918, are of silver content approximately 41% less than the dollar here quoted; and those issued under decree of Oct. 27, 1919, contain about 51% less silver.

Colombia, G., Peso (\$0.9733). Currency: Government paper and gold.

Costa Rica, G., Colon (\$0.4653).

Cuba, G., Peso (\$1.0000).

Denmark, G., Krone (\$0.2680).

Ecuador, G., Sucre (\$0.4867).

Egypt, G., Pound (100 piasters) (\$4.9431). The actual standard is the British pound sterling, which is legal tender for 97½ piasters.

Finland, G., Markka (\$0.1930).

France, G. and S., Franc (\$0.1930). Member Latin Union; gold is actual standard.

Germany, G., Mark (\$0.2382).

Great Britain, G., Pound sterling (\$4.8665).

Greece, G. and S., Drachma (\$0.1930). Member Latin Union; gold is actual standard.

Guatemala, S., Peso (\$0.5074). Currency: Inconvertible paper.

G., means gold standard country; S., silver. Value in U. S. money is stated in parentheses.

Hayti, G., Gourde (\$0.2000). Currency: Inconvertible paper.

Honduras, S., Peso (\$0.5074). Currency, bank notes.

India (British), G., Mohurad Sovereign (\$4.8665); S., Rupee (\$0.2411). The British sovereign and half sovereign are legal tender in India at 10 rupees per sovereign.

Indo-China, S., Piaster (\$0.5480).

Italy, G., Lira (\$0.1930). Member Latin Union; gold is actual standard.

Japan, G., Yen (\$0.4985).

Liberia, G., Dollar (\$1.0000). Currency: Depreciated silver token coins. Customs duties are collected in gold.

Mexico, G., Peso (\$0.4985).

Netherlands, G., Guilder (florin) (\$0.4020).

Newfoundland, G., Dollar (\$1.0000).

Nicaragua, G., Cordoba (\$1.0000).

Norway, G., Krone (\$0.2680).

Panama, G., Balboa (\$1.0000).

Paraguay, G., Peso (Argentine), (\$0.9648). Currency: Depreciated Paraguayan paper currency.

Persia, S., Kuran (\$0.0934). Currency: Silver circulating above its metallic value. Gold coin is a commodity only, normally worth double the silver.

Peru, G., Libra (\$4.8665).

Philippine Islands, G., Peso (\$0.5000).

Portugal, G., Escudo (\$1.0805). Currency: Inconvertible paper.

Roumania, G., Leu (\$0.1930).

Russia, G., Ruble (\$0.5146).

Salvador, G., Colon (\$0.5000).

Santo Domingo, G., Dollar (\$1.0000).

Serbia, G., Dinar (\$0.1930).

Siam, G., Tical (\$0.3709).

Spain, G. and S., Peseta (\$0.1930). Valuation is for gold peseta; currency is notes of the Bank of Spain.

Straits Settlements, G., Dollar (\$0.5678).

Sweden, G., Krona (\$0.2680).

Switzerland, G., Franc (\$0.1930). Member Latin Union; gold is actual standard.

Turkey, G., Piaster (\$0.0440). (100 piasters equal to the Turkish Lira.)

Uruguay, G., Peso (\$1.0342). Currency: Inconvertible paper.

Venezuela, G., Bolivar (\$0.1930).

## FOREIGN MONEY UNITS OF VALUE.

English Money: 4 farthings—1 penny (d); 12 pence—1 shilling (s); 20 shillings—1 pound (£); 21 shillings—one guinea; 5 shillings—one crown. French Money: 100 centimes—1 franc. German Money: 100 pfennig—1 mark. Russian Money: 100 copecks—1 ruble. Austro-Hungarian Money: 100 heller—1 krone (crown).

| December.....  | 31   | 62   | 90    | 121   | 151 | 182  | 212  | 243  | 274   | 304  | 335  | 365  |

EXAMPLE: To find the number of days from April 10 to October 10 (including one of the given days):  
By the calendar April 10 to October 10 gives 183 days, the number required.

## ANCIENT GREEK AND ROMAN WEIGHTS AND MEASURES.

WITH AMERICAN EQUIVALENTS.

## WEIGHTS.

The Roman libra or pound = 10 oz. 18 pwt. 13 5-7 gr., Troy.

The Attica mina or pound = 11 oz. 7 pwt. 16 2-7 gr., Troy.

The Attica talent (60 minae) = 56 lbs. 11 oz. 0 pwt. 17 1-7 gr., Troy.

## DRY MEASURE.

The Roman modus = 1 pk. 2-9 pint.

The Attic choenix = nearly 1½ pints.

The Attic medimnus = 4 pk. 6 l-10 pints.

## LIQUID MEASURE.

The cotyle = a little over ½ pint.

The cyathus = a little over 1½ pints.

The chus = a little over 6¾ pints.

## LONG MEASURE.

The Roman foot = 11 3-5 inches.

The Roman cubit = 1 ft. 5¾ inches.

The Roman pace = 4 ft. 10 inches.

The Roman furlong = 604 ft. 10 inches.

The Roman mile = 4,835 feet.

The Grecian cubit = 1 ft. 6¾ inches.

The modern drachma equals 19.3 cents. The Greek stater weighed 134.75 grains avoirdupois. The Roman aureus was worth \$4.50.

The Grecian furlong = 504 ft. 4 1-5 inches.

The Grecian mile = 4,030 feet.

## MONEY.

The quadrans = 1 1-10 milles.

The as = 1 3-10 milles.

The sestertius = 3.58 + cents.

The sestertium (1,000 sestertii) = \$35.80.

The denarius = 14.35 + cents.

The Attic obolus = 2.39 + cents.

The drachma = 14.35 + cents.

The mina (100 drachmae) = \$14.35 +.

The talent (60 minae) = \$861.00.

The Greek stater was worth \$4; the Persian, \$5.35.

Each coin was of silver, composed of 20 drachmas, each drachma equal in value to 19½ cents, American money.

## BIBLICAL WEIGHTS REDUCED TO TROY WEIGHT.

## STANDARD NEWSPAPER MEASURES.

TYPE is measured by the number of "points" in the height of the face thereof. A "point" is approximately one-seventy-second of an inch (actually .01383 inch). There are 996 "points" in 35 centimeters. Nonpareil type, the size generally used by newspapers, is a 6-point type, and therefore sets 12 lines to an inch, measuring up and down the column. Twenty-four lines of nonpareil type make what is commonly called a "stick." There are usually ten "sticks" of type in a newspaper column. The smallest type in ordinary use is ruby, which is  $3\frac{1}{2}$  points in height. Diamond type is 4 or  $4\frac{1}{2}$  points; pearl, 5 points; agate,  $5\frac{1}{2}$  points; nonpareil, 6 points; minion, 7 points; brevier, 8 points; bourgeois, 9 points; long primer, 10 points; small pica, 11

points; pica, 12 points; English, 14 points; great primer, 18 points. The news columns in The World are almost 2 and three-sixteenths inches wide, equal to  $12\frac{1}{2}$  "picas" or pica M-quads. Each size of type has its own M-quad, which is the square of the face of the capital M of that size of type. A quadrat, or quad, is the type without a letter on it, and is used in spacing between words and in filling out blank lines. The quad is usually of four sizes—N-quad, M-quad, 2M-quad, and 3M-quad. In the old days of setting type by hand, a good printer could average 40 lines of nonpareil an hour, equal to 1,000 Ms of that type. A good operator, setting by machine, say on the linotype, can average 180 lines of nonpareil an hour.

## ROMAN AND ARABIC NUMERALS.

|     |   |      |    |      |    |       |    |     |    |        |     |      |     |      |      |
|-----|---|------|----|------|----|-------|----|-----|----|--------|-----|------|-----|------|------|
| I   | 1 | VI   | 6  | XI   | 11 | XVI   | 16 | XXX | 30 | LXXX   | 80  | CCC  | 300 | DCCC | 800  |
| II  | 2 | VII  | 7  | XII  | 12 | XVII  | 17 | XL  | 40 | or XXG | 80  | CCCG | 400 | CM   | 900  |
| III | 3 | VIII | 8  | XIII | 13 | XVIII | 18 | LX  | 60 | XC     | 90  | D    | 500 | M    | or   |
| IV  | 4 | IX   | 9  | XIV  | 14 | XIX   | 19 | LXX | 70 | C      | 100 | DC   | 600 | etc. | 1000 |
| V   | 5 | X    | 10 | XV   | 15 | XX    | 20 | LXX | 70 | CC     | 200 | DCC  | 700 | MM   | 2000 |

NOTE—A dash line over a numeral, multiplies the value by 1,000; thus,  $\overline{X}$ =10,000;  $\overline{L}$ =50,000;  $\overline{C}$ =100,000;  $\overline{D}$ =500,000;  $\overline{M}$ =1,000,000;  $\overline{CLIX}$ =159,000;  $\overline{DLCX}$ =550,140.

Other general rules in Roman numerals are as follows: (1), repeating a letter repeats its value—XX=20; CCC=300; (2), a letter placed after one of greater value adds thereto—VI=6; DC=600; (3), a letter placed before one of greater value subtracts therefrom—IV=4; IX=9; XC=90; (4), a letter between two of greater value gives to the three, taken together, a value equal to that caused by subtracting the middle letter from the sum of the others—XIV=14; LXIX=59.

Arabic numerals are those now commonly in use—0, 1, 2, 3, 4, 5, 6, 7, 8, 9, etc.

## KNOTS AND MILES.

THE U. S. and British Statute Mile is 5,280 feet. The British Admiralty Knot or Nautical Mile is 6,080 feet. The Statute Knot is 6,082.66 feet, and is generally considered the standard. The number of feet in a statute knot is arrived at thus: The circumference of the earth is divided into 360

degrees, each degree containing 60 knots or (360x60) 21,600 knots to the circumference. 21,600 divided into 131,385.456—the number of feet in the earth's circumference—gives 6,082.66 feet—the length of a standard mile.

A Knot = 1.151 statute miles; a Fathom = 6 feet; a Cable = 600 feet.

| Hard "                        | 60,000 |                              |         | White oak.                    | 14,500  |                                  |        |
|                               |        |                              |         | Live "                        | 13,000  |                                  |        |

Tensile Strength is resistance to separation. The fibres of wood are strongest near the centre of the trunk or limb.

## SPECIFIC GRAVITY OF VARIOUS SUBSTANCES.

(Compared with water, which is rated at 100.)

The weight of a cubic foot of distilled water at a temperature of 60° F. is 1,000 ounces avoirdupois, very nearly, therefore the weight (in ounces, avoirdupois) of a cubic foot of any of the substances in the above table is found by multiplying the specific gravities by 10, thus:—one cubic foot of oak weighs 1,170 ounces; one cubic foot of marble 2,700 ounces, and so on.

## SPECIFIC GRAVITY OF GASES.

Wind reduces the velocity of sound much more than fog or rain does. Explosions cannot be distinguished separately when but 1-16 second apart. Sound in water travels 4,708 feet a second; in wood it goes at least 10,000 feet a second; in metals, at least 4,000 feet a second.

## SPEED OF A FALLING BODY.

(By Prof. George B. Pegram of Columbia.)

In the first second of its descent a body falls 16 feet; second second, 16+32=48 feet; third second, 16+64=80 feet; fourth second, 16+96=112 feet; fifth second, 16+128=144 feet; nth second, 16+32

The total distance fallen by a body at the end of the nth second is 16n<sup>2</sup> feet, thus at the end of the first second it has fallen 16 feet, at the end of the second 64 feet, at the end of the fifth 400 feet. The figures given above are only approximate ones

and in them no account is taken of air resistance. As the air resistance encountered by a falling body depends on the shape and size of the body no general rule can be given for taking account of it, except to say that the air resistance increases with the velocity. The force of gravity on a body one mile above the surface of the earth is less than if the body were at the surface of the earth by about one-twentieth of one per cent., a difference which it would be difficult to measure in the rate of fall of the body.

## AREAS OF CIRCLES.

To find the circumference of a circle multiply the diameter by 3.14159265 (commonly expressed as 3.1416). To find the area of a circle multiply the square of the diameter by .785398 (usually expressed as .7854). To find the cubic contents of a cylinder or pipe, multiply the area by the height or depth.

Thus, a pipe 1 foot in diameter and 1 foot in length, contains .7854 cubic feet. To find how many gallons are contained in a pipe or cylinder, divide the cubic contents by 231, which is the number of cubic inches in a United States gallon.

## CIRCLE AREAS IN EIGHTHS OF A UNIT.

## MELTING POINTS OF CHEMICAL ELEMENTS, ETC.

(By the Bureau of Standards, U. S. Dept. of Commerce.)

THE values of the melting points used by the Bureau of Standards as standard temperatures for the calibration of thermometers and pyrometers are indicated in capitals. The other values have been assigned after a careful survey of all the available data. As nearly as may be, all values, in particular the standard points, have been reduced to a common scale, the thermodynamic scale. For all purposes

except the most accurate investigations, the thermodynamic scale is identical with any of the gas scale. At high temperatures some of the values are quite uncertain; thus, while the melting point of platinum may be considered accurately known to 10° C., that of tungsten is possibly uncertain by 50° C. or more. Temperatures centigrade are rounded off, and the exact Fahrenheit equivalents are usually given.

Every human death may be attributed to one of three causes: (1) Interference with respiration (asphyxia or aspen); (2) Interference with the heart's action (syncope), and (3) Interference with the nervous system (coma or shock). The number of distinct diseases producing death is limited.

The length of the humerus multiplied by 5.06, or the length of the femur multiplied by 3.66, equals the height of the man. Thus the height of prehistoric peoples can be worked out.

In height man may vary from 1m. 25 (4 feet 1 inch) to 1m. 99 (6 feet 6 3/4 inches). Below 1m. 25 man is abnormal or pathological (dwarfism); above 2 meters man is also abnormal (gigantism). Both these extremes are sterile. The extreme averages of different populations run from 1m. 38 (4 feet 6 inches) to 1m. 79 (5 feet 10 1/2 inches), the Scots of Galloway or Scots or the North are 1m. 78. The stature of man is not more than 2 or 3 centimeters higher than his skeleton.

The length of the trunk in man is more than one-third and less than two-fifths of the height. The arm reach in American soldiers, compared to their height, is as 1,043 to 1,000. The brains of the higher apes are much less complex in their con-

ditions and much less in both relative and absolute weight. The gorilla's brain barely exceeds twenty ounces in weight, while man's brain hardly weighs less than thirty-two.

From 11,000 brains weighed, Topinard finds an average weight of 1,361 grains for man and 1,290 grains for woman.

The gray substance represents 37 to 38 per cent. of the total weight of the brain. The differences in the form and the dimensions of the skull in correlation with those of the brain serve to distinguish races and species. Thus the lula bone (one of the wormian bones), between the parietal and occipital bones, is frequent in Peruvian crania—20 times in 100; in negroes 6 times; in Europeans it is still more rare; among Indians of Arizona this bone is more frequent than among Peruvians. The suture of the alar bone is peculiar to Japanese crania—25 to 40 per cent., and only 9 per cent. in European races.

## LONGEVITY OF ANIMALS.

(Figures represent years.)

Ass, from 25 to 50; bee, 4; beaver, 50; beetle, 1 to 4; birds, 3 to 30; camel, 50 to 60; carp, 100 to 150; cat, 18; cow, 20; crocodile, 100; crow, 100; deer, 20; dog, 23 to 30; eagle, 100; elephant, 150 to 200; fox, 15.

Fowl, 10; goose, 50; hare, 7 to 8; heron, 60; hog, 20; horse, 25 to 30; lark, 16 to 18; lion, 60; monkey, 16 to 18; ox, 19; parrot, 100; peacock, 24; pelican, 40 to 50; pigeon, 20; pike, 100; rabbit, 8 or 9; raven, 160; rhinoceros, 30; salmon, 10; sheep, 10; sparrow-hawk, 40; spider, 1; squirrel, 7; stag, under 50; swan, 100; tiger and leopard, 25; toad, 20 to 30; tortoise, over 100; viper, 6 or 7; wolf, 20; wren, 2 or 3.

## The Metric System.

(Prepared for the U. S. Government by the Bureau of Standards Department of Commerce.)

## UNITS OF WEIGHT AND MEASURE.

The fundamental unit of the metric system is the meter, the unit of length. From this the units of capacity (liter) and of weight (gram) were derived. All other units are the decimal subdivisions or multiples of these. These three units are simply

related, *e. g.*, for all practical purposes 1 cubic decimeter equals 1 liter and 1 liter of water weighs 1 kilogram. The metric tables are formed by combining the words "meter," "gram," and "liter," with the six numerical prefixes, as in the following tables:

| PREFIXES.                | Meaning. | Units.             |
|--------------------------|----------|--------------------|
| milli- = one-thousandth. | .001     |                    |
| centi- = one-hundredth.  | .01      | "meter" for length |
| deci- = one-tenth.       | .1       | "gram" for weight  |
| Unit = one.              | 1        | or mass.           |

| PREFIXES.             | Meaning. | Units.                |
|-----------------------|----------|-----------------------|
| deka- = ten.          | 10       |                       |
| hecto- = one hundred. | 100      | "liter" for capacity. |
| kilo- = one thousand. | 1000     |                       |

All lengths, areas, and cubic measures in the following tables are derived from the international meter, the legal equivalent being 1 meter = 39.37 inches (law of July 28, 1866). In 1893 the United States Office of Standard Weights and Measures was authorized to derive the yard from the meter, using for the purpose the relation legalized in 1856, 1 yard = 3600/3937 meter. The customary weights are likewise referred to the kilogram (Executive order approved April 5, 1893). This action fixed the values, inasmuch as the reference standards are as perfect and unalterable as it is possible for human skill to make them at this time. All capacities are based on the equivalent 1 liter equals 1.000027 cubic decimeters. The decimeter is equal to 3.937 inches.

## STANDARDS FOR

In accordance with the legal equivalent of the meter given above. The gallon referred to in the tables is the United States gallon of 231 cubic inches. The bushel is the United States bushel of 2,150.42 cubic inches. These units must not be confused with the British units of the same name, which differ from those used in the United States. The British gallon is approximately 20 per cent. larger and the British bushel 3 per cent. larger than the corresponding units used in this country. The custom are based on the value 1 avoirdupois pound = 453.592427 grams. The value of the troy pound is based upon the relation just mentioned and also the equivalent 5760/7000 avoirdupois pounds equals 1 troy pound.

## MEASUREMENT.

Units of measurement should be distinguished from standards for measurement, particularly in the case of length and capacity. Units of length are fixed distances, independent of any other consideration, while length standards are affected by the expansion and contraction with changes of temperature of the material of which the standard may be composed. It is therefore necessary to fix upon some temperature at which the distance between the defining lines or end surfaces of the standards shall be equal to the unit. The same is true of standards of capacity, which at some definite temperature contain a given number of units of volume. The temperature at which metric length standards are customarily made correct is 0° C, although 20° C is also used for steel tapes and some other standards intended for use at room or average outdoor temperatures. The temperature at which standards of length of the customary system are made correct is 62° F.

For measurements of high precision it is also necessary to specify the manner of support of the standards, whether at certain points only or throughout their entire length, and in the case of tapes it is also necessary to give the tension applied to the tape when in use. In the United States the capacity standards, both metric and customary, are made to hold the specified volumes at 4° C. Standards of capacity are usually made of brass so the capacity at any other temperature may be computed by the use of the coefficient of cubical expansion, usually

assumed to be 0.000064 per degree Centigrade. In the purchase and sale of liquids a more important consideration than the temperature of the measures is the temperature of the liquid when measured, for the reason that the large coefficient of expansion of many liquids makes the actual mass of a given volume delivered vary considerably with temperature. For this reason, the custom of buying and selling liquids by weight instead of by measure is recommended. It is further recommended that, when liquids are sold by volume, 68° F or 20° C be adopted as the standard temperature of the liquid.

While the temperature of a weight does not affect its mass, it is nevertheless important that when two weights are compared in air they both be at the same temperature as the air. If there is a difference between the temperature of the air and the weights, convection currents will be set up and the readings of the balance will be thereby affected. Also, since weights are buoyed up by the surrounding air by amounts dependent upon their volumes, it is desirable that the weights of any set be of the same material. If two weights of the same density balance in air of a certain density they will balance in vacuo or in air of a different density. Brass is the material most widely used for standard weights, although platinum is quite commonly used for weights of 1 gram or less. In the absence of any knowledge as to the actual density of weights, those made of brass are assumed to have a density of 8.4 at 0° C, while those of platinum are assumed to have a density of 21.5 at 0° C.

## SPELLING AND ABBREVIATION OF UNITS.

Following the names of each unit in the list below is given the abbreviation which the Bureau has adopted. Attention is called to the following principles: 1. The period is omitted after the abbreviations of the metric units, while it is used after those of the customary system. 2. The exponents, "2" and "3," are used to signify area and volume, respectively, in the case of the metric units instead of the longer prefixes "sq." or "cu." In

conformity with this principle the abbreviation for cubic centimeter is "cm<sup>3</sup>," instead of "c. c." or "c. cm." The term "cubic centimeter" as used in chemical work is, in fact, a misnomer, since the unit actually used is the "milliliter," which has a slightly larger volume. 3. The use of the same abbreviation for both singular and plural is recommended. This practice is already established in expressing metric units and is in accordance with the spirit and chief purpose of abbreviations.

## DEFINITIONS OF UNITS.

## LENGTH.

**Fundamental Units.**—A meter (m) is a unit of length equivalent to the distance between the defining lines of the international prototype meter at the international Bureau of Weights and Measures when this standard is at the temperature of melting ice (0° C).

A yard (yd.) is a unit of length equivalent to 3600/3937 of a meter.

## Multiples and submultiples:

- 1 kilometer = 1000 meters.
- 1 hectometer = 100 meters.
- 1 dekameter = 10 meters.
- 1 decimeter = 0.1 meter.
- 1 centimeter = 0.01 meter.
- 1 millimeter = 0.001 meter = 0.1 centimeter.
- 1 micron = 0.00001 meter = 0.001 millimeter.
- 1 millimicron = 0.0000001 meter = 0.001 micron.
- 1 foot = 1.35 yard = 1.203637 meter.
- 1 inch = 1.36 yard = 1.12 foot = 100/3937 meter.
- 1 link = 0.22 yard = 7.92 inches.

- 1 rod = 16 1/2 yards = 16 1/2 feet.
- 1 chain = 22 yards = 100 links = 4 rods = 4 chains.
- 1 furlong = 220 yards = 40 rods = 10 chains.
- 1 statute mile = 1760 yards = 5280 feet = 320 rods.
- 1 hand = 4 inches.
- 1 point = 1/72 inch.
- 1 tall = 0.001 inch.
- 1 fathom = 6 feet.
- 1 span = 9 inches = 1.8 fathom.
- 1 nautical mile { United States = 6080.26 feet.
- 1 sea mile { = 1.151553 statute miles.
- 1 geographical mile { = 1853.249 meters.

## AREA.

## Fundamental Units:

A square meter is a unit of area equivalent to the area of a square the sides of which are 1 meter.

A square yard is a unit of area equivalent to the area of a square the sides of which are 1 yard.

## Multiples and Submultiples:

1 square kilometer = 1,000,000 square meters.  
1 hectare or square hectometer = 10,000 square meters.

1 are or square dekameter = 100 square meters.

1 centare = 1 square meter.

1 square decimeter = 0.01 square meter.

1 square centimeter = 0.0001 square meter.

1 square millimeter = 0.000001 square meter = 0.01 square centimeter.

1 square foot = 1-9 square yard.

1 square inch = 1-1296 square yard = 1-144 square foot.

1 square link = 0.0484 square yard = 62.7264 square inches.

1 square rod = 30.25 square yards = 272.25 square feet = 625 square links.

1 square chain = 484 square yards = 16 square rods = 100,000 square links.

1 acre = 4840 square yards = 160 square rods = 10 square chains.

1 square mile = 3,097,600 square yards = 640 acres.

## VOLUME

## Fundamental Units:

A cubic meter is a unit of volume equivalent to a cube the edges of which are 1 meter.

A cubic yard is a unit of volume equivalent to a cube the edges of which are 1 yard.

## Multiples and Submultiples:

1 cubic kilometer = 1,000,000,000 cubic meters.

1 cubic hectometer = 1,000,000 cubic meters.

1 cubic dekameter = 1,000 cubic meters.

1 stère = 1 cubic meter

1 cubic decimeter = 0.001 cubic meter.

1 cubic centimeter = 0.000001 cubic meter = 0.001 cubic decimeter.

1 cubic millimeter = 0.000000001 cubic meter = 0.001 cubic centimeter.

1 cubic foot = 1-27 cubic yard.

1 cubic inch = 1-46656 cubic yard = 1-1728 cubic foot.

1 board foot = 144 cubic inches = 1-12 cubic foot.

1 cord = 128 cubic feet.

## CAPACITY.

## Fundamental Units:

A liter is a unit of capacity equivalent to the volume occupied by the mass of 1 kilogram of pure water at its maximum density (at a temperature of 4° C., practically) and under the standard atmospheric pressure (of 760 mm.). It is equivalent in volume to 1.000027 cubic decimeters.

A gallon is a unit of capacity equivalent to the volume of 231 cubic inches. It is used for the measurement of liquid commodities only.

A bushel is a unit of capacity equivalent to the volume of 2150.42 cubic inches. It is used in the measurement of dry commodities only.

The above bushel is the so-called stricken or struck bushel. Many dry commodities are sold by heaped bushel, which is generally specified in the State laws to be the usual stricken bushel measure "duly heaped in the form of a cone as high as the article will admit" or "heaped as high as may be without special effort or design." The heaped bushel was originally intended to be 25 per cent. greater than the stricken bushel.

## Multiples and Submultiples:

1 hectoliter = 100 liters.

1 dekaliter = 10 liters.

1 deciliter = 0.1 liter.

1 centiliter = 0.01 liter.

1 milliliter = 0.001 liter = 1.000027 cubic centimeters.

1 liquid quart = 1-4 gallon = 57.75 cubic inches.

1 liquid pint = 1-8 gallon = 1-2 liquid quart = 28.375 cubic inches.

1 gill = 1-32 gallon = 1-4 liquid pint = 7.21875 cubic inches.

1 fluid ounce = 1-128 gallon = 1-16 liquid pint.

1 fluid dram = 1-8 fluid ounce = 1-128 liquid pint.

1 minim = 1-60 fluid dram = 1-480 fluid ounce.

1 firkin = 9 gallons

1 peck = 1-4 bushel = 537.605 cubic inches.

1 dry quart = 1-32 bushel = 1-8 peck = 67.200625 cubic inches.

1 dry pint = 1-64 bushel = 1-2 dry quart = 33.600-3125 cubic inches.

1 barrel (for fruit, vegetables and other dry commodities) = 7056 cubic inches = 105 dry quarts.

The barrel capacity was fixed by United States statute, approved March 4, 1915.

## MASS.

## Fundamental Units:

A kilogram is a unit of mass equivalent to the mass of the international prototype kilogram at the International Bureau of Weights and Measures.

An avoirdupois pound is a unit of mass equivalent to 0.4535924277 kilogram.

A gram is a unit of mass equivalent to one-thousandth of the mass of the international prototype kilogram at the International Bureau of Weights and Measures.

A troy pound is a unit of mass equivalent to 5760-7000 of that of the avoirdupois pound.

## Multiples and Submultiples:

1 metric ton = 1000 kilograms.

1 hectogram = 100 grams = 0.1 kilogram.

1 dekagram = 10 grams = 0.01 kilogram.

1 decigram = 0.1 gram.

1 centigram = 0.01 gram.

1 milligram = 0.001 gram.

1 avoirdupois ounce = 1-16 avoirdupois pound.

1 avoirdupois dram = 1-256 avoirdupois pound = 1-16 avoirdupois ounce.

1 grain = 1-7000 avoirdupois pound = 10-4375 avoirdupois ounce = 1-5760 troy pound.

1 apothecaries' pound = 1 troy pound = 5760-7000 avoirdupois pound.

1 apothecaries' or troy ounce = 1-12 troy pound = 480-7000 avoirdupois pound = 480 grains.

1 apothecaries' dram = 1-96 apothecaries' pound = 1-8 apothecaries' ounce = 60 grains.

1 pennyweight = 1-20 troy ounce = 24 grains.

1 apothecaries' scruple = 1-3 apothecaries' dram = 20 grains.

1 metric carat = 200 milligrams = 0.2 gram.

1 short hundredweight = 100 avoirdupois pounds.

1 long hundredweight = 112 avoirdupois pounds.

1 short ton = 2000 avoirdupois pounds.

1 long ton = 2240 avoirdupois pounds.

## FEET, YARDS, MILES, WITH METRIC EQUIVALENTS.

(By S. W. Stratton, Director of the United States Bureau of Standards, Department of Commerce.)

**ENERGY RESOURCES OF THE WORLD.**

The United States is literally the most powerful country in the world, according to a statement made by Dr. Thomas T. Read of the Federal Bureau of Mines, before the School of Foreign Service of Georgetown University. "The real basis of power of a nation is its energy resources rather than its man-power strength," said Dr. Read. "The modern way to use the energy of a man is to employ it in a way similar to the little detonator of the big explosive shell—the little charge sets off the big one and does an amount of work far in excess of its own capacity. The energy output of an average workman is about a tenth of a horsepower. The energy expended by a coal miner in an eight-hour day thus amounts to about that available from two pounds of coal. A Japanese miner who gets out 1,400 pounds of coal a day, thus multiplies his energy by 700.

It is somewhat like planting one grain of wheat and having 700 grow from it.

"The American miner gets out 8,800 pounds of coal in a day and so multiplies his energy by 4,400. There are 11,000,000 wage earners in the United States and their energy output is a little over 4,000,000 horsepower, or only nine times the potential energy output in the form of coal of 100 miners. The power minerals, coal, petroleum, and water-power, are, therefore, the real sources of strength in an industrial civilization. Just where the United States stands on this basis is best brought out by some comparative figures which may be set out in millions of horsepower years, so that the figures will be easier to handle. Taking the estimates of probable and possible available coal, petroleum, and water-power in the principal countries of the world, and reckoning them in terms of millions of horsepower years, they line up something like this:

| COUNTRY.           | Coal (Millions of Hp. Years). | Petr'ole'm (Millions of Hp. Years). | Water-power (Millions of Hp. Years). | COUNTRY.                        | Coal (Millions of Hp. Years). | Petr'ole'm (Millions of Hp. Years). | Water-power (Millions of Hp. Years). |

| Canada.....        | 48,000                        | 40                                  | 22 1/2                               | India.....                      | 11,000                        | 70                                  | 27                                   |
| Great Britain..... | 27,000                        | (?)                                 | 1                                    |                                 |                               |                                     |                                      |

No other country has as much as one-fiftieth part of the total energy resources as the United States. The United States had resources before 1492 even greater than now because they were all unused. China is in somewhat the same position to-day as the United States was 400 years ago. Japan, on

the other hand, is an example of a country that has developed its very limited resources to a large extent. Japan's energy resources are less than one five-hundredth part of those of the United States, and therefore the Japanese cannot afford to use their energy for rough uses that require large quantities, such as in breaking stone.

## CLASSIFICATION OF ROCKS AND DIVISIONS OF GEOLOGIC TIME.

(Prepared by the U. S. Geological Survey.)

THE rocks composing the earth's crust are grouped by geologists into three great classes—igneous, sedimentary, and metamorphic. The igneous rocks have solidified from a molten state. Those that have solidified beneath the surface are known as intrusive rocks. Those that have flowed out over the surface are known as effusive rocks, extrusive rocks, or lavas. The term volcanic rock includes not only lavas but bombs, pumice, tuff, volcanic ash and other fragmental materials thrown out from volcanoes. Sedimentary rocks are formed by the accumulation of sediment in water (aqueous deposits or eolian deposits). The sediment may consist of rock frag-

ments or particles of various sizes (conglomerate, sandstone, shale); of the remains or products of animals or plants (certain limestones and coal); of the product of chemical action or of evaporation (salt, gypsum, &c.); or of mixtures of these materials. A characteristic feature of sedimentary deposits is a layered structure known as bedding or stratification. Metamorphic rocks are derivatives of igneous or sedimentary rocks produced through mechanical or chemical activities in the earth's crust. The unaltered sedimentary rocks are commonly stratified, and it is from their order of succession and that of their contained fossils that the fundamental data of historical geology have been deduced.

## LAND AND WATER AREAS.

THE superficial area of the earth is 196,940,000 square miles—140,295,000 square miles of water and 56,255,000 square miles of land. The three great oceans comprise the Atlantic, 41,321,000 square miles; Pacific, 68,634,000 square miles, and Indian, 29,430,000 square miles. There are about 1,000,000 square miles of lake and river surface on the land, and 1,910,000 square miles of islands in the seas. The diameter of the earth at the equator is 7,926 miles, and through the poles 7,899.6 miles. The average elevation of the land above sea level is 2,300 feet. The average depth of the ocean below sea level is 12,600 feet. The deepest place in the ocean yet found is off Mindanao, Philippine Islands, 32,088 feet. The highest mountain is Mount Everest, in the Himalayas, 29,002 feet. This gives a range of 61,090 feet or more than 11½ miles between the bottom of the oceans and the top of the land. The greatest depth in the Atlantic Ocean is near Porto Rico, 31,366 feet; in the Indian Ocean, 22,968; in the Arctic, 13,200; in the Malay, 21,342; in the Caribbean, 20,568; in the Mediterranean, 12,276; in the Bering, 13,422.

The best estimates of the earth's area place the fertile regions at 29,000,000 square miles; steppes at 14,000,000 square miles; deserts at 4,861,000 square miles.

Areas in square miles of seas: Okhotsk, 580,000; Yellow, 480,000; Japan, 405,000; Andaman, 300,000; North, 220,000; Red, 178,000; Baltic, 160,000; Hudson Bay, 472,000.

The population of the earth at the death of Emperor Augustus, estimated by Bodio, was 54,000,000. The population of Europe hardly exceeded 50,000,000 before the fifteenth century.—*Mulhall*. The population of the earth at its present ratio of gain will be about 4,000,000,000 in 2014.

Abbe Theodore Moreaux, director of the observatory of Bourges, in an article in *La Revue du Ciel*, declares the world to be 500,000,000 years old. Life, Abbe Moreaux says, has existed on the earth for at least 240,000,000 to 260,000,000 years, although it has not been human life. He says the moon was not once part of the earth, but was a sun, since extinct, but it formerly aided in warming the earth.

## AREA OF ISLANDS.

## JEWISH POPULATION OF THE WORLD.

The Jews in the world are estimated at 15,500,000, of whom 3,500,000 are in the United States (1,500,000 in N. Y. City); 10,500,000 in Europe; in Asia, 500,000; and the rest chiefly in Africa and South America.

## UPPER AIR WINDS AND CONDITIONS.

Numerous observations with kites and balloons give the following information relative to upper air winds:

1. In general, winds a short distance above the ground blow from points slightly to the right of those at the surface; at greater heights this clockwise turning increases in the case of southerly winds, i. e., ESE to WSW, but northerly winds, especially those from NNW to ENE, turn counter-clockwise with altitude. For example, above SE winds at the surface there are found SSW to WSW winds as a rule; above NE winds, it is usual to find NNW to WNW winds.

2. On the average, wind speeds increase sharply, about 100%, within 1,500 feet above the surface. This rule applies to all directions. At greater heights the increase is more gradual, and in many cases, especially with easterly winds in summer, there is an actual decrease. The largest increases are found above surface SW to NW winds.

3. Winds in the upper air are prevailing from a westerly direction, i. e., SSW to NNW. At heights of two or three miles and thence to six or seven miles this preponderance amounts to about 90%. When easterly winds are found at these heights they are

usually of low velocity. Westerly winds, on the other hand, continue to increase in speed, reaching a maximum at altitudes of about six or seven miles. At still greater heights a decrease in speed is found.

4. The characteristics indicated in 1, 2, and 3 are more pronounced in winter than in summer and in the northern than in the southern part of the country.

5. Although westerly winds are usually found, they are not to be placed in the category of "trade winds," since large variations, both in speed and direction, are found from place to place, from season to season, and even from day to day.

The Weather Bureau, Washington, D. C., issues twice daily "flying weather" forecasts which are sent to all aviation fields in the country and in addition are broadcast from Arlington, so that any one having a radio receiving set can easily obtain information as to the probable upper air conditions of wind, etc. A similar message is broadcast from San Francisco for the benefit of Pacific Coast flyers. In addition to this service, the Weather Bureau is in possession of much detailed information as to upper air conditions, means, extremes, etc., and careful attention is always given to specific requests by letter, or otherwise, for such information.

AVERAGE UPPER AIR CONDITIONS AT ABOUT LATITUDE 40° IN THE U. S.  
SUMMER.

## TELESCOPES.

The magnifying power of telescopes is generally expressed in diameters, the practical limit of power being 100 diameters per inch of diameter of the telescope. Thus the 36-inch telescope at the Lick Observatory may give a magnifying power of 3,600 diameters. But such high power can only be used in a very tranquil atmosphere; consequently most astronomical observations are made at 1,000 diameters or less.

The largest refracting telescopes in the world are in the United States. The one at Yerkes Observatory, Geneva Lake, Wis., has an object lens 40 inches in diameter, with a focal length of 64 feet. The movable part of the instrument turning on the polar axis weighs about 12 tons, and the clock 1½ tons. Other large telescopes are the 36-inch at Lick Observatory, Mt. Hamilton, Cal., where many important astronomical discoveries have been made; the 26-inch at the U. S. Observatory, Washington, D. C., and the 24-inch (photographic objective) belonging to Harvard University, now at the Arequipa, Peru, station of the Harvard Observatory. There is a 30-inch refracting telescope at the Allegheny Observatory, Riverview Park, Pa.

Abroad is the 30-inch at the Imperial Observatory Pulkova (near Petrograd), Russia. This telescope has a platform at the lower end of the polar axis from which observers can readily operate the instrument. The Meudon Observatory (near Paris,

France), has a 32-inch; the Potsdam, Prussia, a 31-inch; and the Royal Observatory, at Greenwich, England, a 28-inch.

Two of the most perfect reflecting telescope instruments ever built are at Mt. Wilson Observatory, Pasadena, Cal. One mirror is silver on glass, 60 inches in diameter, and weighs nearly a ton. The telescope is moved by electric motors in right ascension and declination. An important feature in this instrument is the different focal lengths that can be obtained. The 40-inch mirror has a 25-foot focus, but by a suitable arrangement of mirrors it is possible to get focal lengths of 80, 100 and 150 feet. At the same observatory is a 100-inch reflector, the tube with the mirror at the bottom is 43 feet long, and with the mountings weighs nearly 20 tons. There is a 36-inch reflector at Lick Observatory. Harvard University has a 28-inch and a 60-inch, and at the Yerkes Observatory is a 24-inch. Other notable reflectors are the Lord Rosse, at Birr Castle, Ireland, which has a mirror 72 inches in diameter of speculum metal and a focal length of 54 feet; a 48-inch at Melbourne, Australia; a 60-inch at Ealing, England; a 48-inch at Paris, France, and a 39-inch at Meudon, France. A 61-inch reflecting telescope at the National Astronomic Observatory, Cordoba, Argentina, is under construction. The Dominion Astronomical Observatory, Victoria, B. C., Canada, has a 72-inch reflector.

## POETS-LAUREATE OF ENGLAND.

THERE is no authentic record of the origin of the office of Poet-Laureate of England. According to Warton, there was a *Versificator Regis*, or King's Poet, in the reign of Henry III. (1216-1272), and he was paid 100 shillings a year. Geoffrey Chaucer (1328-1400) assumed the title of Poet-Laureate, and in 1389 got a royal grant of a yearly allowance of wine. In the reign of Edward IV. (1461-1483) John Kay held the post. Under Henry VII. (1485-1509) Andrew Bernard was the Poet-Laureate, and was succeeded under Henry VIII. (1509-1547) by John Skelton. Next came Edmund Spenser, who died in 1599; then Samuel Daniel, who died in

1619; and after him, Ben Johnson (1574-1637), Sir William Davenant (1637-1668), John Dryden (1631-1700), who was deposed at the time of the Revolution. The others, with the date of appointment, when known, have been: Thomas Shadwell, 1689; Nahum Tate, 1692; Nicholas Rowe, 1715; the Rev. Laurence Eusden, 1718; Colly Cibber, 1730; William Whitehead, 1758, on the refusal of Gray; Rev. Thomas Warton, 1785, on the refusal of Mason; Henry J. Pye, 1790; Robert Southey, 1813, on the refusal of Sir Walter Scott; William Wordsworth, 1843; Alfred Tennyson, 1850; Alfred Austin, 1896; Robert Bridges, 1913.

## HISTORY OF WIRELESS TELEGRAPHY AND TELEPHONY.

(Prepared for THE WORLD ALMANAC by the American Telephone and Telegraph Co.)

Efforts to develop one form or another of wireless telegraphy go back nearly a century. Early experiments involved either volume distribution of electric current throughout a large area of moist earth or water, the propagation of energy from one point to another by electro-magnetic induction, or propagation by means of electrostatic induction. These early systems, although experimentally successful, failed to become practicable, and the electric wave wireless telegraphy of the present day differs fundamentally in principle from any of them.

Wireless telegraphy may be said to trace its origin directly from the theoretical work of J. C. Maxwell who in 1865, as a result of his researches in mathematical physics, was led to make the prediction that visible light consisted of electric waves in ether. For years the importance of Maxwell's prediction was unrecognized because it lay undiscovered from the complicated mathematical reasoning which he had arrived at it. It was not until 187 that interest was really aroused in the subject when Heinrich Hertz gave an experimental proof of the truth of Maxwell's prediction. Hertz showed that the ether of space would transmit electric waves and he showed how these waves might be produced and detected.

Following the work of Hertz, which received widespread attention, the suggestion was frequently made that the newly discovered waves might open the way to successful wireless telegraphy. However, the apparatus devised by Hertz for producing and detecting electric waves was in no way suitable to practical adaptation.

## INVENTION OF THE COHERER.

In 1890 the remarkable fact was noted by Branly that metal filings when loosely packed in a small glass tube normally formed a very poor conductor of electricity but that they became a good conductor under the influence of a nearby electric spark. The action of the spark apparently being to weld the metal grains lightly together. Branly's device received the name *coherer* and it was found to be a much more sensitive means of detecting electric waves than the device which Hertz had used.

Between the years 1894 and 1896 Marconi initiated his experiments which were destined to become famous, first devoting himself to improvements in his coherer. He adopted an idea originating with Depoff of using an electro-magnetic buzzer to de-cohere the coherer between signals and also found that the coherer when placed between an earth connection and a wire running to a large metal screen supported in the air became a very sensitive detector of electric waves. At about the same time Marconi modified the original oscillator of Hertz by connecting one terminal of the spark gap to the earth and the other to a large aerial conductor. By this means, which constitutes the first use of what is now known as an antenna, he was able to greatly increase the efficiency and amount of energy radiated from the oscillator.

Marconi tried out his developments in the field of space telegraphy in England in 1896 and by 1898 had succeeded in telegraphing a distance of 14½ miles. During the same year his apparatus was applied to a lightship and communication successfully established over a short stretch of water. By 1901 he had telegraphed from Cornwall to the Isle of Wight, a distance of 200 miles. At about this time he developed an oscillation transformer by means of which the coherer was inductively coupled to the receiving antenna.

## INDUCTIVE COUPLING.

In the use of inductive coupling, Marconi was anticipated by Sir Oliver Lodge who devised a wireless telegraph system in which such coupling was used and in which the natural period of the antenna circuit was made equal to the period of the oscillating circuit. Lodge's antenna was not earth connected like Marconi's but consisted of an upper and lower conducting surface, an arrangement which is coming into quite general use in recent years and is known as an antenna with counterpoise. Patents on inductive coupling and tuning were also taken out by Marconi, Arco and Slaby, Braun, Stone, and others. By the use of an auxiliary oscillating circuit, the capacity of which could be made much larger than the capacity of the antenna, means were provided for greatly increasing the amount of energy radiated as well as sharpening the frequency of radiation. In 1900 both Arco and Slaby and Marconi showed that two messages could be simultaneously received on different wave lengths by one antenna.

The next important development in spark sets came in 1908 with the invention by Wien of the quenched spark. The use of the quenched spark

narrowed materially the band of wave lengths radiated from a transmitting station and made sharper tuning possible.

In 1902 Castelli, an officer in the Italian Navy, invented the first self-restoring coherer. This permitted the use of the ordinary telephone receiver as a receiving instrument and thereby very greatly improved the sensitiveness of the receiving set. Shortly afterward the magnetic and electrolytic detectors were developed, but while they were self-restoring they were never generally used because the crystal detectors, introduced in 1906 as a result of the work of Dunwoody and Picard in America, proved far more satisfactory in practically every respect.

## DEVELOPMENT OF THE ARC.

In 1903, Poulsen, of Denmark, developed a form of arc which was characterized by a hydrogen atmosphere surrounding the electrodes and a transverse magnetic electric field between the electrodes, the field being formed by solenoids through which the current feeding the arc flows. The Poulsen arc proved a very satisfactory generator of oscillating currents up to frequencies of 20,000 to 30,000 and as subsequently developed is used in many of the largest radio telegraph stations throughout the world. Arcs have recently been built, as for the Lafayette Station in France, which are capable of delivering 1,000 k. w. to an antenna.

The development of the arc, because it supplied a source of continuous waves, held out the promise of making radio telephony practicable but until the advent of the vacuum tube no satisfactory means was found of effecting the necessary modulation with speech frequencies.

Another form of continuous wave generator which has received much attention is the high frequency alternator. The names best known in this field are those of Goldschmidt and Alexanderson. In recent years the Alexanderson type of alternator has been the object of important developments by the General Electric Company and is being used extensively by the Radio Corporation of America in its large telegraph stations.

Briefly, the importance of continuous wave radio telegraph lies in the fact that it makes possible the use of larger amounts of power than the spark and it permits the generation of narrower bands of waves, thus tending to reduce interference between simultaneous messages. It also led to the introduction of heterodyne reception, by Fessenden about 1905.

## THE VACUUM TUBE.

Within the past few years the vacuum tube or thermionic amplifier has become one of the most important types of generator for continuous waves. It was introduced in 1906 by De Forest as a detector and amplifier of electric waves and although it proved under favorable conditions to be extremely sensitive in these capacities it was not entirely reliable. The vacuum tube or "audion," as made by De Forest, contained an appreciable amount of residual gas within the evacuated bulb which proved to be largely responsible for its uncertain behavior. Because it gave promise of containing the germ of a sensitive electric amplifier, the Bell Telephone System became interested in developing it, beginning 1912, as a means of attaining transcontinental telephony. The telephone engineers undertook a thorough study of its electrical characteristics and applied means for thoroughly exhausting the gas. The resulting tubes acted so satisfactorily as telephone repeaters that the development of much larger power tubes was immediately undertaken with the object of applying them to radio telephony.

These developments produced vacuum tubes which were used successfully as continuous wave generators and speech modulators and led, in the year 1915, to a successful trial of transoceanic radio-telephony. The development of a vacuum tube in very large sizes is still in its infancy and there is every reason to believe that in the near future it will take its place beside the arc and alternator for the handling of very large amounts of energy, both for radio telegraphy and telephony.

The use of the vacuum tube detector and amplifier for receiving purposes, by making possible the detection of very faint signals, is at present giving rise to extensive use of the loop antenna for directive reception, and this in turn is leading to the erection of many radio compass stations and radio beacons for the supplying of ships' bearings to navigators at sea.

The vacuum tube has also been generally responsible for the rapid development during the past few years of radio-telephony for ship-to-shore

communication, for military purposes—especially for guiding aircraft—and for radio broadcasting.

Following are a few of the more important dates relating to the application of the radio telegraph and telephone to commercial and other uses, notably military and broadcasting:

#### WIRELESS CHRONOLOGY.

1901—Marconi first succeeded in telegraphing certain signals across the Atlantic and in 1903 a complete message was sent.

1904—A regular telegraph service to handle press news and private messages was begun from Poldhu and Cape Breton to Atlantic liners. This led to the publication of small daily newspapers on board many of the transatlantic steamships.

1906—The use of radio-telegraphy by steamships had so demonstrated its value as a means of increasing the safety of travel at sea that an International Radio Convention was called in Berlin to consider the desirability of establishing certain uniform international practices. The articles of this convention, which dealt largely with the international use of the radio telegraph, particularly as concerned its use by ships at sea, were subscribed to by practically all nations.

1907—Press despatches were being handled by radio-telegraphy across the Atlantic.

1909—Collision between the steamships Republic and Florida occurred, and by summoning aid the radio-telegraph was instrumental in saving the lives of all on board. The first wireless shipping report was published at Lloyd's in 1910.

1912—The second International Radio-Telegraph Convention was signed at London; like the first one signed at Berlin it had to do especially with safety at sea.

1915—Experimental transoceanic telephony was first achieved, speech being transmitted by the Bell Telephone System engineers from Washington, D. C., to Paris and to Honolulu, the latter dis-

tance being nearly 5,000 miles. During the demonstration a telephone message was sent by wire from New York to Washington and then radiated from Washington to San Francisco, thus establishing the radio-telephone as a supplement to the wire system. It is this possibility which must at the heart of all successful ship-to-shore and transoceanic telephone systems.

1914-19—During the World War the value of the radio telegraph and telephone for many military and naval purposes was thoroughly established. The wireless telephone proved particularly useful as a means of directing aircraft.

1920—Following the close of the war, the development of the radio art in the United States was in danger of being seriously retarded because of the diversified ownership of essential patents. At the suggestion of the United States Government, the leading holders of these patents, namely the American Telephone & Telegraph Company, the General Electric Company, the Radio Corporation of America and the Westinghouse Electric and Manufacturing Company entered into a cross licensing agreement permitting each company to avail itself of the patents of the others in its particular fields. By means of this agreement the greatest research and development staffs in the world have been freed to develop the public service feature of radio without fear of patent infringement.

1921-22—Many radio-telephone stations, located at New York, Newark, Pittsburgh, Shenectady, Chicago, and certain other cities, adopted the programme of broadcasting music and other entertainment regularly for the purpose of focusing popular interest upon radio. By October 6 the number of broadcasting stations was 546. California led with 66, Ohio second with 35, and New York third with 30. Fully 2,000,000 were "listening in" nightly and, as the average cost of a radio set is \$75, the amount invested is \$150,000,000.

### WHAT IT WAS THAT ALEXANDER GRAHAM BELL DISCOVERED.

(A. C. Curacy in the N. Y. Evening Post).

L'illustration, Paris, August 26, 1854, contained an article by Charles Boursiel, in which the electrical transmission of speech was predicted in the following words: "Suppose that a man speaks near a movable disk sufficiently flexible to lose none of the vibrations of the voice; that this disk alternately makes and breaks the connection from a battery; you may have at a distance another disk which will simultaneously execute the same vibrations."

Six years later, 1860, Philipp Reis built a device that he called a "telephone" upon the principle laid down by Boursiel. The tenth and final form of the "transmitter" is known as the "square box pattern." It consists essentially of a square box, with a membrane in the cover and a mouthpiece in the side. At the centre of the membrane is a loose contact that makes and breaks the circuit when a sound directed into the box through the mouthpiece causes the membrane to vibrate. The best known form of "receiver" is the "knitting needle receiver." It consists essentially of a knitting needle wrapped with silk-insulated copper wire and mounted on a box which serves as a sounding board.

The Reis "receiver" operates on a principle that was discovered by C. G. Page, of Salem, Mass., in July, 1837—namely, that when a piece of iron is suddenly magnetized or demagnetized it will emit a feeble click. This sound is due, of course, to the adjusting and readjusting of the molecules of the piece of iron.

Specimens of Reis's apparatus are to be found in the Smithsonian Institution in Washington, D. C., and in semi-private museums in the United States.

Why do not these inventions transmit speech satisfactorily?

#### CHARACTERISTICS OF SOUND.

A sound possesses three characteristics: Pitch, which depends upon the frequency of the vibrations; loudness, which depends upon the amplitude of the vibrations, and timbre, which depends upon the source of the sound. The tones of a piano and of a violin may be the same as to pitch and loudness, yet the tones are radically different. That difference is what I mean by timbre.

Reis's telephone will transmit pitch and loudness, but it cannot transmit timbre, because it operates on the make and break principle.

In the summer of 1874, Alexander Graham Bell conceived an apparatus that possessed the power of transmitting speech sounds by means of a self-generated *unbroken undulating current*, and on June 2, 1875, satisfactorily tested this apparatus. The device consisted essentially of a diaphragm of gold beater's skin, which, when vibrated by the voice set into similar vibration a steel armature mounted in association with an electromagnet. This motion of the armature generated an *unbroken undulating current* in the telephone circuit, in accordance with a principle discovered by the Russian scientist E. Lenz, in 1834, and a principle discovered by the German scientist, F. E. Newmann, in 1845. These principles may be combined in a single sentence as follows: Any change in the magnetic field, with respect to a conductor, induces a current in the conductor whose direction is such as to oppose the change which produced it, and the induced electromotive force is proportional to the rate of change of the field.

Bell's first receiver was an electromagnet with a vibrating steel reed armature. The attraction exerted by the electromagnet upon its armature varied exactly the same as the *unbroken undulating current* generated by the transmitting apparatus varied. Bell's apparatus transmitted and received timbre as well as pitch and loudness. For this reason Bell succeeded in transmitting intelligible speech while Reis failed.

#### BELL'S FIRST PATENT.

Bell's first telephone patent, No. 174465, covered the use of an *unbroken undulating current* for the transmission of speech. It included the use of the alternating undulating current, which is produced by the device that I have just discussed, and the use of a uni-directional undulating current, which is produced by incorporating in the circuit a battery in association with a transmitter, the resistance of which is varied by the voice of the speaker. A second patent covered the use of a permanent magnet instead of an electromagnet.

Until March 7, 1893, and January 30, 1894 respectively, these patents controlled the manufacture of transmitters and receivers. No one challenged Bell's claim that he was the inventor of the telephone until the first patent was about eighteen months old. During the succeeding twenty years some fifty of the most eminent lawyers in the country tried to demolish Bell's claim and failed.

## FOOD CROPS OF THE WORLD (BUSHELS).

| YEAR.     | Corn.         | Wheat.        | Oats.         | Barley.       | Rye.          | Potatoes.     |

| 1891-95.....    | 12,149,000 | 8,041,000      | 66.18         | 1920.....       | 21,787,000 | 13,440,000     | 61.68         |
| 1896-1900.....  | 15,162,000 | 10,081,000     | 66.48         | 1921.....       | 15,593,000 | 8,340,000      | 53.48         |

The world's production of raw cotton in 1920-21 is estimated at 19,595,000 bales of 500 lbs. gross, or 478 lbs. net, by the U. S. Dept. of Agriculture. United States, 13,366,000; India, 2,976,000; Egypt, 1,251,000; China, 1,000,000; Russia, 180,000;

Brazil, 100,000; Mexico, 165,000; Peru, 157,000; and all other countries, 400,000 bales. A normal world crop is about 22,000,000 bales.

There are about 152,000,000 cotton spinning spindles in the world, of which 130,000,000 are actively at work, as a rule.

## WORLD'S WOOL PRODUCTION—MILLS IN UNITED STATES.

The world's production of wool averages about 2,600,000,000 pounds, of which 800,000,000 pounds comes from Australasia, 460,000,000 from South America, 200,000,000 from Russia, 225,000,000 from the U. S.

The number of woolen mills in the United States

exceeds 1,000, and there are about 80,000 looms, over 8,000 of which are used in making carpets and rugs. The number of active spinning spindles exceeds 4,000,000, pretty evenly divided between woolens and worsteds. There are usually from 250,000 to 500,000 idle spindles.

## WORLD'S RAW SILK PRODUCTION.

The world's raw silk production in the 1921-1922 season is estimated at 59,437,000 lbs., of which Asia exported 48,740,000 lbs.

Raw silk production in the 1920-1921 season (pounds): Europe, 8,025,000 (Italy, 7,330,000; France, 551,000; Spain, 144,000); Levant, 1,654,000.

Asia, 35,138,500 (China: Shanghai, 6,518,500; Canton, 4,210,000); Japan, 24,300,000; India, 110,000. Total for world, 44,817,500. Tussock silk, 1,650,000. Figures for Asia cover exports only. Actual production there last year was estimated as follows: China, 22,506,300 lbs.; Japan, 37,385,000 lbs.

## WORLD'S TOBACCO PRODUCTION.

Yearly average production (pounds)—Algeria, 23,000,000; Argentina, 35,000,000; Austria-Hungary, 170,000,000; Brazil, 100,000,000; Belgium, 20,000,000; Bulgaria, 30,000,000; Canada, 13,000,000; Ceylon, 25,000,000; Cuba, 75,000,000; China, 500,000,000; Chili, 9,000,000; Colombia, 20,000,000; Dutch E. Indies, 200,000,000; France, 50,000,000; Germany, 60,000,000; Greece, 22,000,000; India,

1,000,000,000; Italy, 20,000,000; Japan, 120,000,000; Korea, 35,000,000; Mexico, 35,000,000; Persia, 20,000,000; Philippines, 100,000,000; Porto Rico, 10,000,000; Paraguay, 18,000,000; Roumania, 20,000,000; Russia, 255,000,000; Santo Domingo, 23,000,000; Serbia, 7,500,000; Turkey, 90,000,000; Union of So. Africa, 15,000,000; United States, 1,400,000; Venezuela, 8,000,000. Total, 4,600,000,000 pounds.

## LIVE STOCK IN THE WORLD.

Productive area includes arable land; natural meadows and pastures, nurseries and orchards; woods and forests, and marsh, heath and uncultivated productive land.

Arable land includes land used for cereals, grass and other fodder crops, food crops, industrial crops,

crops for seeding purposes, bare fallow, fertilizer crops and fields under natural grass, and other and unspecified classification.

Changed boundaries in Austria, Bulgaria, Germany and Roumania partly account for differences in figures.

## WHEAT HARVEST SEASONS OF THE WORLD.

January—Australia, New Zealand and Chili.

February and March—East India, Upper Egypt.

April—Lower Egypt, Syria, Cyprus, Persia, Asia Minor, India, Mexico and Cuba.

May—Algeria, Central Asia, China, Japan, Morocco, Texas and Florida.

June—Turkey, Greece, Italy, Spain, Portugal, South of France, California, Louisiana, Mississippi, Alabama, Georgia, Carolinas, Tennessee, Virginia, Kentucky, Kansas, Arkansas, Utah, Missouri.

July—Roumania, Bulgaria, Austria-Hungary, South of Russia, Germany, Switzerland, France, South of England, Oregon, Nebraska, Minnesota, Wisconsin, Colorado, Washington, Iowa, Illinois,

Indiana, Michigan, Ohio, New York, New England and Upper Canada.

August—Belgium, Holland, Great Britain, Denmark, Poland, Lower Canada, Columbia, Manitoba, North and South Dakota.

September and October—Scotland, Sweden, Norway, and North of Russia.

November—Peru, South Africa and Argentina.

December—Burmah and Argentina.

## CORN HARVEST TIME.

January—New South Wales.

March and April—Argentina.

September and October—All European countries.

October—The crop of the United States is harvested principally in this month.

## THE FIVE GREAT FOOD GROUPS.

(Prepared by the U. S. Department of Agriculture.)

Every food may be put into one of five groups. Each of these groups serves a special purpose in nourishing the body. Some food from each group is needed regularly by the body.

1. Vegetables and fruits.
2. Meat, fish, eggs, milk, cheese, soy beans, and peanuts.
3. Cereal grains and their products.
4. Sweets—Sugar syrups, honey, jelly, and candies.
5. Fats and fat foods—Butter, cooking fats, and table oils; suet, salt pork and bacon; nuts.

1. *Vegetables and fruits* furnish some of the material from which the body is made and keep its many parts working smoothly. They help to prevent constipation.

2. *Meat, fish, eggs, milk, cheese, soy beans, and peanuts* help to build up the growing body and renew used-up parts. That is their main business, though

they also serve as fuel. Milk is important for children.

3. *Cereals, and the flours, meals, breads, cakes, breakfast foods, and other dishes made from them* act as fuel for the work of the body, much as the gasoline burning in an automobile engine makes the car go. This is their chief business. Moreover they give the body some building material.

4. *Sweets, too, are fuel.* They also give flavor to other foods. They are valuable food, but many persons eat more of them than they need, and one could get along better without this group than without any of the others. Sweet fruits, especially dried ones like dates and raisins, contain much sugar and are better for the children than candy.

5. *Fats.* These furnish body-fuel in a concentrated form. Some are needed especially by hard-working people. Expensive fats are no better fuel than cheap ones. Drippings from bacon and other left-over fats can well be used. Children need some butter fat.

## HUNDRED-CALORIE PORTIONS IN COMMON FOOD MATERIALS.

The fuel value of food is measured in calories just as length is measured in inches. For convenience

in meal planning, the hundred-calorie portion is sometimes used, as is done in the following table:

## GROUP I. VEGETABLES AND FRUITS.

| MATERIALS.                | No. of Hundred-Calorie Portions. | MATERIALS.                      | No. of Hundred-Calorie Portions. | MATERIALS.                   | No. of Hundred-Calorie Portions.         |
|---------------------------|----------------------------------|---------------------------------|----------------------------------|------------------------------|------------------------------------------|
| <b>VEGETABLES, FRESH.</b> |                                  | <b>VEGETABLES, FRESH—Cont'd</b> |                                  | <b>FRUITS, FRESH—Cont'd</b>  |                                          |
| Asparagus.....            | 1 per lb.                        | Radishes.....                   | 1 per lb.                        | Huckleberries.....           | 3¼ per lb. or qt.                        |
| Beans, lima, sh'd.....    | 5½ per lb.                       | Rhubarb.....                    | ¼ per lb.                        | Lemons.....                  | 1½ per lb.                               |
| Beans, string.....        | 7 per quart.                     | Spinach.....                    | 1 per lb.                        | ".....                       | 4¼ per dozen medium sized.               |
| Beets.....                | 1½ per quart.                    | Squash.....                     | 5 per peck.                      | Muskmelon.....               | 1 per lb. or 1 per medium-sized.         |
| Cabbage.....              | 1½ per pound.                    | Tomatoes.....                   | 1 per lb.                        | Oranges.....                 | 1¼ per lb. or 10 per dozen medium sized. |
| ".....                    | 1 per lb.                        | Turnips.....                    | 1¼ per lb.                       | Peaches.....                 | 1½ per lb.; 6 per dozen                  |
| ".....                    | 3 per medium-sized head (3lbs)   | Turnip tops.....                | 2 per lb.                        | Pears.....                   | 2½ per lb.                               |
| Carrots.....              | 1½ per lb.                       | <b>VEGETABLES, CANNED.</b>      |                                  | Plums.....                   | 3½ per lb.                               |
| Cauliflower.....          | 1½ per lb.                       | Beans, string.....              | 1 per lb.                        | Raspberries.....             | 3 per lb. or qt.                         |
| ".....                    | 1½ per lb.                       | " baked.....                    | 1¼ per No. 2 can.                | Strawberries.....            | 1¼ per lb. or qt.                        |
| Celery.....               | ¾ per lb.                        | ".....                          | 6 per lb.                        | Watermelon.....              | ½ per lb.                                |
| Corn.....                 | 1¼ per lb.                       | ".....                          | 7 per No. 2 can.                 | <b>FRUITS, CANNED.</b>       |                                          |
| ".....                    | 11 per doz. med-sized ears.      | Corn.....                       | 4½ per lb.                       | Cherries.....                | 4 per lb.                                |
| Cowpeas, sh'd.....        | 6 per lb.                        | ".....                          | 6 per No. 2 can.                 | Peaches.....                 | 5 per No. 2 can.                         |
| Cucumbers.....            | ¾ per lb.                        | Tomatoes.....                   | 2½ per lb.                       | ".....                       | 2 per lb.                                |
| ".....                    | ¼ per med-sized cucumber.        | Peas.....                       | 1 per lb.                        | Pears.....                   | 2½ per No. 2 can.                        |

## WEEKLY NEEDS OF A FAMILY.

The number of hundred-calorie portions needed by any family can be estimated by reference to the table given below. For illustration, if a family consists of one man who does little muscular work; two women, one of whom does little muscular work;

the other hard muscular work, an active boy 16 years of age, and three children, 11, 8, and 4 years of age, they would require, respectively, about 200, 150, 200, 280, 140, 120, and 100 hundred-calorie portions a week, which make a total of about 1,200 hundred-calorie portions per week.

## ENERGY NEEDS OF DIFFERENT INDIVIDUALS.

(Hundred-Calorie Portions.)

| INDIVIDUAL.                                                             | Per Day | Per Wk. | INDIVIDUAL.                                                 | Per Day | Per Wk. |
|-------------------------------------------------------------------------|---------|---------|-------------------------------------------------------------|---------|---------|
| A man or boy using much muscular energy in work or play up to.....      | 40      | 280     | A boy or girl between 10 and 12 years of age, at least..... | 20      | 140     |
| A man or boy using little or no muscular energy in work or play.....    | 27      | 200     | A boy or girl between 6 and 9 years of age, at least.....   | 17      | 120     |
| A woman or girl using much muscular energy in work or play.....         | 27      | 200     | A boy or girl between 2 and 5 years of age, at least.....   | 14      | 100     |
| A woman or girl using little or no muscular energy in work or play..... | 22      | 150     |                                                             |         |         |

The diet will usually prove adequate and appetizing if the necessary calories of energy are supplied somewhat as follows:

About one-fifth by fruits and vegetables.

About one-fifth by meat, milk, and similar foods.

About three-tenths by cereal foods.

About one-tenth by sugar and other sweets.

About one-fifth by fats and fat foods.

## COAL RESERVES OF THE WORLD UNMINED.

UNITED STATES and Alaska, 3,538,506,328,300 tons, of which 16,153,000,000 tons is anthracite. 2,155,000,000,000 tons is bituminous, and 2,054,000,000,000 tons is sub-bituminous and lignite; Canada, 1,361,000,000,000 tons, of which 2,000,000,000 is anthracite and 318,000,000,000 is bituminous; China, 1,097,000,000,000 tons, of which 427,000,000,000 in anthracite; Germany, 467,000,000,000 tons, of which 452,000,000,000 tons is bituminous and the rest sub-bituminous; Great Britain, 209,000,000,000 tons, of which 12,000,000,000 is anthracite; Siberia, 192,000,000,000 tons, no anthracite; Australia, 183,000,000,000 tons, all bituminous or sub-bituminous; India, 87,000,000,000 tons, no anthracite; Russia in Europe, 66,000,000,000 tons, of which 41,000,000 is anthracite; Union of South Africa, 62,000,000,000 tons, of which 13,000,000,000 is anthracite; Austria, 59,000,000,000 tons, no anthracite; Colombia, 30,000,000,000 tons, no anthracite; Indo-China, 22,000,000,000 tons, all anthracite; France, 19,000,000,000 tons, of which 4,000,000,000 is anthracite; Belgium, 12,000,000,000 tons, no anthracite; Spain, 10,000,000,000 tons, of which 2,000,000,000 is anthracite; Spitzbergen, 9,000,000,000 tons, no anthracite; Japan, 9,000,000,000 tons, no anthracite; Holland, 5,000,000,000 tons, no anthracite; other countries, 24,009,000,000 tons, of which 3,000,000,000 is anthracite.

Total coal reserves, 7,460,506,000,000 tons, of which 542,103,000,000 is anthracite.

Coal unmined in Pennsylvania is estimated at 16,000,000,000 tons anthracite and 108,474,000,000 tons bituminous; in West Virginia, 150,363,600,000 tons, bituminous.

## COAL OUTPUT OF THE WORLD.

The yearly coal production of the world is estimated at slightly under 1,500,000,000 short tons, of which from 550,000,000 to 650,000,000 tons is mined in the United States; 325,000,000 in Great Britain; 300,000,000 in old Germany; 66,000,000 in old Austria-Hungary; 50,000,000 in old France; 40,000,000 in old Russia; 25,000,000 in Belgium; 30,000,000 in Japan; 20,000,000 in China; 20,000,000 in India; 15,000,000 in Canada; 12,000,000 in New South Wales; 7,000,000 in Spain; 10,000,000 in Union of South Africa; 2,500,000 in New Zealand; and smaller amounts in Holland, Chile, Mexico, Turkey, Italy, Sweden, Serbia, Bulgaria, Peru and other countries.

## COAL MINERS—THEIR AVERAGE NUMBER.

The number of men employed in the Pennsylvania anthracite mines ranged as high as 180,000 in 1914, and as low as 154,000 in 1917. They average 200 (1908) to 293 (1918) days' work a year, and they dig 2.02 (1913) to 2.39 (1908) tons per man per day. In the bituminous mines the number of employees ranged up to 615,305 in 1918, with 243 days' work per year, and an average digging of 3.91 (1915) tons per man per day.

## IRON AND STEEL OUTPUT OF CHIEF COUNTRIES.

| YEAR.     | United Kingdom.   | United States.    | Germany.          | France.           | YEAR.     | United Kingdom.   | United States.    | Germany.          | France.           |

## WORLD'S IRON AND STEEL PRODUCTION.

(Long or metric tons of 2,240 lbs.)

Pig iron (1913) 65,566,000; (1919) 46,690,000;  
 (1920) 54,976,000; (1921) 29,281,000.  
 Steel (1913) 63,356,000; (1919) 51,774,000;  
 (1920) 63,117,000; (1921) 35,342,000.

The 'minette' ore field, which extends over a portion of Alsace-Lorraine, Luxemburg, and Belgium, is

is the most important as regards quantity in Europe. This field in 1912 produced 44,000,000 tons, or 28 per cent. of the world's output. The ore—geologically a bedded oolitic ironstone of Jurassic age—is a carbonate partly oxidized to brown ore.

## IRON ORE RESOURCES OF THE WORLD.

The unmined iron ores of the world are officially estimated as follows, in metric or long tons:

| COUNTRIES.           | Iron Ore.           | Iron.               | COUNTRIES.                    | Iron Ore.           | Iron.               |
|----------------------|---------------------|---------------------|-------------------------------|---------------------|---------------------|
| Europe:              | <i>Metric tons.</i> | <i>Metric tons.</i> | Europe—Continued.             | <i>Metric tons.</i> | <i>Metric tons.</i> |
| Germany.....         | 1,270,000,000       | 600,000,000         | Greece.....                   | 100,000,000         | 45,000,000          |

Nearly 76 per cent. of planted acreage plantation rubber is owned by British capital, and 5.6 per cent. by American capital, according to best available authorities.

The 55,000 acres planted and controlled by

American capital comprise the estate of the General Rubber Co., in Sumatra. American interests have also acquired 40,000 acres of undeveloped land in Sumatra. A very limited area is also planted to rubber in Mindanao Philippines.

| N. Y. City.....          | 64,257                            | 11.17                  | 89                      | 13                       | 97                        | 113                                  | 131,241                           | 23.34                  | 71                              |

The death rates for typhoid, measles, scarlet fever, whooping cough and diphtheria are, generally speaking, higher in foreign than in American cities.

## VITAL STATISTICS FOR ENGLAND AND WALES, 1920.

The important facts in the record of vital statistics for England and Wales for the year 1920, as presented in the Eighty-third Annual Report of the Registrar for England and Wales for that year, are stated to be the following: The highest marriage rate recorded to that date—20.2 per 1,000 of the population, a rate 4.8 above the average of the last 10-year period unaffected by the war (1905-1914); the highest birth rate (25.5 per 1,000 population) since 1909; and the lowest death rate recorded, namely 12.4 per 1,000 population, being 1.3 below the rate for 1919. The number of deaths was 466,130—the smallest number recorded in any year since 1862, when the population was little more than half that of 1920.

The proportion of males to females born in 1920 was 1,052 per 1,000, continuing much above pre-war experience. The loss of births attributable to the war was estimated at about 600,000.

## MARRIAGE, BIRTH AND DEATH RATES IN GERMANY.

The Statistische Reichsamt has recently published the marriage, birth and death rates in Germany for 1921, and comparisons are made with the figures for the years 1904-1920. The following table gives the data for the years 1904 to 1921, inclusive, and the difference between the birth rates and death rates for each year:

Marriage, birth, and death rates per 1,000 population in Germany, 1904 to 1921, inclusive.

| YEAR.     | Marriage<br>Rate. | Birth<br>Rate. | Death<br>Rate. | Differ-<br>ence. | YEAR.     | Marriage<br>Rate. | Birth<br>Rate. | Death<br>Rate. | Differ-<br>ence. |
|-----------|-------------------|----------------|----------------|------------------|-----------|-------------------|----------------|----------------|------------------|
| 1904..... | 8.0               | 35.1           | 20.6           | +14.5            | 1913..... | 7.7               | 28.3           | 15.8           | +12.5            |
| 1905..... | 8.1               | 34.0           | 20.8           | +13.2            | 1914..... | 6.8               | 27.6           | 19.9           | +7.7             |
| 1906..... | 8.2               | 34.1           | 19.2           | +14.9            | 1915..... | 4.1               | 21.0           | 22.0           | -1.0             |
| 1907..... | 8.1               | 33.2           | 19.0           | +14.2            | 1916..... | 4.1               | 15.7           | 19.7           | -4.0             |
| 1908..... | 8.0               | 32.0           | 19.0           | +13.0            | 1917..... | 4.7               | 14.4           | 20.8           | -6.4             |
| 1909..... | 7.8               | 32.0           | 18.1           | +13.9            | 1918..... | 5.4               | 14.7           | 18.8           | -4.1             |
| 1910..... | 7.7               | 30.7           | 17.1           | +13.6            | 1919..... | 13.4              | 20.6           | 16.4           | +4.5             |
| 1911..... | 7.8               | 29.5           | 18.2           | +11.3            | 1920..... | 14.8              | 27.1           | 16.3           | +10.8            |
| 1912..... | 7.9               | 29.1           | 16.4           | +12.7            | 1921..... | 11.9              | 26.1           | 14.8           | +11.3            |

Positive figures indicate excess of births over deaths; minus figures excess of deaths over births. The figures in the following table represent the marriages, births, and deaths in 1920 and 1921 as compared with 1913, the figures for 1913 being taken as a base and represented as 100:

Marriages, births, and deaths in Germany in 1920 and 1921 as compared with 1913.

(The figures for 1920 and 1921 are in percentages of those for 1913, which are represented by 100.)

|                | 1913. | 1920. | 1921. |             | 1913. | 1920. | 1921. |             | 1913. | 1920. | 1921. |
|----------------|-------|-------|-------|-------------|-------|-------|-------|-------------|-------|-------|-------|
| Marriages..... | 100   | 190   | 155   | Births..... | 100   | 94    | 91.6  | Deaths..... | 100   | 101.3 | 93.7  |

## POISONS AND THEIR ANTIDOTES.

NOTE—When the poison is unknown, give stimulants and soothing liquids. The data below is from an American National Red Cross textbook on first aid.

Table I.—Poisons for which an emetic is always given first.

The treatment is in addition to an emetic.

**ALCOHOL**—In any form—rum, gin, whiskey, proof spirits, etc., also methyl alcohol.

**Symptoms**—Giddiness, swaying of body, inability to stand. Face flushed, eyes red, skin clammy, weak pulse, may be convulsions and unconsciousness.

**Treatment**—Hot coffee or aromatic spirits of ammonia. Try to arouse, but if weak do not exhaust by making walk. Dash cold water on face and chest. When somewhat recovered, wrap warmly and put to bed.

**ARSENIC**—Found in rat poisons, vermin killer, Paris green, Fowler's solution. Sometimes in tinned fruits and beer.

**Symptoms**—Severe pain in stomach; purging; severe cramps in legs, vomiting, dryness of throat, cold sweats, profound shock.

**Treatment**—Much lukewarm water. Magnesia in large quantity or dialyzed iron in ½-ounce doses, repeated. Beaten-up eggs or castor oil and stimulants. Warmth and rubbing. If rat poison has been taken, treat as for poisoning by arsenic.

**CARBON MONOXIDE**—It is in blast and coke furnaces and foundries; in leaky furnaces or chimneys; about gas stoves without flue connections, such as tenements, tailor shops or boarding houses. The exhaust gases of gasoline automobiles contain from 4 to 12 per cent. of carbon monoxide, and in closed garages men are not infrequently found dead beside a running motor. A similar danger may arise from gasoline engines in launches. The gas is formed also in smoke-rooms, in gun turrets on battleships, in petroleum refineries, as in the Leblanc soda process in cement and brick plants. In underground work it may appear as the result of shot firing, mine explosions, or mine fires, or in tunnels from automobile exhausts or from coal or oil burning locomotives.

**Symptoms**—Carbon monoxide exerts its extremely dangerous action on the body by displacing oxygen from its combination with hemoglobin, the coloring matter of the blood which normally absorbs oxygen from the air in the lungs and delivers it to the different tissues of the body.

**Treatment**—1. Administer oxygen as quickly as possible and in as pure form as is obtainable, preferably from a cylinder of oxygen through an inhaler mask. 2. Remove patient from atmos-

phere containing carbon monoxide. 3. If breathing is feeble, at once start artificial respiration by the prone posture method. 4. Keep the victim flat, quiet, and warm. 5. Afterward, give plenty of rest.

**LEAD**—Sugar of lead, lead paint, white lead.

**Symptoms**—Throat dry; metallic taste with much thirst, colic in abdomen, cramps in legs, cold sweat; sometimes paralysis of legs and convulsions.

**Treatment**—½-ounce Epsom salts in tumbler of water. Stimulants and soothing liquids.

**OPIMUM**—Laudanum, morphine, paregoric, some soothing syrups and cough mixtures.

**Symptoms**—Drowsiness, finally unconsciousness; pulse full at first, then weak; breathing full and slow at first, gradually slower and shallow; pinhead pupils; face flushed, then purple.

**Treatment**—May have difficulty in getting emetic to work; plenty of strong coffee. Try to arouse by speaking loudly and threatening, but do not exhaust by compelling to walk, etc. Stimulants and artificial respiration.

**PHOSPHORUS**—In matches, phosphorous paste in many rat poisons and vermin killers, often with arsenic.

**Symptoms**—Severe pain in stomach, vomiting. Skin is dark and may have odor of phosphorus. Bleeding from nose, bloody purging. Convulsions.

**Treatment**—Epsom salts, ½-ounce in tumbler of water, or magnesia. Stimulants. Soothing liquid best. Milk. Avoid fats and oils.

**POTMAINE**—Poisoning by decayed meat, fish, milk, or ice cream.

**Symptoms**—Nausea, vomiting, purging. Skin cold and clammy. Pulse weak. Severe pain in abdomen, cramps, great prostration and weakness. Often eruption on skin.

**Treatment**—Purgative, castor oil or Epsom salts. Teaspoonful of powdered charcoal, and repeat.

**STRYCHNINE**—**NUX VOMICA**—Strychnine is frequently used on meat to poison animals and in some vermin killers.

**Symptoms**—Convulsions, very severe, alternating with cramps, affecting all muscles of body. Back is bowed up by spasms of muscles. Jaws are locked. Spasm of muscles is so great that it prevents breathing, so face becomes dusky.

**Treatment**—Powdered charcoal, if possible, in large quantity. Follow with another emetic. Absolute quiet so as not to bring on convulsions.

Table II.—Poisons for which an emetic should not be given first.

**MERCURY**—Corrosive sublimate, antiseptic tablets. Other salts of mercury much less commonly used.

**Symptoms**—Corrosive sublimate is very irritating, so when taken turns mouth, lips and tongue white. Mouth is swollen and tongue is shrivelled; always metallic taste in mouth. Pain in abdomen. Nausea and vomiting mucus and blood, bloody purging, cold, clammy skin, great prostration, and convulsions.

Table III.—Poisons for which an emetic should never be given.

**STRONG CORROSIVE ACIDS**—1. Acetic; 2. Hydrochloric (spirits of salt); 3. Nitric (aqua fortis); 4. Sulphuric (vitriol).

**Symptoms**—Very severe burning pain in mouth, throat, and stomach. Wherever acid touches skin or mucous membrane they are destroyed. Frequently vomiting and purging. More or less suffocation from swelling of throat, great prostration and shock.

**Treatment**—An alkali to neutralize acid. Best, magnesia or chalk in water, given frequently and freely. Lime, whitening, baking soda, plaster, tooth powder, or even wood ashes may all be used for alkali, or ammonia, a tablespoonful to 2 cups of water, but those mentioned above are better as they are less irritating. Afterward, soothing liquids, milk, milk and egg, olive oil. Stimulants are practically always required. If acid has entered air passage, may inhale fumes of ammonia.

**OXALIC ACID** (salts of lemon or sorrel).

**Symptoms**—Much like corrosive acids just named, but not so much burning of lips, etc.

**Treatment**—Magnesia, chalk, and water or lime water to neutralize acid. Then one ounce of castor oil and stimulants freely.

**CARBOLIC ACID** (Phenol)—(Very commonly used in attempts at suicide).

**Symptoms**—It is also a powerful corrosive poison, which causes great pain and vomiting.

**Treatment**—First, give white of egg or whole egg beaten up; flour and water, but not so good. Emetics, soothing liquids, and stimulants.

**NITRATE OF SILVER**—Lunar caustic.

**Symptoms**—Pain in mouth and stomach; mouth first colored white, then black; vomit, first white, then turns black.

**Treatment**—Common salt dissolved in water, or milk very frequently. Then emetic. Afterward soothing liquids and stimulants.

an emetic should never be given.

Severe case: Unconsciousness very soon and early death. Usually easy to tell by odor of acid and burn, which with pure acid is white and with impure, black.

**Treatment**—Rinse mouth with pure alcohol. If grown person, should swallow three or four tablespoonfuls of alcohol mixed with an equal quantity of water. Follow this in five minutes with two tablespoonfuls of Epsom salts dissolved in a little water. Though not so good, limewater may be used to rinse mouth, several glasses of it being swallowed; three or four raw eggs may be given or castor or sweet oil. Stimulants always, and keep warm.

**STRONG CAUSTIC ALKALIES**: 1. Ammonia: Strong ammonia, ammonia liniment, camphor liniment; 2. Lime: Quicklime; 3. Potash: Caustic potash; 4. Soda: Caustic soda.

**Symptoms**—Much like corrosive acids. Immediate severe burning, pain in mouth, throat, and stomach. Vomiting and purging. Alkali destroys tissues of mouth it has touched. Severe shock and suffocation from swelling.

**Treatment**—An acid to neutralize alkali. Vinegar, lemon or orange juice. Tartaric or citric acid in plenty of water. Soothing liquids, stimulants. If cannot swallow, may inhale acetic acid or vinegar from a pocket handkerchief.

**CAUTION**—In giving any antidote do not wait for it to dissolve but stir it up in any fluid which can be obtained, except oil, and give it at once.

## HELP IN CASE OF ACCIDENTS.

**Drowning.** There are several methods of artificial respiration, but the Schaefer prone-pressure one-man method is considered the best, being widely used throughout the United States as well as in many foreign countries. By the plan many human lives are saved each year by members of the U. S. Vol. Life Sav. Corps, who use it to the exclusion of all others. The directions are as follows:

Send some one immediately for a doctor. **DO NOT AWAIT HIS ARRIVAL,** but proceed as follows: After the patient has been taken from the water locate an even flat surface, laying the patient face downward. Loosen all clothing, collars, belts, garters, etc. Clear the mouth of all mucus and foreign matter, pull the tongue out and see that it remains out; then straddle the patient, placing your hands under his stomach, clasping them together. In this manner gradually lift the patient a few inches, squeezing as you do so, dropping him suddenly. Sometimes a sharp slap between the shoulders is helpful. Lifting the patient as above mentioned should only be done once or twice, taking a few seconds, as it is merely to start anything that might be blocking the air passages.

Remind some one in the crowd about the doctor. Keep the patient lying face downward on an even flat surface, arms extended, the forehead resting on the leeward forearm, tongue out, facing the wind, the windward arm to be crooked, acting as a protector to the face. Straddle the patient as before, facing his head place your hands, open spread, upon the patient's lower or short ribs, commencing with a downward and inward pressure to the count of three, relaxing to the same count. This motion is continuous, first down, then up, swinging the body to and fro to the count of three. After the downward pressure to the count of three the hands are relaxed from the ribs to the same count each time, and should be maintained until signs of life show—namely, when the patient breathes unaided.

For warmth and circulation, rub the arms and legs upward (toward the heart), no back strokes. Circulation should not be started until after breathing has been fully restored. During the period of operation the subject should be kept warm by the application of hot water bottles, heated bricks, etc. applied to the pit of the stomach, the armpits, between the thighs or to the soles of the feet. Should you not be able to resort to these suggestions as to warmth, a fire built on the lee side of the patient at a distance not to set fire to him would help serve the purpose. Stimulants should not be given by the mouth until after the patient is able to swallow—that is, when the patient is fully conscious, then give

plain black coffee, or half teaspoonful of aromatic spirits of ammonia in half a glass of water.

The patient should be kept in bed as quiet as possible in a well ventilated room. To be feared: Pneumonia or possible collapse of the heart.

This treatment should be continued at least an hour. As a general rule signs of life begin to show after 8 or 10 minutes' work. One should not be discouraged if it takes longer, as life has been restored after working as long as 30 minutes, although this is not common.

We read of persons having been revived after being under water as long as 15 minutes. This is very rare. If the person has been under water 3 or 4 minutes there is everything in his favor, but should the submersion be much longer the odds are apt to be against it. In any case never give up, but commence work at once.

Signs of death are: Breathing and the heart's action entirely cease, eyelids generally are half closed, the pupils dilated, the tongue approaches the under edges of the lips, and these, as well as the nostrils, are covered with a frothy mucus. Coldness and pallor of surface increase.

Remember that mechanical devices are dangerous in the hands of the inexperienced.

Do not await the arrival of the doctor before starting the artificial respiration. Start immediately.

Do not lay the patient on the back when applying artificial respiration. Always face downward.

Do not hold the body up by the feet.

Do not dash water in the patient's face.

Do not place the body in a bath unless ordered to do so by the doctor.

Do not tie the strings on the tongue or run pins or nails through it.

Do not roll the patient over barrels, boxes, or a fence.

**Burns and Scalds.** Cover with cooking soda and lay wet cloths over it. Whites of eggs and olive oil. Olive oil or linseed oil, plain or mixed with chalk or whiting. Sweet or olive oil and lime water.

**Lightning.** Dash cold water over a person struck.

**Sunstroke.** Loosen clothing. Get patient into shade and apply ice-cold water to head. Keep head in elevated position.

**Mad Dog or Snake Bites.** Tie cord tight above wound. Suck the wound and cauterize with caustic or white-hot iron at once, or cut out adjoining parts with a sharp knife. Give stimulants, as whiskey, brandy, etc.

**Stings of Venomous Insects, etc.** Apply weak ammonia, oil, salt water, or iodine.

**Fainting.** Place flat on back; allow fresh air and sprinkle with water. Place head lower than rest of body.

## COMMON STAINS AND HOW TO REMOVE THEM.

(By the U. S. Department of Agriculture.)

**Blood and meat juice.** Use cold water; soap and cold water; or starch paste.

**Bluing.** Use boiling water.

**Chocolate and cocos.** Use borax and cold water; bleach if necessary.

**Coffee and tea. (Clear.)** Use boiling water; bleach if necessary. (With cream.) Use cold water, then boiling water, bleach if necessary.

**Coffee and tea. (Clear.)** Use boiling water; bleach if necessary. (With cream.) Use cold water, then boiling water; bleach if necessary.

**Cream and milk.** Use cold water, then soap and cold water.

**Egg.** Use cold water.

**Fruit and fruit juices.** Use boiling water; bleach if necessary.

**Grass.** Use cold water; soap and cold water; alcohol; or a bleaching agent.

**Grease and oils.** Use French chalk, blotting paper or other absorbent; or warm water and soap; or gasoline, benzine, or carbon tetrachloride.

**Iodine.** Use warm water and soap; alcohol; or ammonia.

**Ink.** Try cold water; then use an acid or bleach if necessary.

**Iron.** Use oxalic acid; hydrochloric acid; salts of lemon; or lemon juice and salt.

**Kerosene.** Use warm water and soap.

**Lampblack and soot.** Use kerosene, benzine,

chloroform, ether, gasoline, or carbon tetrachloride.

**Medicine.** Use alcohol.

**Mildew.** If fresh, use cold water; otherwise try to bleach with Javelle water or potassium permanganate.

**Paint and varnish.** Use alcohol, carbon tetrachloride, chloroform, or turpentine.

**Perspiration.** Use soap and warm water; bleach in the sun or with Javelle water or potassium permanganate.

**Pitch, tar, and wheel grease.** Rub with fat; then use soap and warm water; or benzine, gasoline, or carbon tetrachloride.

**Scorch.** Bleach in the sunshine or with Javelle water.

**Shoe polish. (Black.)** Use soap and water; or turpentine. (Tan.) Use alcohol.

**Syrup.** Use water.

**Solve polish.** Use cold water and soap; or kerosene, benzine, or gasoline.

**Vaseline.** Use kerosene or turpentine.

**Water.** Steam or sponge the entire surface of water-spotted materials.

**Wax.** Scrape off as much as possible. Use French chalk, blotting paper or other absorbent with a warm iron; or use benzine or gasoline. If color remains, use alcohol or bleach.

Send to the U. S. Department of Agriculture for Farmers' Bulletin 861, "Removal of Stains from Clothing and Other Textiles."

## WEDDING ANNIVERSARIES.

First—Cotton.  
Second—Paper.  
Third—Leather.  
Fifth—Wooden.

Seventh—Woolen.  
Tenth—Tin.  
Twelfth—Silk and fine linen.

Fifteenth—Crystal.  
Twentieth—China.  
Twenty-fifth—Silver.  
Thirtieth—Pearl.

Fortieth—Ruby.  
Fiftieth—Golden.  
Seventy-fifth—Diamond.

## Sporting Events and Records.

Amateur and professional sports throughout the United States continued to grow in interest both from the spectator's and competitor's basis during the season of 1922. Reports from every section of the country showed a steady development and spread in all forms of games and sport and attendant enthusiasm therein. New gate receipt records were made in the World's Baseball Series and major and minor leagues reported unusually large gate receipts during the pennant seasons.

National golf and tennis tournaments drew record-breaking galleries, and football games in all portions of the country, especially those with international interest, filled huge stadiums to overflowing. Classic races of the turf season brought thousands of racing enthusiasts to the scene of

various derbies and stake events. Boxing bouts of titular calibre proved remarkably profitable to both contestants and promoters.

Competition was both brilliant and sensational in almost every branch of sport. A host of new records was made by American swimmers, male and female. A number of international track and field records were broken by college and club athletes.

While the Davis Cup, emblematic of the world's team tennis championship, was the only famous international trophy in competition, there was no lack of international competition. American golfers took part in Great Britain's championships and the British players competed in the United States title play later in the year. British yachtsmen entered a team in the international six-metre races on Long Island Sound and English, Irish and Argentine polo fours played in the national polo tournament.

### BASEBALL.

BALL playing was popular in Egypt 4,000 years ago, and a leather ball has been used ever since in almost every country, including China, but bating the ball is a modern innovation. According to the commission, appointed at A. G. Spalding's suggestion in 1907, baseball originated in the United States, and the first scheme for playing it was devised by Major Gen. Abner Doubleday, in 1839, at Cooperstown, N. Y. The game was developed from Town Ball into a diamond-shaped field, and a code of playing rules was adopted by the Knickerbocker Base Ball Club of New York, in 1845. In 1858 the National Association of Base Ball Players was formed, and the first game with an admission fee was played July 20, at the Fashion Race Course, near Jamaica, L. I., between the New York and Brooklyn clubs. The first tour of an organized club was made through New York State, in 1860, by the Excelsiors of Brooklyn. The first Eastern club to tour the West was the National, of Washington, D. C. The first professional baseball club (1869) was the Cincinnati (Red Stockings), formed in 1866 as an amateur organization. The National Association of Professional Base Ball Players was formed in 1871 (with 10 clubs); the National League of Professional Base Ball Clubs, in 1876; the American Association, in 1882; the American League, in 1902. The World's Series of 1922 was played between the New York National League and the New York American League Clubs, respective pennant winners in their leagues. All games were played at the Polo Grounds, New York City, the National League Club (Giants) won in four games to none, with the second contest ending in a 3-3 tie due to darkness. Prominent betting Commissioners ruled that where

a wager was made that one team would win four straight games, those who bet on Giants won, the tie game not counting against the sequence of victories. The record by games:

#### FIRST GAME.

|              |                  |          |
|--------------|------------------|----------|
|              |                  | R. H. E. |
| Giants.....  | 0 0 0 0 0 0 3 x— | 3 11 3   |
| Yankees..... | 0 0 0 0 1 1 0 0— | 2 7 0    |

Batteries—Nehr, Ryan and Snyder; Bush, Hoyt and Schang.

#### SECOND GAME.

|              |                      |          |
|--------------|----------------------|----------|
|              |                      | R. H. E. |
| Giants.....  | 3 0 0 0 0 0 0 0 0—   | 3 8 1    |
| Yankees..... | 1 0 0 1 0 0 0 1 0 0— | 3 8 0    |

Ten innings—called amateur darkness. Batteries—Barnes and Snyder; Shawkey and Schang.

#### THIRD GAME.

|              |                    |          |
|--------------|--------------------|----------|
|              |                    | R. H. E. |
| Giants.....  | 0 0 2 0 0 0 1 0 x— | 3 12 1   |
| Yankees..... | 0 0 0 0 0 0 0 0 0— | 0 4 1    |

Batteries—Scott and Smith; Hoyt, Jones and Schang.

#### FOURTH GAME.

|              |                    |          |
|--------------|--------------------|----------|
|              |                    | R. H. E. |
| Giants.....  | 0 0 0 0 4 0 0 0 0— | 4 9 1    |
| Yankees..... | 2 0 0 0 0 0 1 0 0— | 3 8 0    |

Batteries—McQuillan and Snyder; Mays, Jones and Schang.

#### FIFTH GAME.

|              |                    |          |
|--------------|--------------------|----------|
|              |                    | R. H. E. |
| Giants.....  | 0 2 0 0 0 0 0 3 x— | 5 10 0   |
| Yankees..... | 1 0 0 0 1 0 1 0 0— | 3 5 0    |

## PENNANT-WINNING MANAGERS.

John McGraw, of the New York National League Club, leads all managers in both major leagues in the number of league championships won. The leader of the Giants has won eight pennants. Connie Mack, manager of the Philadelphia American League Club, ranks second, with six league championships. The following are the managers, the clubs they handled and the number of pennants they won in the National and American Leagues from 1900 to 1922, inclusive:

## NATIONAL LEAGUE.

| MANAGER.          | Club.       | Pennants. | MANAGER.          | Club.              | Pennants. |
|-------------------|-------------|-----------|-------------------|--------------------|-----------|

**HOME RUN RECORDS.**

Although "Babe" Ruth, of the New York Americans did not approach his 1921 record of 59 home runs, due in part to suspensions and other causes, the 1922 season was notable for the number of home

runs made in the major leagues. The records of some of the leading hitters in this department of the game follow:

**AMERICAN LEAGUE.**

A., Iroquois Alleys, Newark, N. J., 545, 1909.

## CHECKERS.

The feature of the year in Checker (Draughts) play was the international match held at Glasgow, Jan. 23 to Feb. 11, for the World's Championship, between Robert Stewart, Blairadam, Fife, and Newall W. Banks of Detroit, Mich. The conditions called for forty games for a purse of £500, to be divided £300 to the winner and £200 to the loser. Result: Stewart won 2; Banks won 1 and 37 games drawn.

The United States national championship tournament held at Boston, Oct. 12 to 20, was won by Asa A. Long, 18-year-old champion of Ohio; Alfred Jordan, ex-English champion, was runner-up and Louis C. Ginsberg, of Brooklyn, third. Ginsberg was the only one to defeat Long during the tour-

ney. Victor Townsend of Boston tied with him, playing twenty-two drawn games.

The next tourney will be held at Cleveland, Ohio, in the spring of 1924.

The following officers were elected: President, E. H. Greene, Hannibal, Mo.; First Vice-President, Willis G. Hill, Lawrence, Mass.; Second Vice-President, John Dougherty, Los Angeles, Cal.; Third Vice-President, Charles J. Messer, Syracuse, N. Y.; Fourth Vice-President, Morris Steingrub, Detroit Mich.; Fifth Vice-President, Frank G. Farmer, Wichita, Kan.; Sixth Vice-President, Preston Ketchum, Milwaukee, Wis.; Secretary, J. G. Finley, Newark, N. J.; Treasurer, E. J. Phelan, Lynn, Mass.

# TENNIS.

FOR the second season in succession the United States retained the Davis Cup.

**FIRST ROUND—France** defeated **Canada**, by default. *Australasia, 4; Belgium, 0.* **SINGLES**—J. O. Anderson (A.) defeated J. Washer (B.), 6-4, 6-3, 6-2. G. L. Patterson (A.) defeated J. Washer (B.), 6-3, 6-4, 6-4. J. O. Anderson (A.) defeated A. G. Watson (B.), 6-2, 6-1, 6-2. **DOUBLES**—J. O. Anderson-P. O'Hara-Wood (A.) defeated J. Washer-A. G. Watson (B.), 6-1, 6-2, 4-6, 7-9, 7-5. *Czecho-Slovakia* defeated *Hawaii* by default. *Spain* defeated *Philippines* by default. *India, 5; Roumania, 0.* **SINGLES**—A. Fyzee (I.) defeated Nicholas Mishu (R.), 3-6, 5-7, 6-4, 6-4, 6-0. A. H. Fyzee (I.) defeated M. Stern (R.), 6-0, 6-1, 6-2. A. Fyzee (I.) defeated M. Stern (R.), 6-2, 6-2, 6-1. A. H. Fyzee (I.) defeated Nicholas Mishu (R.), 4-6, 6-1, 6-1, 7-5. **DOUBLES**—A. H. Fyzee-C. Ramaswami (I.) defeated Nicholas Mishu-M. Stern (R.), 6-2, 6-4, 6-0. *Italy* defeated *Japan* by default.

**SECOND ROUND—France, 4; Denmark, 1.** **SINGLES**—Jean Borotra (F.) defeated Eric Tegner (D.), 6-0, 3-6, 6-4, 1-6, 6-4. Vagn Ingerslev (D.) defeated Jean Couletras (F.), 8-6, 6-3, 6-1. Henri Cochet (F.) defeated Eric Tegner (D.), 7-5, 6-2, 9-7. Jean Borotra (F.) defeated Vagn Ingerslev (D.), 6-3, 6-2, 6-2. **DOUBLES**—Henri Cochet-Jean Borotra (F.) defeated Eric Tegner-M. Worm (D.), 3-6, 6-2, 2-6, 10-8, 6-2. *Australasia, 5; Czecho-Slovakia, 0.* **SINGLES**—G. L. Patterson (A.) defeated F. Rohrer (Cz.), 6-1, 6-3, 3-6, 6-2. J. O. Anderson (A.) defeated K. Ardelt (Cz.), 7-5, 6-4, 6-4. G. L. Patterson (A.) defeated K. Ardelt (Cz.), 6-3, 6-2, 2-6, 6-2. J. O. Anderson (A.) defeated F. Rohrer (Cz.), 4-6, **DOUBLES**—G. L. Patterson-R. C. Wertheim (A.) defeated F. Rohrer-K. Ardelt (Cz.), 9-7, 6-0, 6-3. *Spain, 4; India, 1.* **SINGLES**—Manuel Alonso (S.) defeated A. Fyzee (I.), 6-1, 6-2, 6-2. Count de Gomar (S.) defeated A. H. Fyzee (I.), 1-6, 6-2, 6-3, 3-6, 6-1. Manuel Alonso (S.) defeated A. H. Fyzee (I.), 6-3, 6-4, 0-6.

Fifty miles (made in 100-mile race)—3h. 15m. 59 2-5s., J. F. Donohue, Stamford, Ct., Jan. 26, 1893. Sixty miles (made in 100-mile race)—4h. 7m. 3-5s., J. F. Donohue, Stamford, Ct., Jan. 26, 1893. Seventy miles (made in 100-mile race)—4h. 55m. 3-5s., J. F. Donohue, Stamford, Ct., January 26, 1893. Eighty miles (made in 100-mile race)—5h. 41m. 55s., J. F. Donohue, Stamford, Ct., Jan. 26, 1893. Ninety miles (made in 100-mile race)—6h. 55m. 57 3-5s., J. F. Donohue, Stamford, Ct., Jan. 26, 1893. 100 miles—7h. 11m. 38 1-5s., J. F. Donohue, Stamford, Ct., Jan. 26, 1893.

# MIDDLE STATES CHAMPIONSHIPS.

Held at Newburgh, N. Y., Jan. 2. Results, finals only: *220 Yards*—Won by Paul Forsman, Tremont Skating Club; Joe Moore, 181st Street Ice Palace, second; Leslie Boyd, Lake Placid, third. Time—21 3-5s. *440-Yard Dash*—Won by Joe Moore, 181st Street Ice Palace; Paul Forsman, Tremont Skating Club, second; James Hennessey, Lake Placid, third. Time—0:42 4-5. *Half-Mile*—Won by Joe Moore, 181st Street Ice Palace; Alfred Neuhfur, Cleveland A. C., second; William Murphy, 181st Street Ice Palace, third. Time—1:35. *One Mile*—Won by Leslie Boyd, Lake Placid Club; Joe Moore, 181st Street Ice Palace, second; Alfred Neuhfur, Cleveland A. C., third. Time—3:04 1-5. *Donohue Memorial, Three Miles*—Won by Joe Moore, 181st Street Ice Palace; Leslie Boyd, Lake Placid Club, second; H. A. Perilberg, Cleveland A. C., third. Time—9:17 1-5. *Women's Championships—440 Yards*—Won by Gladys Robinson, Toronto; Elsie Muller, 181st Street Ice Palace, second; Mildred Truslow, Brooklyn Ice Palace, third. Time—0:52 2-5. *Half-Mile*—Won by Elsie Muller, 181st Street Ice Palace; Mildred Truslow, Brooklyn Ice Palace, second; Roslyn Sternberg, Tremont Skating Club, third. Time—1:55 4-5.

# NEW YORK STATE CHAMPIONSHIPS.

Held at Binghamton, Jan. 8. Results, finals only: *220-Yard Dash*—Won by Charles Jewtraw, Lake Placid, N. Y.; Paul Forsman, Tremont Rink Club, New York, second; Bobby Hearn, Brooklyn S. C., third. Time—0:20 1-5. Moore finished second but was disqualified for fouling. *440-Yard Dash*—Won by Charles Jewtraw, Lake Placid; Paul Forsman, Tremont R. C., New York, second; William Murphy, 181st Street Ice Palace, New York, third. Time—0:39 1-5. *Half-Mile*—Won by Charles Jewtraw, Lake Placid, N. Y.; Joe Moore, 181st Street Ice Palace, New York, second; Paul Forsman, Tremont R. C., New York, third. Time—1:26 4-5. *One-Mile*—Won by Joe Moore, 181st Street Ice Palace, New York; Leslie Boyd, Lake Placid, N. Y., second; Don Robinson, 181st Street Ice Palace, New York, third. Time—2:57 2-5. *Three-Mile*—Won by Joe Moore, 181st Street Ice Palace, New York; Leslie Boyd, Lake Placid, N. Y., second; Valentine Biallas, Lake Placid, third. Time—3:39.

# METROPOLITAN CHAMPIONSHIPS.

Held at New York, Jan. 13-15. Results, finals only: *Half-Mile Race*—Won by Al Leach, unattached; Paul Forsman, Tremont S. C., second; West Becker, Tremont S. C., third. Time—1:25. *One-Mile Race*—Won by Al Leach, unattached; Paul Forsman, Tremont S. C., second; West Becker, Tremont S. C., third. Time—3:01 4-5. *220-Yard Race*—Won by Paul Forsman, Tremont Skating Club; Mike McLaughlin, Tremont Skating Club, second; George Pickering, Dyckman Skating Club, third. Time—0:17 2-5. *One-Mile Race*—Won by Wesley Becker, Tremont Skating Club; Sam Goldberg, Tremont Skating Club, second; Duncan McCool, Dyckman Skating Club, third. Time—2:53. Total Point Score for Championship—Paul Forsman, 90; George Pickering, 50; Wesley Becker, 40; Mike

McLaughlin and Samuel Goldberg, 20 each; George McCool and James Smith, 10 each.

Amateur Roller Skating Championship, held at Chicago, April 8—Won by Roland Clont, Akron, O., with 60 points; Rodney Peters, St. Louis, 31 points, second; Joe Lawrey, Chicago, 23 points, third.

### NEW ENGLAND CHAMPIONSHIPS.

Held at Laconia, N. H., Feb. 19—Results: N. H. Skating Championship—Won by Walter Thorne of the Boston Arena, 90 points; Martin Brewster, second, 60 points; J. J. Hennessey, Dartmouth Col-

lege, and H. T. McCarthy, South Boston, tied for third, 30 points each; Israel Davis, Mattapan, fifth, 20 points; Thomas Corcoran, Cambridge, sixth, 10 points. *Final, Quarter Mile*—Won by Walter Thorne; Martin Brewster, second; Israel Davis, third. Time 40 4-5s. *Final, Half Mile*—Won by J. J. Hennessey; Walter Thorne, second; Martin Brewster, third. Time, 1m. 29 3-5s. *Mile Race*—Won by Walter Thorne; Martin Brewster, second; Israel Davis, third. Time 3m. 1 1-5s. *Three-Mile Race*—Won by H. T. McCarthy, South Boston; Walter Thorne, second; Thomas Corcoran, third. Time 9m. 49 3-5s.

#### AMATEUR ATHLETIC UNION CHAMPIONSHIPS.

Held at Kansas City March 6-11. Teams from all portions of the country competed and the tournament was a success, more than 12,000 spectators paying \$12,157 admission fees. In the final game the Lowe and Campbell team of Kansas City de-

feated the Kansas City A. C. five, the 1921 champions, by a score of 42-28. Third place was won by Southwestern College, which defeated the Indianapolis Y. M. C. A., 35-22.

**ROWING.**

**YALE VS. HARVARD—VARSITY EIGHTS.**

YALE and Harvard varsity eight-oared races began in 1852 on Lake Winnepesaukee, at two miles, when Harvard won. In 1855 the course was changed to Springfield and lengthened to three miles. Lake Quinsigamond was the scene

for nine years, and Lake Saltonstall for 1860. After an interval of seven years the crews in 1876-77 went to Springfield, Mass., when the four-mile course was inaugurated. In 1878 the crews changed again to New London, Conn. The official records follow:

| DATE.          | Won By. | TIME.     |           | DATE.         | Won By. | TIME.              |           |

**YACHTING.**

Small yacht races were the feature of the 1922 season, there being two international regattas of this type in Eastern waters during the summer. The first of these was the model or miniature races held at Bayside, (L. I.), N. Y., June 8-9-10. Won by United States entry in three straight races.

**MODEL YACHT RACE.**

| YACHT.    | Owner.        | Club.                  | Distance. | TIME.     |          |          |
|-----------|---------------|------------------------|-----------|-----------|----------|----------|
|           |               |                        |           | 1st Race. | 2d Race. | 3d Race. |
| Polka Dot | E. A. Bull    | Prospect Park M. Y. C. | 3 Miles   | H. M. S.  | H. M. S. | H. M. S. |
| Endeavor  | W. J. Daniels | London (Eng.) M. Y. C. | 3 Miles   | 2.24.03   | 2.03.50  | 1.33.22  |
|           |               |                        |           |           |          | 1.43.13  |

Endeavor failed to finish within the time limit in first race and was disqualified for fouling stake boat at turn in second race.

**SIX-METRE TEAM RACE.**

The international six-metre team race between English and United States yachts, won in 1921 by England, was renewed at Oyster Bay (L. I.), N. Y., in September and won by United States team of four yachts, 111 points to 104.

| AMERICAN TEAM. |              | ENGLISH TEAM. |             |
|----------------|--------------|---------------|-------------|
| Yacht.         | Owner.       | Yacht.        | Owner.      |
| Lea            | Birmingham   | Jean          | Sir J. Ward |
| Grebe          | A. Boardman  | Colia III     | Stephens    |
| L'Esprit       | H. W. Childs | Caryl         | Robertson   |
| Clytie         | H. B. Plant  | Reg           | N. C. Neill |

**FINAL RESULTS—6 Twelve Mile Races.**

The Lea and Colia scored the most points in the series. Each won two races and Jean and Reg won one race each. The following shows the positions at the finish of each race and the points scored:

| YACHTS.  | 1 | 2 | 3 | 4 | 5 | 6 | Pts. |
|----------|---|---|---|---|---|---|------|
| Lea      | 1 | 1 | 5 | 2 | 5 | 5 | 35   |
| Colia    | 6 | 3 | 6 | 1 | 2 | 1 | 35   |
| Grebe    | 4 | 8 | 3 | 3 | 3 | 3 | 30   |
| L'Esprit | 3 | 6 | 2 | 6 | 4 | 8 | 25   |
| Reg      | 8 | 4 | 7 | 4 | 1 | 4 | 26   |
| Jean     | 5 | 2 | 1 | 7 | 8 | 7 | 24   |
| Clytie   | 2 | 5 | 4 | 8 | 7 | 6 | 21   |
| Caryl    | 7 | 7 | 8 | 5 | 6 | 2 | 19   |

|         | 1st. | 2d. | 3d. | 4th. | 5th. | 6th. | Tot. |

Winner—Vagrant.

## INTERNATIONAL FISHING SCHOONER CHAMPIONSHIP.

Held off Gloucester, Mass., Oct. 21-26. Course 40 miles; results:

|                       | Elapsed Time. |          |          |
|-----------------------|---------------|----------|----------|
|                       | 1st Race.     | 2d Race. | 3d Race. |
|                       | H. M. S.      | H. M. S. | H. M. S. |
| Blue Nose (Can.)....  | 5.42.10       | 5.57.41  | 4.48.38  |
| Henry Ford (U. S.)... | 5.29.25       | 6.05.04  | 4.56.27  |

The international trophy was awarded to Captain Angus Walters, of Lunenburg, together with a purse of \$3,000. Capt. Clayton Morrissey, of the Henry Ford received \$2,000. The first race of the series was declared no-race when the schooners crossed the starting line and continued disregarding the race committee's recall signals. The Henry Ford defeated the Blue Nose in this unofficial contest which had no bearing on the final result.

\* Columbia disabled, but finished race. † Valkyrie III. fouled Defender, and the race was awarded to American boat, though the challenger finished 47s. ahead in 3.55.09. ‡ Shamrock II. finished first, but lost race on time allowance of 43s. The Reliance allowed the Shamrock II. 1m. 57s. in all their races, Reliance measuring 108.41 ft. and Shamrock III. 104.37 ft. In the preliminary trials between Reliance, Constitution and Columbia the Constitution won three races, although Reliance was selected as the Cup defender.

## RACQUETS, COURT TENNIS, SQUASH.

## COURT TENNIS.

World's Professional Championship, won by G. F. Covey, England, defeating W. A. Kinsella, 7 sets to 3.

National Championships. Singles—won by Jay Gould, defeating Hewitt Morgan, 6-2, 6-6, 6-0.

Doubles—won by Jay Gould and J. W. Wear, defeating G. Fearing and D. P. Rhodes, 5-6, 6-0, 6-1.

English Championship—won by E. M. Baerlein, defeating W. Renshaw, 6-5, 5-6, 6-1, 6-0.

## RACQUETS.

National Singles Championship—won by C. C. Pell, defeating Hewitt Morgan, 15-10, 15-5,

15-4. Doubles—C. C. Pell and S. G. Mortimer defeated Jay Gould and J. W. Wear, 12-15, 17-15, 15-7, 7-15, 15-3.

Gold Racquet Championship—won by C. C. Pell, defeating Hewitt Morgan, 15-5, 5-15, 15-11, 13-15, 15-12.

English Championship—won by C. N. Bruce, defeating E. M. Baerlein, 15-2, 15-10, 15-9.

## SQUASH—RACQUETS.

National Singles—won by S. W. Pearson, defeating Morton Newhall, 15-5, 17-14, 15-11. Class B Championship—won by G. E. Abbot, defeating W. Rand, Jr., 15-7, 5-15, 15-9, 15-8.

### MOTOR BOAT RACING.

Until 1921 the Gold Cup Trophy was for boats under 40 feet in length, with unlimited power. Very costly racing machines were developed under those rules. Under the new rules the boats must be under 26 feet in length and the cubic capacity of the engine is limited to 625 cubic inches. Such engines average 100 horse-power, and the average speed of a

boat is not much over 40 miles an hour, as against 70 miles an hour under the old rules.

There were no races for the Harmsworth Trophy, emblematic of the world's speed championship, in 1922. The National Gold Cup Trophy race, held at Detroit, Sept. 1-4, was the leading event of the season. Result:

#### THREE HEATS OF THIRTY MILES EACH (GOLD CUP TROPHY).

## PUGILISTIC CHAMPIONS.

All attempts to designate and classify the pugilistic champions and title holders are more or less arbitrary because of the fact that few such champions won and defended the championships at the same weight. Among the lighter weight boxers it is not at all unusual for a pugilist to be forced from one class into the next higher by growth and increased weight. The following list, dating from 1890, is generally accepted by critics and boxers as being the correct classification, although holders did not always win title from previous champions:

**HEAVYWEIGHTS** (over 158 lbs.)—1890-1892, John L. Sullivan; 1892-1897, James J. Corbett; 1897-1898, Robert Fitzsimmons; 1899-1906, James J. Jeffries; 1906-1908, Tommy Burns; 1908-1915, Jack Johnson; 1915-1918, Jess Willard; 1919-1922, Jack Dempsey.

**MIDDLEWEIGHTS** (158 lbs.)—1890-1897, Robert Fitzsimmons; 1897-1907, Tommy Ryan; 1907-1908, Stanley Ketchel; 1908, Bill Papke and Stanley Ketchel; 1908-1910, Stanley Ketchel; 1911-1913, claimed by Frank Klaus, Mike Gibbons, Ed McGoorty and Geo. Chip; 1914-1917, Al McCoy; 1917-1920, Mike O'Dowd; 1921-1922, Johnny Wilson.

**WELTERWEIGHTS** (145 lbs.)—1890-1893, no recognized champion; 1894-1896, Tommy Ryan;

1896-1897, Kid McCoy; 1898-1900, Billy Smith; 1900, Rube Ferns; 1901, Matty Matthews and Rube Ferns; 1901-1904, Joe Walcott; 1904-1908, Dixie Kid; 1914-1916, Kid Graves; 1916, Jack Britton; 1917-1918, Ted (Kid) Lewis; 1919-1922, Jack Britton, Mickey Walker.

**LIGHTWEIGHTS** (133 lbs.)—1890-1893, Jack McAuliffe; 1893-1899, Kid Lavigne; 1899-1902, Frank Erne; 1902-1908, Joe Gans; 1908-1916, Battling Nelson; 1910-1912, Ad Wolgast; 1912-1914, Willie Ritchie; 1914-1917, Freddie Welsh; 1917-1922, Benny Leonard.

**FEATHERWEIGHTS** (122 lbs.)—1890-1892, no recognized champion; 1892-1897, George Dixon; 1897, Solly Smith; 1898, Solly Smith and Dave Sullivan; 1898-1900, George Dixon; 1900-1901, Terry McGovern; 1901-1904, Young Corbett; 1904-1908, Tommy Sullivan; 1908-1911, Abe Attell; 1911-1922, Johnny Kilbane.

**BANTAMWEIGHTS** (116 lbs.)—1890-1892, George Dixon; 1892-1894, no recognized champion; 1894-1898, Jimmy Barry; 1898-1901, no recognized champion; 1901-1903, Harry Forbes; 1903-1905, Frankie Nell; 1905-1907, no recognized champion; 1907-1913, Johnny Coulon; 1914-1915, Kid Williams; 1916-1920, Pete Herman; 1920-1921, Joe Lynch; 1921, Pete Herman, Johnny Buff; 1922, Johnny Buff, Joe Lynch.

\* Purse \$25,000 and \$10,000 a side. † Estimated. ‡ Ten-round, no-decision bout. § Before deduction of war tax.

## BOXING.

Lack of space prevents the recording of other than important bouts. Abbreviations used follow: K. O., knock out; R. D., referee's decision; P. V., public verdict; D., draw. In case of a draw, the names of boxers in winners' and losers' columns have no significance. The letter "X" opposite date indicates such a draw.

| DATE.     | Winner.             | Loser.             | Decision.  | Rounds. | Place.            |

Middleweight, Class B—Rosenkzist, Finland, defeated Svenssen, Sweden. Heavyweight Class—Nilsson, Sweden, defeated Ahlgren, Sweden.

## POLO.

THE feature of the 1922 polo season was the tour of England and the United States by the Argentine Polo team, which won both the English and the American open championship tournaments. In a special series of matches at the close of the United States season the Meadow Brook "Big Four" team, winners of the International Championship Cup in 1921, defeated the Argentine team in two straight games. The results of the various important tournaments follow:

National Championships—Open: won by Argentine team defeating Meadow Brook 14 to 7 in final game. Junior—U. S. Army team defeated Meadow Brook Ramblers 8-7 in final game.

Other results: Herbert Memorial Trophy—won by Meadow Brook defeating Flamingo four 17-11 in final game; Monty Waterbury Trophy—won by Shelburne 7-6 in final game. Canadian championship won by Montreal four defeating Toronto 12-2 in final game.

Special exhibition matches between Meadow Brook "Big Four" combination, international champions, and Argentine team, winner of 1922 English and American Open Championships. Results, first game—Meadow Brook 7, Argentine 4; second game—Meadow Brook 5, Argentine 4.

INTERNATIONAL POLO CUP RECORD.  
1886—Newport, R. I.—England, 2 matches; America, 0. America—1. W. Thorn, 2. R. Belmont, 3. F. P. Keene, Back, T. Hitchcock. England—1. Capt. T. Hone, 2. Hon. R. T. Lawley, 3. Capt. M. Little, Back, J. Watson.

1900—Hurlingham, England—England, 1 match; America, 0. America—1. W. McCreery, 2. F. J. Mackey, 3. F. P. Keene, Back, L. McCreery. England—1. Capt. Beresford, 2. F. M. Freaque, 3. W. S. Buckmaster, Back, J. Watson.

1902—Hurlingham, England—England, 2 matches; America, 1. America—1. E. L. Agassiz, 1. M. Waterbury, 2. J. E. Cowdin, 2. L. Waterbury, 3. F. P. Keene, Back, L. Waterbury, Back, E. L. Agassiz. England—1. C. P. Nickalls, 2. P. W. Nickalls, 2. F. M. Freaque, 2. G. A. Miller, 3. W. Buckmaster, 3. G. A. Miller, 3. P. W. Nickalls, Back, C. D. Miller, Back, W. Buckmaster. America won

first match, 2 to 1; England won second, 6 to 1, and third, 7 to 1.

1909—Hurlingham, England—America, 2 matches; England, 0. America—1. L. Waterbury, 2. J. M. Waterbury, Jr., 3. H. P. Whitney, Back, D. Milburn. England—1. Capt. H. Wilson, 1. Harry Rich, 2. F. M. Freaque, 3. P. W. Nickalls, 3. Lord Wodehouse, Back, Capt. H. Lloyd. America won first match by 9 to 4, and second by 8 to 2.

1911—Meadow Brook, L. I.—America, 2 matches; England, 0. America—1. L. Waterbury, 2. J. M. Waterbury, Jr., 3. H. P. Whitney, Back, D. Milburn. England—1. Capt. Cheape, 2. Lieut. A. N. Edward, 3. Capt. J. H. Lloyd, Back, Capt. Wilson. America won first match by 4½ to 3, and second by 4½ to 3½.

1913—Meadow Brook, L. I.—America, 2 matches; England, 0. America—1. L. Waterbury, 1. I. E. Stoddard, 2. J. M. Waterbury, Jr., 2. L. Waterbury, 3. H. P. Whitney, Back, D. Milburn. England—1. Capt. Cheape, 2. F. M. Freaque, 2. Capt. Edwards, 3. Capt. R. G. Ritson, Back, Capt. Lockett. America won first match by 5 to 3, and second match by 4½ to 4½.

1914—Meadow Brook L. I.—England, 2 matches; America, 0. America—1. R. La Montagne, 2. J. M. Waterbury, Jr., 3. L. Waterbury, Back, D. Milburn. England—1. Capt. Tomkinson, 2. Capt. Cheape, 3. Major Barrett, Back, Capt. Lockett. England won first match by 8½ to 3, and second by 4 to 2½.

1921—Hurlingham, England—America, 2 matches; England, 0. America—1. Louis E. Stoddard, 2. T. Hitchcock, Jr., 3. J. Watson Webb, Back, D. Milburn. England—1. Lieut.-Col. H. A. Tomkinson, 2. Major F. W. Barrett, 3. Lord Wodehouse, Back, Major Lockett. America won first match by 11 to 4, and second by 10 to 6.

The history of the games between England and America dates back to 1886, when a Hurlingham team visited the United States and easily secured the cup. It remained at Hurlingham until 1909, when it was regained by Mr. H. P. Whitney's "Big Four." Lost to England again in 1914, and regained in 1921.

Norman Seagram's Canadian tour in England, won 0, lost 4, drawn 7.

Frankford Cricket Club won the Halifax Cup, New York being represented by Staten Island, this being the first time the Staten Island Club took part in the competition. J. L. Evans of the Merion Club won the batting average and R. Waad of the Frankford Club the bowling average.

Yorkshire won the English county championship in 1922.

The highest individual scores of the season were hit by J. L. Evans, 135 not out, in the United States and P. P. Barnett, 184 not out, in Canada.

H. Livingston of the Pittsburgh Field Club established a record for the United States by scoring three consecutive centuries in one week in a tournament held in Chicago in August, 1907; a similar feat was performed by H. N. R. Coblet in Canada in a tournament held in Vancouver, British Columbia, in August, 1906. H. V. Hordern of the University of Pennsylvania established a record for the United States and Canada by securing 213 wickets during 1907. J. B. King, F. F. Kelly and H. Rushton are the only three bowlers who have taken over 2,000 wickets. A. C. MacLaren scored 424 for Lancashire vs. Somerset at Taunton, England, July, 1895—the record in a first-class match. A. F. J. Collins, playing at Clifton, June, 1899, for Clarke's House against North Town, scored 628, not out—the record in any match. Melbourne University scored 1,094 runs against Essenden at Melbourne (Australia), 1898—the highest authenticated record. In a match between A. E. Stoddart's English team and New South Wales, 1,739 runs were scored—a record in first-class cricket. The longest partnership on record was 623 runs by Capt. Oakes and Private Fitzgerald, First Royal Munster Fusiliers vs. Army Service Corps, at Curragh, 1895. In a small match in Australia F. R. Spofforth bowled down all 10 wickets of his opponents in each inning—a feat without parallel. F. R. Spofforth on the Australian tour in 1878 took 764 wickets—a world's record. Dr. W. G. Grace, the world's greatest cricketer, died Oct. 23, 1915. He hit up 217 centuries during his career, which will not likely ever be equalled.

Best records in the United States and Canada are by G. S. Patterson eleven playing against A. M. Woods eleven at Philadelphia, scoring 689 runs, in 1894. Australians against Vancouver scored 633 for 8 wickets in 1913. J. B. King scored 344 runs for Belmont against Merion B. in 1906. W. Robertson, 206, not out, and A. G. Sheath, 118, not out, scored 340 runs in partnership, without the loss of a wicket, at San Francisco in 1894. Smallest score, Americas 0 against Roseville at Guttenberg, N. J., in 1897. The smallest score in international match in United States, West Indians 13 against Australians, 1913. Smallest score in Canada, Winnipeg 6 against Australians, 1913. Largest score in the Metropolitan District Cricket League Championship, New Jersey Athletic Club 385 runs for 5 wickets against Manhattan, at Bayonne, N. J., 1897.

Seven centuries in a season, P. J. Higgins of Los Angeles in 1912, 159, 100, 100, 121, 182, 110, 240.

G. S. Patterson of the Germantown C. C. scored 1,748 runs in season of 1892—a record for the United States. Rev. F. W. Terry of Toronto C. C. scored 1,509 runs in season of 1892—a record for Canada.

TRAPSHOOTING.

The Twenty-third Grand American Tournament, at which the National Trapshooting Championship titles are contested for, was held at Atlantic City, N. J., September 11-16, 1922. A record was established for the number of targets thrown during the tournament—413,000 being thrown from 16 traps. There were 588 individual entries in the Grand American Handicap event, and this was won by J. S. Frink of Worthington, Minn., with a score of 96 from the 22 yard mark, after a shoot-off with L. G. Seifing (16 Yds.), E. T. Hall (21 Yds.), and E. B. Simpkins (18 Yds.) Frink broke 25 straight in the tie, the scores of the others being 23, 22 and 20 respectively.

The winners of the several national championship titles competed for at this tournament were as follows:

National Singles, 16 yards, (Amateur)—Dave Fauskee, Worthington, Minn. Score 197x200. (Won from F. M. Troeh, Vancouver, Wash., in shoot-off 25 to 24.)

National Singles, 16 yards, (Professional)—Art Killam, St. Louis, Mo. Score 197x200.

National Singles, 16 yards, (Women's)—Mrs. E. L. King, Winona, Minn. Score 187x200.

National Singles, 16 yards, (Junior)—Dudley Shalcross, South Seekonk, Mass. Score 96x100.

National Singles, 18 yards, (Amateur)—Phil Miller, Dallas, Texas. Score 194x200. (Won from Mark Arle, Champaign, Ill., in shoot-off—24, 23, 24 and 25 to 24, 23, 24 and 22.)

National Singles, 18 yards, (Professional)—J. R. Graham, Ingleside, Ill. Score 194x200. (Won from F. S. Tomlin, Glassboro, N. J., in shoot-off—25 to 24.)

National Doubles (Amateur)—R. A. King, Delta, Colo. Score, 170x200 (100 pairs).

National Doubles (Professional)—J. R. Graham, Ingleside, Ill. Score 162x200 (100 pairs).

Zone Five-Man Team Championship—Winner—Prairie Zone Team (Phil Miller, 195; Frank Hughes,

193; E. C. Wheeler, 192; C. A. Gunning, 185; R. A. King, 190). Total score 955x1000.

Sectional Ten-Man Team Championship—200 targets per man—East vs. West. Won by West Team, score, 1899x2000. Individual scores—Frank Hughes, Mobridge, S. D., 195; Phil Miller, Dallas, Tex., 195; F. M. Troeh, Vancouver, Wash., 194; S. T. Olin, East Alton, Ill., 193; Mark Arle, Champaign, Ill., 192; Dave Fauskee, Worthington, Minn., 191; J. S. Frink, Worthington, Minn., 187; Sam H. Sharnan, Salt Lake City, Utah, 185; E. C. Wheeler, Pawhuska, Okla., 184; M. E. Jenny, Lexington, Ill., 183.

Other events on the program of this tournament resulted as follows:

Atlantic City Introductory—Won by C. B. W. Chapman, Clarksburg, W. Va., score 99x100.

Preliminary Handicap—(16 to 23 yards, 100 targets).—Won by H. C. Taylor, Tybee, Ga., score 97 from 16-yard mark. (Won from Mark Arle, Champaign, Ill., in shoot-off—22 and 24 to 22 and 23. Arle shooting from 23-yard mark.)

Classification event (200 targets)—Five classes; those classified under A. T. A. Standard System: Class 1—Phil Miller, Dallas, Tex., 195. (Won from Frank Hughes, Mobridge, S. D., in shoot-off—24 and 25 to 24 and 24.)

Class 2—Geo. Gray, Philadelphia, Pa., 192.

Class 3—C. B. W. Chapman, Clarksburg, W. Va., 191. (Won from G. F. Flaherty, Mason City, Ia., in shoot-off—25 to 24.)

Class 4—H. L. Thompson, Savannah, Ga., 185.

Class 5—P. C. Fletcher, Richmond, Va., 185.

Governor's Cup (High score on the 1,000 targets on the program, open to all amateurs). Won by P. R. Miller, Dallas, Texas., score 939.

The Jim Day Cup—(Aggregate high score in National Singles Championship at 200 16-yard targets; National Doubles Championship at 100 pairs and the 100 targets in the Grand American Handicap—500 targets in all). Won by P. R. Miller, Dallas, Tex., score 456x500. Open to all amateurs.

Results: Track Events. 100-Yard Dash—Won by Robert McAllister, unattached, New York; J. A. Leoney, Meadowbrook, Philadelphia, second; Edward Farrell, New York A. C., third; William D. Hayes, Boston A. A., fourth. Time—10s. 220-Yard Run—Won by J. A. Leoney, Meadowbrook, Philadelphia; Herald Jones, Illinois A. C., second; William D. Hayes, Boston A. A., third; Loren Murchison, Illinois A. C., fourth. Time—22 1-10s. 440-Yard Run—Won by J. W. Driscoll, Boston A. A.; William E. Stevenson, New York A. C., second; E. S. Dudley, Jr., Boston A. A., third; Phil Spink, Chicago A. A., fourth. Time—49 9-10s. 120-Yard High Hurdles—Won by Earl Thomson, Los Angeles A. C.; Carl Anderson, Illinois A. C., second; S. Harrison Thompson, Princeton, third; Harold A. Crawford, University of Iowa, fourth. Time—15 3-10s. 220-Yard High Hurdles—Won by J. C. Taylor, New York A. C.; Carl Anderson, Illinois A. C., second; Charles E. Brooks, University of Iowa, third; Otto Anderson, Los Angeles A. C., fourth. Time—24 6-10s. 440-Yard Hurdles—Won by Joseph Hall, Chicago A. A.; De Gay Ernst, Illinois A. C., second; G. B. Stolley, Illinois A. C., third; Walter Gegan, New York A. C., fourth. Time—56 1-10s. 880-Yard Run—Won by Allan B. Helfrich, New York A. C.; Thomas Campbell, Yale, second; Jole Ray, Illinois A. C., third; Michael Devaney, Millrose A. C., New York, fourth. Time—1m. 56 3-10s. One-Mile Run—Won by Jole Ray, Illinois A. C.; J. Connolly, Boston A. A., second; R. F. Wharton, Chicago A. A., third; Ray B. Watson, Kansas City A. C., fourth. Time—4m. 17s. Five-Mile Run—Won by R. Earl Johnson, Pittsburgh; William Ritola, Finnish-American A. C., second; Lloyd Rathburn, Winner, S. D., third; James P. Henningham, Dorchester, Mass., fourth. Time—25m. 33s. Three-Mile Walk—Won by William Plant, Morningside A. C., New York; Joseph B. Pearman, New York A. C., second; Myles Joyce, North Tonawanda, N. Y., third; Charles Foster, Detroit Y. M. C. A., fourth. Time—21m. 50 1-10s. (new championship record). Former record, 21m. 50 1-5s, set by G. H. Goulding, Toronto Y. M. C. A., in 1917.

Field Events. Running Broad Jump—Won by Dehart Hubbard, unattached, Cincinnati, 24 ft. 5 1-8 in.; E. O. Gourdin, Boston, 23 ft. 11 1/2 in., second; Sol Butler, unattached, New York, 23 ft. 7 5-8 in., third; Albert Rose, Meadowbrook, Philadelphia, 22 ft. 11 1/4 in., fourth. Putting 16-lb. Shot—Won by Patrick J. McDonald, New York A. C., 46 ft. 11 7-8 in.; Ralph G. Hills, Princeton, 46 ft. 7 1/4 in., second; O. Wanzer, New York A. C., 46 ft. 1-3 in., third; Clarence Houser, Los Angeles A. C., 45 ft. 4 1-8 in., fourth. Throwing 16-lb. Hammer—Won by M. J. McGrath, New York A. C., 155 ft. 9 in.; C. G. Dandrow, Boston A. A., 152 ft. 7 1/4 in., third; F. D. Tootell, Boston A. A., 151 ft. 8 1/4 in., fourth. Running High Jump—Won by D. V. Alberts, Chicago A. A., 6 ft. 5 1-8 in.; Harold Osborne, Illinois A. C., 6 ft. 5 1-8 in., second; Leroy Brown, New York A. C., 6 ft. 1 in., third; R. W. Landon, New York A. C., 6 ft., fourth. Alberts won in jump-off after tie. Throwing 56-lb. Weight—Won by M. J. McGrath, New York A. C.; 35 ft. 10 in.; Patrick J. McDonald, New York A. C., 34 ft. 11 1/2 in., second; Capt. Edward R. Roberts, U. S. A., Fort Myer, 31 ft. 11 1-8 in., third; H. C. Blackwood, Chicago A. A., 31 ft. 8 1/4 in., fourth. Running Hop, Step and Jump—Won by Dehart Hubbard, Cincinnati, 48 ft. 1 1/2 in.; Harold Osborne, Illinois A. C., 46 ft. 9 1/4 in., second; A. J. Plansky, Boston K. C., 45 ft. 10 1/2 in., third; Herbert Prem, Baltimore Cross-Country Club, 44 ft. 8 1/4 in., fourth. The jumps of both Alberts and Osborne made a new championship record; the former record, 3 ft. 4 1/2 in., having been made by J. Murphy, of Notre Dame. Throwing the Discus—Won by A. E. Pope, Portland, Ore., 145 ft. 11 in.; Clarence Houser, Los Angeles A. C., 141 ft. 5 1/2 in., second; Thomas Lieb, Notre Dame, 137 ft. 7 in., third; C. B. Ashton, New York A. C., 135 ft. 5 1/4 in., fourth. Pole Vault—Won by Ed. Knourek, Illinois A. C., 13 ft.; Ralph Spearrow, Portland, Ore., 13 ft., second; E. E. Meyers, Chicago A. A., 12 ft., third; Richard Emmons, Los Angeles A. C., 12 ft., fourth. Knourek defeated Spearrow on vault-off; Meyers defeated Emmons on vault-off. Throwing the Javelin—Won by Flint Hanner, Los Angeles A. C., distance 193 ft. 2 1/4 in.; H. Hoffman, Illinois A. C., distance 183 ft. 4 in., second; Racine Thompson, Illinois A. C., distance, 167 ft. 10 1/4 in., third; Joe Butler, Baton Rouge (La.) A. C., distance, 165 ft. 3 1/4 in., fourth. New championship record. Former mark, 192 ft. 10 1/4 in., by M. S. Angier, Illinois A. C., in 1920.

Amateur Athletic Union Junior Championships,

held under auspices Newark A. C., Newark, N. J., Sept. 8. Results: Track Events. 100-Yard Dash—Won by Robert McAllister, unattached, New York; L. Clarke, Baltimore Cross-Country Club, second; Royal Welch, Bridgeport A. C., third; Carl Altmaler, Meadowbrook Club, Philadelphia, fourth. Time—10 1-10s. 220-Yard Run—Won by L. Clarke, Baltimore Cross-Country Club; J. W. Fuller, Montreal A. A., second; R. Wol., Newark A. C., third; L. Hallock, Newark A. C., fourth. Time—22 6-10s. 440-Yard Run—Won by Douglas Fessenden, unattached, Onawa, Iowa; William Farley, Loughlin Lyceum, Brooklyn, second; A. Woostroff, Newark A. C., third; H. Boettischer, Newark A. C., fourth. Time—52 2-10s. 120-Yard High Hurdles—Won by Harold A. Crawford, University of Iowa; Harold E. Parent, Meadowbrook Club, Philadelphia, second; G. McDonough, Baltimore Cross-Country Club, third; Tom Farrell, Newark A. C., fourth. Time—15 9-10s. 220-Yard Low Hurdles—Won by H. Meyer, Newark A. C.; J. P. Sullivan, Boston A. A., second; Harold Parent, Meadowbrook Club, Philadelphia, third; G. McDonough, Baltimore Cross-Country Club, fourth. Time—26s. 440-Yard Hurdles—Won by Walter Gegan, New York A. C.; Y. Chittick, Newark A. C., second; A. Dolder, New York A. C., third; J. Bunick, Newark A. C., fourth. Time—57 6-10s. 880-Yard Run—Won by G. M. Marsters, Boston A. A.; John Herr, Meadowbrook, Philadelphia, second; G. B. Noll, Iowa University, third; M. Perkins, Baltimore Cross-Country Club, fourth. Time—2m. 5 1-10s. One Mile Run—Won by W. O. Spencer, Mississippi A. and M. College; William R. Sullivan, unattached, New York, second; Edward Kirby, Newark A. C., third; B. Booth, Baltimore Cross-Country Club, fourth. Time—4m. 27 9-10s. Three-Mile Walk—Won by Charles Foster, Detroit Y. M. C. A.; Morris Greenberg, Pastime A. C., New York, second; Harry R. Henkle, New York, unattached, third; Mark Hanna, Indianapolis A. C., fourth. Time—23m. 39 3-5s. (new championship record). Former record, 23m. 57s., made by L. Labowitz, Pastime A. C., New York, 1918. Five-Mile Run—Won by Ilmar Prim, Finnish-American A. C., New York; Marion Rock, New York A. C., second; Grover C. Caughey, Pittsburgh A. A., third; H. Ackerman, New York A. C., fourth. Time—26m. 29 3-5s.

Field Events. High Jump—Won by B. P. Chamberlin, Baltimore Cross-Country Club, 6 ft. 1 in.; Carlos Figueroa, unattached, New York, second; Sidney Needs, Meadowbrook, Philadelphia, third; E. A. Bigelow, unattached, New York, fourth. Running Broad Jump—Won by Dehart Hubbard, Cincinnati Gymnasium and A. C., 24 ft. 3 1/2 in.; A. Dowding, Illinois A. C., 23 ft. 6 in., second; Albert Rose, Meadowbrook Club, Philadelphia, 22 ft. 8 1/4 in., third; James Bannon, Shanahan C. C., Philadelphia, 21 ft. 7 in., fourth. (New championship record). Former record, 23 ft. 1 in., made by H. T. Worthington, Boston A. A., in 1914. Hop, Step and Jump—Won by A. J. Plansky, Knights of Columbus, Boston, 46 ft. 9 3-8 in.; Leroy Ward, unattached, New Orleans, 44 ft. 9 1/4 in., second; W. Rosenberg, unattached, New York, 42 ft. 9 1-8 in., third; Albert Rose, Meadowbrook, Philadelphia, 42 ft. 8 1/4 in., fourth. (New championship record). Former record, 46 ft. 7 1/4 in., made by K. Geist, Y. M. H. A., New York, in 1920. Throwing Discus—Won by Charles Ashton, New York A. C., 132 ft. 9 in.; E. J. Weatherdon, New York A. C., 131 ft. 11 1/2 in., second; J. Anderson, Los Angeles A. C., 124 ft., third; Capt. Edward R. Roberts, U. S. A., Fort Myer, 118 ft. 3 in., fourth. Pole Vault—Won by A. Releh, Young Men's Club, Detroit, with 12 ft.; Sidney Needs, Meadowbrook Club, Philadelphia, 11 ft. 6 in., second; N. Atkinson, New York A. C., 11 ft. 6 in., third; E. Aaronson, Baltimore Cross-Country Club, 11 ft., fourth. Putting 16-lb. Shot—Won by Otto Wanzer, New York A. C., with 45 ft.; Norman Anderson, Los Angeles A. C., 43 ft. 6 1/2 in., second; H. Van Orden, unattached, Ann Arbor, Mich., 41 ft. 8 1/4 in., third; Homer Hazel, Newark A. C., 40 ft. 2 1/4 in., fourth. Throwing 16-lb. Hammer—Won by F. D. Tootell, Boston A. A., with 158 ft. 9 1/4 in.; Harvey Emery, Princeton University, 140 ft. 4 in., second; Capt. E. R. Roberts, U. S. Army, Fort Myer, Va., 134 ft. 6 1/2 in., third; B. F. Sherman, unattached, New York, 126 ft. 2 1/4 in., fourth. Throwing 56-lb. Weight—Won by Capt. E. R. Roberts, U. S. Army, Fort Myer, Va., with 31 ft. 7 7-8 in.; Patrick Flynn, Pastime A. C., New York, 28 ft. 11 1/2 in., second; Patrick O'Connor, Pastime A. C., New York, 26 ft. 7 1/4 in., third; B. F. Sherman, unattached, New York, 24 ft. 10 5-8 in., fourth. Throwing the Javelin—Won by Joseph Butler, Baton Rouge (La.) A. C., with 169 ft. 9 in.; Benjamin Lingefelter, Drake University, Des Moines, Iowa, 165 ft. 2 in., second; Waino Tirri, Boston A. A., 163 ft. 8 in., third; J. Franklin Styer, Meadowbrook Club, Philadelphia, 156 ft. 4 1/4 in., fourth.

Amateur Athletic Union Relay Championships, held at Newark, N. J., Sept. 11. Results: *440-Yard Relay*—Won by New York A. C. (B. J. Wefers, Jr., Fred Lovejoy, J. C. Taylor and Edward Farrell); Meadowbrook Club, Philadelphia (J. A. Leconey, C. Altmaier, Dewey Rodgers and Allan Woodruff); second, Illinois A. C., Chicago (Loren Murchison, K. Anderson, P. Jones and D. Jones), third, Time—43.3-10s. *880-Yard Relay*—Won by Meadowbrook Club, Philadelphia (J. A. Leconey, Allan Woodruff, Dewey Rodgers and William Stevenson); New York A. C. (B. J. Wefers, Jr., Fred Lovejoy, J. C. Taylor and Edward Farrell); second, Illinois A. C., Chicago (K. Anderson, Loren Murchison, D. Jones and P. Jones), third, Time—1m. 23s. *One-Mile Relay*—Won by New York A. C. (B. J. Wefers, Jr., J. C. Taylor, Allan Helfrich and William Stevenson); Boston A. A. (E. S. Dudle, Jr., P. M. Dillow, H. H. Hile and J. W. Driscoll), second; Newark A. C. (H. Boettcher, A. Woostroff, A. Y. Chittick and H. Ray), third; Loughlin Lyceum, Brooklyn (James J. Brien, Thomas Foget, M. Foget and William Farley), fourth, Time—3m. 21s. *Two-Mile Relay*—Won by New York A. C. (J. R. Sellers, Joseph Higgins, R. Malone and A. M. Helfrich); Boston A. A. (E. S. Dudle, Jr., C. M. Marsters, A. T. Kirley and J. H. Connolly), second; Chicago A. C. (A. Gustafson, H. N. Yates, R. F. Wharton and Phil Spink), third, Time—7m. 57.4-10s. *Four-Mile Relay*—Won by Boston A. A. (R. E. Brown, A. T. Kirley, J. M. Marsters and J. J. Connolly); New York A. C. (Walter Higgins, Al Hulslen, Newark W. M. Thompson and Sid Leslie), second; Newark A. C. (H. Stewart, G. Douglas, L. Austin and E. Kirby), third, Time—18m. 42s.

Amateur Athletic Union Decathlon Championship, held at Newark, N. J., Sept. 11. Results: Competitors: S. Harrison Thomson, Illinois A. C., Chicago; Andrew M. Lockett, Jr., Columbia University; Harold M. Osborne, Illinois A. C., Chicago; Lieut. Eugene L. Vidal, unattached, West Point; Victor Naegeli, Union Club, Hutchinson, Minn.; Frank J. Daley, Stamford A. A.; Thomas Rector, Stamford A. A.; Joseph Shevlin, Knights of St. Anthony, Brooklyn, and Joseph Butler, Baton Rouge, La. A. C. Point Scores: S. H. Thomson, 6,892-57; H. M. Osborne, 6,796-26; Lieut. E. L. Vidal, 6,466-30; V. Naegeli, 6,254-32; A. M. Lockett, Jr., 4,999-92; J. Shevlin, 4,466-76; T. Rector, 4,430-11; F. J. Daley, 3,464-26.

Results and points scored in ten individual events: *100-Metre Dash*—Won by Thomson, 11.6-10s. (762 points); Vidal, 12s. (666.81 points), and Naegeli, 12s. (666.81 points), tied for second; Osborne, 12.2-10s. (619.20 points), fourth; Rector, 12.4-10s. (571.60 points), and Butler, 12.4-10s. (571.60 points), tied for fifth; Daley, 12.6-10s. (524 points), seventh; Lockett, 12.7-10s. (520.20 points), eighth. Shevlin did not appear in time for competition. *Running Broad Jump*—Won by Osborne, with 21 ft. 11.5-8 in. (773.52 points); Thomson, 21 ft. 5-1-8 in. (738.83 points), second; Naegeli, 21 ft. (706 points), third; Vidal, 20 ft. 10 in. (693.75 points), fourth; Shevlin, 19 ft. 9-7-8 in. (617.8 points), fifth; Lockett, 19 ft. 9-5-8 in. (617.04 points), sixth; Rector, 19 ft. 2-1-8 in. (570.51 points), seventh; Butler, 19 ft. 1-8 in. (563.9 points), eighth; Daley, 18 ft. 3-3/4 in. (605.1 points), ninth. *Putting 16-lb. Shot*—Won by Thomson, with 40 ft. 11 in. (713 points); Butler, 36 ft. 9 in. (586 points), second; Osborne, 36 ft. 8 1/2 in. (585 points), third; Vidal, 35 ft. 6 in. (548 points), fourth; Naegeli, 35 ft. 3 in. (541 points), fifth; Rector, 30 ft. 6 in. (396 points), sixth; Shevlin, 28 ft. 9 in. (343 points), seventh; Daley, 28 ft. 3 in. (327 points), eighth; Lockett, 27 ft. 5 1/4 in. (303 points), ninth. *Running High Jump*—Won by Osborne, with 6 ft. 2 1/4 in. (938 points); Thomson, 6 ft. 1/4 in. (868 points), second; Lockett, 5 ft. 9 1/2 in. (822 points), and Vidal, 5 ft. 9 1/4 in. (782 points), tied for third; Naegeli, 5 ft. 7 1/2 in. (687.80 points), fifth; Rector, 5 ft. 5 1/2 in. (627.60 points), and Shevlin, 5 ft. 5 1/2 in. (627.60 points), tied for sixth; Butler, 5 ft. 1 in. (468 points), eighth; Daley, 4 ft. 11 1/4 in. (426 points), ninth. *440-Metre Run*—Won by Naegeli, 54s. (781.92 points); Osborne, 55-9-10s. (710.48 points), second; Vidal, 56-1-10s. (702.90 points), third; Rector, 56-3-10s. (695.44 points), fourth; Daley, 56-5-10s. (687.92 points), fifth; Shevlin, 56-6-10s. (684.16 points), sixth; Thomson, 56-8-10s. (676.64 points), seventh; Lockett, 57-2-10s. (661.60 points), eighth; Butler, 58-5-10s. (612.72 points), ninth. *110-Metre Hurdle Race*—Won by Thomson, 16-1-10s. (895.50 points); Osborne, 16-7-10s. (835.50 points), second; Vidal, 17-1-10s. (800.50 points), third; Naegeli, 18s. (715 points), fourth; Lockett, 18-1-10s. (705.50 points), fifth; Shevlin, 19-2-10s. (601 points), sixth; Rector, 20s. (526 points), seventh; Daley, 22-2-10s. (316 points), eighth. *Throwing of Discus*—Won by Thomson, with 118 ft. 4 1/2 in. (652.95 points); Vidal, 116 ft. 7-8 in. (626.35 points), second; Osborne, 108 ft. 8 1/2 in. (541.69 points), third; Naegeli, 95 ft. (382.39 points), fourth;

Daley, 92 ft. 1 1/2 in. (349.82 points), fifth; Shevlin, 84 ft. (255 points), sixth; Rector, 80 ft. 4 in. (213.71 points), seventh; Lockett, 76 ft. 6 1/2 in. (168.52 points), eighth. *Pole Vault*—Vidal, with 11 ft. (680 points), and Naegeli, with 11 ft. (680 points), tied for first; Osborne, 10 ft. 6 in. (592 points), third; Lockett, 10 ft. (514 points), and Thomson, 10 ft. (514 points), tied for fourth, fifth and sixth; Shevlin, 9 ft. 2 in. (433 points), seventh; Daley, 8 ft. (182 points), eighth. *Throwing the Javelin*—Won by Osborne, with 140 ft. 1 1/4 in. (503.075 points); Naegeli, 135 ft. 8 1/2 in. (460.212 points), second; Thomson, 133 ft. 5 1/4 in. (440.65 points), third; Vidal, 121 ft. 7 in. (341.65 points), fourth; Shevlin, 121 ft. 4 1/2 in. (339 points), fifth; Lockett, 108 ft. 1 in. (228.262 points), sixth; Daley, 98 ft. 1 in. (146.42 points), seventh; Rector, 84 ft. 5 in. (32.25 points), eighth. *1,600-Metre Run*—Won by Osborne, 4m. 14s. (686.9 points); Vidal, 4m. 56-1-10s. (644.2 points), second; Naegeli, 4m. 57-9-10s. (632.2 points), third; Thomson, 4m. 58-3-10s. (631 points), fourth; Shevlin, 5m. 9-1-10s. (566.2 points), fifth; Lockett, 5m. 13-5-10s. (539.8 points), sixth; Rector, 5m. 55-8-10s. (284 points), seventh; Daley did not finish.

National Amateur Athletic Union Junior Indoor Championships, held at New York City, March 4. Results: *70-Yard High Hurdles*—Won by A. Hulman, Jr., Yale; Richard Oram, Union College, second; A. P. Roberts, N. Y. A. C., third; Ellis Boynton, N. Y. U., fourth. Time—9-3-5s. *60-Yard Dash*—Won by York University, Lafayette College; T. Wood, St. Christopher's Club, second; Victor Graeb, Columbia, third; J. N. Lewis, Columbia, fourth. Time—6-3-5s. *1,000-Yard Run*—Won by Malcolm K. Douglas, Yale; W. M. Parer, St. Christopher's Club, second; Fred W. Hillos, Yale, third; W. E. Boettcher, Lafayette, fourth. Time—2m. 18-3-5s. *16-Pound Shot-Put*—Won by Robert W. Beattie, Princeton, 39 ft. 7 in.; Joseph Arneith, Paulist A. C., 36 ft. 7 1/2 in., second. *Standing Broad Jump*—Won by A. D. Pendleton, Alpha P. C. C., 9 ft. 5 1/4 in.; J. N. Lewis, Columbia, 9 ft. 4 1/2 in., second; J. H. Vickers, unattached, 9 ft. 3 1/4 in., third; Theodore Vusbarger, Ascension A. C., 9 ft. 1 1/2 in., fourth. *Two-Mile Run*—Won by Edward Jeters, Buffalo; Andrew Gray, unattached, second; William Ritter, Jr., Meadowbrook Club, third; Arthur Cassot, Glencoe A. C., fourth. Time—9m. 42-4-5s. *600-Yard Run*—Won by Vincent Lally, St. Anselm's Club, C. Scherman, St. Christopher's Club, second; M. T. Bohannon, University of Virginia, third; Thomas Brodhead, Colgate, fourth. Time—1m. 16-4-5s. *One-Mile Walk*—Won by W. Von Barga, Morningside A. C.; Michael Rekeet, unattached, second; Irving Boskin, American Walkers, third; Morris Greenberg, Pastime A. C., fourth. Time—1m. 16-2-5s. *300-Yard Run*—Won by Ellis Perlman, New York University; R. Georgi, N. Y. A. C., second; James W. Dorsey, Meadowbrook Club, Philadelphia, third; W. Dcwney, Paulist A. C., fourth. Time—35s. *Running High Jump*—Won by A. B. Abromet, unattached, 6 ft.; Harry Troup, Princeton, 5 ft. 10 in., second; B. Proctor, Jr., Mount St. Joseph, 5 ft. 9 in., third; Frank Boyd, Lincoln University, 5 ft. 8 in., fourth. *One-and-Sevent-Eighths-Mile Medley Relay*—Won by Princeton University (J. C. Taylor, R. M. McKim, R. E. Johnson, S. C. Conger); Loughlin Lyceum (Philip Houser, Edward Faith, E. Swensen, M. Leslie), second; Morningside A. C. (A. Peters, J. Bohling, W. Feldstein, Arthur Treble), third. Time—8m. 6-2-5s. *600-Yard Run*—Won by Vincent Lally, St. Anselm's A. C.; Clarence Sherman, St. Christopher's Club, second; M. T. Bohannon, University of Virginia, third; Thomas Brodhead, Colgate, fourth. Time—1m. 16-4-5s. *Standing High Jump*—Won by S. R. Smith, unattached, 4 ft. 9 in.; Joe Smutney, Sokol Gymnasium, 4 ft. 8 in., second; J. H. Vickers, unattached, 4 ft. 7 in., third.

National Amateur Athletic Union Senior Indoor Championships, held at Buffalo, N. Y., Feb. 11. Results: *Running High Jump*—Won by L. T. Brown, Dartmouth College, 6 ft.; Richmond W. Landon, New York A. C., 5 ft. 10 in., second; C. E. Jacquith, Illinois A. C., 5 ft. 8 in., third. *60-Yard Run*—Won by Loren Murchison, Illinois A. C.; H. B. Lever, University of Pennsylvania, second; Bernie Wefers, Jr., New York A. C., third; J. W. Kelly, Carnegie Tech., fourth. Time—6-2-5s. (Equals championship and American record.) *Putting 16-lb. Shot*—Won by Ralph Hils, Princeton, distance 46 ft. 10-3-8 in.; O. Wanser, New York A. C., 44 ft. 6-1-8 in., second; Douglas C. Sinclair, Meadowbrook A. C., 43 ft. 3 1/4 in., third. *1,000-Yard Run* (4 1/2 laps)—Won by H. C. Cutbill, Boston A. A.; Larry Shields, Penn State, second; Joie W. Ray, Illinois A. C., third. Time—2m. 13-2-5s. (Equals American record.) *70-Yard High Hurdles*—Won by Harold Barron, Penn State; W. E. Massy, Princeton, second; Ralph Hills, Princeton, third. Time—9-1-5s. *600-Yard Run* (2-3 laps)—Won by Sidney Leslie, New York A. C.; Melvin J.

Suttner, Syracuse University, second; Allen S. Monie, Syracuse University, third; Lawrence C. Butler, Illinois A. C., fourth. Time—1m. 14 4-5s. *Two-Mile Run* (16 laps)—Won by J. Romig, Penn State R. Earl Johnston, Pittsburgh, second; E. O. McLane, University of Penn., third; Bramwell French, fourth. Time—9m. 21 1/8s. *300-Yard Run*—Won by Allen Woodring, Syracuse University; Loren Murchison, Illinois A. C., second; Bernie Wetters, New York A. C., third. Time—31 1-5s. (new American record) *Standing Broad Jump*—Won by W. Irving Reid, Brown University, 10 ft. 8 3/4 in.; Ed. Eames, New York A. C., 10 ft. 6 3/4 in.; second; Edward Berquist, Mohawk A. C., 9 ft. 11 in., third. *Standing High Jump*—Won by Ed. Eames, New York A. C., height 5 ft. 1 in.; Ted Clark, New York A. C., 4 ft. 11 3/4 in., second; W. Irving Reid, Brown University, 4 ft. 11 1/4 in., third; C. E. Jacquith, Illinois A. C., 4 ft. 10 in., fourth. *One-Mile Walk*—Won by William Plant, Morningside A. C.; Joe Fearman, New York A. C., second; William Rolker, New York A. C., third; Charles H. Barnes, West End Y. M. C. A., Toronto, fourth. Time—6m. 40 3-5s. *One-and-Seven-Eighths-Mile Medley Relay Race*—Won by

Georgetown University (Kinnaly, L. E. Gendrc, Masters and Connelly); Illinois A. C. (Butler, Cussau, Murchison and Ray), second; Boston Athletic Association (Meanix, Dudley, King and Cutbill), third; Columbia University (Kopplish, Graeb, Marzolt and Higgins), fourth. Time—7m. 41 2-5s.

#### ENGLISH AMATEUR CHAMPIONSHIPS.

Held at London, July 1. Many Continental athletes competed, including several 1920 Olympic Games champions, and a majority of the first places was won by competitors other than English. Results, first places only: *100-Yard Run*—Edwards, England, 10 1/8s. *880-Yard Run*—Mountain, Cambridge University, 1m. 55 3-5s. *Throwing the Hammer*—Lindh, Sweden, 172 ft. 3 in. *Pole Vault*—Gerspach, Switzerland, 12 ft. *Two-Mile Walk*—Frigerio, Italy, 14m. 30s. *Throwing the Javelin*—Johannsen, Finland, 200 ft. 5 in. *440-Yard Run*—Edwards, England, 50 2-5s. *120-Yard Hurdles*—Gaby, England, 15 3-5s. *One-Mile Run*—McPhee, Scotland, 4m. 27s. *High Jump*—Lewden, France, 5 ft. 11 in. *Long Jump*—Hoff, Norway, 23 ft. 3 in.; *220-Yard Dash*—Edwards, England, 22s. *Two-Mile Steeplechase*—Nurmi, Finland, 11m. 1-5s.

#### PROFESSIONAL PLAY.

Jacob Schaefer, 2d, winner of the 1921 18.2 Balkline World's Championship, defended his title twice during the early portion of 1922. He defeated Willie Hoppe, former champion, 1,500 points to 1,468. The match was played at Chicago, in three blocks of 500 points per night, the final being staged on March 29. With the score 1,490 to 1,468 in the last block, with Hoppe at the table, the latter needing but 32 points to win, miscued and Schaefer ran out his ten points.

The score by blocks:

#### FIRST BLOCK.

Schaefer—0, 8, 0, 252, 40, 145, 11, 9, 1, 31. Total, 500. Average, 50.

Hoppe—2, 14, 55, 114, 9, 260, 9, 2, 1. Total, 466. Average, 51 7-9.

#### SECOND BLOCK.

Schaefer—157, 143, 35, 16, 53, 27, 11, 58—500. 500—1,000. Average for night, 62 4-8. Grand average, 58 14-17.

Hoppe—43, 54, 0, 71, 17, 134, 167—486, 466—952. Average for night, 69 3-7. Grand average, 59 8-15.

#### THIRD BLOCK.

Schaefer—59, 107, 2, 22, 20, 3, 28, 4, 0, 0, 0, 213, 29, 3, 10. Total, 500. High run, 213. Average, 33 5-15.

Hoppe—6, 3, 1, 58, 69, 0, 83, 1, 111, 0, 44, 84, 43, 13. Total, 616. High run, 111. Average, 36 12-14. Grand average—Schaefer, 48 12-31; Hoppe, 48 28-30.

Schaefer also defeated Welker Cochran, 1,500 points to 1,333, in a similar match played at Chicago and ending on May 18.

The score by innings of the entire match follows: Schaefer—1, 79, 0, 1, 0, 20, 3, 0, 0, 0, 8, 26, 202, 75, 101, 0, 10, 33, 79, 2, 5, 76, 48, 81, 17, 62, 58, 9, 94, 1, 15, 0, 31, 115, 24, 112, 8, 49, 20, 3, 21, 7. Total—1,500. Average, 35 30-42.

Cochran—0, 72, 94, 2, 6, 0, 2, 1, 0, 17, 20, 31, 9, 76, 97, 4, 0, 60, 0, 0, 1, 75, 28, 40, 32, 0, 58, 159, 0, 0, 3, 1, 1, 99, 34, 7, 79, 0, 166, 21, 4, 0. Total—1,333. Average—31 31-42.

High runs—Schaefer, 202; Cochran, 166.

Referee—Albert G. Cutler

Ralph Greenleaf, winner of the 1921 Pocket Billiard Championship, also defended his title several times during the season of 1922. He defeated Thomas Hueston, former champion, at New York, 450 to 133, including a new world's record run of 100 balls in the final night's play. On May 6 he defeated Walter Franklin at New York 450 to 216. Bennie Allen also lost to the champion at Philadelphia on Oct. 28, by a score of 257 to 450.

John Layton, three-cushion champion, defended his title successfully, defeating Alfredo De Oro 180 to 135 at Milwaukee, March 1, and Charles McCourt 180 to 139 at Sedalia, Mo., May 3.

#### BEST RECORD AVERAGES.

Professional—200 at 18.2, Jacob Schaefer 2d, Chicago, Nov. 19, 1921; 40 at 18.1, Jacob Schaefer, Chicago, 1898; 10 at straight cushion caroms, J. Schaefer, New York, 1883; 37.97 at champion's game, G. F. Slosson, Paris, 1882; 52 at 14.1, George Sutton, Baltimore, Md., Oct. 28, 1914.

Amateur—57.14 at 14.2, Calvin Demarest, Chicago, 1908; 33.33 at 18.2, Lucien Rerolle, Paris, 1903.

#### BEST RECORD RUNS.

Professional—436 at 18.2, Jacob Schaefer 2d, New York, March 5, 1921; 155 at 18.1, Willie Hoppe, Philadelphia, Pa., Nov. 29, 1910; 246 at 18.2, Maurice Vignaux, Chicago, 1883, when record balkline was first played; 303 at 14.1, Willie Hoppe, New York, April 23, 1914; 85 at straight cushion caroms, F. C. Ives, Boston, 1906; 398, champion's game, Paris, 1882; 2,196 at English billiards, by George Gray, Australia, at London, March 18, 1911.

Amateur—175 at 18.2, L. Rerolle, Paris, 1908; 202 at 14.2, Calvin Demarest, Chicago, 1908.

Three-cushion—Best run, 18, Pierre Maupome, St. Louis, Mo., Sept. 18, 1914, in exhibition; 18, Charles Morin, St. Louis, Mo., May 20, in competition.

#### POOL.

Best run under new rule, one ball always on table—Amateur—74, Morton Phillips, Chicago, Feb. 13, 1913; in amateur city championship, Professional—100—Ralph Greenleaf, at New York, Feb. 24, 1922, in match against Thomas Hueston.

Results by events:

**TRACK EVENTS—100-Yard Dash**—Won by J. A. Le Coney, Lafayette; F. K. Lovejoy, Cornell, second; E. R. McKim, Princeton, third; E. Sudden, Stanford, fourth; E. J. Rusnack, Yale, fifth. Time—9 7-10s. (new intercollegiate and collegiate record). Former intercollegiate mark, 9 4-5s, held jointly by Le Coney, Wefers, Craig and Patterson; collegiate record was held jointly by Wefers, Schick and Patterson. **220-Yard Dash**—Won by J. A. Le Coney, Lafayette; E. Sudden, Stanford, second; F. K. Lovejoy, Cornell, third; M. M. Kirksey, Stanford, fourth; S. Feldman, Yale, fifth. Time—21 3-10s. **440-Yard Dash**—Won by J. W. Driscoll, Boston College; W. E. Stevenson, Princeton, second; O. O. Hendrixson, California, third; A. S. Monte, Syracuse, fourth; C. F. John, Cornell, fifth. Time—49½s. **Half-Mile Run**—Won by L. A. Brown, Pennsylvania; R. L. Johnson, Princeton, second; M. L. Shields, Penn State, third; C. O. Carter, Cornell, fourth; A. B. Helfrich, Penn State, fifth. Time—1m. 55 1-5s. **One-Mile Run**—Won by M. L. Shields, Penn State; M. Douglas, Yale, second; E. B. Kirby, Cornell, third; J. W. Burke, Harvard, fourth; E. B. Strickler, Cornell, fifth. Time—4m. 13 2-5s. **Two-Mile Run**—Won by W. Higgins, Columbia; R. B. Baker, Bates, second; R. Moore, Columbia, third; C. M. Dorr, California, fourth; N. P. Brown, Cornell, fifth. Time—9m. 28 1-5s. **120-Yard High Hurdles**—Won by J. C. Taylor, Princeton; H. H. Meyer, Rutgers, second; C. Haynes, Stanford, third; H. H. Hille, Penn State, fourth; H. N. Stone, Cornell, fifth. Time—23 9-10s. **120-Yard High Hurdles**—Won by C. R. Hauers, Harvard; W. E. Massey, Princeton, second; S. H. Thompson, Princeton, third; R. V. Merrick, Boston College, fourth; (C. H. Kauffman, Penn State, disqualified). Time—15 3-10s.

**FIELD EVENTS—Broad Jump**—Won by R. L. Legendre, Georgetown, 23 ft. 7½ in.; A. E. Rose, Pennsylvania, 23 ft. 2½ in.; second; D. B. Lourie, Princeton, 22 ft. 1¼ in.; third; J. W. Merchant, California, 22 ft. 7½ in.; fourth; E. Courtois, New York University, 22 ft. ¼ in.; fifth. **High Jump**—Won by L. T. Brown, Dartmouth, 6 ft. 4 5-8 in. (a new intercollegiate record); tie between R. H. Clark, Amherst, and H. P. Muller, California, 6 ft. 2 5-8 in.; for second; P. B. Nicols, Cornell, 6 ft. 1¼ in.; fourth; T. J. Treyer, California, 6 ft. ¾ in.; fifth. **Javelin Throw**—Won by G. E. Bronder, Pennsylvania, 185 ft. 8 5-8 in.; S. S. Sorenti, California, 185 ft. 7¾ in.; second; J. F. Hanner, Stanford, 180 ft. 3¾ in.; third; J. W. Merchant, California, 177 ft. 10 in.; fourth; S. H. Downs, Cornell, 169 ft. 11 in.; fifth. **Pole Vault**—Won by G. Norris, California, 12 ft. 9 in.; tie among E. V. Gouinlock, Cornell, K. D. Libbey, Dartmouth, W. Black, Stanford, and T. Gardner, Yale, 12 ft. 6 in., for second. **Discus Throw**—Won by G. Hartman, Stanford, 140 ft. 1-8 in.; H. P. Muller, California, 134 ft. 3¼ in.; second; W. V. Miller, Harvard, 130 ft. 3 5-8 in.; third; R. A. Berkey, California, 129 feet 9 7-8 in.; fourth; R. L. Legendre, Georgetown, 127 ft. 7¾ in.; fifth. **Shot Put**—Won by G. Hartman, Stanford, 48 ft. 6½ in.; J. W. Merchant, California, 44 ft. 10½ in.; second; J. I. Witter, California, 44 ft. 8 3-8 in.; third; G. E. Bronder, Pennsylvania, 44 ft. 7¾ in.; fourth; S. H. Thompson, Princeton, 43 ft. 9 1-8 in.; fifth. **Hammer**

**Throw**—Won by J. W. Merchant, University of California, 171 ft. 2 in.; J. F. Brown, Harvard, 159 ft. 6 in.; second; H. F. Baker, Princeton, 155 ft. 1¼ in.; third; F. D. Tootel, Bowdoin, 155 ft. 3 in.; fourth; H. Emery, Princeton, 150 ft., fifth.

Meredith, Pennsylvania, Cambridge, Mass., May 27, 1916. **Half-Mile Run**—1m. 53s. J. E. Meredith, Pennsylvania, Cambridge, Mass., May 27, 1916. **One-Mile Run**—4m. 14 2-5s. J. P. Jones, Cornell, Cambridge, Mass., May 31, 1913. **Two-Mile Run**—9m. 22 2-5s. J. C. Dresser, Cornell, Cambridge, Mass., May 31, 1919. **Running Broad Jump**—24 ft. 4½ in. A. C. Kraenzlein, Pennsylvania, New York, May 27, 1899. **Running High Jump**—6 ft. 4½ in. L. T. Brown, Dartmouth, Cambridge, Mass., May 27, 1922. **Putting 16-Pound Shot**—48 ft. 10½ in. P. Beatty, Columbia, Philadelphia, Pa., June 1, 1912. **Throwing the Hammer**—173 ft. 6 in., Lee Talbot, Pennsylvania, Harrisburg, Pa., May 7, 1910. **Pole Vault**—13 ft. 1 in., R. Gardner, Yale, Philadelphia, Pa., June 1, 1912. **120-Yard High Hurdles**—14 2-5s. Earl Thomson, Dartmouth, Philadelphia, May 29, 1920. **220-Yard Hurdles**—23 3-5s. A. C. Kraenzlein, Pennsylvania, New York, May 28, 1898, and J. I. Wendell, Wesleyan, Cambridge, Mass., May 31, 1913. **One-Mile Walk**—6m. 45 2-5s. W. B. Feiterman jr., Pennsylvania, New York, May 28, 1898.

PREVIOUS WINNERS.

1876, Princeton; 1877, Columbia; 1878, Columbia; 1879, Columbia; 1880, Harvard; 1881, Harvard; 1882, Harvard; 1883, Harvard; 1884, Harvard; 1885, Harvard; 1886, Harvard; 1887, Yale; 1888, Harvard; 1889, Yale; 1890, Harvard; 1891, Harvard; 1892, Harvard; 1893, Yale; 1894, Yale; 1895, Yale; 1896, Yale; 1897, Univ. of Pennsylvania; 1898, Univ. of Pennsylvania; 1899, Univ. of Pennsylvania; 1900, Univ. of Pennsylvania; 1901, Harvard; 1902, Yale; 1903, Yale; 1904, Yale; 1905, Cornell; 1906, Cornell; 1907, Univ. of Pennsylvania; 1908, Cornell; 1909, Harvard; 1910, Univ. of Pennsylvania; 1911, Cornell; 1912, Univ. of Pennsylvania; 1913, Univ. of Pennsylvania; 1914, Cornell; 1915, Cornell; 1916, Cornell; 1917, no meet; 1918, Cornell; 1919, Cornell; 1920, Pennsylvania; 1921, California; 1922, California.

WESTERN CONFERENCE.

Twenty-second Annual Championship Western Conference Athletic Association held at Iowa City, Iowa, June 2-3. Point winners: Illinois, 59 6-14; Iowa, 24 1-35; Minnesota, 23 1-10; Notre Dame, 22 13-14. Individual event winners:

**TRACK EVENTS—100-Yard Dash**—Won by Hayes, Notre Dame; Paul, Grinnell, second; Wilson, Iowa, third; Morehead, Ohio, fourth; Ayres, Illinois, fifth. Time—9 7-10s. **220-Yard Dash**—Won by Paul, Grinnell; Wilson, Iowa, second;

Spetz, Wisconsin, third; Hayes, Notre Dame, fourth; Morehead, Ohio, fifth. Time—21 7-10s. *440-Yard Dash*—Won by Wolters, Ames; Fessenden, Illinois, second; Sweet, Illinois, third; Hultkrantz, Minnesota, fourth; Schlapprizzi, Illinois, fifth. Time—48s. *880-Yard Run*—Won by Wolters, Ames; Higgins, Ames, second; Harrison, Purdue, third; Yates, Illinois, fourth; Morrow, Iowa, fifth. Time—1m. 55s. *One-Mile Run*—Won by Patterson, Illinois; Wells, Illinois, second; Sweitzer, Minnesota, third; Ashton, Iowa, fourth; Murphy, Purdue, fifth. Time—4m. 22s. *Two-Mile Run*—Won by Rathbun, Ames; Wharton, Illinois, second; Doolittle, Butler, third; Scott, Illinois, fourth; Watson, Illinois, fifth. Time—9m. 27s. (new conference record: 9m. 29 3-5s. made by Stout, Chicago, 1916). *120-Yard High Hurdles*—Won by Knollin, Wisconsin; Anderson, Minnesota, second; Sargent, Michigan, third; Martineau, Minnesota, fourth. Time—15s. (No fifth place; Wallace, Illinois, finished fourth, but was disqualified.) *One-Mile Relay*—Won by Iowa (Knoll, Keppler, Beck and Wilson); Chicago, second; Ames, third; Wisconsin, fourth; Michigan, fifth. (No time given on account of Illinois finishing first in 3m. 20s., but being disqualified for alleged roughness by Sweet.) *220-Yard Low Hurdles*—Won by Brookins, Iowa; Anderson, Minnesota, second; Desch, Notre Dame, third; Knollin, Wisconsin, fourth; S. H. Wallace, Illinois, fifth. Time—23 4-5s. (Ties conference record.)

**FIELD EVENTS—Running High Jump**—Osborne, Illinois, and Murphy, Notre Dame, tied for first and second, 6 ft. 5 1-16 in.; Hoffman, Iowa, third, 6 ft.; Conn, Iowa, Platten, Wisconsin, Campbell, Minnesota, McEllen, Michigan, and Woods, Butler, tied for fourth and fifth, 5 ft. 10 in. *Shot Put*—Won by Cannon, Illinois, 42 ft. 1 1/2 in.; Hulscher, West Michigan State Normal, second, 42 ft. 6 1/2 in.; Sundt, Wisconsin, third, 42 ft. 5 in.; Lieb, Notre Dame, fourth, 41 ft. 1 1/2 in.; Dahl, Northwestern, fifth, 41 ft. 5 1/2 in. *Javelin Throw*—Won by Angier, Illinois, 196 ft. 11 in.; Hoffman, Michigan, second, 194 ft. 6 1/2 in.; Hanny, Indiana, third, 171 ft. 5 1/2 in.; Miller, Purdue, fourth, 171 ft. 4 1/2 in.; Moes, Notre Dame, fifth, 170 ft. 4 1/2 in. *Discus Throw*—Won by Lieb, Notre Dame, 147 ft. 8 in.; Frida, Chicago, second, 134 ft. 5 in.; Carlson, Illinois, third, 133 ft.; Grossman, fourth, 129 ft. 4 in.; Howard, Drake, fifth, 123 ft. 8 in. *Pole Vault*—Won by Landowski, Michigan, 12 ft. 6 in.; Hawker, Minnesota, and Collins, Illinois, tied for second and third, 12 ft.; Devine, Iowa; Chandler, Illinois, McClure, Wisconsin, Merrick, Wisconsin, Hogan, Notre Dame, Hall, Chicago, and Faust, Northwestern, tied for fourth and fifth, 11 ft. 6 in. *Hammer Throw*—Won by Hill, Illinois, 137 ft. 5 1/2 in.; Schmidt, Michigan, second, 129 ft. 4 1/2 in.; Thomas, Ohio, third, 127 ft. 1 in.; White, Ohio, fourth, 117 ft. 1 in.; Michael, Chicago, fifth, 115 ft. 8 1/2 in. *Running Broad Jump*—Won by Osborne, Illinois, 22 ft. 9 in.; Sundt, Wisconsin, second, 22 ft. 6 1/2 in.; Schmidt, Michigan, third, 22 ft. 5 1/2 in.; Farley, Minnesota, fourth, 22 ft. 1 1/2 in.; Johnson, Wisconsin, fifth, 21 ft. 1 1/2 in.

#### BEST CONFERENCE RECORDS.

*100-Yard Dash*—9 7-10s., W. Hayes, Notre Dame, Iowa City, June 3, 1922. *220-Yard Run* (around a turn)—22s., William Hogenson, Chicago, June 3, 1905; H. J. Huff, Grinnell, June 1, 1907. *Straightaway*—21 3-5s., J. Ward, Chicago, Urbana, Ill., June 5, 1915, and J. Scholz, Missouri, Ann Arbor, June 5, 1920. *440-Yard Run*—47 2-5s., Binga Dismond, Chicago, Evanston, Ill., June 3, 1916. *880-Yard Run*—1m. 53 1-5s., Don Scott, Mississippi A. and A., Evanston, Ill., June 3, 1916. *One-Mile Run*—4m. 15 4-5s., E. H. Ball, Oberlin, Chicago, Ill., June 9, 1917. *Two-Mile Run*—9m. 29 3-5s., C. J. Stouck, Chicago, Evanston, June 3, 1916. *120-Yard High Hurdles*—13 3-5s., Robert Simpson, Missouri, Evanston, Ill., June 3, 1916. *220-Yard Low Hurdles*—23 4-5s., Robert Simpson, Missouri, Evanston, Ill., June 3, 1916. *Pole Vault*—12 ft. 8 1/2 in., J. K. Gold, Madison, Wis., June 7, 1913. *Running High Jump*—6 ft. 5 1-16 in., H. Osborne, Illinois, and J. Murphy, Notre Dame, Iowa City, June 3, 1922. *Running Broad Jump*—24 ft. 1 in., C. E. Johnson, Michigan, Chicago, Ill., June 7, 1919. *Putting 16-Pound Shot*—47 ft. 1/2 in., Ralph Rose, Michigan, June 4, 1904. *Throwing 16-Pound Hammer*—160 ft. 4 in., K. Shattuck, California, Madison, Wis., June 7, 1913. *Throwing the Discus*—155 ft. 2 in., A. M. Mucks, Wisconsin, Evanston, Ill., June 3, 1916. *One-Mile Relay* (4 men)—3m. 21 4-5s., Chicago (Campbell, Stegeman, Cornwall, Dismond), Urbana, Ill., June 5, 1915, and Illinois (Donohue, Prescott, Spink, Emery), Ann Arbor, June 5, 1920. *Javelin Throw*—178 ft. 4 in., Hoffman, Michigan, Chicago, June 4, 1921.

#### NATIONAL COLLEGIATE A. A. CHAMPIONSHIPS.

Twenty-third Annual N. C. A. A. Championships held at Chicago, June 17. The point scores: California, 28 1/2; Penn State, 19 1/2; Notre Dame, 16 7-10; Illinois, 14 7-10; Iowa, 13 34-45; Grinnell, 10; Michigan, 10; Georgetown, 7; Mississippi A. & M., 7; Penna., 6; Ames, 5; Wisconsin, 3 34-45; Butler, 3 1-18; Montana, 3; Central Wesleyan, 3; Chicago, 3; Kansas Aggies, 2 1/2; Minnesota, 2 1-18; Depauw, 2 1-18; Ohio State, 2 1-18; Earlham, 2; Hamilton, 2; Nebraska, 1 1-18; Amherst, 1 1-18; Western State Normal, 1; Georgia Tech., 1; Kansas, 7-10; Texas A. & M., 1/2; Purdue, 1/2. Individual event winners:

**TRACK EVENTS—100-Yard Dash**—Won by Paul, Grinnell; Hayes, Notre Dame, second; Irwin, Kansas Aggies, third; Wilson, Iowa, fourth; Smith, Nebraska, fifth. Time—9 9-10s. (New meet record. Former record of 10s. made by Paul in 1921.) *220-Yard Dash*—Won by Paul, Grinnell; Wilson, Iowa, second; Spetz, Wisconsin, third; Hayes, Notre Dame, fourth; Erwin, Kansas Aggies, fifth. Time—21 4-5s. (New collegiate record. Former record of 22 3-5s. made by Wilson, Iowa, in 1921.) *440-Yard Run*—Won by Cochran, Mississippi A. & M.; McDonald, California, second; Fessenden, Illinois, third; Pyott, Chicago, fourth; Brickman, Chicago, fifth. Time—49 7-10s. *880-Yard Run*—Won by Helfrich, Penn State; Brown, Pennsylvania, second; Morrow, Iowa, third; Yates, Illinois, fourth; Gardner, Nebraska, fifth. Time—1m. 58 1-10s. *One-Mile Run*—Won by Shields, Penn State; Patterson, Illinois, second; Connelly, Georgetown, third; Wikoff, Ohio State, fourth; Furnas, Purdue, fifth. Time—4m. 20 2-5s. (New collegiate record. Former record of 4m. 23 2-5s. made by Ray Watson, Kansas Aggies, in 1921.) *Two-Mile Run*—Won by Rathbun Ames; Doolittle, Butler, second; Thompson, Hamilton, third; Enck, Penn State, fourth; Swanson, Illinois, fifth. Time—9m. 32 1-10s. *120-Yard High Hurdles*—Won by Barron, Penn State; Cook, Central Wesleyan, second; Ivey, Earlham, third; Brickman, Chicago, fourth; Sargeant, Michigan, fifth. Time—15 2-5s. *220-Yard Low Hurdles*—Won by Brookins, Iowa; Desch, Notre Dame, second; Ellis, Mississippi A. & M., third; Stolley, Wisconsin, fourth; Barron, Penn State, fifth. Time—24 1-5s. (New collegiate record. Former record of 24 4-5s. made by Desch, Notre Dame, in 1921.)

**FIELD EVENTS—Pole Vault**—Tie between Norris, California, and Landowski, Michigan, at 12 ft. 6 in., for first and second; tie between Devine, Iowa; Collins, Illinois; Hogan, Notre Dame; Merriol, Wisconsin, and Rogers, Kansas, at 12 ft., for third, fourth and fifth. (New collegiate record. Former record of 12 ft. made by Welch, Georgia Tech, in 1921.) *Shot Put*—Won by Merchant, California, 44 ft. 6 1/2 in.; Bronder, Pennsylvania, 44 ft. 3 1/2 in.; second; Whittier, California, 43 ft. 2 in.; third; Hulscher, Western State Normal, 43 ft. 1 1/2 in.; fourth; Keen, Texas A. & M., 42 ft. 6 in., fifth. *Running High Jump*—Tie between Murphy, Notre Dame, and Osborne, Illinois, 6 ft. 2 5-8 in., for first and second; Muller, California, 6 ft. 2 in., third; Clark, Amherst, 6 ft. 1 in., fourth; tie between Terver, California; Darling, Amherst; Campbell, Minnesota; Hoffman, Iowa; Turner, Nebraska; Jones, De Pauw; Woods, Butler; Platten, Wisconsin; and Shidecker, Ohio State, 5 ft. 9 in., for fifth. *Running Broad Jump*—Won by Legendre, Georgetown, 24 ft. 3 in.; Muller, California, 23 ft. 8 1/2 in.; second; Jones, De Pauw, third; Merchant, California, fourth; Osborne, Illinois, fifth. (New collegiate record. Former record, 23 ft. 3 3-8 in., made by Stinchcomb, Ohio State, in 1921.) *Discus Throw*—Won by Lieb, Notre Dame, 144 ft. 2 1/2 in.; MacGowan, Montana, 136 ft. 6 in., second; Gross, Minnesota, third; Muller, California, fourth; Frida, Chicago, fifth. (New collegiate record. Former record of 142 ft. 2 1/2 in., made by Pope, Washington, in 1921.) *Hammer Throw*—Won by Merchant, California, 161 ft. 4 in.; Palm, Penn State, 136 ft. 3 1/2 in.; second; Hill, Illinois, third; White, Ohio State, fourth; Schmidt, Michigan, fifth. (New collegiate record. Former record, 133 ft. 9 1/2 in., made by Redmon, Chicago, in 1921.) *Javelin Throw*—Won by Hoffmann, Michigan, 202 ft. 3 in.; Bronder, Pennsylvania, 190 ft. 9 1/2 in.; second; Sorrenti, California, 188 ft. 11 in., third; Angier, Illinois, 187 ft. 5 in., fourth; Welch, Georgia Tech, 173 ft. 3 1/2 in., fifth. (New collegiate record. Former record, 191 ft. 2 1/2 in., made by Hanner, Stanford, in 1921.)

**I. C. A. A. A. INDOOR CHAMPIONSHIPS.**  
Held New York City March 11. Point scores: Cornell, 35 1/2; Dartmouth, 25; Pennsylvania, 24; Princeton, 16; Penn State, 14; Yale, 12; Harvard, 8 1/2; Amherst, 6 1/2; Boston College, 6; Lafayette, 5; Brown, 4. Individual event winners: *Freshman Medley Relay*, 1 7-8 Miles—Won by University of

Pennsylvania; Dartmouth, second; Cornell, third; Yale, fourth; Harvard, fifth. Time—7m. 45 1-5s. **Pole Vault**—Won by Libbey, Dartmouth, 12 ft.; tie between S. J. Needs, Pennsylvania; S. F. Smith, Dartmouth; E. W. Gournlock, Cornell; Richard Stevens, Cornell, and Ted Gardner, Yale, 11 ft. 6 in., for second. **16-Pound Shot Put**—Won by Harrison S. Thompson, Princeton, 43 ft. 5½ in.; Edward F. Bell, Boston College, 41 ft. 9 in., second; John H. Lee, Dartmouth, 40 ft. 8 in., third; Leonard Thurnbull, Dartmouth, 40 ft. 6 in., fourth; R. Jordan, Yale, 40 ft. 2 in., fifth. **One-Mile Run**—Won by Larry Shields, Penn State; Malcolm Douglass, Yale, second; Edward B. Kirby, Cornell, third; William Burke, Harvard, fourth; Walter Higgins, Columbia, fifth. Time—4m. 20 8-10s. **Throwing 55-Pound Weight**—Won by J. F. Brown, Harvard, 47 ft. 11 in.; Humphrey R. Wagar, Cornell, 43 ft. 4½ in., second; H. E. Baker, Princeton, 43 ft. ¼ in., third; Merwin W. Swenson, Dartmouth, 40 ft. ½ in., fourth; Herbert D. Tobey, Cornell, 39 ft. 8½ in., fifth. (Decided at Columbia Field in afternoon.) **70-Yard Dash**—Won by J. A. Lecony, Lafayette; F. K. Lovejoy, Cornell, second; H. B. Lever, University of Pennsylvania, third; J. F. Carter, Brown, fourth; Victor Graeb, Columbia, fifth. Time—3-10s. **60-Yard High Hurdles**—Won by Harold Barron, Penn State; David W. Kimball, Cornell, second; Tony Fulman, Yale, third; H. H. Hille, Penn State, fourth; H. S. Thompson, Princeton, fifth. Time—7 4-5s. **One-Mile Relay**—Tie between Syracuse and Princeton; Massachusetts Institute of Technology, third; Boston College, fourth; Cornell, fifth. Time—3m. 22 4-6s. **Two-Mile Run**—Won by Norman P. Brown, Cornell; Robert C. Brown, Cornell, second; R. B. Whearty, Fordham, third; Charles J. Cooper, Penn State, fourth; J. G. Young, Dartmouth, fifth. Time—9m. 45 3-5s. **Running High Jump**—Won by Leroy Brown, Dartmouth, 6 ft. 4 7-8 in.; Robert H. Clark, Amherst, 6 ft. ½ in., second; tie between H. Troupe, Princeton, and V. B. Darling, Amherst, 5 ft. 10¼ in., for third; tie between P. Nichols, Cornell, and M. Morse, Harvard, 5 ft. 8¼ in., for fourth. **Running Broad Jump**—Won by S. Chow, University of Pennsylvania, 21 ft. 10¼ in.; A. M. Rose, University of Pennsylvania, 21 ft. 5¼ in., second; Paul Courtoss, New York University, 21 ft. 1¼ in., third; W. I. Ried, Brown University, 21 ft., fourth; V. L. Chum, Dartmouth, 20 ft. 6¼ in., fifth.

# CONFERENCE INDOOR CHAMPIONSHIPS.

Held at Evanston, Ill., Mar. 13. Point winners: Illinois, 44 6-7; Wisconsin, 22 11-21; Ohio State, 8¼; Iowa, 8 1-3; Michigan, 7 1-3; Minnesota, 5½. Individual event winners: **One-Mile Run**—Won by McGinnis, Illinois; Patterson, Illinois, second; Wilkoff, Ohio, third; Sweitzer, Minnesota, fourth. Time—4m. 25 3-5s. **Fifty-Yard Dash**—Won by Brookins, Iowa; Ayres, Illinois, second; Moorehead, Ohio State, third; Spetz, Wisconsin, fourth. Time—5 2-5s. **440-Yard Run**—Won by Spetz, Wisconsin; Pyott, Chicago, second; Schlappprizl, Illinois, third; Sweet, Illinois, fourth. Time—52 3-5s. **60-Yard High Hurdles**—Won by Knollin, Wisconsin; Johnson, Illinois, second; Sargent, Michigan, third. Time—7 3-5s. **One-Mile Relay**—Won by Illinois; Iowa, second; Chicago, third; Wisconsin, fourth. Time—3m. 30 2-5s. **Pole Vault**—Tie between Merrick, Wisconsin, and Landowski, Michigan, for first; tie between Faust, Northwestern, Collins, Illinois, Chandler, Illinois, Hawker, Minnesota, McClure, Wisconsin, Hammann, Wisconsin, and Teal, Purdue, for third and fourth. Height—12 ft. 6 in. **Two-Mile Run**—Won by Wharton, Illinois; Swanson, Illinois, second; Scott, Illinois, third; Furnas, Purdue, fourth. Time—9m. 41 3-5s. **880-Yard Run**—Won by Yates, Illinois; Hirt, Minnesota, second; Wilkoff, Ohio State, third; Wroter, Minnesota, fourth. Time—1m. 58 2-5s. **High Jump**—Won by Osborne, Illinois; tie between Platten, Wisconsin, and Moorehead, Ohio State, for second and third, tie between Anderson, Minnesota, McEllven, Michigan, Smith, Michigan, Gibson, Wisconsin, Hoffman, Iowa, and Conn, Iowa, for fourth. Height—6 ft. 2½ in. **Shot Put**—Won by Dahl, Northwestern, Sundt, Wisconsin, second; Cannon, Illinois, third; Stipe, Michigan, fourth. Distance—42 ft. 6 in.

## PENNSYLVANIA RELAY CARNIVAL.

Twenty-eighth Annual Relay Championships held at Franklin Field, Philadelphia, April 23-29. College Pentathlon Championship won by Robert Legendre, Georgetown. Results by events: **PENTATHLON—Running Broad Jump**—Won by Robert Legendre, Georgetown, 22 ft. 8¼ in.; C. Reinartz, Muhlenberg, 21 ft. 1½ in., second; F. Byrd, Virginia Poly. Institute, 21 ft. 2½ in., third; Charles West, Washington and Jefferson, 20 ft. 8 in., fourth; Emery, Princeton, 20 ft. 2½ in., fifth; Vernon Clapp, United States Naval Academy, 19 ft.

9 1-8 in., sixth; F. Moroney, Georgetown, 19 ft. 6¼ in., seventh; Taylor, United States Naval Academy, 19 ft. 4¼ in., eighth. **Throwing the Javelin**—Won by Legendre, 171 ft. 1 in.; West, 168 ft., second; Reinartz, 165 ft. 4 in., third; Moroney, 159 ft. 8½ in., fourth; Emery, 149 ft. 9½ in., fifth; Clapp, 149 ft. 3¼ in., sixth; Taylor, 138 ft. 10¼ in., seventh; Byrd, 132¼ ft., eighth. Former record by W. Bartels, Penn, 168 ft. 11¼ in., in 1921. **1,600-Metre Run**—Won by Emery, 4m. 35 3-5s; West, 4m. 44 4-5s., second; Legendre, 4m. 48 4-5s., third; Clapp, 5m. 26s., fourth; Moroney, 5m. 52 1-5s; fifth; Reinartz, 5m. 52 4-5s., sixth. **200-Metre Run**—Won by Legendre, 22 1-5s. He beat Clapp, who finished in 24 2-5s, in their third heat. First heat, Reinartz won in 23s, from Emery, 22 2-5s.; third, Byrd, 26 4-5s., second heat, West, 23 1-5s.; Clapp, 24 2-5s., fourth. (New record. Former mark, 22 2-5s., by J. H. Berry, Penn, 1917.) **Throwing Discus**—Won by Clapp, 121 ft. ½ in.; Legendre, 112 ft. 3¼ in., second; Moroney, 109 ft. 9¼ in., third; Reinartz, 105 ft. 7 in., fourth; Byrd, 102 ft. 6 in., fifth; Emery, 100 ft. 5 in., sixth; West, 80 ft. 8¼ in., seventh. **440-Yard Hurdles** (10 hurdles 2 ft. 6 in. high)—Won by W. G. Harmer, University of Delaware; K. M. McCreary, Ohio State, second; Thomas F. Allen, Lafayette, third; J. W. Green, Ohio State, fourth; A. B. Alderette, Washington and Jefferson, fifth. Time—56 2-5s.

## RELAY CHAMPIONSHIPS—American College

**Championship Sprint**, Medley Relay (first man ran 440 yards, second and third men 220 yards each, and fourth man 88 yards)—Won by Pennsylvania (J. Holden, H. Lever, E. Gill, Brown); Syracuse (A. Monie, A. Woodring, W. Stone, H. Smith), second; United States Naval Academy, third; Princeton, fourth. Time—3m. 33 1-5s. **One-Quarter-Mile College Relay Championship**—Won by Pennsylvania (H. Lever, C. Altmaler, V. Welch, C. Sharkey); Lafayette, second; Ohio State, third; Georgetown, fourth. Time—43 2-5s. (First time in championships.) **One-Mile College Relay Championships**—Won by Syracuse (Stone, Monie, Smith and Woodring); Princeton, second; Chicago, third; Massachusetts Institute of Tech, fourth. Time—3m. 19 2-5s. **One-Half-Mile College Relay Championship of America**—Won by Georgetown (Legendre, Birch, Byrd and Gaffney); Ohio State, second; University of Pennsylvania, third. Time—1m. 30 3-5s. **Two-Mile College Relay Championship**—Won by University of Pennsylvania (G. Meredith, McMullin, Hanlon and Brown); Pennsylvania State College (Enck, Edgerton, Shields and Helfrich), second; Georgetown, (Masters, Brewster, Higgins and Connolly), third. Time—7m. 49 2-5s. (New world's record.) **Four-Mile College Relay Championship**—Won by Cornell (Strickler, R. Brown, N. Brown and Carter); Ohio State, second; Yale, third; Columbia, fourth. Time—17m 56 3-5s. **Class B One-Mile College Relay Championship**—Won by Boston College (Nolan, Kinley, Dillon and Driscoll); Columbia, second; Navy, third; Pittsburgh, fourth. Time—3m. 24 1-5s. **One-Mile Freshman College Relay Championship**—Won by University of Pennsylvania (Kehoe, Mitchell, Jensen and Hayes); Syracuse, second; Navy, third. Time—3m. 28s. **Middle Atlantic States Conference A. A. Mile Relay**—Won by Rutgers (De Witt, Robinson, Beattie and Ray); Lehigh, second; Bucknell, third; Swarthmore, fourth. Time—3m. 24 1-5s. **South Atlantic I. A. A. Mile Championship**—Won by University of Virginia (Ganmon, Talbot, Bohansson and Baker); Georgetown, second; Johns Hopkins, third. Time—3m. 23s. **College Class, One-Mile Relay**—Won by George Washington University; Gallaudet College, second; Juniata College, third; Pennsylvania City of New York, second; Ursinus, third. Time—3m. 40 3-5s. **College Class, One-Mile Relay**—Won by Bates; Hamilton College, second; Colby, third. Time—3m. 28s. **College Class, One-Mile Relay**—Won by Bucknell; University of Maryland, second; Washington and Jefferson, third. Time—3m. 29 2-5s. **College Class, One-Mile Relay**—Won by Carnegie Institute of Technology; Rensselaer Polytechnic Institute, second; Northeastern, third. Time—3m. 32s. **College Class, One-Mile Relay**—Won by Colgate; Brown, second; University of Maine, third. Time—3m. 27 1-5s.

## HIGH SCHOOL RELAYS—Class B, High

**School One-Mile Relay Championship**—Won by Germantown High; Harrisburg Technical High School, second; De Witt Clinton High, third. Time—3m. 7s. **Intercollegiate Two-Mile Relay Championship**—Won by Hamilton College; College Institute of Canada (Barnes, Christie, Thompson and Bascom); Lakewood (Ohio) High School, second; Rochester Prep School, third. Time—8m. 27 3-5s. **One-Mile High School Relay Championship**—Won by Hamilton College; College Institute of Canada (Sheu;

Christie, Bascom and Smith); Lakewood (Ohio) high, second; Brooklyn High, third; Medford (Mass.) High, fourth. Time—3m. 32 2-5s. *One-Mile Preparatory School Relay*—Won by Brown Prep.; Baltimore Friends, second; Pennsylvania Institute for Deaf, third. Time—3m. 42s. *One-Mile Preparatory School Relay*—Won by Potomac State; Franklin and Marshall Academy, second; Salle Prep., third. Time—3m. 41 1-5s. *Class Preparatory School One-Mile Relay Championship*—Won by Brooklyn Poly Prep.; St. Benedict's Prep., second; Bethlehem Prep., third. \* Dead heat, stakes divided.

NOTE. The Derby of 1915-6-7-8 was run at Newmarket as the "New" Derby. The 1920 Derby was won in record time of 2 minutes 34 4-5 seconds; previous best time being Lemberg's, 1910, 2 minutes 35 1-5 seconds.

The 1921 Derby was run on June 1. Humorist at 12 to 1 in the betting, won in a hard drive by a neck from Viscount Astor's Craig an Eran, while three lengths back Joseph Watson's Lemonora finished third, and Allen Breck, the favorite, fourth. A. K. Macomber's The Bohemian, an American bred horse was never prominent and finished among the also rans. The time was 2 minutes, 45 seconds. The King and Queen were present.

**THE 1922 DERBY.**

The 1922 Derby was won in a canter in the record

**1922 CALCUTTA**

The winner of the Calcutta sweepstakes, a Liverpool woman, Miss Gwendoline Thomas, thirty-four, is the sole support of her widowed mother. Miss Thomas would have won £122,000 but she

time of 2 minutes, 34 3-5 seconds. Tamar, owned by Lord Astor, was second; Craigaugower, third; and the betting favorite, St. Louis, fourth.

The Derby was instituted by the twelfth Earl of Derby in 1780. A year earlier the same racing peer had started the Oaks, named after his place at Banstead Downs—the Valley of Lambert's Oaks. Lord Derby won his own race in 1787 with Sir Peter Teazle, named thus in honor of his wife, who was Miss Farren, and had been acting as Lady Teazle in "The School for Scandal," when Lord Derby saw her for the first time. On May 18, 1847, Lord George Bentinck moved the adjournment of the House of Commons over Derby Day. This motion was moved each year until 1879.

The Derby course on Epsom Downs is left-handed, and consists of two straights and a turn—the historic Tottenham Corner.

**SWEEPSTAKES.**

He sold half her ticket for £3,000 to a Calcutta man. Her winnings, therefore, amount to £64,000 and are free from income tax, as the authorities do not recognize income from such a source.

## FOOTBALL.

intercollegiate football developed marvellous popularity in 1922, record throngs attending many big games in all parts of the country and the largest stadiums were unable to accommodate all who desired to witness the play. The scores of a few of the leading college teams follow:

WESTERN INTERCOLLEGIATE CONFERENCE.

Iowa and Michigan completed their Conference season without defeat and as they did not meet the question of supremacy was undecided. The record of the "Big Ten" colleges in Conference play for the 1922 season is appended:

| COLLEGE.       | Won. | Lost. | Tied. | Pts. | Op. Pts. | COLLEGE.        | Won. | Lost. | Tied. | Pts. | Op. Pts. |
|----------------|------|-------|-------|------|----------|-----------------|------|-------|-------|------|----------|
| Iowa.....      | 5    | 0     | 0     | 141  | 33       | Illinois.....   | 2    | 4     | 0     | 19   | 50       |
| Michigan.....  | 4    | 0     | 0     | 70   | 13       | Northwestern..  | 0    | 3     | 1     | 44   | 78       |
| Chicago.....   | 4    | 0     | 1     | 50   | 16       | Ohio State..... | 1    | 4     | 0     | 24   | 55       |
| Wisconsin..... | 2    | 2     | 1     | 40   | 16       | Indiana.....    | 0    | 2     | 1     | 7    | 47       |
| Minnesota..... | 2    | 3     | 1     | 57   | 65       | Purdue.....     | 0    | 3     | 1     | 20   | 99       |

RECORDS OF CHIEF FOOTBALL GAMES IN PAST YEARS.

(During America's participation in the World War most of the big college teams did not play.)

|      | Army vs. Navy |    | Army vs. Yale |    | Cornell vs. Penna. |    | Harvard vs. Yale |    | Harvard vs. Princeton |    | Lafayette vs. Penna. |    | Princeton vs. Yale |    |
|------|---------------|----|---------------|----|--------------------|----|------------------|----|-----------------------|----|----------------------|----|--------------------|----|

LACROSSE.

Lacrosse gained further popularity as a college sport during the season of 1922, due in part to the tour of the Oxford-Cambridge University combination from England. The northern section championship of the Intercollegiate League was won by the Syracuse University team without a defeat. The southern section play resulted in a tie, the University of Pennsylvania team winning in the playoff. The record of the leading college twelves, including non-league games, follows:

| TEAM.             | Won. | Lost. | Per Cent. |
|-------------------|------|-------|-----------|
| Syracuse.....     | 17   | 0     | 1.000     |
| Navy.....         | 7    | 0     | 1.000     |
| Maryland.....     | 7    | 1     | .875      |
| Princeton.....    | 6    | 2     | .750      |
| Army.....         | 5    | 2     | .714      |
| Rutgers.....      | 5    | 2     | .714      |
| Hopkins.....      | 7    | 3     | .700      |
| Hobart.....       | 5    | 3     | .625      |
| Cornell.....      | 5    | 4     | .555      |
| Pennsylvania..... | 5    | 5     | .500      |
| Lehigh.....       | 5    | 5     | .500      |

The Oxford-Cambridge combination played twelve games with the United States college teams for possession of the International Lacrosse Cup, winning seven and losing 5. The results follow:

|                       |    |                         |    |
|-----------------------|----|-------------------------|----|
| Oxford-Cambridge..... | 8  | Lehigh Univ.....        | 2  |
| Oxford-Cambridge..... | 6  | Penn State College..... | 0  |

## WOMEN'S ATHLETICS.

Athletics for women received a great impetus throughout the country during the season of 1922 when a team of schoolgirl athletes representing the United States competed in the first international meet held in Paris, August 20, and won second place. Development of track and field sports for women is progressing in all parts of the country and it is expected that the Amateur Athletic Union will assume jurisdiction of women's athletics in the United States before 1923 and that the country will be represented by a women's team in the Olympic Games of 1928 at Amsterdam when events for women are planned for the program at those games.

## INTERNATIONAL MEET.

First international games for women held at Paris, Aug. 20. Point scores: England 50; United States 31; France 29, Czechoslovakia 12; Switzerland 6. Results of events:

80-Metre Dash—Won by Mlle. B. Mejzlikova, Czechoslovakia; Miss Lines, England, second; Miss Callebout, England, third; Mlle. Maugars, France, fourth. Time—7 3-6s. (World's record.)

100-Yard Dash—Won by Miss Callebout, England; Mlle. A. Mejzlikova, Czechoslovakia, second; Miss Lines, England, third; Mlle. Prost, France, fourth. Time—12s.

300-Metre Run—Won by Miss Lines, England; Miss Cast, England, second; Mlle. A. Darreau, France, third; Miss Lucille Godbold, United States, fourth. Time—44 4-5s.

100-Yard Hurdles—Won by Miss Camella Sabie, United States; Miss Carrie Hatt, England, second;

Mlle. Therese Laloz, France, third; Miss Flora Batson, United States, fourth. Time—14 2-5s.

1,000-Metre Run—Won by Mlle. Brea d. France; Mlle. Lenor, France, second; Miss Hall, England, third; Miss Godbold, United States, fourth. Time—3m. 12s. (World's record.)

440-Yard Relay—Won by England; France, second; Czechoslovakia, third; United States, fourth. Time—51 4-5s.

Standing Broad Jump—Won by Miss Camella Sabie, United States; Miss Hughes, England, second; Mlle. Comte, France, third; Miss Birkenough, England, fourth. Distance—2 metres 4.85 centimetres.

Running Broad Jump—Won by Miss Lines, England; Miss Elizabeth Stine, United States, second; Miss Camella Sabie, United States, third; Miss Carrie Hatt, England, fourth. Distance—5.06 metres.

Running High Jump—Miss Nancy Voorhees, United States, and Miss Carrie Hatt, England, tied for first place at 1.45 metres; Miss Lowman, England, third; Mlle. Gerner, France, fourth.

Putting 8-Pound Shot—Won by Miss Lucille Godbold, United States; Mme. Gouraud Morris, France, second; Miss Maud Rosenbaum, United States, third; Mlle. A. Mejzlikova, Czechoslovakia, fourth. Distance—20 metres 22 centimetres.

Throwing the Javelin—Won by Mlle. Palanzola, Switzerland; Mlle. Gancel, France, second; Miss Flora Batson, United States, third; Mlle. Grosilmond, Switzerland, fourth. Distance—43 metres 25 centimetres.

## WOMEN'S WORLD ATHLETIC RECORDS.

Recognized by the International Women's Sports Federation to September 1, 1922.

| EVENT.                                       | Time.              | Holder.               | Nation.     | Yr.  |
|----------------------------------------------|--------------------|-----------------------|-------------|------|
| 50 yards.                                    | 6 sec.             | E. Maebeth.           | America     | 1920 |
| 50 metres.                                   | 6 2-5 sec.         | Mejzlikova, II.       | Czechoslov. | 1922 |
| 60 metres.                                   | 7 3-5 sec.         | Mejzlikova, II.       | Czechoslov. | 1922 |
| 75 yards.                                    | 8 3-5 sec.         | L. Haydock.           | America     | 1913 |
| 80 Metres.                                   | 10 sec.            | Mejzlikova, II.       | Czechoslov. | 1922 |
| 100 yards.                                   | 11 2-5 sec.        | Mejzlikova, II.       | Czechoslov. | 1922 |

The annual individual championship was won by Leon Brown of Commerce High.

Rhode Island Championship, Providence, February 22—Won by Joseph C. Cook of the Providence Chess Club.

Manhattan C. C. Championship—Won by Morris A. Schapiro, score of 9-1. Other leading scores: R. T. Black, 7½-2½; J. Rosenthal, 7-3; J. Liebling, 6½-3½; S. Katz, 5½-4½.

New Jersey State Championship, Newark, February 22—Won by John W. Brunnemer of Hillsdale;

W. J. Vandervoort, Newark, second; H. E. Holbrook, Newark, third; Otto G. Horster, Newark, fourth.

Pan-American Cable Match—Between the Manhattan C. C., New York and Argentine Chess Club, Buenos Ayres, April 23—Won by New York by 3½-2½.

International Tournament at Plistyan, Czechoslovakia, April 7-29—Won by E. D. Bogoljubow, score of 15-3. Other leading scores: A. Aljechin and R. Spielmann, each 14½-8½; E. Gruenfeld, 11-7; R. Reti, 10½-7½.

International Congress in London, July 31-August 19—Won by Jose R. Capablanca, score of 13-2. Other leading scores: A. Aljechin, 11½-3½; Dr. M. Vidmar, 11-4; A. Rubinstein, 10½-4½; E. D. Bogoljubow, 9-6; R. Reti and Dr. S. Tartakower, each 8½-6½.

Metropolitan Chess League—Won by the Marshall Chess Club with ten matches out of eleven and a total score of 62½ games: Rice-Progressive C. C., second, with 9½ matches and 62 games; Manhattan C. C., third, with 8½ matches and 56 games; Newark C. C., fourth, with 8½ matches and 52½ games; Brooklyn C. C., fifth, with 7 matches and 46½ games; Staten Island C. C., sixth, with 6½ matches and 43 games.

Western Championship Tournament, Louisville, Ky., August 28-September 5—Won by Samuel Factor, Chicago, total of 9½-1½; second, N. T. Whitaker, Washington, 9-2; third, Edward Lasker, Chicago, 8½-2½; fourth, J. W. Shewalter, Georgetown, Ky., 8-3.

Hastings International Tournament, Hastings, England, September 10-21—Won by A. Aljechin, score of 7½-2½; second, A. Rubinstein, 7-3; third and fourth, E. D. Bogoljubow and Sir George Thomas, each 4½-5½.

New York Masters' Tournament, Chess Club International, October 7-16—Won by Edward Lasker, Chicago, score of 4-1; second, C. Jaffe, New York, 3-2; tie for third prize between J. Bernstein, H. R. Bigelow, D. Janowski and S. Rzeschewski, each 2-3.

New York vs. Chicago by Printing Telegraph, April 1, between Western Electric Co. engineers in New York and the Hawthorne Station in Chicago. Result—a tie with a score of 5-5.

Masters' Tournament at Teplitz, Schoenau, Czechoslovakia, September. Won by R. Reti and R. Spielmann (tie), each 9-4; second and third, E. Gruenfeld and Dr. S. Tartakower, each 8½-4½; fourth, A. Rubinstein, 8-5.

## ARCHERY.

The 42d Annual Championship Tournament of the National Archery Association of the United States, was held in Cooperstown, New York, August 22 to 25 and was known as "The Robin Hood Tournament." Chief among the new trophies was the Douglas Fairbanks' Robin Hood Trophy. Other new trophies were the Mald Marion Cup presented by Wallace Bryant of Washington, D. C., the Leatherstocking Cup presented by James Fenimore Cooper of Cooperstown, New York, and a cup also presented by Wallace Bryant for the best score at 80 yards.

Competition for the men's championship narrowed down to the 1921 champion, James S. Jiles of Pittsburgh, Pa., and Dr. Robert P. Elmer of Wayne, Pa., who had held the championship for a number of years previous to 1921. Dr. Elmer finally winning. Among the ladies Miss Dorothy D. Smith of Newton Center, Mass., was successful in defending her championship title.

In connection with Dr. Elmer's shooting he won the Double York Round with a score of 1,039. In two previous championship tournaments Dr. Elmer had made over 1,000 in the Double York Round, the present tournament being the third at which he had accomplished this feat. H. A. Ford, of England, is the only other archer who ever made over 1,000 in the Double York Round at three championship meets.

The only records which were broken were in the team shoots. The Robin Hood Team from the Wayne Archers, and composed of Dr. R. P. Elmer, W. H. Palmer Jr., J. M. Mauser and W. H. Palmer 3d, not only won the championship for the men's team shoot, but broke the previous record of 1,680 by making a total of 1,691. The ladies' team from the Newton Archers, of Newton, Mass., composed of Miss Dorothy D. Smith, Mrs. L. C. Smith, Miss Norma Pierce and Mrs. E. W. Frentz, also broke the women's team record of 1,517 by making a new score of 1,525.

A special contest for the Douglas Fairbanks' Robin Hood Trophy was staged, consisting of a long-range wand shoot. A band two inches wide was placed vertically across each target and the contestants

each shot 48 arrows at a distance of 100 yards. Only the arrows which lodged in the narrow band counted. This event was won by Dr. R. P. Elmer with three hits in the band.

A special event was also staged for the Leatherstocking Cup. This event was participated in by both men and women, the men shooting 48 arrows at 60 yards and the women 48 arrows at 40 yards. The cup was won by W. H. Palmer Jr., of Wayne, Pa., with a total of 273 points. Miss Dorothy D. Smith was a close second with 266 points.

The winners in the various events are as follows: Men's Championship—Dr. R. P. Elmer, Wayne, Pa., 2,488 points.

Women's Championship—Miss Dorothy D. Smith, Newton Center, Mass., 1,616 points.

Double York Round—Dr. R. P. Elmer, 219 hits, score, 1,039.

Double American Round—Dr. R. P. Elmer, 178 hits, score, 1,052.

Double National Round—Miss Dorothy D. Smith, 120 hits, score, 552.

Double Columbia Round—Miss Dorothy D. Smith, 140 hits, score, 804.

## WINNING MEN'S TEAM.

Robin Hood Team From Wayne Archers—R. P. Elmer, 93 hits, score, 523; W. H. Palmer Jr., 92 hits, score, 476; J. M. Mauser, 89 hits, score, 463; W. H. Palmer 3d, 53 hits, score, 229.

## WINNING WOMEN'S TEAM.

Newton Archers—Miss Dorothy D. Smith, 90 hits, score, 400; Miss Norma Pierce, 82 hits, score, 416; Mrs. E. W. Frentz, 81 hits, score, 408; Mrs. L. C. Smith, 72 hits, score, 306.

Robin Hood Contest for Douglas Fairbanks' Robin Hood Trophy—Won by Dr. R. P. Elmer with 3 hits in the wand.

Leatherstocking Cup Contest—Won by W. H. Palmer Jr., Wayne, Pa., with 47 hits, score, 273.

## GARLAND CONTEST.

For Leatherstocking Spoons Donated by James Fenimore Cooper—Won by Miss Dorothy D. Smith. Clout Shoot—Won by Dr. R. P. Elmer with score of 36.

**SIX-DAY BICYCLE RACE.**

Held at Madison Square Garden, New York City, Dec. 3 to 9, 1922. Final standing end of 143 hours riding:

| TEAM.                | Points. | Miles. | Laps. | TEAM.                  | Points. | Miles. | Laps. |

\*The only title race run at the 1914 world's championship meeting at Copenhagen, Denmark, was the 100-kilometre amateur paced race. The other events were curtailed on account of the breaking out of the war.

Motor-paced championship for amateurs not run at Antwerp in 1920. A 190-kilometre (118 miles) road race was substituted at Copenhagen in 1921. G. Skold, Sweden, won from W. Nielsen, Denmark, and C. F. Davey, England, in 6h. 18m. 17s.

Motor-paced championships for amateurs were discontinued after the 1914 races.

### FENCING.

**National Senior Championship**—Folls, Major H. Raynor, U. S. A. and Washington F. C.; sabre, N. Nunes, New York A. C.; epee, L. Nunes, New York A. C. **National Junior Championship**—Folls, P. Walker, Jr., Yale University; sabre, J. G. Bartol, New York A. C.; epee, N. Murray, W. S. F. C. **National Senior Team Championship**—Folls, New York Fencers' Club; sabre, New York A. C.; epee, New York Fencers' Club. **National Junior Team Championship**—Folls, New York French F. M. C. A.; sabre, New York A. C.; epee, New York Washington Square F. C.

**National Outdoor Epee Championship**—Won by Ibert Strauss, New York French F. M. C. A.

**National Women's Championships**—Won by Miss Alice Gehrig.

**Intercollegiate Championships**—Final standing, foil teams, bouts won and lost: Navy, 45-9; Harvard, 33-21; Columbia, 30-24; Dartmouth, 28-26; Yale, 28-26; Mass. Tech., 16-38; Pennsylvania, 9-45. Navy also won the team sabre and epee championship. Individual winners: foils, Shears, Navy, 17-1; sabre, Gulder, Navy, 10-1; epee, Calloway, Navy, 10-1.

**International Amateur Foils Championship**—Special match between M. Goudin, France, and N. Nadi, Italy, held at Paris, France. Won by Goudin, 20 points to 11. The match was for a 50,000 francs purse which the winner contributed to charity. Many thousands of francs were wagered by the adherents of the two contestants.

**OFFICIAL MOTORCYCLE RECORDS.**

(To November 15, 1922).

**OFFICIAL STRAIGHTAWAY WORLD MOTORCYCLE RECORDS.**

(Daytona Beach, Fla., April 14-15, 1920.)

The kilometre eight-valve record stands officially as the greatest speed ever attained by a motorcycle—115.79 miles per hour.

A.; Hilda James, Garston, S. E., second; Frances Cooney, W. S. A., third. Time—2m. 49 1-5s. **440 Yards**—Held under the auspices of New Brunswick, B. C., at New Brunswick, N. J., on Sept. 2, 1922. Won by Gertrude Ederle, W. S. A.; Helen Wainwright, W. S. A., second; Hilda James, Liverpool, Eng., third. Time—6m. 1 1-5s. **880 Yards**—Held at Santa Barbara, Cal., on July 4, 1922—Won by Helen Wainwright, W. S. A.; Ethel McGary, W. S. A., second; Marie Curtis, L. A. A. C., third. Time—13m. 5s. **One Mile**—Held under the auspices of Women's Swimming Assn., at Manhattan Beach, N. Y., on Aug. 14, 1922—Won by Helen Wainwright, W. S. A.; Hilda James, Liverpool, Eng., second; Lillian Stoddard, W. S. A., third. Time—26m. 44 4-5s. **Long Distance**—Awarded to Central Association. Not held. **High Diving**—Held under the auspices of Women's Swimming Assn., in the Manhattan Beach Lagoon, at Manhattan Beach, N. Y., on Sept. 16, 1922—Won by Helen Meany, W. S. A.; Josephine Meany, W. S. A., second; Katherine Brown, W. S. A., third. 81.3 points. **Fancy Diving**—Held under the auspices of the Chicago Aquatic Club, at Municipal Pier, Chicago, Ill., on Aug. 9, 1922—Won by Helen Meany, W. S. A.; Alleen Rigin, W. S. A., second; Helen Wainwright, W. S. A., third. **100 Yards Breast Stroke**—Held under the auspices of Detroit A. A. A., at Detroit, Mich.—Won by Edna O'Connell, I. A. C.; Dorothy Andre, So. East H. S. of Detroit, second; Ruth Wild, So. East H. S. of Detroit, third. Time—1m. 34 1-5s. **100 Yards Back Stroke**—Held under the auspices of Indianapolis A. C., in the Broad Ripple pool, at Indianapolis, Ind., won by Sybil Bauer, Illinois A. C.; Helen Wainwright, W. S. A. of N. Y., second; Alleen Rigin, W. S. A. of N. Y., third; Thelma Darby, Indianapolis, fourth. Time—1m. 17 3-5s. **400 Yards Relay**—Held under the auspices of Women's Swimming Assn., in the Manhattan Beach Lagoon, at Manhattan Beach, N. Y., on Sept. 16, 1922—Won by W. S. A. (H. Wainwright, A. Rigin, E. McGary and G. Ederle); W. S. A. (D. O'Mara, E. Baker, H. Meany and F. Cooney), second; W. S. A. (E. Ursprung, M. MacFarlane, D. Wesley and D. Donohue), third. Time—4m. 32 3-5s. **Pentathlon**—Not awarded. **Medley**—Held under the auspices of Indianapolis A. C., in the Broad Ripple pool, at Indianapolis, Ind., on Aug. 12, 1922—Won by Hilda James, Liverpool, Eng.; Sybil Bauer, Illinois A. C., second; Helen Wainwright, N. Y. W. S. A., third. Time—4m. 40 4-5s.

#### JUNIOR CHAMPIONSHIPS.

**50 Yards**—Awarded to Niagara Assn. Not held. **100 Yards**—Awarded to Southeastern Assn.—No report. **280 Yards**—Held under the auspices of Hoosier Athletic Club, in the Broad Ripple pool, at Indianapolis, Ind., on July 20, 1922—Won by Euphrasia Donnelly, Hoosier A. C.; Minnie DeVry, Illinois A. C., second; Dorothy Moore, Hoosier A. C., third. Time—3m. 7 4-5s. **440 Yards**—Held under the auspices of Hawaiian Assn., A. A. U., in the Naval Slip Piers pool, at Honolulu, T. H., on June 24, 1922—Won by Helen Moses, Outrigger Canoe Club; L. Bowmer, Outrigger Canoe Club, second. Time—6m. 37 1-5s. **880 Yards**—Held under the auspices of N. Y. Women's Swimming Assn., at the Woodmere C. Y. Woodmere, L. I., on Aug. 17, 1922.—Won by Doris O'Mara, N. Y. W. S. A.; Virginia Whitmach, N. Y. W. S. A., second; Francis Cooney, N. Y. W. S. A., third. Time—14m. 43s. **One Mile**—Awarded to Southern Pacific Assn.—No report. **Long Distance**—Awarded to Southeastern Assn.—Not held. **High Diving**—Awarded to Metropolitan Assn.—Not held. **Fancy Diving**—Awarded to Pacific Northwest Assn.—Not held. **100 Yards Back Stroke**—Held under the auspices of Indianapolis A. C., in the Broad Ripple pool, at Indianapolis, Ind., Aug. 10, 1922—Won by Helen Wainwright, N. Y. W. S. A.; Alleen Rigin, N. Y. W. S. A., second; Hilda James, Liverpool, Eng., third; Bessie Ryan, Ambassador S. C., fourth. Time—1m. 26 2-5s. **100 Yards Breast Stroke**—Awarded to Central Assn.—No report. **400 Yards Relay**—Held under the auspices of Hawaiian Assn., A. A. U., in the Naval Slip Pier, at Honolulu, Hawaii, on June 24, 1922—Won by Outrigger C. C. (Lillie Bowmer, E. Cassidy, Helen Moses and M. Wehselau); Hui Makani Club (M. Akana, K. Kahanamoku, H. Miller and E. Westcott), second. Time—4m. 38s. **Pentathlon**—Not awarded. **Medley**—Not awarded.

**WORLD AND AMERICAN SWIMMING RECORDS.**

World swimming records must be officially recognized by the International Amateur Swimming Federation. The Federation meets annually and records are frequently recognized a year or more after being made. Many American records made in 1922 are also world records as yet unsanctioned. American records are based upon short courses, from 60 feet to 220 yards, and long courses, from 220 feet to 220 yards.

**WORLD'S RECORDS TO JANUARY 1, 1921.**

| DISTANCE.             | Name.             | Country.      | Time.         | Date.         | Place.        | Length of Course. |
|-----------------------|-------------------|---------------|---------------|---------------|---------------|-------------------|
| 100 yds.              | D. P. Kahanamoku. | United States | 53s.          | Sept. 5, 1917 | Honolulu      | 100 yds.          |
| 100 met.              | D. P. Kahanamoku. | United States | 60 2-5s.      | Aug. 24, 1920 | Antwerp       | 100 met.          |
| 150 yds.              | H. E. Vollmer     | United States | 1m. 29 4-5s.  | Jan. 10, 1916 | New York      | 25 yds.           |
| 200 met.              | Norman Ross       | United States | 2m. 21 3-5s.  | Nov. 24, 1916 | San Francisco | 33 1-3 yds        |
| 220 yds.              | Norman Ross       | United States | 2m. 21 3-5s.  | Nov. 24, 1916 | San Francisco | 33 1-3 yds        |
| 300 yds.              | Norman Ross       | United States | 3m. 2 4-5s.   | Sept. 7, 1920 | Exeter        | 25 yds.           |
| 300 met.              | Norman Ross       | United States | 3m. 45 2-5s.  | Jan. 17, 1920 | Brisbane      | 25 yds.           |
| 400 met.              | Norman Ross       | United States | 5m. 14 3-5s.  | Oct. 9, 1919  | Los Angeles   | 33 1-3 yds        |
| 440 yds.              | Norman Ross       | United States | 5m. 14 3-5s.  | Oct. 9, 1919  | Los Angeles   | 33 1-3 yds        |
| 500 yds.              | Norman Ross       | United States | 5m. 58 4-5s.  | Oct. 9, 1919  | Los Angeles   | 33 1-3 yds        |
| 880 yds. (half mile)  | Norman Ross       | United States | 6m. 55 4-5s.  | Feb. 26, 1920 | Sydney        | 110 yds.          |
| 1,000 yds.            | D. Billington     | Great Britain | 11m. 24 1-5s. | Jan. 10, 1920 | Sydney        | 110 yds.          |
| 1,000 met.            | F. E. Beaufepatre | Australia     | 13m. 34 4-5s. | July 22, 1905 | Liverpool     | 125 yds.          |
| 1,500 met.            | G. R. Hodgson     | Canada        | 14m. 31s.     | Feb. 14, 1920 | Adelaide      | 110 yds.          |
| 1,760 yds. (one mile) | G. R. Hodgson     | Canada        | 22m.          | July 10, 1912 | Stockholm     | 100 met.          |
|                       |                   |               | 23m. 34 1-2s. | July 10, 1912 | Stockholm     | 100 met.          |

**AMERICAN RECORDS.**

| DISTANCE.           | Time.         | Winner.           | Place.              | Date.          | Kind of Course. |

\* Indoor record.

## VAULTING.

Pole vault for height (outdoor)—13 ft. 3 9-16 in., Frank K. Poss, Chicago A. A., Chicago, Ill., Aug. 23, 1919; (indoor), 12 ft. 8 1-4 in., E. E. Myers, Chicago, March 11, 1922.

Pole vault for distance (indoor)—28 ft. 2 in., Platt Adams, New York City, Oct. 31, 1910.

## THROWING THE HAMMER.

Regulation hammer, A. A. U. rules, weight (including handle) 16 lbs., entire length 4 feet, thrown from 7-foot circle.

## CROSS-COUNTRY, MARATHON.

National Amateur Athletic Union senior six-mile cross-country championship, held at Van Cortlandt Park, New York, November 25. Order of finish, first ten runners: W. Ritola, Finnish-American A. C., 34m. 37s., first; R. Earl Johnson, Edgar Thomson Steel Co., Pittsburgh, Pa., 35m. 41s., second; I. Prim, Finnish-American A. C., 36m. 21s., third; M. Rick, New York A. C., 36m. 23s., fourth; J. Henigan, Dorchester (Mass.) Club, 36m. 28s., fifth; J. Doherty, Dorchester (Mass.) Club, 36m. 37s., sixth; W. Rittler, Jr., Meadowbrook Club, Philadelphia, 36m. 38s., seventh; J. Phillips, Paulist A. C., 36m. 45s., eighth; F. A. Tobatan, Meadowbrook Club, Philadelphia, 36m. 57s., ninth; R. Dalrymple, Dorchester (Mass.) Club, 37m. 58s., tenth.

Team Scores—Finnish-American A. C., 42; Dorchester Club, 49; Meadowbrook Club, 51; Paulist A. C., 87; Millrose A. A., 96.

National A. A. U. junior cross-country championship, six miles, held at Van Cortlandt Park, New York, November 19. Order of finish, first ten runners: John Phillips, Paulist A. C., 36m. 35s., first; W. Rittler, Meadowbrook Club, Philadelphia, 36m. 44s., second; M. Rick, New York A. C., 36m. 51s., third; A. Studenroth, Meadowbrook Club, Philadelphia, 36m. 52s., fourth; A. Fager, Finnish-American A. C., 37m. 13s., fifth; G. Ramsay, Meadowbrook Club, Philadelphia, 37m. 16s., sixth; M. Dwyer, Mohawk A. C., 37m. 18s., seventh; F. Tobatan, Meadowbrook Club, Philadelphia, 37m. 24s., eighth; G. Caughey, Pittsburgh A. A., 37m. 27s., ninth; N. Erickson, Finnish-American A. C., 37m. 35s., tenth.

Team Scores—Meadowbrook Club, 21; Finnish-American A. C., 59; Mohawk A. C., 69; Knights of St. Anthony, 85; Cygnet A. C., 91.

National A. A. U. ten mile run and seven mile walk championships, held at New York, October 28. Results, 10 miles run: W. Ritola, Finnish-American A. C., 52m. 3 4-5s., first; R. Earl Johnson, Edgar Thomson Steel A. A., Pittsburgh, 54m. 17 2-5s., second; A. Michelson, Cygnet A. C., Port Chester, N. Y., 54m. 50s., third; M. J. Dwyer, Mohawk A. C., 57m. 10s., fourth; H. Parkinson, Morningside A. C., 58m. 1 1-5s., fifth; W. Kennedy, Cygnet A. C., Port Chester, N. Y., 58m. 16 2-5s., sixth; O. Phillipson, Pastime A. C., 58m. 24 2-5s., seventh.

Seven mile walk: W. Plant, Morningside A. C., 54m. 46 4-5s., first; J. Pearman, New York A. C., 55m. 6 3-5s., second; R. Remer, American Walkers' Association, 57m. 11 1-5s., third; C. Foster, Detroit Y. M. C. A., 57m. 37 1-5s., fourth; M. Greenberg, Pastime A. C., 58m. 33 4-5s., fifth.

A. A. U. fifteen mile walk, held at New York, November 12. Results: M. Greenberg, Pastime A. C., 2h. 16m. 24s., first; W. Martin, Pastime A. C., 2h. 22m. 55s., second; M. Krinsky, Pastime A. C., 2h. 24m. 7s., third; P. Anthony, Pastime A. C., 2h. 27m. 17 1-5s., fourth; W. Dunne, Walkers' Club, 2h. 37m. 19s., fifth; G. Brumlich, Pastime A. C., 2h. 38m. 32s., sixth.

Boston A. A. Marathon Race, twenty-five miles, held at Boston, April 19. Results, first ten to finish: C. De Mar, Melrose Highlands, Mass., 2h. 18m. 10s., first; W. Ritola, Finnish-American A. C., New York, 2h. 21m. 44 4-5s., second; A. Smoke, Peterboro A. A., Peterboro, Ont., 2h. 22m. 49 3-5s., third; W. Maculey, Windsor, N. S., 2h. 24m. 2 2-5s., fourth; W. Kyronen, Millrose A. A., New York, 2h. 24m. 42s., fifth; O. Laakso, Millrose A. A., New York, 2h. 24m. 45 3-5s., sixth; C. Linder, Boston A. A., Boston, 2h. 25m. 29 2-5s., seventh; F. Zuna, Paulist A. C., New York, 2h. 26m. 26s., eighth; H. Frick, Glencoe A. C., New York, 2h. 28m. 16 4-5s., ninth; E. Fabre, National A. C., Montreal, P. Q., 2h. 29m. 3-5s., tenth.

Brooklyn Sea Gate Fifteen Mile Marathon, held at Brooklyn, February 12. Results, first five to finish: W. Ritola, Finnish-American A. C., 1h. 25m. 2-5s., first; H. Parkinson, Morningside A. C., 1h. 28m. 27 2-5s., second; J. McNeil, Paulist A. C., 1h. 29m. 29 2-5s., third; W. Kennedy, unattached, 1h. 29m. 43s., fourth; F. Zuna, Paulist A. C., 1h. 30m. 39 4-5s., fifth.

American Legion Fourteen Mile Marathon, held

16-lb. hammer—139 ft. 6 1-2 in., P. Ryan, Celtic Park, L. I., Aug. 17, 1913.

## SHOT PUTTING.

16-lb. shot—51 ft., Ralph Rose, San Francisco, Aug. 21, 1909.

16-lb. shot, right and left hand, with toe board—91 ft. 10 1-2 in. (right hand, 50 ft. 6 in.; left hand, 41 ft. 4 1-2 in.), Ralph Rose, Oakland, Cal., June 2, 1912; right and left hand, without toe board—91 ft. 10 in. (right hand, 49 ft. 10 in.; left hand, 42 ft.), Ralph Rose, American League Park, New York City, June 12, 1912.

## DISTANCE RUNS AND WALKS.

at Philadelphia, June 10. Results, first five to finish: I. Prim, unattached, New York, 1h. 11m. 55s., first; A. Fager, unattached, New York, 1h. 17m. 27s., second; J. Gaughan, Morningside A. C., 1h. 18m. 7s., third; L. H. Hill, Meadowbrook Club, 1h. 18m. 20s., fourth; G. Williams, Shanahan C. C., 1h. 18m. 40s., fifth.

II Popolo Sixteen Mile Marathon, held at New York, October 12. Results, first five to finish: W. Ritola, Finnish-American A. C., 1h. 20m. 52s., first; A. Michelson, Cygnet A. C., Port Chester, N. Y., 1h. 22m. 35s., second; F. Titterton, Glencoe A. C., 1h. 23m. 56s., third; F. Zuna, unattached, 1h. 24m. 11s., fourth; M. Dwyer, Mohawk A. C., 1h. 25m. 7s., fifth.

Chicago Marathon, twenty miles, held February 22. Won by C. L. Mellor, time 1h. 58m. 47s.

Hamilton, Ont., Marathon, twenty miles, held November 6. Won by F. Zuna, time 1h. 51m. 16s.

International Cross-Country Race, held at London, England, April 2, distance ten miles. Won by J. Guillemot, France, time 1h. 3m. 59s.

France vs. England cross-country race, held at Paris, March 19. Won by France, 45; England, 44. Individual winner, G. Heuet, France.

International Intercollegiate Relay Race, held at London, April 8. Won by Cambridge University team; second, University of Pennsylvania; third, Oxford University. Times for four miles, each man to run one mile, Cambridge, 18m. 7 2-5s.; Pennsylvania, 18m. 20s.; Oxford, 18m. 23 3-5s. Time by miles: Cambridge—Mountain, 4m. 32s.; Tatham, 4m. 36s.; Seagrove, 4m. 32s.; Stallard, 4m. 27 2-5s. Pennsylvania—Herr, 4m. 36s.; Kerr, 4m. 36 2-5s.; McLane, 4m. 34s.; Brown, 4m. 31 1-5s. Oxford—Hewetson, 4m. 35s.; Weekley, 4m. 40s.; Brunner, 4m. 36s.; Milligan, 4m. 32s.

Annual I. C. A. A. A. Cross-Country Championships, held at Van Cortlandt Park, New York, November 27. Results, six-mile varsity race, first ten to finish: W. Higgins, Columbia, 32m. 21 4-5s., first; R. E. Hendrie, M. I. T., 32m. 32s., second; H. Smith, Syracuse, 32m. 43s., third; H. E. Dykeman, Carnegie, 32m. 46s., fourth; E. O. McLane, Pennsylvania, 33m. 5s., fifth; M. J. Douglas, Yale, 33m. 12s., sixth; J. G. Young, Dartmouth, 33m. 16s., seventh; R. A. Lutz, Harvard, 33m. 18s., eighth; M. Treadwell, Yale, 33m. 31s., ninth; E. M. Case, Syracuse, 33m. 33s., tenth.

## CENTRE OF NEGRO POPULATION, 1920.

The United States Department of Commerce announces that the centre of Negro population as determined by the Bureau of the Census on the basis of the fourteenth census enumeration, taken Jan. 1, 1920, is located in latitude 34°46'52" and longitude 85°30'48", being in the extreme north-western corner of Georgia, in Dade County, about 1½ miles north-northeast of Rising Fawn town, and that for the first time in the history of the country this centre has moved northeast, being approximately 9.4 miles further east and 19.4 miles further north in 1920 than it was in 1910.

Its former movements have all been in a south-westerly direction. In 1790 it was located 25 miles west-southwest of Petersburg, Dinwiddie County, Virginia, and one hundred years later, in 1890, it had moved southwest 463 miles to a point 15.7 miles

southwest of Lafayette, Walker County, Georgia, the same county in which it was located in 1880.

Between 1890 and 1900 it crossed the State line into Alabama, its location in 1900 and again in 1910 being in DeKalb County, Alabama. Its north-eastward movement after 1910 has brought it back to the State of Georgia.

The northeasterly movement of the centre of Negro population between 1910 and 1920 is due principally to the great increase in the Negro population of Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, West Virginia, Ohio, Indiana, and Michigan.

The total increase in the Negro population of the United States was 635,363 and it will be noted that the increase in the northern States mentioned was 56 per cent. of the total increase.

# Election Returns by States.

The 1922 Congressional Election Returns are to be found following Wyoming table.

## ALABAMA.

(Presidential vote, 1920, 1916.)

Governor (1922)—Davis, Dem., 271,658; Morgan, Rep., 252,602; Phillips, Soc., 9,138.

Davis, the new Governor, spoke in his campaign against the Industrial Court and promised a reduction of taxes.

Kansas, in 1922, voted for a Soldier Bonus.

## PAST VOTE OF KENTUCKY.

|                                                                                |                                                                                                          |

U. S. Senator (1922)—Reed, Dem., 506,264; Brewster, Rep., 462,009.

The Anti-Saloon League and other "dry" opposed Reed. Both Reed and Brewster attacked the Ku Klux Klan. The vote in St. Louis was: Reed, 104,680; Brewster, 60,878. Reed's total plurality in the State was 44,556, of which 43,802 was given to him in St. Louis. Every other large city in Missouri voted against him.

**PAST VOTE OF MISSOURI.**

## THE 1922 VOTE FOR OTHER STATE OFFICERS.

**Lieutenant Governor**—Lunn, Dem., 1,244,036; Donovan, Rep., 1,070,975; Wiley, Soc., Farm-Lab., 117,269; Ramsdell, Proh., 20,195; DeLee, Soc. Lab., 5,539.

**Secretary of State**—Hamilton, Dem., 1,205,736; Joseph, Rep., 1,062,921; Randolph, Soc., Farm-Lab., 129,461; Estelle, Proh., 24,776; Phalar, Soc. Lab., 3,628.

**State Comptroller**—Fleming, Dem., 1,191,894; Maler, Rep., 1,066,871; Sheahan, Soc., Farm-Lab., 132,739; Dean, Proh., 21,611; Donohue, Soc. Lab., 7,078.

**State Treasurer**—Shuler, Dem., 1,174,218; Marshall, Rep., 1,084,405; Berman, Soc., Farm-Lab., 132,176; Pierson, Proh., 21,256; Archer, Soc. Lab., 5,959.

**Attorney General**—Sherman, Dem., 1,192,468; Rogers, Rep., 1,064,223; Wilcox, Soc., Farm-Lab., 130,286; Baldwin, Proh., 23,015; Ensign, Soc. Lab., 5,963.

**State Engineer and Surveyor**—La Du, Dem., 1,077,314; Cadle, Rep., 1,009,582; Steinmetz, Soc., Farm-Lab., 291,763; Passage, Proh., 19,852; Bickweat, Soc. Lab., 5,131.

## VOTE ON CONSTITUTIONAL AMENDMENTS, 1922.

New York State voters (1922) rejected the proposed Constitutional amendment, designed to increase the salaries of the Judges of the Court of Appeals, by 891,980 and 572,502.

By a vote of 819,628 to 554,654 approval was given to the amendment relating to the return of city bills to the Legislature. Under the amendment Mayors of cities are required to return special city bills to the clerk of the House from which they

were sent. If the Legislature is not in session, the clerk, and not the Mayor, shall immediately transmit the bills to the Governor.

Approximately 1,000,000 registered voters failed to express themselves on the proposed amendments. The proposed amendment increasing the salaries of Court of Appeals Judges was carried in only two counties, New York and Nassau. The amendment relating to the return of city bills was defeated in twenty-five counties, thirteen of which have cities.

## REGISTRATION IN NEW YORK STATE, 1922-1920.

The registration by counties in three years was as follows:

| COUNTIES.        | 1922.   | 1921.   | 1920.   | COUNTIES.         | 1922.     | 1921.     | 1920.     |

Governor (1922)—Pierce, Dem., 133,392; Olcott, Rep., 99,155.

Oregon voters, in 1922, adopted the initiative measure known as the Compulsory School Bill. The bill, sponsored originally by the Scottish Rite Masons, was taken up by the Ku Klux Klan as its main issue. It is said the bill will close parochial schools. The purpose of the bill was stated on the official ballot as follows:

"Requiring any parent or guardian or other person having control, charge or custody of a child

over eight and under sixteen years of age, from and after Sept. 1, 1926, to send such child to a public school during the entire school year, excepting (a) children physically unable; (b) children who have completed the eighth grade; (c) children between the ages of eight and ten living more than three miles from a public school, except where transportation is furnished; (d) children taught by parent or private teacher."

10. Frear, Rep., 29,781; Swenson, Soc., 444.
11. Peavy, Rep., 36,636; unopposed.

## WYOMING.

- At Large—Winter, Rep., 30,885; Rose, Dem., 27,017;
- Hastings, Soc., 857.

**SUMMARY OF ELECTORAL VOTE SINCE 1789.**

1789. Previous to 1804, each electo voted for two candidates for President. The one who received the largest number of votes was declared President, and the one who received the next largest number of votes was declared Vice-President. The electoral votes for the first President of the United States were: George Washington, 69; John Adams, of Massachusetts, 34; John Jay, of New York, 9; R. H. Harrison, of Maryland, 6; John Rutledge, of South Carolina, 6; John Hancock, of Massachusetts, 4; George Clinton, of New York, 3; Samuel Huntington, of Connecticut, 2; John Milton, of Georgia, 2; James Armstrong, of Georgia; Benjamin Lincoln, of Massachusetts, and Edward Telfair, of Georgia, 1 vote each. Vacancies (votes not cast), 4. George Washington was chosen President and John Adams Vice-President.

1792. George Washington, Federalist, received 132 votes; John Adams, Federalist, 77; George Clinton, of New York, Republican, 5; Thomas Jefferson, of Virginia, Republican, 4; Aaron Burr, of New York, Republican, 1 vote. Vacancies, 3. George Washington was chosen President and John Adams Vice-President.

1796. John Adams, Federalist, 71; Thomas Jefferson, Republican, 68; Thomas Pinckney, of South Carolina, Federalist, 59; Aaron Burr, of New York, Republican, 30; Samuel Adams, of Massachusetts, Republican, 15; Oliver Ellsworth, of Connecticut, Independent, 11; George Clinton, of New York, Republican, 7; John Jay, of New York, Federalist, 5; James Iredell, of North Carolina, Federalist, 3; George Washington, of Virginia; John Henry, of Maryland, and S. Johnson, of North Carolina, all Federalists, 2 votes each; Charles Cotesworth Pinckney, of South Carolina, Federalist, 1 vote. John Adams was chosen President and Thomas Jefferson Vice-President.

1800. Thomas Jefferson, Republican, 73; Aaron Burr, Republican, 73; John Adams, Federalist, 65; Charles C. Pinckney, Federalist, 64; John Jay, Federalist, 1 vote. There being a tie vote for Jefferson and Burr, the choice devolved upon the House of Representatives. Jefferson received the votes of ten States, which, being the larger vote cast for a candidate, elected him President. Burr received the votes of four States, which, being the next largest vote, elected him Vice-President. There were 2 blank votes.

1804. The Constitution of the United States having been amended, the electors at this election voted for a President and a Vice-President, instead of for two candidates for President. The result was as follows: For President, Thomas Jefferson, Republican, 162; Charles C. Pinckney, Federalist, 14. For Vice-President, George Clinton, Republican, 162; Rufus King, of New York, Federalist, 14. Jefferson was chosen President and Clinton Vice-President.

1808. For President, James Madison, of Virginia, Republican, 22; Charles C. Pinckney, of South Carolina, Federalist, 47; George Clinton, of New York, Republican, 6. For Vice-President, George Clinton, Republican, 113; Rufus King, of New York, Federalist, 47; John Langdon, of New Hampshire, 9; James Madison, 3; James Monroe, 3. Vacancy, 1. Madison was chosen President and Clinton Vice-President.

1812. For President, James Madison, Republican, 128; De Witt Clinton, of New York, Federalist, 89. For Vice-President, Elbridge Gerry, Republican, of Massachusetts, 131; Jared Ingersoll, of Pennsylvania, Federalist, 86. Vacancy, 1. Madison was chosen President and Gerry Vice-President.

1816. For President, James Monroe, of Virginia, Republican, 183; Rufus King, of New York, Federalist, 34. For Vice-President, Daniel D. Tompkins,

of New York, Republican, 183; John Eager Howard, of Maryland, Federalist, 22; James Ross, of Pennsylvania, 5; John Marshall, of Virginia, 4; Robert G. Harper, of Maryland, 3. Vacancies, 4. Monroe was chosen President and Tompkins Vice-President.

1820. For President, James Monroe, of Virginia, Republican, 231; John Q. Adams, of Massachusetts, Republican, 1. For Vice-President, Daniel D. Tompkins, Republican, 218; Richard Stockton, of New Jersey, 5; Daniel Rodney, of Delaware, 4; Robert G. Harper, of Maryland, and Richard Rush, of Pennsylvania, 1 vote each. Vacancies, 3. James Monroe was chosen President and Daniel D. Tompkins Vice-President.

1824. For President, Andrew Jackson, of Tennessee, Republican, 99; John Quincy Adams, of Massachusetts, Republican, 84; Henry Clay, of Kentucky, Republican, 37; William H. Crawford, of Georgia, Republican, 41. For Vice-President, John C. Calhoun, of South Carolina, Republican, 182; Nathan Sanford, of New York, Republican, 30; Nathaniel Macon, of North Carolina, Republican, 24; Andrew Jackson, of Tennessee, Republican, 13; Martin Van Buren, of New York, Republican, 9; Henry Clay, of Kentucky, Republican, 23; Calhoun was chosen Vice-President.

*There was no choice in the Electoral College in 1824 for President, and the election was thrown into the House of Representatives, which chose John Quincy Adams for President, he receiving 87 votes, as against 71 for Jackson, and 64 for Crawford.*

1828. For President, Andrew Jackson, of Tennessee, Democrat, 178; John Quincy Adams, of Massachusetts, National Republican, 83. For Vice-President, John C. Calhoun, of South Carolina, Democrat 171; Richard Rush, of Pennsylvania, National Republican, 83; William Smith, of South Carolina, Democrat, 7.

1832. For President, Andrew Jackson, of Tennessee, Democrat, 219; Henry Clay, of Kentucky, National Republican, 49; John Floyd, of Georgia, Independent, 11; William Wirt, of Maryland, Anti-Mason, 7. For Vice-President, Martin Van Buren, of New York, Democrat, 189; John Sergeant, of Pennsylvania, National Republican, 49; Henry Lee, of Massachusetts, Independent, 11; Amos Fillmaker, of Pennsylvania, Anti-Mason, 7; William Wilkins, of Pennsylvania, Democrat, 30.

1836. For President, Martin Van Buren, of New York, Democrat, 170; Wm. Henry Harrison, of Ohio, Whig, 73; Hugh L. White, of Tennessee, Whig, 26; Daniel Webster, of Massachusetts, Whig, 14; Willie P. Mangum, of North Carolina, Whig, 11. For Vice-President, Richard M. Johnson, of Kentucky, Democrat, 147; F. Granger, of New York, Whig, 77; John Tyler, of Virginia, Whig, 47; William Smith, of Alabama, Democrat, 23.

1840. For President, William Henry Harrison, of Ohio, Whig, 234; Martin Van Buren, of New York, Democrat, 60. For Vice-President, John Tyler, of Virginia, Whig, 234; Richard M. Johnson, of Kentucky, Democrat, 48; Littleton W. Tazewell, of Virginia, Democrat, 11; James K. Polk, of Tennessee, Democrat, 1.

1844. For President, J. K. Polk, of Tennessee, Democrat, 170; H. Clay, of Kentucky, Whig, 105. For Vice-President, G. M. Dallas, of Pennsylvania, Democrat, 170; T. Frelinghuysen, of New Jersey, Whig, 105.

1848. For President, Zachary Taylor, of Louisiana, Whig, 163; Lewis Cass, of Michigan, Democrat, 127. For Vice-President, Millard Fillmore, of New York, Whig, 163; William O. Butler, of Kentucky, Democrat, 127.

1852. For President, Franklin Pierce, of New Hampshire, Democrat, 254; Winfield Scott, of New Jersey, Whig, 42. For Vice-President, W. R. King, Ala., Dem., 254; W. A. Graham, N. Car., Whig, 42.

| 1st. 1789-1791  | 24           | 53     | 2            | 12     | Washington. | In Colonial and Revolutionary Days the Americans were either Whigs (Liberals), or Tories (Conservatives). John Adams called it a division between the Court party and the Country party. There was, however, no party organization, and the Colonists were mostly Whigs. The rulers sent from England were the Tories. In the Revolution, the people were divided between Patriots (Whigs), and Loyalists (Tories). Immediately after the Revolution, the people became either Nationalists (Republicans), or Federalists, according as they favored States' rights, or a strongly centralized government. The Federalists were stronger in the big States, such as Va., Pa., and Mass. The Republicans also were called Democrats, or Democratic-Republicans. |

| 21st. 1829-1831 | 38         | 142    | 10      | 71     | Jackson.         | The Whig party at first included National Republicans, Nullifiers, Anti-Masons, and Federalists. It finally went to pieces, as a party, on the slavery issue, and its last Presidential candidate was Gen. Scott, in 1852, who carried but four States—Mass., Vt., Ky., and Tenn. The Democratic party gradually absorbed the various pro-Slavery and States' rights elements. In the 25th Congress there were 5 Independents in the Senate and 13 in the House; in the 26th, 2 in the Senate and 6 in the House; in the 30th, 4 in the House. In the 29th Congress there were 6 Native Americans in the House as Independents. |

## PARTY STRENGTH IN EARLY CONGRESSES.

The figures as to party strength in the First to the Twentieth, and also in the Twenty-first to the Thirty-first Congresses are slightly at variance as between different political authorities. The data in the table above are as nearly correct as possible.

## APPORTIONMENT OF CONGRESSIONAL REPRESENTATION.

(Ratios under the Constitution and at each census, 1790 to 1910, by States. Source: Reports of the Bureau of the Census, Department of Commerce.)

## NOTES ON THE ABOVE TABLE.

Since the taking of the Census of 1920 there have been several efforts in the House of Representatives to legislate toward an increase in membership, based on the growth of population. Up to the end of 1922 none of these efforts had succeeded. The chief objection to enlarging the House is that it would make that body too large and cumbersome.

Membership of House under census of 1850 was increased from 233 to 234 by act of July 30, 1852; membership under census of 1860 was increased from 233 to 241 by act of March 4, 1862; membership under census of 1870 was originally fixed at 233, but increased to 292 by act of May 30, 1872.

Representation such as shown in table was assigned after apportionment under censuses, as follows: (1790) Tenn.; (1800) Ohio; (1810) Ala., Del., Ind., La., Miss.; (1830) Ark., Mich.; (1840) Cal., Fla., Iowa, Texas, Wis.; (1850) Minn., Ore.; (1860) Neb., Nev.; (1870) Col.; (1880) Idaho, Mont., S. D., N. D., Wash., Wyo.; (1890) Utah; (1900) Okla.

Ariz. and N. Mex. were included in apportion-

ment under 1910 census, in anticipation of becoming States.

Maine's apportionment of seven members under 1810 census was included in the 20 members originally assigned to Mass. but credited to Maine after it became a State, March 15, 1820.

The ratio under the Constitution was one Representative in Congress for each 30,000 of population. Thereafter, the ratios, as determined by the decennial censuses, were as follows: 1790 and 1800, one to each 33,000; 1810, one in each 35,000; 1820, one in each 40,000; 1830, one in each 47,700; 1840, one in each 70,680; 1850, one in each 93,423; 1860, one in each 127,381; 1870, one in each 131,425; 1880, one in each 151,911; 1890, one in each 173,901; 1900, one in each 194,182; 1910, one in each 211,877.

Of the thirteen Original States the present quotas are the same as under the Constitution in Connecticut, Delaware, Maryland, and Virginia. The original quotas in the other Original States were as follows: Georgia, 3; Massachusetts, 8; New Hampshire, 3; New Jersey, 4; New York, 6; North Carolina, 5; Pennsylvania, 8; Rhode Island, 1; and South Carolina, 5.

## PAST POLITICAL COMPLEXION OF THE STATES (1828-1920).

R, Republican; W, Whig; D, Democratic; U, Union; A, American; A. M., Anti-Mason; N. R., National Republican; P, Populist; Pr., Progressive.

# SWEENEY SCHOOL

Now, I will guarantee a real job to qualified Sweeney graduates. Learn the auto and tractor business. Learn a trade. Eight weeks course leads to employment. Free railway fare to Kansas City. Wonderful offer to you from world famous Million-Dollar trade school. **FREE RADIO COURSE**

Young man, the only difference between a rut and the grave is that the grave is deeper. I say, get out of the rut. Do the work you like. Be independent. Learn a trade. Be a mechanic. Get into the auto business. You can earn big money. You can travel and see the world.

I have helped 50,000 men to success. This Million-Dollar trade school is the greatest success factory you ever saw. The way to learn is easy. You don't need any experience. I teach with tools not books. You learn your trade by actually doing the work.

You have a right to make a success of your life. Make a start now. I'd like to

show you what thousands of men just in your position have done as a result of the Sweeney system of practical instruction. It's a shame for you to stick in a rut or work at jobs you don't really like.

Ask any Sweeney man. They are in good positions all over the country. Repairing and selling autos. Driving cars and trucks. Mechanics. Running garages, tire shops, battery shops. Welders. Handling radio supplies.

Learning is a real pleasure in the Sweeney School. World's finest equipment. Fine associates. Healthful surroundings. Entertainment after working hours. Instructors who take personal interest in you. Free radio course. Big radio broadcasting station.

I am now paying your railroad fare to Kansas City and giving a free radio course. No extras. No books. You are sure of getting a job when you graduate. I can't tell it all here, but send for my big catalog. Investigate this real opportunity.

**FREE** Simply send name to-day for my big 72-page catalog. Shows hundreds of pictures of men at work in the school. Tells all about wages, profits, opportunities in auto and tractor business. Explains step by step how you learn. Interesting letters from graduates telling how they made good. Shows how men come from all over the world to this big school. Makes you want to join the crowd. Tells everything you want to know about, including all the new radio details. Includes contract for employment. No cost, no obligation. Clip the coupon or a postcard will do. Get the catalog now—that's the first step. Don't put it off one minute. No colored students accepted.

## Well Drilling With a Fordson Tractor Driven Cyclone Drill An Economical, Quick-Moving Outfit

**T**HE Cyclone well drill using the versatile Fordson tractor as the power unit makes a self-propelled or traction well drill outfit of very low original cost and even lower proportionate upkeep.

Some of the advantages of such an outfit are: (1) Cost is 1-4 to 1-3 that of a self-contained traction well drill; (2) can be moved at eight to ten miles per hour (about four times the moving speed of a self-contained traction drill); (3) Fordson dealer service throughout the world available for the tractor or power unit; (4) kerosene used for fuel—\$1.00 to \$1.25 is the fuel cost; (5) ample power always available for drilling and moving; (6) when the well drill is not busy the tractor can be used for other purposes, such as hauling, plowing, threshing, etc.

No business offers greater money-making possibilities in proportion to capital invested than does well drilling. It is a healthful, outdoor occupation, extremely profitable either on a full-time or part-time basis.

The Fordson tractor driven Cyclone drill is a specially designed machine for this work, not merely a well drill without power. Machines may be had in three sizes in capacities for depths up to 600 feet.

Write for our circular, "Drilling Dollars With a Fordson Tractor and a Cyclone Well Drill," or ask your local Ford dealer for a copy.

## THE SANDERSON-CYCLONE DRILL CO.

203 Market Street,

ORRVILLE, OHIO

We also build a full line of self-contained gasoline and steam power, traction and non-traction well drills and drilling tools.

## Crooked Spines Straightened!

NO matter how old you are; no matter what caused your affliction; no matter how many years you have suffered or how hopeless you believe your case to be, there is hope for you in the Philo Burt Method.

Eminent specialists who have studied and treated spinal diseases and deformities for years are first astonished, then convinced and quickly become enthusiastic upon finding one success follow another when the Philo Burt Method is used. Ask us for the names of happy patrons right in your vicinity.

A young woman who was bed-ridden at 26 with spinal tuberculosis after suffering for 20 years, is married, happy and perfectly strong and vigorous at 29.

A boy of 8 was unable to walk or hold his head erect. After a few months every symptom disappeared and he walks daily three miles to school.

A man of 45, in cruel agony for six years, spent over \$3,000 in a vain search for relief. Now works every day without the aid of any artificial support.

### FREE—30 Days' Trial

The Philo Burt Method is new and different, not like anything you have tried. It has benefited or cured over 30,000 sufferers from spinal trouble caused by tuberculosis, Pott's disease, infantile paralysis, spinal meningitis, pleurisy, rheumatism, injuries, wrong sitting and standing postures, etc. Treat yourself at home. A 30-days' trial costs you nothing; no obligations of any kind if it fails.

The Philo Burt Appliance will positively cure any case that is curable and straighten any crooked spine that can be straightened. It gives firmer and more natural support to the spine than any torturing, unsanitary, old style brace made of steel, iron, leather, plaster of paris, etc. It is as yielding, soft and comfortable as a corset. Goes on and off like a coat and cannot be detected under the clothing. It relieves and strengthens and has accomplished many amazing cures. Let us send you sworn proof. Send no money. Simply describe your case fully. Get our liberal offer and helpful book on spinal troubles absolutely free.

# ELECTRICITY

Needs You to Boss  
Jobs Like This

Earn  
\$3,500  
to  
\$10,000  
a Year

## BE A CERTIFIED ELECTRICAL EXPERT

It's a shame for you to earn less than \$100.00 a week when trained Electrical Experts are in such great demand. You ought to get more. You can get more.

Cooke Trained "Electrical Experts" earn \$70 to \$230 a week. Fit yourself for one of these big paying positions. Get into a line of work where there are hundreds and hundreds of opportunities for advancement and a big success.

**What's Your Future?** Today even the ordinary Electrician—the "screw driver" kind—is making money—big money. But it's the trained man—the man who knows the whys and wherefores of Electricity—the "Electrical Expert" who is picked out to "boss" ordinary Electricians—to boss the Big Jobs—the jobs that pay up to \$10,000 a year.

**AGE OR LACK OF EXPERIENCE NO DRAWBACK**  
You don't have to be a College Man; you don't have to be a High School graduate. My Course in Electricity is the most simple, thorough and successful in existence, and offers every man, regardless of age, education or previous experience, the chance to become, in a very short time, an "Electrical Expert," able to make from \$70 to \$200 a week.

**I Give You a Real Training**  
As Chief Engineer of the Chicago Engineering Works I know exactly the kind of training a man needs to get the best positions at the highest salaries. Hundreds of my students are now earning \$3,500 to \$10,000. Many are now successful ELECTRICAL CONTRACTORS.

**YOUR SATISFACTION GUARANTEED**  
So sure am I that you can learn Electricity—so sure am I that after studying with me, you, too, can get into the "big money" class in electrical work, that I will guarantee under bond to return every single penny paid to me in tuition if, when you have finished my course, you are not satisfied it was the best investment you ever made.

**FREE—Electrical Working Outfit—FREE**  
I give each student a Splendid Outfit of Electrical Tools, Materials and Measuring Instruments absolutely FREE. I also supply them with Drawing Outfit, examination paper, and many other things that other schools do not furnish. You do PRACTICAL work AT HOME. You start right in after the first few lessons to work at your profession in a practical way—make extra money while you learn. **GET STARTED NOW—MAIL COUPON—I** want to send you an Electrical Book and Proof Lessons, both FREE. These cost you nothing and you'll enjoy them. Make the start today for a bright future in Electricity. Send the coupon—NOW.

# Is Your English a Handicap? This Test Will Tell You

THOUSANDS of people make little mistakes in their everyday English and don't know it. As a result of countless tests, Sherwin Cody found that the average person is only 61% efficient in the vital points of English. In a five-minute conversation, or in an average one-page letter, five to fifty errors will appear. Try the test shown below, now. See where you stand on these 30 simple questions.

## Try This Test Now

Correct answers shown in panel at the right.

### 1. Would You Write—

|                        |                             |
|------------------------|-----------------------------|
| Between you and I      | or Between you and ME       |
| I HOPE it would come   | or I WISH it would come     |
| WHO shall I call       | or WHOM shall I call        |
| It's just AS I said    | or It's just LIKE I said    |
| How MANY are there     | or How MUCH are there       |
| I WOULD like to go     | or I SHOULD like to go      |
| The FIRST TWO lessons  | or The TWO FIRST lessons    |
| He sat AMONG the three | or He sat BETWEEN the three |
| The wind blows COLD    | or The wind blows COLDLY    |
| You will FIND ONLY one | or You will ONLY FIND one   |

### 2. How Do You Say—

|             |                   |                   |
|-------------|-------------------|-------------------|
| evening     | EV-en-ing         | or EVE-ning       |
| ascertain   | AS-cer-tain       | or as-CER-tain    |
| hospitable  | HOS-pl-ta-ble     | or hos-PIT-able   |
| abdomen     | AB-do-men         | or ab-DO-men      |
| mayoralty   | MAY-or-al-ty      | or may-OR-al-ty   |
| an-nable    | a-ME-na-ble       | or a-MEN-able     |
| acclimate   | AC-cl-mate        | or ac-OLI-mate    |
| profound    | PRO-found         | or pro-FOUND      |
| beneficiary | ben-e-fi-shEE-ary | or ben-e-FISH-ary |
| culinary    | CUL-lina-ry       | or CU-li-na-ry    |

### 3. Do You Spell It—

|           |              |             |               |
|-----------|--------------|-------------|---------------|
| superCede | or superSede | repEtition  | or repItition |
| reCtIve   | or reeIve    | seParate    | or sepErate   |
| reprEtive | or reprEve   | aCoModate   | or aCComodate |
| donkEYE   | or donkIES   | traFFicking | or traCCkcing |
| factoRIES | or factoYs   | aOSeSible   | or aCCeSSible |

## New Invention Improves Your English in 15 Minutes a Day

Mr. Cody has specialized in English for the past twenty years. His wonderful self-correcting device is simple, fascinating, time-saving, and incomparably efficient. You can write the answers to 50 questions in 15 minutes and correct your work in 5 minutes more. You waste no time in going over the things you already know. Your efforts are automatically concentrated on the mistakes you are in the habit of making, and through constantly being shown the right way you soon acquire the correct habit in place of the incorrect habit. There is no tedious copying. There is no heart-breaking drudgery.

## FREE—Book on English

use the wrong word, when you mispronounce a word, when you misspell a word, when you punctuate incorrectly, flat, ordinary words you handicap yourself. Write for our new book, "How to Speak and Write Masterly English." Merely mail the coupon, and it will be sent by return mail. Learn how Sherwin Cody's new invention makes it easy to gain command of language in 15 minutes a day. Mail this coupon or a postal AT ONCE.

# STANDARD Reference Work

For years you've wanted an encyclopedia—but put it off because you felt the price was prohibitive. But now you can get the famous Standard Reference Work—the Encyclopedia you've always wanted—at an amazingly low price you can easily afford.

This is your opportunity to have what you have always wanted—a real encyclopedia. You can now have the facts you want about World History, about Biography, Science, Invention, Exploration, Literature, Art, Industry, Astronomy, and every other subject. And how many, many times you have wanted specific facts quickly! In preparing a club paper, or a business report, or in looking up a reference made in any book, magazine or newspaper, in tracing down any mentioned point, in making yourself an information-mine of facts that will put you ahead—that is the help that the Standard Reference Work offers you.

The Standard Reference Work is written unlike the ordinary encyclopedia. Every page grips the attention. Profusely illustrated and indexed, and bound in rich maroon Levant binding. Over 200 authorities are its authors and editors.

## COUPON BRINGS FREE LITERATURE

Mail this coupon and let us send you the interesting free literature which describes the Standard Reference Work in detail and tells you how you may purchase it on this special offer, and on small monthly payments that you will never miss. With the Loose-leaf Extension Service you receive unlimited service of our Research Bureau, which assembles for you any facts you want on any subject, without charge. To many this service in itself has been worth the complete price of the Encyclopedia. This coupon brings you full information about the Stand-
